"Whereas, The federal government through many years of deficit spending has incurred a national debt of astronomical and dangerous proportions; the gross national debt is currently estimated to be almost $800 billion, over twice the figure for 1962 and about 40 percent of the nation's gross national product; and

"Whereas, Statutorily imposed 'permanent' debt ceilings repeatedly raised by Congress, have proved to be no impediment to the monstrous growth of the national debt; this disgraceful legacy for future generations has swollen by $177 billion over the past three years and has fostered an interest payment of $50 billion for this year; and

"Whereas, Persistent deficit financing is a major factor contributing to income-robbing inflation, high interest rates, and an unstable, unpredictable economy, and results in the funding of government programs of questionable benefit and need; and

"Whereas, Texas' enviable financial position among state governments is largely due to its 'pay-as-you-go' constitutional provision restricting deficit spending by the legislature; and

"Whereas, During the 1977 regular session, this legislature adopted House Concurrent Resolution No. 31 memorializing congress to initiate a constitutional amendment that would similarly prevent deficit spending and therefore halt the growth of the national debt, the greatest threat to this nation's future well-being; now, therefore, be it

"*Resolved by the House of Representatives of the State of Texas, the Senate concurring*, That the 65th Legislature, 2nd Called Session, hereby reaffirm the provisions of House Concurrent Resolution No. 31 calling for an amendment to the United States Constitution requiring a balanced annual federal budget and hereby request the Texas congressional delegation to sponsor this vital amendment; and, be it further

"*Resolved*, That this amendment require the achievement of a balanced budget within a reasonable period after adoption and establish a procedure for amortizing the national debt; and, be it further

"*Resolved*, That the Governor of Texas be hereby requested to actively seek the

sponsorship of the amendment by the Texas congressional delegation and to use the financial resources of his office to promote support for the amendment; and, be it further

"Resolved, That the governor, the lieutenant governor, and speaker of the house be hereby requested to contact government leaders of other states to solicit and encourage support for the amendment; and, be it further

"Resolved, That the lieutenant governor and speaker of the house be authorized to designate separate or joint committees or individual legislators to represent them and the state in this endeavor and that reasonable expenses incurred by them or their designees in efforts to initiate the amendment be paid from the contingent expense fund of the appropriate house; and, be it further

"Resolved, That official copies of this resolution be prepared and forwarded to the President of the United States, to the President of the Senate and the Speaker of the House of Representatives of the United States Congress, and to all members of the Texas delegation to the congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America."

ORDER FOR STAR PRINT—S. 2236

Mr. BAYH. Mr. President, I ask unanimous consent that we have a star print made of S. 2236, relative to international terrorism, so that we may make technical changes in the Intelligence Committee's amendments on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CHILES, from the Committee on Governmenal Affairs and the Committee on the Judiciary, jointly, with an amendment:

S. 3178. A bill to provide for the resolution of claims and disputes relating to Government contracts awarded by executive agencies (Rept. No. 95–1118).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Nicholas A. Veliotes, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States to the Hashemite Kingdom of Jordan.

(The above nomination from the Committee on Foreign Relations was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

POLITICAL CONTRIBUTIONS STATEMENT

Nominee: Nicholas A. Veliotes.

Post: Amman, Jordan.

Nominated: June 26, 1978.

Contributions, amount, date and donee:

1. Self: $25.00, March 1974, Doug Bennett for Congress Committee; $25.00, February 1976, Citizens with Celeste; $25.00, March 1976, Jack Calkins Congressional Committee; and, $25.00, February 1977, Citizens with Celeste.

2. Spouse: $25.00, March 1974, Doug Bennett for Congress Committee; $25.00, February 1976, Citizens with Celeste; and, $25.00, March 1976, Jack Calkins Congressional Committee.

3. Children and Spouses: Christopher, none; Michael, none.

4. Parents: Irene Zoobrick (mother), none. Loucille Horrom (mother-in-law), $5.00, summer of 1976, Local Democratic Campaign Committee.

5. Grandparents: None.

6. Brothers and Spouses: John Otis, none; Phyliss Otis, none.

7. Sisters and Spouses: Dorothy Chessari, none; John Chessari, none.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

By Mr. SPARKMAN, from the Committee on Foreign Relations:

James David Isbister, of Maryland, to be an Associate Director of the International Communication Agency.

Harold F. Schneidman, of Pennsylvania, to be an Associate Director of the International Communication Agency.

(The above nominations from the Committee on Foreign Relations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. NELSON:

S. 3410. A bill to amend the Internal Revenue Code of 1954 to provide an exclusion from gross income of the first $1,500 of net capital gains; to the Committee on Finance.

By Mr. GLENN:

S. 3411. A bill to provide for the employment and compensation of employees of the General Accounting Office without regard to certain provisions of title 5, United States Code, and for other purposes; to the Committee on Governmental Affairs.

S. 3412. A bill to provide for cost-of-living adjustments in the annuity of a retired Comptroller General, and for other purposes; to the Committee on Governmental Affairs.

By Mr. THURMOND:

S. 3413. A bill for the relief of Emi Ohta; to the Committee on the Judiciary.

By Mr. WALLOP (for himself, Mr. YOUNG, Mr. CHAFEE, Mr. EASTLAND, Mr. CULVER, Mr. SCOTT, Mr. HODGES, Mr. FORD, Mr. ANDERSON, Mr. MORGAN, Mr. CURTIS, Mr. HATCH, and Mr. DOLE):

S. 3414. A bill to amend the Internal Revenue Code of 1954 to provide that nonresident aliens are taxable on gain from the sale or exchange of farming property and undeveloped real property at capital gains rates; to the Committee on Finance.

By Mr. PACKWOOD:

S. 3415. A bill for the relief of George D'Souza; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. NELSON:

S. 3410. A bill to amend the Internal Revenue Code of 1954 to provide an exclusion from gross income of the first $1,500 of net capital gains; to the Committee on Finance.

CAPITAL GAINS EXCLUSION

● Mr. NELSON. Mr. President, last week by an overwhelming vote of 362 to 49 the House passed H.R. 13511, the Revenue Act of 1978. The House bill includes provisions which would reduce taxes on capital gains. The House bill would repeal the alternative tax on capital gains of individuals and remove capital gains from the list of tax preference items for purposes of applying the minimum and maximum tax. Thus, under the House bill the rate of tax on capital gains would be reduced from a maximum of 49.125 percent to 35 percent.

In the Senate, over 60 Senators have cosponsored similar legislation, S. 3065. The Senate version would reduce the maximum rate of tax on capital gains to 25 percent. Obviously, the Congress intends to pass some form of capital gains tax relief this year.

However, under both the House and Senate bills, over 90 percent of the tax relief benefits go to taxpayers with adjusted gross incomes of over $50,000. This group comprises less than 2 percent of the total number of taxpayers in this Nation.

Mr. President, today I am introducing an alternative capital gains tax relief bill which is far more equitable to the average middle-income taxpayer as well as all taxpayers, than any other proposal for capital gains tax reduction that has been advanced so far.

This proposal targets a major portion (over 72 percent) of its relief to taxpayers with adjusted gross incomes of less than $50,000, a group which comprises over 98 percent of the Nation's taxpayers. Under the proposal, a single taxpayer would be entitled to exclude the first $1,500 of capital gains from income. A married taxpayer filing a joint return would be entitled to a $3,000 exclusion. Moreover, this proposal will not add complexity to our present tax system since it does not affect the rate of tax, present exclusion or minimum/maximum tax. It merely provides that an individual will take an initial capital gains exclusion equal to a maximum of $1,500 ($3,000 in the case of a joint return).

Unlike the House bill, however, this proposal offers the average taxpayer a substantial tax benefit. The table below compares the House bill with my proposal:

NELSON CAPITAL GAINS TAX RELIEF BILL[1]

Adjusted gross income	Total individuals with a tax decrease		Percent distribution of tax benefits	
	House[2]	Nelson	House	Nelson
Up to $5,000	700	49,100	0.1	0.1
$5'000 to $10,000	0	539,200	0	4.2
$10,000 to $15,000	0	566,700	0	7.5
$15,000 to $20,000	10,500	681,700	.2	11.0
$20,000 to $30,000	29,200	985,900	.8	22.4
$30,000 to $50,000	98,600	867,200	5.5	27.0
$50,000 to $100,000	123,600	424,700	19.4	20.6
$100,000 to $200,000	43,000	105,800	17.3	5.1
$200,000 or more	21,500	33,700	56.5	2.0
Total	327,200	4,253,800	100.0	100.0

[1] Revenue estimates provided by the Joint Committee on Taxation.

[2] Under the House bill, the maximum capital gains tax rate is cut to 35 percent, which overwhelmingly affects the taxes paid by upper income taxpayers. However, it is possible that these taxpayers can shelter most, if not all, of their adjusted gross income, but have substantial capital gains, With the imposition of a minimum tax of 10 percent on capital gains, these people would appear as lower income taxpayers in the chart.

REVENUE ESTIMATE

	House	Nelson
1978	953,000,000	863,000,000
1979	1,050,000,000	949,000,000

As the chart dramatically discloses, the House bill would benefit only some 327,000 individuals; whereas, this proposal would benefit over 4 million individuals. At a time when millions of middle-income taxpayers are revolting against regressive and inequitable taxation, we cannot in due conscience provide greater tax relief for the wealthy at the further expense of the middle class. Under the proposal, over 72 percent of the total tax benefits would go to taxpayers earning less than $50,000. Moreover, over 49 percent of the benefits would go to taxpayers in the $20,000 to $50,000 bracket. The House bill, however, concentrates over 93 percent of the benefits to the income class of over $50,000 and 74 percent over $100,000. Under the House proposal, the average individual would receive virtually no capital gains tax relief. This bill affords even the small investor with less than $20,000 in adjusted gross income over 22 percent of the tax benefits. The wealthy few, however, would not receive a disproportinate share of the tax benefits.

If Congress is going to have a responsible tax relief package this year, it must benefit the majority in need of relief and at the same time, serve the needs of the country. A capital gains tax reduction concentrated in the $20,000 to $50,000 brackets would make available millions of dollars for capital formation which is currently being channeled to passive savings, tax free municipal bonds, or consumer consumption.

The problem of capital scarcity and its significance to the business community and this country is well documented. For example, the NYSE estimates that over the next 10 years, the United States will require $4.5 trillion of new capital if we are to continue to support a real annual growth rate of 3.6 percent over the next decade. Although $3.9 trillion could be raised from personal savings and retained earnings, a $600 billion capital shortage remains. The exchange estimates that of this $600 billion, $250 billion will have to come from new equity investment, with an essential part of that being provided by individual investors.

The bear markets of the 1970's, 10 percent inflation and high interest rates have been major causes of the individual investor's departure from the marketplace. It is also true that our increasingly restrictive Federal income tax structure has played a significant role in the decline of capital formation. The Tax Reform Acts of 1969 and 1976 restricted the use of the 25 percent alternative rate on capital gains to the first $50,000 in gains and imposed a minimum tax on capital gains which increased the incremental tax rate to a maximum of 49.125 percent. These restrictive measures have become major investment disincentives discouraging the individual investor from productive investment and encouraging consumption.

Our securities industry today has the most serious problems in the history of U.S. financial markets. America's individual investors continue to resist the purchase of common stock. This has a direct impact upon the ability of small- and medium-sized companies to raise desperately needed capital. Arthur Levitt, Jr., chairman of the American Stock Exchange, discussed the extent of the individual investors' participation in his testimony before the Senate Finance Committee on June 20, 1978. He indicated that:

By 1975, the United States shareholder population had dropped . . . more than 18 percent, and the shareholder percentage of the entire population was down to 11.8 percent, or scarcely one in eight. The percentage of shareholders with total investments of under $10,000 fell from 62 percent to less than 50 percent; those with total investments of under $5,000, fell from 41 percent to less than one-third.

This bill is aimed at the very problem posed by Mr. Levitt. Its purpose is to encourage the small- or middle-income investor to get back into the stock market by concentrating over 72 percent of the total tax benefits to taxpayers earning less than $50,000.

If our Nation is to continue its growth in areas of technology, innovation, and production, we need a tax system which encourages individuals and business to continue to invest in America.

We need to encourage investors to invest by providing economic incentives not disincentives. However, these incentives must not be at the expense of the middle-class taxpayer who is already heavily burdened by high interest rates and high inflation.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3410

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) part I of subchapter P of chapter 1 of the Internal Revenue Code of 1954 (relating to treatment of capital gain) is amended by adding at the end thereof the following new section:

"Sec. 1203. Partial Exclusion of Net Capital Gains.

"(a) EXCLUSION FROM GROSS INCOME.—Gross income of an individual does not include the net capital gain of an individual for any taxable year to the extent that such net capital gain does not exceed $1,500 ($3,000 in the case of an individual filing a joint return).

"(b) EXCEPTION.—Subsection (a) shall not apply to any net capital gain for any taxable year to the extent that such gain is attributable to the sale or exchange of the prinicpal residence (within the meaning of section 1034) of the taxpayer.

"(c) COORDINATION WITH OTHER SECTIONS.—For purposes of determining the amount of the alternative tax under section 1201 and the amount of the deduction under section 1202, net capital gain shall not include any amount which is excluded from gross income under subsection (a).".

(b) The table of sections for such part I is amended by adding at the end thereof the following new item:

"Sec. 1203. Partial exclusion of net capital gains.".

(c) Section 57(a)(9)(A) of such Code (relating to capital gains as an item of tax preference) is amended to read as follows:

"(A) INDIVIDUALS.—

"(i) IN GENERAL.—In the case of a taxpayer other than a corporation, an amount equal to one-half of the net capital gain for the taxable year (other than any amount included under clause (ii)).

"(ii) EXCLUSION.—In the case of an individual, an amount equal to any amount excluded from gross income under section 1203.".

(d) The amendments made by this section shall apply to taxable years beginning after December 31, 1978.●

By Mr. GLENN:

S. 3411. A bill to provide for the employment and compensation of employees of the General Accounting Office without regard to certain provisions of title 5, United States Code, and for other purposes; to the Committee on Governmental Affairs.

S. 3412. A bill to provide for cost-of-living adjustments in the annuity of a retired Comptroller General, and for other purposes; to the Committee on Governmental Affairs.

● Mr. GLENN. Mr. President, I introduce for appropriate reference two bills regarding the General Accounting Office.

The first bill would exempt GAO employees from laws administered by the Civil Service Commission regarding appointments, position classification and certain other personnel actions.

The need for the change in the law, according to the GAO, is to prevent conflict-of-interest situations which could compromise GAO audits. GAO increasingly reviews personnel procedures and management within the executive branch and is sometimes critical of the Civil Service Commission, which controls the personnel system upon which GAO must rely for its staff. CSC now could direct the GAO to reduce the grades and salaries of GAO staff members or refuse to promote or appoint GAO personnel.

The second bill I am introducing today deals with the retirement and survivor benefits of comptrollers general.

A comptroller general who completes his 15-year term is entitled to retire at full salary minus a quarter percent for each month he is under age 65. He may retire at full salary after 10 years service if he has attained the mandatory retirement age of 70 or is permanently disabled.

At present a retired comptroller general receives no cost-of-living increases. Under the bill I am introducing today his retirement would increase according to annuitants under the civil service retirement system. However, the annuity could not exceed the annual rate of compensation of the incumbent comptroller general.

At present 3 percent of the Comptroller General's salary is deducted for survivor benefits, if he so elects. No deductions are made for his own retirement, which is financed out of funds ap-

propriated for the General Accounting Office. Under this bill future comptrollers general would contribute 8 percent of their salary, as Members of Congress do, to finance their own and their survivors' benefits.

The bill also increases benefits for survivors of deceased comptrollers general. These changes are generally comparable to those Congress provided for survivors of Federal judges in Public Law 94–554.●

By Mr. WALLOP (for himself, Mr. YOUNG, Mr. CHAFEE, Mr. EASTLAND, Mr. CULVER, Mr. SCOTT, Mr. HODGES, Mr. FORD, Mr. ANDERSON, Mr. MORGAN, Mr. CURTIS, Mr. HATCH, and Mr. DOLE):

S. 3414. A bill to amend the Internal Revenue Code of 1954 to provide that nonresident aliens are taxable on gain from the sale or exchange of farming property and undeveloped real property at capital gains rates; to the Committee on Finance.

● Mr. WALLOP. Mr. President, today I am introducing legislation that would change the capital gains tax treatment of agricultural lands owned by nonresident aliens. This legislation would add gains from the sale or exchange of agricultural or timber lands to the list of items on which a nonresident alien must pay capital gains. At present, nonresident aliens can avoid paying capital gains tax on the sale or exchange of agricultural property.

The question of foreign investment in U.S. agricultural lands has generated much concern on the part of farmers, who are troubled over the effects these investments will have on escalating land prices. At the same time, consumer organizations question how increased foreign ownership of our agricultural lands could one day affect food prices for all Americans. Mr. President, it is not my claim that all foreign investment in U.S. agriculture either benefits or harms farmers and consumers. I argue, however, that the present favored capital gains tax treatment for foreign investors in U.S. agricultural lands provides an incentive for land investment that is neither needed nor desired. There is no reason to provide foreign investors with the added incentive of a decided tax favor which is unavailable for our American farmers and their families.

Aside from the questions of equity, which are by no means unimportant, there is a strong economic case to make against providing such an incentive to foreign investors. The unequal application capital gains tax on the sale of property only encourages speculation. Foreign investors who seek a quick profit from escalating land prices face no tax deterent. Indeed it results in a built-in foreign advantage of up to 20 percent on initial investment. As such purchases and sales increase in number, there is a ratchet effect of escalating land prices.

The tax incentive given to foreign investors places domestic farmers at a competitive disadvantage when land purchases are required to expand a farm operation. Many American farmers have already been priced out of further land investments. There is no reason why the U.S. Government should retain a tax law which only encourages foreign investment that conflicts with the best interests of the American farmer and consumer.

There are those who are properly concerned with the maintenance of capital flows from OPEC and other balance-of-payments surplus countries. Investments made by those countries in the United States are useful to our economy and the balance-of-payments position of the United States. Altering the capital gains treatment of all foreign investments would jeopardize a source of financing that has become increasingly important over the past few years. To those concerned with this issue, let me point out that this bill affects the capital gains treatment of agricultural land sales alone; it has no effect on the tax treatment of nonagricultural securities or industrial facilities. As such, the balance-of-payments effects of this kind of legislation are minimal, especially when we consider the underlying economic forces that will still encourage foreign investments in U.S. farm lands.

It is evident that the favored capital gains tax exemption on nonresident aliens creates a singular incentive for foreign investors to buy U.S. agricultural lands. This is just one of several incentives which attract foreign investors to our land market. There are economic forces in motion which insure that even without the capital gains tax exemption, there will still be a steady flow, and perhaps excessive flow of foreign investments into U.S. farm lands. The U.S. trade imbalance with the OPEC countries and our industrial trading partners has put billions of dollars in the hands of Arab, Japanese, and German investors. At the same time, the U.S. trade deficit has weakened the dollar in relation to other major currencies. A devalued dollar permits foreign investors to buy U.S. products, securities, and farmlands at a discount. In other words, Mr. President, there has never been a time in our Nation's history in which farmlands could be purchased by foreign investors at such bargain rates as they are today.

The fact that the prevailing rate of inflation in the United States is well below the inflation rate of many other industrial countries creates another incentive to invest in the United States.

What better place is there to invest money than in U.S. food-producing lands? In 1975 agricultural land values rose by 13 percent. In 1976 land values rose again by 14 percent. Last year, the average price increase in U.S. agricultural lands was 17 percent. In a world of expanding food demands, we can be certain that agricultural land investments will remain as good hedge against inflation.

Mr. President, I make these points only to demonstrate that there is already too great an incentive to invest in U.S. agricultural lands without providing a capital gains tax loophole for foreign investors. The capital gains tax treatment of foreign investments in agriculture can only attract the worst kind of speculative investment in our land markets. This bill would close a capital gains tax loophole available to foreign investors and help restore some balance between farmers and nonresident aliens who wish to invest in agricultural lands. I urge the Senate to act quickly to change this unfair and harmful section of the tax code.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3414

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) paragraph (2) of section 871(b) of the Internal Revenue Code of 1954 (relating to determination of gross income of nonresident alien individuals which is connected with United States business) and paragraph (2) of section 882(a) of such Code (relating to determination of taxable income of foreign corporations which is connected with United States business) are each amended to read as follows:

"(2) Determination of taxable income.—In determining taxable income for purposes of paragraph (1)—

"(A) gross income includes only gross income which is effectively connected with the conduct of the trade or business within the United States, and

"(B) gain from the sale or exchange of—

"(i) land used in farming (as defined in section 180(b)), 2032(e)(4) land suitable for use in farming (as defined in section 182(c)(2)), or other undeveloped land (as defined by the Secretary in regulations), or

"(ii) stock in a corporation, or interest in a partnership, determined by the Secretary to have been formed or availed of for the purpose of acquiring, holding, or selling such land, shall be treated as gross income which is effectively connected with the conduct of a trade or business within the United States.".

(b) Paragraph (1) of section 337(b) of such Code (relating to definition of property for gain or loss on sales or exchanges in connection with certain liquidations) is amended—

(1) by striking out "and" at the end of subparagraph (B).

(2) by striking out the period at the end of subparagraph (C) and inserting in lieu thereof a comma and the word "and", and

(3) by adding at the end thereof the following new subparagraph:

"(D) property described in section 882(a)(2)(B)(i).".

Sec. 2. The amendments made by the first section of this Act shall apply with respect to sales and exchanges in taxable years beginning after the date of enactment of this Act.●

ADDITIONAL COSPONSORS

S. 2856

At the request of Mr. MORGAN, the Senator from New Jersey (Mr. WILLIAMS) was added as a cosponsor of S. 2856, the Uniformed Services Survivor Benefit Plan Amendments Act of 1978.

S. 3007

At the request of Mr. DOLE, the Senator from Colorado (Mr. HASKELL) was added as a cosponsor of S. 3007, a bill to disregard, for the purpose of certain taxes imposed by the Internal Revenue Code of 1954 with respect to employees, certain changes since 1975 in the treatment of individuals as employers.

S. 3178

At the request of Mr. CHILES, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 3178, the Contract Disputes Act of 1978.

S. 3408

At the request of Mr. INOUYE, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 3408, the National Aquaculture Policy Act of 1978.

SENATE JOINT RESOLUTION 65

At the request of Mr. KENNEDY, the Senator from Colorado (Mr. HASKELL) was added as a cosponsor of Senate Joint Resolution 65, to amend the Constitution to provide for representation of the District of Columbia.

SENATE JOINT RESOLUTION 151

At the request of Mr. HEINZ, the Senator from Minnesota (Mr. ANDERSON), the Senator from Tennessee (Mr. BAKER), the Senator from Florida (Mr. CHILES), the Senator from Arizona (Mr. DECONCINI), the Senator from New Mexico (Mr. DOMENICI), the Senator from Kentucky (Mr. FORD), the Senator from Colorado (Mr. HASKELL), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Indiana (Mr. LUGAR), the Senator from Illinois (Mr. PERCY), the Senator from Maryland (Mr. SARBANES), the Senator from New Mexico (Mr. SCHMITT), the Senator from Alaska (Mr. STEVENS), the Senator from South Carolina (Mr. THURMOND), the Senator from Wyoming (Mr. WALLOP), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from North Dakota (Mr. YOUNG) were added as cosponsors of Senate Joint Resolution 151, authorizing and requesting the President to designate November 11 through 17, 1978, as "Vietnam Veterans Week."

AMENDMENT NO. 3446

At the request of Mr. HUDDLESTON, the Senator from Montana (Mr. MELCHER) was added as a cosponsor of amendment No. 3446 intended to be proposed to S. 3073, the Federal-Aid Highway Act of 1978.

SENATE RESOLUTION 526

At the request of Mr. DOLE, the Senator from Illinois (Mr. PERCY) was added as a cosponsor of Senate Resolution 526, commemorating the 10th anniversary of the invasion of Czechoslovakia.

SENATE CONCURRENT RESOLUTION 92

At the request of Mr. GOLDWATER, the Senator from Indiana (Mr. BAYH) was added as a cosponsor of Senate Concurrent Resolution 92, to seek the resurrection of the Ukrainian Orthodox and Catholic Churches and other religions in Ukraine.

SENATE CONCURRENT RESOLUTION 102—SUBMISSION OF A CONCURRENT RESOLUTION ON THE NEED FOR CAPITOL HILL CHILD CARE CENTER

Mr. McGOVERN submitted the following concurrent resolution, which was referred to the Committee on Governmental Affairs:

S. CON. RES. 102

Whereas it has been documented that 150 employees of the Senate, the House of Representatives, the Library of Congress, and the Supreme Court have expressed the need for a child care center for their children and are willing to offer moral and financial support to the effort;

Whereas it has been documented that 190 children of these Capitol Hill employees need this service;

Whereas a child care center would strengthen family ties by bringing parents and children together at the workplace; and

Whereas reduction of absenteeism and improved work productivity result from the improved psychological well-being of those parents whose children are provided quality child care at the site of work; Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that a child care center should be established on Capitol Hill for the children of employees of the Senate, the House of Representatives, the Library of Congress, and the Supreme Court.

CAPITOL HILL CHILD CARE CENTER

Mr. McGOVERN. Mr. President, I have long been concerned for the children of Capitol Hill employees, having learned through my own conversations that quality child care facilities are not always available to them. In conjunction with the Congressional Clearinghouse on Women's Rights I recently sent a questionnaire to employees of the Senate, House of Representatives, Library of Congress, and Supreme Court, to specifically determine the extent to which child care is needed on Capitol Hill. The responses bear out my suspicions. They indicate an overwhelming need for this service. One hundred and fifty parents responded that at least one of their children would attend a child care center if it were located at, or near their place of work. Results of the questionnaire show that 190 children need this service. In order to respond to this need, I am today submitting a resolution to establish a child care center for the children of Capitol Hill employees.

There is not a Member of the Senate that is not aware of the increasing pressures placed on the American family. Unfortunately, Government policies can often exacerbate family burdens. High taxes, inflation, education costs, high medical bills, unemployment, and inadequate child care for children of working parents all help to contribute to family problems. Statistics bear out the bad situation: over 14 nations have a lower infant mortality rate than the United States; we continue to incarcerate young juvenile offenders when most should remain with their families; every year 1 million children are victims of child abuse, with 5,000 children dying as a result of these injuries; and it is estimated that one-fifth of our children have no regular source of health care.

Furthermore, we cannot ignore the fact that over 6.4 million children under the age of 6, and 22.5 million children ages 6 to 17, have mothers in the labor force. These children, for most of their waking hours, do not have their mother at home to take care of them. Many people contend that mothers seek employment because they are tired of raising their children. This is not true; most women are forced to work in order to support their families, in order to give them the things they need.

We know it can be difficult for families where both parents work. For many generations our society has described a good family as one where the father makes enough money to allow the mother to stay home and care for the children. Although social scientists tell us that children of working mothers are not necessarily disadvantaged, working parents fear that their children are being neglected. And unfortunately, in too many cases this is true. Children are neglected not because their parents are negligent, but because proper child care is not available.

There are millions of children in this country who come home after school to a locked, empty house. These "latch key" children have no relatives to take care of them; babysitters often have proved to be untrained or unavailable on a regular basis, and there are very few afterschool child programs available to them. The situation is worse for parents with preschool children. In the questionnaire that was sent to our employees, many parents commented that a child care center on Capitol Hill would be preferable to their present arrangement because their child is usually alone all day with a babysitter who is merely putting in time, and who pays very little attention to the child. Other parents wrote that they worry about the child being miles away from them during the day. If an emergency arises, mother or dad cannot be there to help and comfort their child.

We are all aware of the controversy surrounding Government funding of child care. Many legislators, parents, and concerned citizens are understandably skeptical of the Government's involvement in their lives. I appreciate this concern. But this would not be charity or welfare. All of the Capitol Hill employees interested in this service are paying for their present child care arrangements, and responded favorably to the questionnaire knowing that a Capitol Hill child care center would not be free of cost.

It is evident, however, that most parents who need this service for their children cannot afford the initial startup costs of a day care center. The U.S. Senate houses the restaurant, the credit union, the barber shop, and the Senate beauty salon services our employees need. Now we have substantial evidence of what would seem to be a more fundamental need for more adequate child care facilities to serve the children of our employees while their parents are at work.

Mr. President, we in the U.S. Senate have an opportunity to assist our staffs and their families. This effort is not without precedent. There are seven Government agencies in this city operating child care centers for the children of their employees. Many of these centers are operating successfully, experiencing

low drop-out rates, and have long waiting lists. By establishing a child care center on Capitol Hill, the home, in a sense, can be brought to the work place, bringing children and parents together. Lunch hours and/or coffee breaks could afford parents the opportunity to be with their children; eat lunch with them, participate in their activities. If a child becomes ill, the parent is immediately available. The psychological well-being of children and parents is supported in these ways. Parental work attendance also becomes more stable.

Mr. President, for these reasons I urge my colleagues to support this resolution creating child care facilities for Capitol Hill employees. The distinguished chairman of the Committee on House Administration, my longtime friend and colleague, Congressman FRANK THOMPSON of New Jersey is introducing a companion resolution in the other body.

AMENDMENTS SUBMITTED FOR PRINTING

DISTRICT OF COLUMBIA REPRESENTATION—HOUSE JOINT RESOLUTION 554

AMENDMENT NO. 3475

(Ordered to be printed and to lie on the table.)

Mr. HARRY F. BYRD, JR. submitted an amendment intended to be proposed by him to House Joint Resolution 554, proposing, an amendment to the Constition to provide for representation of the District of Columbia in the Congress.

(The remarks of Mr. HARRY F. BYRD, JR.) when he submitted the amendment appear elsewhere in today's proceedings.)

FEDERAL-AID HIGHWAY PROGRAMS—S. 3073

AMENDMENT NO. 3476

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON submitted an amendment intended to be proposed to S. 3073, a bill to amend title 23, United States Code, to authorize Federal-aid highway programs through fiscal year 1980, and for other purposes.

TARIFF TREATMENT OF FILM, STRIPS, SHEETS, AND PLATES OF CERTAIN PLASTICS OR RUBBER—H.R. 5285

AMENDMENT NO. 3477

(Ordered to be printed and to lie on the table.)

Mr. KENNEDY (for himself, Mr. WILLIAMS, Mr. PELL, Mr. NELSON, Mr. CRANSTON, and Mr. HATHAWAY) submitted an amendment intended to be proposed by them, jointly, to H.R. 5285, an act to amend the tariff schedules of the United States with respect to the tariff treatment accorded to film, strips, sheets, and plates of certain plastics or rubber.

HOSPITAL COST CONTAINMENT

● Mr. KENNEDY. Mr. President, last year when I introduced the Hospital Cost Containment Act of 1977, I indicated that "Americans can no longer afford to pour unlimited dollars into our fragmented nonsystem of health care." In the intervening year, without any cost containment effort on the part of the hospitals, the cost of hospital care has gone up at a remarkable 16 percent—almost three times the rate of inflation in the general economy. In real dollars that is almost $10 billion. Unfortunately, this was not an isolated phenomenon—over the last 3 years the costs of hospital care have jumped almost 50 percent with no evidence that hospitals are making people healthier or that the quality of care has improved.

We can no longer just sit back and watch health costs continue to escalate at past rates. For too long we have allowed hospitals to be reimbursed at whatever level they wanted. Their budgets have been open-ended, and they have had no economic incentive to hold down cost. Ironically, our reimbursement system tends to encourage hospitals to add expensive new facilities, personnel, and technologies. We have encouraged more hospital beds than are needed, and today the consumer is bearing the burden of paying for the cost of greatly underutilized facilities, services, and equipment. A study by the prestigious Institute of Medicine documented that this Nation as a whole has at least 100,000 more hospital beds than it needs. These beds, which should be closed or used for other purposes are costing all of us well over $2 billion per year. We have been pouring so much money into hospitals for these extra beds, for unneeded tests, and for unnecessary surgery that we have not had money to spend on basic preventive health care.

The Hospital Cost Containment Act of 1977 that was ordered reported by the Committee on Human Resources on August 2, 1977, was designed to constrain the rate of increases in inpatient hospital costs through various incentives and limitations in hospital revenues. The bill, which was designed to be implemented quickly and simply, contained provisions for the development of permanent reforms that would increase efficiency, effectiveness, and quality of health care in the United States. It specifically provided for phasing in to a system that would classify hospitals according to size, geographical location, and other criteria which would reflect efficiency and services provided. The bill also provided that a system that more accurately measured the changes in hospital costs associated with changes in hospital volume, and a system that monitors, on a concurrent basis, shifts in case mix were to be developed. A cornerstone to the bill was the development of an inflation index specific to the hospital industry that would accurately reflect the rate of increases in prices of the inputs necessary for the production and delivery of hospital services.

Today, more than a year later, in part due to the lobbying efforts of the hospital industry and the AMA, we still have not enacted a bill that would constrain the rate of increase in hospital costs; tragically, instead we have watched the costs of hospital care continue to escalate at an alarming rate—$1 million an hour—$24 million a day—$168 million a week—and almost three-quarters of a billion dollars a month.

In the period since the Committee on Human Resources has reported the bill by a vote of 11 to 3, I have been working with new data in an attempt to further strengthen the bill and address the hospitals' assertions that the cost containment provisions would be applied retrospectively, and that they were not sensitive to the needs of the individual institutions. I believe that, because of the changes in the state of data collection and the greater sophistication within the Health Care Financing Administration, that we are now in a position to modify some of the original provisions, and some of these changes are included in a bill to be introduced by my distinguished colleaguc, Senator NELSON.

Mr. President, the Subcommittee on Health and Scientific Research held 5 days of hearings on S. 1391, "The Hospital Cost Containment Act of 1977" and after deliberations in both the subcommittee and in the Committee on Human Resources, the bill, as amended, was ordered reported to the Senate on August 2, 1977.

At that time a detailed report on that legislation was prepared and distributed as a committee print because, under the Senate Rules, legislation such as this which is jointly referred to two or more committees must be jointly reported. This effective cost containment bill has been left on the floor of the Senate Finance Committee.

Last week, the Senate Finance Committee reported a bill, H.R. 5285, which includes provisions that affect hospital reimbursements; unfortunately, those provisions will not significantly affect hospital cost escalation. The bill reported from the Committee on Human Resources would save almost $60 billion over the next 5 years. The Finance Committee bill reported last week would save less than 1 percent of that amount—less than $400 million over the next 5 years.

Mr. President, today I am submitting an amendment to H.R. 5285. This amendment is title I of the bill reported by the Committee on Human Resources—a bill which would save $60 billion. My distinguished colleagues Senators WILLIAMS, PELL, NELSON, CRANSTON and HATHAWAY have joined me as cosponsors. I am hopeful that this amendment will be enacted so that we can begin to effectively slow down the rising costs of health care.

Mr. President, so that my colleagues and their staffs may have the benefit of the deliberation of the Committee on Human Resources, I ask unanimous consent that the amendment and portions of an analysis prepared by the Committee on Human Resources of title I of the bill reported by the committee be printed in the RECORD.

There being no objection, the amendment and material were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 3477

Beginning on page 3, line 1, strike out through line 19, page 20, and substitute the following:

REPORT ON PERMANENT REFORM IN THE DELIVERY AND FINANCING OF HEALTH CARE

SEC. 2. The Secretary of Health, Education, and Welfare (hereinafter in this Act referred to as the "Secretary") shall submit to the Congress, no later than March 1, 1979, a report setting forth his recommendations for permanent reforms in the delivery and financing of health care which will increase the efficiency, effectiveness, and quality of health care in the United States and which will replace the transitional provisions of.

TITLE I—TRANSITIONAL HOSPITAL COST CONSTRAINT PROVISIONS

PART A—PURPOSE OF THE PROGRAM

SEC. 101. It is the purpose of the transitional hospital cost containment program established by this title to constrain the rate of increase in total hospital inpatient costs, beginning January 1, 1979, and continuing until the adoption of the permanent reforms referred to in section , by limiting the amount of revenue which may be received by the hospitals that are subject to the provisions of this title from Government programs, private insurers, and individuals who pay directly for hospital care.

PART B—ESTABLISHMENT OF HOSPITAL COST CONTAINMENT PROGRAM

IMPOSITION OF LIMIT ON HOSPITAL REVENUE INCREASES

SEC. 111. (a) The average reimbursement payable per admission to a hospital by any cost payer, and the average inpatient charges per admission of a hospital for any accounting year any part of which occurs after December 31, 1978, may not (except as provided in subsection (b), or in section 114, 115, 117, 118, 119, 124, or 131) exceed such average reimbursement payable per admission or such average inpatient charges per admission, respectively, for the hospital's base accounting year adjusted by a percentage equal to the product of the following factors—

(1) one hundred plus the percentage by which the hospital's costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act) would have increased in the period after the close of the hospital's base accounting year and prior to January 1, 1979, if such costs had increased (during that period) at the average annual rate of increase in the hospital's costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act) during the two-year period ending with the close of such base accounting year, except that such percentage as applied for purposes of this section shall not be more than 15 per centum nor less than 6 per centum.

(2) one hundred plus the percentage by which such average reimbursement payable per admission or average inpatient charges per admission would have increased in the period after December 31, 1978 (or after the close of the hospital's base accounting year, if later), and prior to the first day of the accounting year for which the limit is being imposed if such average reimbursement payable per admission or average inpatient charges per admission had increased (during such period) at an annual rate equal to the inpatient hospital revenue increase limit determined and promulgated under section 112(b), and

(3) one hundred plus the percentage by which such average reimbursement payable per admission or average inpatient charges per admission would increase (or decrease) in the hospital's accounting year (except for any part thereof occurring before January 1, 1979) for which the limit is being imposed if such average reimbursement payable per admission or average inpatient charges per admission increase (or decrease) during such accounting year at an annual rate equal to the adjusted inpatient hospital revenue increase limit applicable to the hospital under section 112(a).

(b) For an accounting year which ends after December 31, 1978, but before December 31, 1979, the ceiling established under subsection (a) for average inpatient charges per admission of a hospital and for average reimbursement payable per admission to that hospital by each cost payer shall be applied only to that percentage of the inpatient charges or reimbursement paid, respectively, as the number of days in that accounting year occurring after December 31, 1978, is of the total number of days in that accounting year.

(c) For purposes of subsection (a), in the case of the admission of an individual whose inpatient hospital services are paid for in part by more than one cost payer, the admission shall be attributed to the cost payer which pays for any such services excluding any amounts paid as a deductible by a cost payer.

DETERMINATION OF ADJUSTED INPATIENT HOSPITAL REVENUE INCREASE LIMIT

SEC. 112. (a) The "adjusted inpatient hospital revenue increase limit" which is applicable to any hospital for purposes of section 111(a)(3) with respect to any accounting year shall (subject to sections 124 and 131) be equal to the inpatient hospital revenue increase limit determined and promulgated under subsection (b) of this section for the twelve-month period in which such accounting year ends, modified by the application of the "volume load formula" which is promulgated under section 113 and applied to that hospital.

(b)(1) Between October 1 and December 31 of each calendar year beginning with 1978, the Secretary shall promulgate a figure which (subject to paragraph 2)) shall be the "inpatient hospital revenue increase limit" applicable to accounting years ending in the twelve-month period beginning January 1 of the next year. Such figure shall be, except as provided in section 131, the sum of—

(A) the rate of increase in the implicit price deflator of the gross national product as calculated by the Bureau of Economic Analysis of the Department of Commerce and published in the Survey of Current Business (hereinafter in this title referred to as the "GNP deflator") for the twelve-month period ending September 30 of such year over the GNP deflator for the previous twelve-month period and

(B) one-third of the difference between—

(i) the average annual rate of increase in total expenditures of hospitals (or distinct parts thereof) which satisfy the requirements of section 121(a) which is found by the Secretary to have occurred during the two previous calendar years, and

(ii) the average annual rate of increase in the GNP deflator for the two previous calendar years.

(2) If the Secretary finds that for any twelve-month period for which a figure is promulgated under paragraph (1) the GNP deflator with respect to such period has exceeded or is expected to exceed by more than 1 percentage point the GNP deflator which was used in making the determination under paragraph (1) (or in making a prior adjustment under this paragraph), the Secretary shall increase (or further increase) the GNP deflator so used by the amount of such excess; except that no adjustment made under this paragraph shall be effective with respect to any accounting year ending prior to the calendar quarter preceding the calendar quarter in which such adjustment is made.

PROMULGATION OF VOLUME LOAD FORMULA

SEC. 113. (a) The volume load formula shall be promulgated by the Secretary within thirty days after the date of enactment of this Act. It shall be defined for any accounting year for which an adjusted inpatient hospital revenue increase limit is determined as the average of—

(1) the per centum change in the number of admissions since the base year, and

(2) the per centum change in the number of patient days since the base year.

(b) The volume load formula shall be applied to generate an adjusted inpatient hospital revenue increase limit for each hospital applicable to the average inpatient charges per admission of the hospital and to the average reimbursement payable per admission to the hospital by each cost payer, and for a hospital whose volume load (in the accounting year to which the adjusted inpatient hospital revenue increase limit applies)—

(1) increases by less than 2 per centum or declines by less than 10 per centum of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted by the inpatient hospital revenue increase limit if there were no change in volume load,

(2) increases by 2 per centum or more but less than 15 per centum of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the sum of (A) the amount specified under clause (1), and (B) one-half of the amount specified under clause (1) multiplied by the increase in volume load above the 2 per centum limit.

(3) declines by 10 per centum or more but by less than 15 per centum of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the difference between (A) the amount specified under clause (1), and (B) one-half of the amount specified under clause (1) multiplied by the decline in volume load below the 10 per centum limit,

(4) increases by 15 per centum or more of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the greatest maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted under clause (2), or

(5) decreases by 15 per centum or more of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the difference between (A) the smallest maximum total inpatient charges and the smallest maximum reimbursements payable by cost payers permitted under clause (3), and (B) the amount specified under clause (1) multiplied by the decline in volume load below the 15 per centum limit.

BASE ACCOUNTING YEAR AND MODIFICATION OF CHARGES AND REIMBURSEMENT FOR THAT YEAR

SEC. 114. (a) For purposes of this title, a hospital's "base accounting year" is its accounting year which ended in 1977, or, if later, the second accounting year during all of which the hospital has been a hospital as defined in section 121.

(b) For purposes of calculating under section 111(a) the average inpatient charges per admission of a hospital and the average reimbursement payable per admission to the hospital by each cost payer for the base

accounting year, the inpatient charges of the hospital (and the reimbursement payable to the hospital by a cost payer) for the base accounting year shall (except as provided in subsection (c)) be reduced by an amount equal to any inpatient charges (in the case of a cost payer, inpatient charges attributable to that cost payer) for such base accounting year for element of inpatient hospital services which cease to be furnished in an accounting year which is subject to this title, multiplied by the portion of that accounting year (or part thereof) subject to this title during which such services are not furnished.

(c) Subsection (b) shall not apply with respect to inpatient hospital services which have been found to be not appropriate pursuant to section 1523(a)(6) of the Public Health Service Act by the State health planning and development agency designated under section 1521 of such Act for the State in which the hospital is located.

ESTABLISHMENT OF EXCEPTIONS

SEC. 115. (a) Upon request by a hospital, the Secretary may grant exceptions from the limits established under this title to such hospital to the extent that such hospital provides evidence satisfactory to the Secretary—

(1) of the extent to which costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act) for such hospital in an accounting year exceed such costs in the base accounting year as the result of—

(A) changes in volume load in the range specified in clause (4) or (5) of section 113, or

(B) changes in capacity or in the character of inpatient hospital services available in the hospital, or renovation or replacement of physical plant which changes, renovation, or replacement increase costs for inpatient hospital services per admission by more than the per centum specified in section 112(b)(1)(B) over costs for inpatient hospital services per admission in the previous accounting year; and

(2) that the current ratio of assets to liabilities (determined in accordance with the last sentence of this subsection) is less than two; and

(3) that the changes in volume load, capacity, or character of inpatient hospital services, or the renovation or replacement generating the excess costs described in paragraph (1) have been found, pursuant to section 1523 of the Public Health Service, to be needed or appropriate by the State health planning and development agency designated under section 1521 of such Act for the State in which such hospital is located.

For purposes of paragraph (2), the term "current ratio of assets to liabilities", with respect to any hospital, means the sum of the cash, notes and accounts receivable (less reserves for bad debts), marketable securities, and inventories held by such hospital divided by the sum of all liabilities of that hospital falling due in an accounting year for which the exception is requested under this section.

(b) Upon request by a hospital, the Secretary may grant exceptions from the limits established under this title to such hospital to the extent that such hospital provides evidence satisfactory to the Secretary that—

(1) there has been a change in the inpatient hospital services for such hospital for which reimbursement is payable by a cost payer, or the basis on which the reimbursement payable by a cost payer is calculated has changed, or

(2) the percentage of inpatient charges attributable to any cost payer has changed for such hospital, and such change has reduced the total revenue of such hospital by at least the per centum specified in section 112(b)(1)(B) of the costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act).

(c) The Secretary shall either approve any request for an exception made by a hospital under subsection (a) or (b), or deny such request, within a period not to exceed ninety days after the hospital has filed in a manner and form prescribed by the Secretary the evidence required by such subsection. (If such hospital has not received written notice within fifteen days that such request has not been filed in such manner and form, such request shall be deemed to have been filed in the prescribed manner and form.) Any such request not denied within such ninety-day period shall be deemed approved.

(d) Any hospital granted an exception under subsection (a) shall make itself available for an operational review by the Secretary. As a result of such review, the Secretary may make recommendations to such hospital for improvements to increase such hospital's efficiency and economy. The Secretary may discontinue, after notice and an opportunity for a hearing on the record, any such exception for failure of the hospital to implement any such recommendation.

(e)(1) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (a)(1)(A), the upper or lower 15 per centum limitation specified in clauses (2) and (3), respectively, of section 113(b) shall be permanently changed for that hospital to the upper or lower per centum limitation determined by the Secretary.

(2) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (a)(1)(B), such hospital shall be allowed increased total revenue for purposes of this title for such accounting year and all subsequent accounting years (and the limit on the allowable rate of increase under section 111 for charges imposed by the hospital and reimbursement from its cost payers shall be adjusted upward accordingly) in an amount no greater than the amount the Secretary estimates, at the time he grants the exception, is necessary to maintain the current ratio of its assets to liabilities (determined in accordance with the last sentence of subsection (a)) at the level specified in subsection (a)(2).

(3) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (b)(1), such hospital shall be allowed increased total revenue for purposes of this title for such accounting year and all subsequent accounting years (and the limit on the allowable rate of increase under section 111 for charges imposed by the hospital and reimbursement from its cost payers shall be adjusted upward accordingly) in an amount equal to the amount the Secretary estimates, at the time he grants the exception, is necessary to offset the loss in revenue caused by the changes for which the exception was granted.

(4) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (b)(2), such hospital shall be allowed increased total revenue for purposes of this title for such accounting year (and the limit on the allowable rate of increase under section 111 for charges imposed by the hospital and reimbursement from its cost payers shall be adjusted upward accordingly) in an amount equal to the amount the Secretary estimates, at the time he grants the exception, is necessary to offset the loss in revenue caused by the changes for which the exception was granted.

(f)(1) Any hospital, or any entity described in section 1842(f)(1) of the Social Security Act, which is dissatisfied with a determination of the Secretary made under this section may obtain a hearing before the Provider Reimbursement Review Board established under section 1878 of the Social Security Act, if the amount in controversy is $10,000 or more and the request for such hearing is filed within one hundred and eighty days after receipt of the Secretary's determination.

(2) The Secretary (notwithstanding section 1878(h) of the Social Security Act) shall appoint five additional members to the Provider Reimbursement Review Board, following the specifications for expertise applicable to the existing five members. Such five additional members shall constitute the Board for purposes of reviewing appeals under this title. The other provisions of subsections (c), (d), (e), (f), (h), and (i) of section 1878 of the Social Security Act shall apply, except that the Board as so constituted shall be considered as reviewing decisions of the Secretary rather than of a fiscal intermediary.

(g) Upon request by a hospital, the State health planning and development agency designated under section 1521 of the Public Health Service Act for the State in which the hospital is located shall make a finding as to the appropriateness of specific institutional health services for purposes of subsection (a)(3) or section 114(c) of this title, after requesting the recommendations of the appropriate health systems agency. The finding of a State health planning and development agency under this subsection shall not be subject to further review.

ENFORCEMENT

SEC. 116. (a) Notwithstanding any provision of title XVIII of the Social Security Act, reimbursement for inpatient hospital services under the program established by that title shall not be payable, on an interim basis or in final settlement, to the extent that it exceeds the applicable limits established under this title or under the program for a State whose hospitals have been excluded under section 117 or 119 from the application of this title.

(b) Notwithstanding any provision of title V or XIX of such Act, payment shall not be required to be made by any State under either such title with respect to any amount paid for inpatient hospital services in excess of the applicable limits established under this title; nor shall payment be made to any State under either such title with respect to any amount paid for inpatient hospital services in excess of such limits.

(c) Notwithstanding any other provision of law, the imposition by any hospital of inpatient charges in excess of the applicable limit established under this title, or any payment by any cost payer (as defined in section 122(e)(2)) for inpatient hospital services in excess of such limit, shall subject such hospital or cost payer—

(1) to the Federal excise tax imposed by section 4991 of the Internal Revenue Code of 1954 (as added by section 128 of this Act), and

(2) to exclusion, at the discretion of the Secretary, from participation in any or all of the programs established by title V, XVIII, or XIX of the Social Security Act.

(d) Any hospital shall be exempt from the penalties set forth in subsection (c) if it holds in escrow an amount equal to its inpatient charges in excess of the applicable limit established under this title multiplied by the percentage of such charges not attributable to cost payers until such time as future inpatient hospital charges fall below the applicable limits established under this title, in an amount equal to the amount in escrow; but any such hospital which fails to do so shall be subject to such penalties.

EXEMPTION FOR HOSPITALS IN CERTAIN STATES

SEC. 117. At the request of the Governor (or other chief executive) of any State the Secretary may exclude from the application of this title except for sections 125 and 126 all hospitals (as defined in section 121(c)) physically located in such State if—

(a) the Secretary finds that such State has in operation as of the date of such request a program capable of containing hospital costs for inpatient hospital services in the State which covers at least 90 per centum of the hospitals in the State which would otherwise be covered under the program established by this title;

(b) the Secretary finds that the State program applies at least to all revenues for inpatient hospital services of hospitals covered by the program and has applied for at least one year prior to the date of such request to at least half of those revenues (excluding revenues received under title XVIII of the Social Security Act);

(c) the Governor (or chief executive) certifies, and the Secretary determines, that the aggregate rate of increase in revenues over the previous accounting year for inpatient hospital services for all hospitals in the State will not (1) exceed 110 per centum of the inpatient hospital revenue increase limit determined pursuant to paragraphs (b)(1) and (b)(2) of section 112, except that, at the option of the State, the above limit shall increase by the amount of increases in revenues attributable to increases in regular wages (as defined in section 124(b)(1)) which are exempt under section 124, nor (2) be less than the increase in the GNP deflator applicable to that fiscal period; and

(d) the Governor (or chief executive) has submitted, and had approved by the Secretary, a plan for recovering any excess of total revenue which (notwithstanding paragraph (c)) may occur.

EXEMPTION FOR HOSPITALS ENGAGED IN CERTAIN EXPERIMENTS OR DEMONSTRATIONS

SEC. 118. A hospital or group of hospitals (as defined in section 121(c)) may be excluded from the application of this title except for sections 125 and 126 if the Secretary determines that (1) such exclusion is necessary to facilitate or continue an experiment or demonstration entered into under section 402 of the Social Security Amendments of 1967, section 222 of the Social Security Amendments of 1972, or section 1526 of the Public Health Service Act, and (2) such experiment or such demonstration is not inconsistent with the provisions of this title.

EXEMPTION FOR STATES WITH COST CONTAINMENT PROGRAMS

SEC. 119. (a) Any State may submit to the Secretary a plan for a hospital cost containment program for approval. The Secretary shall approve such a program and exempt from the application of this title except for sections 125 and 126 all hospitals (as defined in section 121(c)) physically located in such State if the Secretary determines that such program—

(1) designates an identifiable unit of State government which has the authority to supervise the administration of the program;

(2) provides for a methodology to assure that the aggregate rate of increase in revenues for inpatient hospital services over the previous year for all hospitals in the State will not exceed 110 per centum of the inpatient hospital revenue increase limit determined pursuant to paragraphs (b)(1) and (b)(2) of section 112 nor be less than the increase in the GNP deflator applicable to that fiscal period. Such methodology may include alternative methods for classifying hospitals, for establishing prospective rates of payment, and for implementing on a gradual, selective, or other basis the establishment of a prospective payment system, in order to stimulate hospitals through positive (or negative) financial incentives to use their facilities and personnel more efficiently without adversely affecting the quality of services;

(3) includes a methodology for the recovery of any excess of total revenues which (notwithstanding paragraph (2)) may occur;

(4) provides for sanctions and enforcement procedures adequate to insure compliance with the program;

(5) provides for uniform definition of all costs;

(6) provides for the evaluation of standards of institutional performance;

(7) provides that the limit specified in paragraph (2) shall increase by the amount of increase in regular wages (as defined in section 124(b)(1)); and

(8) provides for compliance with such other criteria as the Secretary deems necessary to accomplish the purposes of this title and which are not inconsistent with the provisions of this title.

(b) The Secretary may make grants to any State which has an approved program pursuant to subsection (a) to assist such State in the implementation of its program. For the purposes of this subsection, there are authorized to be appropriated $10,000,000 for the fiscal year ending September 30, 1979, and such sums shall remain available until expended.

(c) The Secretary shall promulgate regulations to implement this section within one hundred and eighty days of the date of enactment of this Act.

REVOCATION OF EXEMPTIONS UNDER SECTIONS 117, 118, AND 119

SEC. 120. (a) The Secretary shall review annually any program, experiment, or demonstration that has received an exemption pursuant to section 117, 118, or 119 to determine whether such program, experiment, or demonstration is in compliance with such section and the regulations promulgated thereunder. The Secretary may revoke, after notice and an opportunity for a hearing on the record, any such exemption if he determines that such exemption is no longer justified because the conditions for such exemption are no longer being met.

(b) Upon revocation of an exemption awarded under section 117, 118, or 119 each hospital that would otherwise be subject to this title will be subject to the limits established under this title for each full accounting year as defined by section 122(a)(1) any part of which was not subject to the program, experiment, or demonstration established under section 117, 118, or 119.

PART C—DEFINITIONS AND MISCELLANEOUS PROVISIONS

DEFINITION OF HOSPITAL AND APPLICABILITY OF TITLE

SEC. 121. (a) For purposes of this title (subject to subsection (b), (c), and (d) of this section), the term "hospital", with respect to any accounting year, means an institution (including a distinct part of an institution if the distinct part participates in the program established under title XVIII of the Social Security Act) which—

(1) satisfies clauses (1) and (7) of section 1861(e) of the Social Security Act, and

(2) had an average duration of stay of thirty days or less in the preceding accounting year.

(b) A hospital shall not be subject to this title except for the purposes of sections 125 and 126 for an accounting year if it—

(1) has met the conditions specified in subsection (a) (under present and previous ownership) for less than two years before such accounting year;

(2) derives more than 75 per centum of its inpatient care revenues, disregarding revenues received under title XVIII of the Social Security Act, from one or more health maintenance organizations (as defined in section 1301(a) of the Public Health Service Act) during such accounting year;

(3) has had, in the three accounting years preceding such accounting year, average annual admissions of two thousand or less; or

(4) has had in the three accounting years preceding such accounting year, average admissions that are greater than two thousand and less than four thousand; is a sole community provider, as defined by the Secretary; and, is not physically located within a Standard Metropolitan Statistical Area.

(c) For the purposes of sections 117, 118, and 119, the term "hospital", with respect to any accounting year, means an institution (including a distinct part of an institution if the distinct part participates in the program established under title XVIII of the Social Security Act) which meets the requirements of paragraphs (1) and (2) of subsection (a) except that a hospital shall not be subject to the provisions of such sections if it meets the requirements of paragraph (2) of subsection (b).

(d) A hospital shall not be subject to any provisions of this title if it is a Federal hospital.

OTHER DEFINITIONS

SEC. 122. For purposes of this title—

Accounting Year

(a)(1) The term "accounting year" means except as provided in paragraph (2),—

(A) in the case of a hospital participating in the program established by title XVIII of the Social Security Act, a period of twelve consecutive full calendar months including the same months as the last full reporting period allowed for reimbursement purposes under such title; and

(B) in the case of a hospital not participating in the program established by title XVIII of the Social Security Act, a calendar year, or, if requested by the hospital, such other period of twelve consecutive full calendar months as the Secretary may designate.

(2) The Secretary may establish an "accounting year" of less than twelve months, and make appropriate adjustments in the application of this title to that period, for an entity whose "accounting year" under paragraph (1) is changed from one twelve month period to another or for other reasons that the Secretary deems appropriate.

Inpatient Hospital Services

(b) The term "inpatient hospital services" has the meaning given it by section 1861(b) of the Social Security Act including in addition the services otherwise excluded by paragraph (5) thereof.

Inpatient Charges

(c) The term "inpatient charges" means (1) charges (as defined in section 405.452(d)(4) of title 20 of the Code of Federal Regulations as in effect on the date of enactment of this Act) for inpatient hospital services or (2) except for purposes of subsection (e), the hospitals costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act), if such costs are greater than the charges as defined in clause (1).

Admission

(d) The term "admission" means the formal acceptance of an inpatient by a hospital, excluding newborn children (unless retained after discharge of the mother) and excluding transfers within inpatient units of the same institution.

Cost Payer

(e) The term "cost payer" means—

(1) a program established under title V, XVIII, or XIX of the Social Security Act, and

(2) any organization which (A) meets the definition in section 1842(f)(1) of the Social Security Act, and (B) reimburses a hospital subject to this title for inpatient hospital services on a basis related to the hospital's costs in furnishing those services or on any other basis other than inpatient charges.

(f) The term "reimbursement payable by a cost payer" means the sum of—

(1) the amounts payable by the cost payer to a hospital for inpatient hospital services, and

(2) the amounts payable by an individual to the hospital for inpatient hospital services if the individual's expenses for such services are payable in part by the cost payer, to the extent that those amounts are calculated as a portion of the costs or other basis on which the amounts payable by the cost payer are determined.

State

(g) The term "State" includes Puerto Rico, Guam, the District of Columbia, and the Virgin Islands.

DETERMINATION OF INPATIENT REIMBURSEMENT

SEC. 123. For purposes of section 111, inpatient reimbursement under a program established under title V, XVIII, or XIX of the Social Security Act shall be determined without regard to adjustments resulting from the application of section 405.460(g), 405.455(d), 405.415(f), or 405.415(d)(3) of title 20 of the Code of Federal Regulations.

EXEMPTION OF NONSUPERVISORY PERSONNEL WAGE INCREASES FROM REVENUE LIMIT

SEC. 124. (a) The Secretary shall modify the inpatient hospital revenue increase limit (for purposes of section 111(a)(2)) and the adjusted inpatient hospital revenue increase limit (for purposes of section 111(a)(3)) otherwise established for any hospital which is subject to the provisions of this title except for those hospitals exempted pursuant to section 117, 118 or 119 for any accounting year beginning before April 1980, as prescribed in subsection (b).

(b) Such modified limits for any accounting year shall be calculated by adding together—

(1) the average percentage increase in regular wages (as that term is used for purposes of the Fair Labor Standards Act of 1938) per employee per hour granted to employees other than doctors of medicine or osteopathy and supervisors (as defined in section 2(12) of the National Labor Relations Act) during that accounting year multiplied by the percentage of total costs for in-patient hospital services (as calculated for purposes of title XVIII of the Social Security Act) attributable to such wages in the preceding accounting year; and

(2) the adjusted inpatient hospital revenue increase limit otherwise applicable to the hospital for that accounting year under this title multiplied by the percentage of such costs attributable to all other expenses in the preceding accounting year; and

(3) 100 percent plus the average percentage increase in regular wages (as defined in clause (1)) per employee per hour granted to employees specified in clause (1), multiplied by the product of (A) the percentage of total costs for inpatient hospital services (as calculated under clause (1)) attributable to such wages in the preceding accounting year, and (B) the fractional increase in the average number of such employees in the accounting year for which the modified limit is calculated over the average number of such employees in the preceding accounting year; provided, that the total percentage determined under this clause may not exceed the difference between the percentage which would be obtained under clause (1) if the adjusted inpatient hospital revenue increase limit were used instead of the average percentage increase in regular wages per employee per hour, and the percentage actually calculated under clause (1).

(c) The modified inpatient hospital revenue increase limit and adjusted inpatient hospital revenue increase limit established under subsection (b) for any hospital with respect to any accounting year shall constitute such hospital's inpatient hospital revenue increase limit under section 111(a)(2) or, as appropriate, the adjusted inpatient hospital revenue increase limit under section 111(a)(3), for such accounting year for all purposes of this title.

DISCLOSURE OF FISCAL INFORMATION

SEC. 125. (a) Every hospital shall submit to the health systems agency designed under section 1515 of the Public Health Service Act for the health service area in which it is located by March 1 and September 1 of each year, a report, in a form prescribed by the Secretary, the rates charged for each of the 30 most frequently used hospital services, as specified by the Secretary, including the average semiprivate and private room rates.

(b) Each such hospital shall submit annually to such health systems agency, within ninety days of the close of each such hospital's accounting year, a report, in a form prescribed by the Secretary, which contains information, as specified by the Secretary, describing the ownership, management, and financial status of each such hospital including:

(1) a balance sheet as of the end of such accounting year, setting forth assets and liabilities at such date, including all capital, surplus, reserve, and depreciation;

(2) a statement of operations for such accounting year, setting forth all operating and non-operating revenues and expenses including the percent increase in wages for nonsupervisory personnel during such accounting year (including a comparison with all previous accounting years subsequent to the date of enactment of this Act);

(3) the name and address of any person—

(A) who has (directly or indirectly) an ownership, lease or rental interest of 5 per centum or more in such hospital, or who is the owner (directly or indirectly) of an interest of 5 per centum or more in any mortgage, deed of trust, note, or other obligation secured (in whole or in part) by such hospital or any of the property or assets thereof, or

(B) who is an officer or director of the hospital if it is organized as a corporation; and

(4) the name and address of any individual, corporation, partnership or other legal entity with whom the hospital has had, during the previous twelve months, business transactions in an aggregate amount in excess of $5,000 if a person described in paragraph (3) or a person who exercises discretionary authority or discretionary control respecting the financial management of the hospital (A) is such an individual or (B) has (directly or indirectly) an ownership interest of 5 per centum or more in such corporation, partnership or other legal entity; and

(5) the names and annual compensation including salary and benefit increases of the hospital's principal operating personnel, as defined by the Secretary.

(c) Every hospital shall submit annually to such health systems agency all costs reports submitted to each cost payer, as defined in section 122(e) of this Act, and its overall plan and budget described in section 1861(z) of the Social Security Act (if it participates in the program established by title XVIII of that Act).

(d) If a hospital fails to fully comply with the requirements of subparagraph (a), (b), and (c) and any regulation promulgated thereunder, the Secretary shall notify the hospital and any payment due to such hospital pursuant to titles XVIII, XIX, and XX of the Social Security Act or any other program supported in whole or in part by funds supplied by the United States shall be reduced by 10 per centum effective with the date of such notice and such reduction shall continue in effect until the hospital fully complies with the requirements of subparagraphs (a), (b), and (c) or any regulation promulgated thereunder: *Provided*, That if the Secretary finds that the hospital has fully complied with such requirements within ninety days of notification by the Secretary of a violation, the Secretary may, in his discretion, waive all or part of the reduction in payments prescribed herein.

(e) Each such health systems agency shall make available to the public for inspection and copying (at the reasonable expense of the public) the information supplied to the health systems agency pursuant to this section in readily understandable language and in a manner designed to facilitate comparisons among the hospitals in the health system agency's health service area.

IMPROPER CHANGES IN ADMISSION PRACTICES

SEC. 126. Upon written complaint by any person that one of more hospitals has changed its admission practices in a manner that would tend to reduce the proportion of inpatients of such hospital or hospitals for whom reimbursement is less than the anticipated inpatient charges applicable to such inpatients, the Secretary shall investigate the complaint. The Secretary may impose, after notice and an opportunity for a hearing on the record, the sanction set forth in section 116(c)(2) if he determines that such complaint is justified.

REVIEW OF CERTAIN DETERMINATIONS

SEC. 127. Any determinations made on behalf of the Secretary under this title with respect to the application of its provisions to individual hospitals (other than determinations made under section 115 or 126) shall be subject to the provisions of section 1878 of the Social Security Act in the same manner as determinations with respect to the amount of reimbursement due a provider of services under title XVIII of such Act.

EXCISE TAX ON EXCESSVE PAYMENTS FOR INPATIENT HOSPITAL SERVICES

SEC. 128. (a) Subtitle D of the Internal Revenue Code of 1954 (relating to miscellaneous excise taxes) is amended by adding at the end thereof the following new chapter:

"CHAPTER 45—TAX ON CERTAIN EXCESSIVE PAYMENTS FOR INPATIENT HOSPITAL SERVICES

"Sec. 4991. Imposition of tax.

"SEC. 4991. IMPOSITION OF TAX

"(a) IN GENERAL.—(1) There is hereby imposed, with respect to the receipt by any hospital of any payment made by any cost payer for inpatient hospital services in excess of the applicable limit established by , and with respect to any payment made by any cost payer as defined in section 122(e)(2) of such Act for inpatient hospital services in excess of such limit, a tax equal to 150 percent of the amount of such excess. The tax imposed by this paragraph shall be paid both by the hospital and by the cost payer.

"(2) There is hereby imposed, with respect to the inpatient charges of any hospital in excess of the applicable limits established by multiplied by the percentage of such charges not attributable to cost payers, a tax equal to 150 percent of the amount of such excess. The tax imposed by this paragraph shall be paid by the hospital.

"(b) EXCEPTION.—The tax imposed by subsection (a)(2) shall not apply with respect to any hospital so long as it is determined by the Secretary of Health, Education, and Welfare to be taking the corrective action described in section 116(d)(2) of the .

"(c) DEFINITIONS.—Terms used in subsections (a) and (b) have the meanings given them by .

"(d) ADMINISTRATION.—Under and to the extent provided by regulations of the Secretary, the appropriate provisions of subtitle F (relating to procedure and administration) shall be made applicable with respect to the tax imposed by subsection (a) of this section.".

(b) The table of chapters for subtitle D of such Code is amended by adding at the end thereof the following new item:

"Chapter 45. Tax on certain excessive payments for inpatient hospital services.".

EFFECT OF ACT ON PAYMENTS BELOW THE ESTABLISHED LIMITS

SEC. 129. This Act shall not require any Federal or State program or any person to pay a hospital more than that program or person would have been required to pay had this Act not been enacted.

CITIZEN'S CIVIL ACTIONS

SEC. 130. (a) Except as provided in paragraph (b) of this section any person may commence a civil action for injunctive relief, including interim equitable relief, on his own behalf, whenever such action consitutes a case or controversy—

(1) against any person (including the Secretary) who is alleged to be in violation of section 125, 126, 128, or 129 of this title or any regulation promulgated thereunder; or

(2) against the Secretary where there is alleged a failure of the Secretary to perform any act or duty pursuant to section 125, 126, 128, or 129 of this title or any regulation promulgated thereunder.

The district courts of the United States shall have jurisdiction over actions brought under this section, without regard to the amount of controversy, or of the citizenship of the parties.

(b) No civil action may be commenced—

(1) under paragraph (a)(1) of this section—

(A) prior to sixty days after the plaintiff has given notice of the alleged violation to the Secretary and to any alleged violator in such manner as the Secretary may by regulation require; or

(B) if the Attorney General or the Secretary has commenced and is diligently pursuing judicial proceedings or administrative action with respect to such alleged violation; or

(2) under paragraph (a)(2) of this section, prior to sixty days after the plaintiff has given notice to the Secretary of such alleged failure to perform an act or duty.

(c) In any action under this section, the Attorney General or the Secretary may intervene as a matter of right. The decision and rulings of the court, in any judicial proceeding commenced under this section, shall not be a bar to the institution of any judicial proceeding or administrative action by the Secretary against a party to such judicial proceeding. No factual finding by such court shall be determinative as to any fact in any subsequent judicial proceeding or administrative action brought by the Secretary, unless the Secretary is a party to the proceeding under this section.

(d) The court, in issuing any final order in any action brought pursuant to subsection (a), may award costs of litigation (including a reasonable attorney's fee, based on the prevailing rates for such services, and expert witness fees) to any party, whenever the court determines that such an award is appropriate.

(e) Nothing in this section shall restrict any right which any person (or class of persons) may have under any statute or at common law to seek enforcement of any regulation or order or to seek any other relief.

(f) Nothing in this section shall require the disclosure of any trade secret information or any other confidential information except as provided by the Federal Rules of Civil Procedure.

SEC. 131. (a) Within one year of the date of enactment of this Act, the Secretary shall—

(1) after consultation with the Bureau of Labor Statistics of the Department of Labor, the Bureau of Economic Analysis of the Department of Commerce, and other appropriate public and private organizations, promulgate a figure that more accurately reflects the rate of increase in the prices of the inputs necessary for the production and delivery of hospital services. Such figure shall replace the figure promulgated pursuant to section 112 as the new inpatient hospital revenue increase limit; and

(2) make any changes in the exceptions process established by section 115 as deemed necessary or appropriate by the Secretary as a result of the promulgation of the new inpatient hospital revenue increase limit pursuant to paragraph (1) of this section. The Secretary shall make such changes in order to insure that—

(A) only hospitals that are experiencing financial crises, as defined by the Secretary, and that have not incurred expenses in excess of those found to be necessary pursuant to section 1861(v)(1)(A) of the Social Security Act are allowed to receive exceptions; and

(B) exceptions will only be granted to hospitals that qualify under clause (A) and that have—

(i) experienced an unforseeable or unavoidable rise in the price of malpractice insurance, other liability insurance, energy or such other items as the Secretary deems appropriate which result in hospital expenditures in excess of the figure promulgated pursuant to paragraph (1) of this subsection;

(ii) experienced a change in patient mix resulting from expanded institutional capacity provided such expansion has been either found by a State health planning and development agency designated under section 1521 of the Public Health Service Act to be in conformity with applicable standards, criteria, and plans under an agreement pursuant to section 1122 of the Social Security Act or approved by such agency under a certificate-of-need program which is satisfactory to the Secretary under section 1523(a)(4) of the Public Health Service Act;

(iii) experienced unusual increased expenses, as defined by the Secretary, associated with the closing, modifying, or changing usage of all or part of its facilities by eliminating excess bed capacity; discontinuing an underutilized service for which there are adequate alternative sources; or, substituting for the underutilized service some other service which is needed in the area and which is consistent with the findings of an appropriate health planning agency; or

(iv) experienced such other change in condition that the Secretary deems an appropriate justification for an exception:

Provided, That such reasons for hospitals qualifying for exceptions as set forth in clauses (i) through (iv) have been found pursuant to section 1523 of the Public Health Service Act to be needed or appropriate by the State health planning and development agency designated under section 1521 of such Act for the State in which the hospital requesting the exception is located.

(b) The changes in the inpatient hospital revenue increase limit and the exceptions process prescribed by subsection (a) shall apply to hospitals for their accounting years commencing after such changes are in effect.

(c) Any changes made pursuant to sections (a)(1) and (a)(2) shall become effective after sixty days of continuous session of the Congress after the Secretary has submitted such changes to the Congress together with a detailed statement of the reasons underlying such changes, unless either House passes a resolution during such sixty-day period stating in substance that it does not favor such changes.

SEC. 132. The Secretary, after consultation with appropriate public and private organizations, shall establish within one year of the date of enactment of this Act the following:

(a) an accounting and uniform functional cost reporting system (including uniform procedures for allocation of costs) for determining operating and capital costs of hospitals providing services.

(b) a system which will classify hospitals according to size, geographical location, and other criteria which will reflect efficiency and services provided;

(c) a system that more accurately measures the changes in hospital cost associated with changes in hospital volume;

(d) a system that monitors, on a current basis, shifts in case mix including shifts of cases with higher than average costs per admission:

(e) a system that measures the output of hospitals which includes a way to identify hospitals that provide better than average care than hospitals of similar characteristics; and

(f) a system that would reimburse hospitals of similar characteristics differently based on the system established pursuant to subsection (e).

SEC. 133. (a) The Secretary shall arrange for the conduct of a study or studies of methods for controlling the costs of and/or revenue received for hospital outpatient services, long term care services, and ambulatory care services.

(b) The study or studies required by subsection (a) shall be completed within one year of the date of enactment of this Act. Within thirty days of the date of completion of such study or studies, such study or studies and the report or reports thereon shall be submitted to Congress. Such report or reports shall include recommendations, if any, for legislative and administrative action.

SEC. 134. The Secretary shall monitor, on a current basis, the economic impact of all the provisions of this title including sections 117, 118, 119, and 124. He shall report anually to the Congress the results of such monitoring including the percentage of increase in the cost of energy, malpractice and other liability insurance, and the wages for nonsupervisory personnel.

SEC. 135. In carrying out the purposes of this title the Secretary or a State is authorized to enter into contracts with State or national cooperative information centers established under section 304 or 306 of the public Health Service Act.

The table of contents on page 3 is amended by striking item 2 and substituting:

SEC. 2. REPORT ON PERMANENT REFORM IN THE DELIVERY AND FINANCING OF HEALTH CARE.

TITLE I—TRANSACTION HOSPITAL COST CONSTRAINT PROVISIONS

PART A—PURPOSE OF THE PROGRAM

PART B—ESTABLISHMENT OF HOSPITAL COST CONTAINMENT PROGRAM

PART C—DEFINITIONS AND MISCELLANEOUS PROVISIONS

I. SUMMARY OF S. 1391 AS REPORTED BY THE COMMITTEE ON HUMAN RESOURCES

The bill would establish a transitional hospital cost-containment program to constrain the rate of increase in inpatient hospital costs through incentives and limitations in hospital revenues and would provide for the publication and disclosure of information designed to encourage efficient use of available hospital resources. The bill would also provide for the development of permanent reforms on order to increase the efficiency, effectiveness, and quality of health care in the United States.

Beginning January 1, 1979, most acute-care and specialty hospitals would be subject to a limit on increases in their revenues from inpatient services. The revenue increase limit would apply to increases in payments

by each third-party cost payer (for example, medicare, medicaid, and Blue Cross) and to increases in charge-based payments by private health insurance companies and self-pay patients in those States that have effective cost containment programs permitting an exemption to the Federal program.

Application of limit.—Under cost containment, the rate of increase in each hospital's inpatient revenues from average charges imposed or costs paid by each government or nongovernment cost payer would be limited to a fixed percentage of revenues in the hospital's base accounting year. A hospital's base accounting year would be its accounting year which ended in 1977 or, if later, the second year throughout all of which it met the definition of hospital for purposes of cost containment. The precentage limitation would be calculated as the product of (1) the inpatient hospital revenue increase limit currently in effect, as modified by any adjustments or exceptions for which the hospital may qualify, (2) the basic inpatient hospital revenue increase limit in effect in prior cost-containment years (or any higher percentage previously allowed under an exception to reflect major increases in patient load or higher costs associated with major capital expenditures), and (3) the percentage allowable for increases in the hospital's costs between the end of its base year and January 1, 1979, the effective date of cost containment. The interim-period adjustment would be calculated to allow an average annual rate of increase in hospital costs equal to the average annual increase in the hospital's inpatient costs in the base year and the preceding accounting year. The interim period adjustment would, however, be limited to a range of not less than 6 nor more than 15 percent.

These constraints on inpatient revenues would apply to all hospitals which have an average length of stay of 30 days or less, except Federal hospitals, hospitals which derive more than 75 percent of their income from one or more health maintenance organizations, and hospitals which, in the three previous accounting years, had fewer than 2,000 admissions per year or, if they were sole community hospitals, had more than 2,000 but less than 4,000 admissions per year.

Basic limit.—Each year, the Secretary would promulgate a basic limit on increases in inpatient hospital revenues to be effective in the following calendar year. In the first year, the basic limit would be set by a formula reflecting general price trends in the economy as measured by the rate of increase in the implicit price deflator of the gross national product ("GNP deflator") in the 12-month period ending September 30 of the year of promulgation, plus an additional allowance for increases in the intensity or real level of services provided per admission. The intensity factor would be equal to one-third of the difference between the rate of increase in the GNP deflator and the average annual rate of increase in hospital costs in the 2 preceding years.

Within 1 year after enactment, the Secretary would be required to develop and thereafter to promulgate the basic limit in accordance with a methodology which more accurately reflects the rate of increase in the prices of the goods and services which go into the delivery of hospitals services.

Basic limit modifications.—The bill provides for certain adjustments, exceptions, and exemptions from the basic limit on inpatient hospital revenue increases.

Volume load adjustment.—The basic limit would be adjusted to take into account major changes in a hospital's patient load. No revenue adjustment would be made if the hospital's volume, since the base accounting year, had increased by less than 2 percent or decreased by less than 10 percent. Increases or decreases in volume outside these limits would result in allowable revenue increases or decreases, respectively, at the rate of one-half of the allowable per-admission revenue limit for each admission above or below the limit. The full amount of allowable revenue per admission would be deducted for decline in volume below 15 percent, and no recognition would be given to increases in volume above 15 percent except as expressly provided under the exceptions process.

Exceptions.—The Secretary would have authority to grant an exception to the inpatient hospital revenue increase limit otherwise applicable in certain cases where (1) a hospital's volume load had increased by more than 15 percent, or (2) the hospital had undertaken major changes in facilities or services approved by the State health planning and development agency, provided the hospital could also demonstrate a relatively poor financial position. Any hospital granted an exception would be subject to an operational review of its effectiveness and efficiency by the HEW Audit Agency, whose report would be made public. Continuance of the exception would be contingent upon the hospital's implementation of any recommendations arising out of the operational review. A modified exception process may be used in future years under the revised method for determining the basic limit. This modified exception process requires congressional approval.

Nonsupervisory wage increase exemption.—The revenue increase limit otherwise applicable in the case of a particular hospital would be adjusted to reflect increases in the wages of the hospital's nonsupervisory employees.

Exemption for hospitals in certain States.—The Secretary would have authority under section 117 of the bill to exempt from the provisions of the Federal program hospitals in States that have a hospital cost-containment program of demonstrated effectiveness. In order to quality for an exemption, the State program would have to apply at least to those revenues to which the Federal program applies, cover at least 90 percent of the State's hospitals which would otherwise be subject to Federal cost containment, and demonstrate a capacity to contain inpatient revenue increases for all hospitals in the State within a range of not less than the rate of increase in the GNP deflator nor more than 110 percent of the basic inpatient hospital revenue increase limit. The 110-percent limit could, at the State's option, be adjusted to reflect wage increases to nonsupervisory hospital employees.

Similarly, the Secretary would have authority under section 119 of the bill to grant an exemption from Federal requirements to hospitals located in a State which has developed a proposed hospital cost-containment program that the Secretary determines would achieve essentially the same cost-containment objectives as those required under established State programs. Pass-through of nonsupervisory wage increases would be mandatory under new State programs.

The Secretary could also exempt a hospital whose exclusion he determined to be necessary to facilitate the conduct of an experiment or demonstration project consistent with the purposes of cost containment.

Disclosure.—Each hospital (including those exempted under an approved State program) would be required to submit to its health systems agency a semiannual report reflecting its rates for the 30 most frequently used hospital services; an annual report describing its ownership, management, and financial status; and copies of all cost reports submitted to cost payers. All such reports would be made available to the public by the health systems agency.

Enforcement.—Reimbursement above the cost-containment limit would be disallowed under medicare and medicaid. Excess revenues paid by any other cost payer or received by a hospital would be subject to a 150-percent tax on both the hospital and the payer. A similar tax on excess charge revenue would be imposed on a hospital unless the hospital placed the excess amount in escrow until it had incurred a shortfall in allowable charge revenue equal to the amount of excess previously acquired.

Hospitals which fail to provide the reports required to be submitted to the health systems agency would receive a 10-percent reduction in amounts otherwise payable under all programs supported in whole or in part by Federal funds.

Hospitals which seek to reduce costs by altering their admissions practices could be excluded by the Secretary from participation in medicare and medicaid. Moreover, the bill provides that citizens may bring civil suits against the Secretary and any other person or provider alleged to have violated or failed to have carried out various requirements of the bill.

II. NEED FOR THIS LEGISLATION—THE PROBLEM OF HEALTH CARE COST INFLATION

During the past 25 years, national health expenditures have increased not only in aggregate terms and on a per capita basis, but also as a percentage of the gross national product (GNP). In 1950, national health expenditures amounted to $12 billion, or 4.5 percent of the GNP. Preliminary estimates for fiscal year 1976 indicate that total health expenditures amounted to $139.3 billion, or 8.6 percent of the GNP. Expenditures for hospital care are the largest component of national health expenditures, reaching an estimated $55.4 billion in fiscal year 1976 for about 40 percent of total health care expenditures.

Expenditures for hospital care have risen annually at double-digit rates for a decade. During fiscal year 1965, the year prior to enactment of medicare and medicaid, expenditures for hospital care amounted to nearly $13.2 billion. Within 5 years the annual outlay had almost doubled to $25.9 billion, and by fiscal year 1976 expenditures had more than quadrupled to $55.4 billion. The average annual increase from 1965 to 1976 was 13.9 percent; adjusted to reflect constant prices in the general economy, the average annual increase was still 8.6 percent. If this rate of increase continues, total spending on hospital care alone could be $220 billion by 1986.

TABLE 1.—*Expenditures for hospital care, selected fiscal years, 1950–76*

Fiscal year	Total expenditures (billion)	Annual percentage increase
1950	$3.7	
1955	5.7	9.0
1960	8.5	8.4
1965	13.2	9.1
1970	25.9	14.5
1971	29.1	12.3
1972	32.7	12.4
1973	36.2	10.7
1974	41.0	13.3
1975	48.2	17.6
1976	55.4	14.9

A. The effects of health cost inflation

Public opinion polls indicate that rising health care costs are among the top three domestic concerns of the American people—even ranking ahead of rising energy costs. This concern reflects a fundamental fact—rising health costs add significantly to burdens in the taxpayer, on the wage earner, and on those consumers who lack adequate health insurance protection.

Each day American taxpayers pay $48 million for hospital care provided under medicare and medicaid.

Private health insurance premiums have jumped 20 to 30 percent in the last year, cutting into most workers' take-home pay. Indeed, Americans today must work more than 1 full month of every year just to pay for their health care. It takes about 2 weeks' wages to cover hospital costs alone. Higher health insurance premiums paid for fully or in part by employers drain off money that could be provided to workers in the form of higher wage increases or pension benefits

For the 18 million individuals in this country without any health insurance, the 19 million additional individuals with very inadequate insurance policies, and the 115 million people without major medical insurance coverage, rising health care costs—especially spiraling hospital costs—pose the direct threat of financial ruin, and a lifetime of indebtedness.

Rising heatlh care costs have also hampered the ability of Federal and State governments to meet other pressing social problems. For example, between 1966 and 1978, the HEW health budget increased from $3 billion to $44.5 billion. Of this increase, $37.3 billion has gone to pay for benefits under medicare and medicaid, with only $4.2 billion left over for expansion of other governmental health activities beyond their 1966 level. The rapid increases in hospital costs have also made it necessary for many States to make serious cuts in ambulatory care services under medicaid.

TABLE 2.—*Total health expenditures between 1975 and 1980*

[In billions of dollars]

Fiscal year	Percentage of GNP	Amount	Estimated amount
1975	8.4	$122.2	
1976	8.6	139.3	
1977	8.7		$159.7
1978	8.9		181.1
1979	9.0		204.5
1980	9.1		228.8

TABLE 3.—*Expenditures for hospital care between 1975 and 1980*

Fiscal year	Amount	Estimated amount
1975	$48.2	
1976	55.4	
1977		$64.6
1978		74.4
1979		85.7
1980		97.4

B. Causes of hospital cost escalation

The amount spent for hospital care has risen because of increases in cost per patient-day and in the number of hospital days. The former factor is much more important, accounting for about 90 percent of the increase. In spite of the intense and sustained inflationary trends in hospital costs, the demand for hospital care has not abated. A major reason for this is the corresponding growth in health insurance payments, which now account for 91 percent of all hospital revenues. Because private insurers and public third-party payers, such as medicare and medicaid, finance the overwhelming proportion of the care rendered in community hospitals, the actual "net costs" of care for most patients at the time of hospitalization are very small. The patient and his agent, the physician, therefore can elect the most expensive care available—more expensive than they might elect if the third-party payment programs did not exist.

The patient has limited ability to distinguish necessary from unnecessary care. Once in a hospital, he has a strong interest in receiving the best care available, regardless of the cost. The insuring agent has usually chosen not to question the value of or need for the services provided. The physician, who acts on the patient's behalf, is inclined to use all the services that will improve his diagnosis and therapy or reduce the possibility of malpractice suits. The hospital administrator is concerned that the quality of care be of a high standard and that his facilities and equipment be such as to attract physicians to the hospital. The administrator is therefore willing to meet physician's requests to expand the scope and complexity of the services the institution provides. This entails little financial risk for the administrator because the majority of hospital insurance payments are based on the costs incurred. If costs rise because of new or more intensive testing, more complex procedures, or more staff, higher reimbursements will be forthcoming.

This unique set of characteristics has encouraged the following hospital and communitywide inefficiencies in the use of health resources:

Uneconomic hospital operation. — Inefficiency occurs when the combination of resources used to provide hospital services is more costly than necessary.

Uneconomic provision of services.—Inefficiency occurs when services are provided that cannot reasonably be expected to have a medical value that justifies their cost.

Excess community capacity to provide general care.—Even a carefully operated hospital may be relatively uneconomical if demand is low relative to capacity.

Excess community capacity to provide various forms of special-purpose care. — An otherwise economically run hospital may have a special facility that is underutilized because other hospitals in the area have developed the same capability.

Excessive utilization resulting from the existence of excess hospital facilities or equipment. — Unnecessary hospital admissions and utilization of procedures and equipment may be stimulated by the availability of capacity because no participant is motivated to be cost conscious.

C. Prior efforts to moderate hospital costs

The problem of spiraling hospital costs has not gone unnoticed on either the Federal or State levels. Many of the theories mentioned above as to the causes of hospital cost inflation have provided theoretical bases for previous efforts to constrain increases in provider costs. The programs discussed below represent the major examples of past and current efforts to hold down the ever-increasing costs of hospitalization.

1. Economic stabilization program.—The economic stabilization program (ESP) established a series of economy-wide wage and price controls which were designed to reduce inflation by about one-half in the economy as a whole. The program began with a freeze on wages and prices in August 1971 (phase I). The freeze was replaced in December 1971 with control programs for each major sector of the economy (phase II), including health.

For the health care industry, phase II consisted of a ceiling of 6 percent per year (adjusted for changes in volume of services) on increases in price and revenues per inpatient day for institutional providers of health care such as hospitals. Within the overall 6-percent ceiling, a 1.7-percent increase in expenditures for new technology was provided. In adidtion, separate ceilings were applied to wage-related expenses (5.5 percent) and to nonwage expenses (2.5 percent). Non institutional providers, such as physicians and dentists, were allowed a 2.5-percent increase per year in their prices. The effect of the phase II controls was approximtely a 50-percent decline in increases in hospital room and board rates and a 25-percent decline in cost per adjusted patient-day and cost per adjusted admission.

Phase III, which lasted from January 11, 1973, to June 13, 1973, was an extension of phase II for many areas of the economy, including the health care industry. On June 13, 1973, another freeze on the prices of all commodities and services began and lasted until July 1, 1973, when it was superseded by Phase IV. Phase IV covered many industries, including health, until April 30, 1974, when ESP authority expired and the program ended.

The goals of the hospital controls under Phase IV as expressed by then President Nixon were to reduce the excessive rate of increase in the cost of hospital stays; to moderate increases in new services and selectively control capital expenditures; to provide economic incentives for the substitution of less expensive ambulatory care for inpatient hospital care; to provide for the development of State rather than Federal administration of health care controls; to allow internal flexibility and incentives for health care managers to improve productivity; and to be responsive to cost-saving innovations, such as health maintenance organizations.

For the health care industry, phase IV included:

A limitation of 7.5 percent on increases in hospital charges and costs per inpatient admission, with adjustments for volume of services.

A 6-percent-increase limit on outpatient charges per procedure.

A 4-percent-increase limit on medical practitioners' aggregate annual fees, with a 10-percent-increase limit for individual fees over $10 and a $1-increase-limit for fees under $10.

A 6.5-percent-increase limit for long-term care institutions on average realized revenues per day by class of purchaser (for example, medicare, medicaid, and all other) or level of care (for example, skilled nursing care, or existing levels by State or by institutions).

The phase IV controls differed from phase II in their emphasis on the total costs of a hospital stay, also called an admission, rather than the individual price per day. In addition, phase IV treated separately increased costs due to new and approved capital expenditures and separated controls on inpatient and outpatient services.

Before ESP went into effect, the annualized rates of increase in prices of medical care and of hospital charges (semiprivate room) exceeded that of prices in the economy as a whole. During the various phases of ESP (August 1971 to April 1974), not only were the rates of increase for medical care and hospital charges reduced, but the rates of increase dropped below prices in the economy as a whole. In the post-ESP period, after the controls were lifted, the rate of increase for medical care and hospital charges rose above the pre-ESP levels and once again exceeded prices in the economy as a whole (see table 1). This temporary effect in lowering prices was due in part to the fact that ESP did not attempt to address the underlying problems in the process of health care delivery, some of which are the unusual system of supply and demand where the users of health care usually pay only a small portion of the costs they incur; the maldistribution of manpower; and the high costs of medical and technological advances.

2. Hospital reimbursement limits under

medicare and medicaid.—The 1972 amendments to the Social Security Act authorized the Secretary of HEW to establish prospective limits on the costs to be reimbursed under the medicare program. The Secretary was given broad discretion in the selection of the institutions and kinds of costs to which the limits are applied and in the method of setting the limits.

Under present policy, cost limits are established each year for the routine cost portion of hospital costs—essentially, the cost related to bed and board. Individual hospitals are assigned to one of various groups, depending on the hospital's size and the per capita income of the area where it is located. The cost limit for hospitals in each group is set by a formula that establishes the limit high enough to permit the routine costs of well over 80 percent of the hospitals to be covered in full.

In fiscal year 1975, the first full year of implementation, approximately 345 hospitals were reported to be in excess of the limit by a total of $36 million. Fiscal year 1976 data are not yet complete, but thus far 334 hospitals have been reported to be in excess of the limit; it is expected that the total will increase above the fiscal year 1975 number when all reports are in.

The objective of the cost limits provision is to establish ceilings that reasonably prudent and cost-conscious hospitals can be expected to live within. And by setting the limits in advance, it was intended that high-cost hospitals could, if they wished, undertake the cost-reduction measures to avoid loss of reimbursement. Where a hospital exceeds the limit and wishes to make up the lost income by imposing a special charge on the patients, the patients must be advised of the situation in advance.

The 1972 legislation also authorized medicare, medicaid, and the maternal and child health program to withhold reimbursement from hospitals for certain capital expenditures for plant, property, or equipment if the designated planning agency has determined them to be inconsistent with State or local health facility planning requirements. The reimbursement amounts that may be withheld include depreciation, interest on borrowed funds, and other costs related to capital expenditures. Where a proprietary hospital is involved, the return on equity capital is also affected. The provision applies only to expenditures that exceed $100,000, that would change the bed capacity, or that would substantially change the services offered by the hospital unless the State chooses to give the provision wider applicability.

3. Federal experimentation and State programs.—The Department of Health, Education, and Welfare is conducting a range of research and experimental activities relating to reimbursement and is attempting to control costs under experimental authorities included in the Social Security Amendments of 1967 and 1972, and section 1526 of the National Health Planning and Resources Development Act of 1974. The 1972 amendment authorized a broad program of experimentation in prospective reimbursement and other alternative reimbursement and ratesetting methods.

Under its authority, the Department evaluated State and local systems which were already operating without Federal funding, and began supporting demonstrations, evaluations, and developmental projects in other States.

Three principal prospective reimbursement methodologies have been identified, which are generally used in some combination:

(*a*) *Budget review approach.*—Involving setting or approval of reimbursement rates based on a detailed review of the projected budgets of individual hospitals and their departments. This approach is used in Maryland in its ratesetting, and is used in New Jersey and Connecticut in combination with a formula approach. Budget review can be done by exception, involving review only of those portions of an institution's budget exceeding established screens.

(*b*) *Formula methods.*—Involving the use of formulas to determine rates of payment, or to determine ceilings or target rates under current reimbursement practices. New York uses a formula approach, and other States use this approach in combination with the other methods.

(*c*) *Negotiated rates.*—Involving joint decisionmaking by the hospital and the rate setter. Rhode Island uses a negotiated budget methodology.

HEW has identified five elements which it believes are essential in a prospective rate-setting system:

(1) All hospitals within a given system should submit accounting and reporting data based on uniform systems.

(2) Health planning and rate setting should be closely coordinated.

(3) Prospective rate setting systems should focus on total hospital expenditures, including utilization factors.

(4) Prospective rate setting systems should cover all payers.

(5) Hospital participation in prospective rate setting systems should be mandatory.

In addition to evaluations of ongoing activities, HEW is funding a number of demonstration and developmental activities to gather further information on ratesetting systems.

A recent American Hospital Association survey identified 25 rate-regulation programs, including several Blue Cross prospective reimbursement plans. Budget review was the principal method used but often in combination with other methods. A total of 2,070 hospitals and 1,407 nursing homes participated in the programs surveyed. In addition to the 25 programs currently in effect, the survey identified 13 States as contemplating some form of program.

III. HISTORY OF LEGISLATION

The legislation was introduced on April 21, 1977, by Senators Kennedy, Hathaway, and Anderson and was referred to the Committee on Human Resources and the Finance Committee. On May 24, May 26, June 17, June 21, and July 6, 1977, the Subcommittee on Health and Scientific Research held hearings on this legislation and alternative methods of controlling the increasing costs of hospital care.

Testimony was received from the Department of Health, Education, and Welfare which supported the legislation. There was general agreement among the many other witnesses that there is a need to control the increasing costs of health care, although many did not support the legislation in its entirety.

Witnesses included:

May 24, 1977

Hon. Joseph A. Califano, Jr., Secretary, Department of Health, Education, and Welfare.

Hon. Michael DuKakis, Governor, Commonwealth of Massachusetts.

Charles M. O'Brien, Jr., Administrator, Georgetown University Hospital.

Leo J. Gehrig, M.D., senior vice president, American Hospital Association.

May 26, 1977

Douglas A. Fraser, president, International Union United Auto Workers.

Andrew J. Biemiller, Bert Seidman, American Federation of Labor, and Congress of Industrial Organizations.

Michael D. Bromberg, Andrew W. Miller, Federation of American Hospitals.

Jere W. Annis, M.D., William C. Felch, M.D., American Medical Association.

Terrance Pitts, supervisor, Milwaukee County, Wisconsin, National Association of Counties.

June 21, 1977

Mr. Bernard Tresnowski, executive vice president, Blue Cross Association.

Mr. Morton D. Miller, vice chairman of the board, the Equitable Life Assurance Society of the United States.

Mr. Henry DiPrete, second vice president, group operations, John Hancock Mutual Life Insurance Co.

Mr. Robert J. Kilpatrick, president, Connecticut General Life Insurance Co.

Mr. William McC. Hiscock, executive director, Central Maryland Health System Agency, Inc., American Association for Comprehensive Health Planning.

Mr. James M. Hacking, American Association of Retired Persons, National Retired Teachers Association.

June 17, 1977

The Honorable Thomas J. McIntyre, U.S. Senator, State of New Hampshire.

Mr. Joe Czerwinski, National Conference of State Legislatures.

Mr. Mancur Olson, Maryland Health Services Cost Review Commission.

Joanne E. Finley, M.D., New Jersey State Commissioner of Health.

Robert P. Whalen, M.D., Commissioner, New York State Department of Health.

Mr. Stanley Wisnjewski, Services Employees International Union.

Mr. Moe Foner, National Union of Hospital and Health Care Employees.

David D. Thompson, M.D., Director, The New York Hospital, New York City, Chairman, Council of Teaching Hospitals, Association of American Medical Colleges.

Mr. David L. Everhart, President, Northwestern Memorial Hospital, Chicago, Chairman, Council of Teaching Hospitals, Association of American Medical Colleges.

Robert M. Heyssel, M.D., Executive Vice President and Director, The Johns Hopkins Hospital, Baltimore.

Prof. John D. Thompson, Chief, Division of Health Services Administration, Yale University School of Medicine.

Edward S. Hyman, M.D., American Council of Medical Staffs.

July 6, 1977 (in Bangor, Maine)

Isador Seeman, Mike Samuels, Ph. D., Department of Health, Education, and Welfare.

Thomas W. Cathcart, Blue Cross and Blue Shield of Maine.

Stanley Hanson, Maine Health Systems Agency.

Fletcher Bingham, Maine Hospital Association.

Kenneth A. Hews, Eastern Maine Medical Center.

Andrew Fennelly, Maine Health Care Association.

Kenneth Robinson, Maine Health Care Association.

Kenneth Morgan, AFL–CIO.

D. Jeffrey Hollingsworth, Maine Medical Association.

Dr. Harrison Aldrich, Maine Osteopathic Association.

Derek V. Bush, Maine Coast Regional Health Facilities.

Martin S. Ulan, York Hospital, York, Maine.

Janet Beach.

In addition, statements were supplied for the record by the following organizations and individuals:

Alice M. Rivlin, Director, Congressional Budget Office, U.S. Congress.

The American Association of Neurological Surgeons.

American Federation of State, County, and Municipal Employees.

American Mutual Insurance Alliance.

American Nurses Association.

The legislation was subsequently considered in open executive session by the Subcommittee on Health and Scientific Research on July 26, 1977, at which time the bill was amended and ordered reported to the Committee on Human Resources. The amended bill was considered in open executive session on July 29 and August 2, 1977, by the Committee on Human Resources, amended further, and as further amended, ordered reported favorably to the Senate.

IV. COMMITTEE VIEWS

The major purpose of this legislation is to establish a transitional hospital cost containment program that will constrain the rate of increase of inpatient hospital costs. The bill would also provide for the publication and disclosure of information designed to encourage efficient use of available hospital resources. The bill would also provide for the development of permanent reforms in order to increase the efficiency, effectiveness, and quality of health care in the United States.

The committee recognizes that its bill makes numerous important and substantive changes in the way that health care will be financed and delivered. At the time that this bill was considered by the committee other important proposals for changes in the financing and delivering of health care were recommended to the committee by its members and by other Senators. Many changes in the Health Planning and Resources Development Act of 1974 (Public Law 93-641) were suggested. These proposals deserve serious consideration and such consideration will be forthcoming in the months ahead as the implementation of Public Law 93-641 is thoroughly reviewed.

The committee would like to highlight the rationale for and the intent of many of the changes in existing law that are proposed by the committee's bill.

The committee's bill employs a revenue increase limit applicable to all hospitals included in the program. The committee believes that this method can and should be implemented quickly and can be administered without unnecessary complexity, as this method does not rely on the development of new procedures and technology. For example, new methods of classifying hospitals that would be capable of distinguishing between high costs arising from atypical services and differing patient needs and the development of new reporting and compliance systems are not needed.

It is the committee's view that adequate methodology is not presently available for a sophisticated system of hospital classification; however, the Secretary is instructed to develop and then implement a system which includes a system of hospital classification. In this respect then, title I accepts the wide variations in hospital costs and charges for the transitional period but limits further inflationary pressures on government and private financing systems while permanent, more sophisticated cost containment programs are being developed and put in place.

The committee realizes that the calculations imposed by section 111 of the bill to adjust the limits imposed starting January 1, 1979, to the various accounting years of hospitals may appear complex. This approach is preferable, however, to the alternative of forcing adaptation of every hospital's accounting year to the administrative needs of a cost containment program which was rejected by the committee as inappropriate and unduly costly to hospitals in a transitional program. It should be noted that those who will actually be performing the limit calculation, such as hospital administrators, accountants, and medicare cost reimbursement technicians, will find that the calculations involve relatively minor adaptations of present techniques to data that is already reported for medicare purposes.

In order to discourage a hospital from increasing its costs to the revenue limit, the committee's bill utilizes a fixed base plus a compounded percentage increase approach which permits a hospital to retain for future years any percentage by which it comes in under the limit in a particular year. Thus, the system avoids incentives to come up to the limit that would exist under a "use or lose system." The basic limit is used during intervening years because the adjustments for patient loads are always based on changes between the subject and base years.

Section 112 of the committee's bill requires the Secretary to promulgate annually a basic limit on increases in inpatient hospital revenues to be effective in the following calendar year. In the first year, the basic limit would be set by a formula reflecting general price trends in the economy as measured by the rate of increase in the implicit price deflator of the gross national product ("GNP deflator") in the 12-month period ending September 30 of the year of promulgation, plus an additional allowance for increases in the intensity or real level of services provided per admission. The intensity factor would be equal to one-third of the difference between the rate of increase in the GNP deflator and the average annual rate of increase in hospital costs in the 2 preceding years.

This basic limit is tied to percentage increases in the gross national product deflator. This was chosen because it is the broadest and most representative measure of inflation in the general economy presently available. The bill provides for an expansion factor, for example, one-third of past differences between general inflation and the rise in hospital costs which the committee believes will allow for continued expansion of needed services. The committee believes that it is essential for this type of program that hospitals are compensated for expected inflation in the overall economy when calculating the basic limit. Thus, if the GNP deflator estimate is significantly lower than actual inflation, paragraph (2) of section 112 allows for such adjustments. The adjustment period is limited to hospitals that have ended the fiscal years no more than 3 months prior to the date of the adjustment period. This is to avoid any need for cost payers to reopen cost reports after they have been filed, which generally is about 90 days after the close of a fiscal year.

Within 1 year after enactment, the Secretary would be required to develop and thereafter to promulgate the basic limit in accordance with a methodology which more accurately reflects the rate of increase in the prices of the goods and services which go into the delivery of hospital services. Simultaneously the committee intends that the Secretary shall promulgate an expanded exceptions process.

Under section 113 of the committees' bill the basic limit would be adjusted to take into account major changes in a hospital's patient load. No revenue adjustments would be made if the hospital's volume, since the base accounting year, had increased by less than 2 percent or decreased by less than 10 percent. Increases or decreases in volume outside these limits would result in allowable revenue increases or decreases, respectively, at the rate of one-half of the allowable per-admission revenue limit for each admission above or below the limit, assuming there has been no change in admissions. The full amount of allowable revenue per admission would be deducted for declines in volume below 15 percent, and no recognition would be given to increases in volume above 15 percent except as expressly provided under the exceptions process.

The volume load formula is designed to compensate hospitals for significant changes in patient load, while encouraging reduction in admission and lengths of stay through better utilization review. If volume declines by up to 10 percent, no reduction in revenue is imposed, thus providing an incentive to prevent unnecessary admissions. For hospitals which experience small increases in volume load—up to 2 percent—total revenue is also to be constant with the hospital expected to absorb the modest variable cost increases that would be involved in such a change. There is also an incentive to reduce lengths of stay to avoid the need to economize further. Automatic adjustments are allowed for increases in volume beyond the initial range; such adjustments add or subtract revenue approximating marginal costs.

In the case hospitals experiencing dramatic increases in patient volume, which the committee expects will be a very small proportion of all hospitals, no adjustment is allowed for increased volume load beyond 15

percent and there is imposed a dollar for dollar reduction in revenue on hospitals experiencing decreased volume beyond 15 percent unless the reason for such changes are closely examined through the exception process which is outlined in section 115.

The marginal cost of 50 percent was chosen recognizing the body of existing research, and although an imperfect figure, the committee felt reflected fairly the marginal cost to the hospital of increased admissions.

The committee believes that when particular kinds of services cease to be furnished by a hospital, the past amounts of revenues from such services should be removed from the hospital's base year revenue calculations. Section 114(b) of the committee's bill includes such a provision.

For example, a CT "CAT" scanner is operated by the hospital in the base year, but leased to a physician in the subject year, the CAT scan charges attributable to Medicare inpatients in the base year would be deducted from Medicare reimbursement in the base year. Similar adjustments would be made in base revenue from each other cost payer and total base year CAT scan charges would be deducted from total base year inpatient charges in determining allowable reimbursement in the subject accounting year.

The committee believes however, that charges attributable to inpatient services that were discontinued, on recommendation of the State health planning and development agency based on a finding that the services were inappropriate, should not be deducted from the base year as otherwise required above. Thus a hospital receives an incentive for the discontinuance of any inappropriate service in that it can continue to pay for debt and redirect the full amount of the operating costs of the discontinued service to other services that will continue to be provided by the hospital.

Section 115 of the committee's bill gives the Secretary the authority to grant an exception to the inpatient hospital revenue increase limit otherwise applicable in certain cases where (1) a hospital's volume load had increased or decreased by more than 15 percent or (2) the hospital had undertaken major changes in facilities or services approved by the State health planning and development agency, provided the hospital could also demonstrate an existing or potential revenue loss which would adversely affect the hospital. Any hospital granted an exception would be subject to an operational review of its effectiveness and efficiency by the HEW Audit Agency, whose report would be made public. Continuance of the exception would be contingent upon the hospital's implementation of any recommendations arising out of the operational review. A modified exceptions process may be used in future years under the revised method for determining the basic limit. This modified exceptions process requires congressional approval.

The committee, in formulating the exceptions process, attempted to draw a balance between simplicity of administratability within government, at the Federal and local level, and fairness and equity for individual institutions in the manner by which they could have access to the exceptions process. It is the committee's view that the Secretary should have appropriate discretion to implement this process.

Whenever an exception is given, the Secretary may require the hospital to undergo an operational review. The findings of such a review are to be made public, and the hospital will be required to implement the recommendations made as a result of the review if it wished to continue to receive the added revenues from the exception. This procedure is likely to rectify some of the factors which are contributing to the need for an exception and subsequently to reduce the number of exceptions.

In all cases when an exception is granted, the additional allowable revenue should be related to the cause of the exception and the revenue should be at a level adequate to maintain a current assets to liability ratio of two.

The committee felt it was essential that an appeals mechanism be instituted when a hospital believed that the decision of the Secretary was adversely affecting the hospital. The Provider Reimbursement Review Board was chosen by the committee to bear the appeals because it was judged that this board, which previously had been established to judge determinations made for the purposes of medicare reimbursement has been doing an adequate job. This would also avoid the need to create a new hearing body for the purposes of the committee's bill.

Under section 117 of the committee's bill the Secretary would have authority to exempt from the provisions of the Federal program hospitals in States that have a hospital cost-containment program of demonstrated effectiveness. In order to qualify for an exemption, the State program would have to apply at least to those revenues to which the Federal program applies, cover at least 90 percent of the State's hospitals which would otherwise be subject to Federal cost containment, and demonstrate a capacity to contain inpatient revenues increases for all hospitals in the State within a range of not less than the rate of increase in the GNP deflator nor more than 110 percent of the basic inpatient hospital revenue increase limit. The 110 percent limit could, at the State's option, be adjusted to reflect wage increases to nonsupervisory employees.

Similarly, the Secretary would have authority under section 119 of the bill to grant an exemption from Federal requirements to hospitals located in a State which has developed a proposed hospital cost-containment program that the Secretary determines would achieve essentially the same cost-containment objectives as those required under established State programs. Pass-through of non-supervisory wage increases would be mandatory under new State programs.

Under section 118 of the bill the Secretary could also exempt a hospital whose exclusion he determined to be necessary to facilitate the conduct of an experiment or demonstration project consistent with the purposes of cost containment.

While Federal controls are necessary on a national level to restrain hospital cost inflation in the short run, the committee was persuaded that, under certain well defined circumstances, cost containment efforts at the State and local levels could be stimulated. Sections 117, 118, and 119 provide three avenues for State authorities to obtain exemptions from the Federal program for hospitals within their boundaries. Firm Federal guidelines underlie each alternative to insure that the exemption may be retained only if an adequate level of cost savings is achieved through a well-administered program.

A number of factors entered into the committee's decision to encourage the long-term growth of State cost containment efforts. Testimony before the committee documented some success by State programs already in operation. Variations among State cost containment techniques demonstrate that some State programs have fostered successful experimentation and have attuned regulatory controls to widely differing geographic, economic, political, and health care conditions.

The committee believes that State programs should facilitate coordination of cost control efforts with local health planning and quality review programs, and the committee intends that there should be coordination between the ratesetting agency and certificate of need and/or 1122 reviews. At a minimum this should mean: (A) that the State health planning and development agency (SHPDA) may be—although need not be the ratesetting agency; (B) the ratesetting agency should not duplicate functions performed by the SHPDA when the ratesetting agency is distinct from the SHPDA—for example, if the SHPDA approves a capital expenditure the ratesetting agency must include reasonable operating costs and the capital costs in the rate, but if the SHPDA disapproves an expenditure the expenditure should not be included in the rate; and (C) the role for the HSA's and SHPDA's under section 117 should be analogous to their role under the Federal title I program.

Section 117 is primarily designed to grant existing State cost control programs meeting certain standards an immediate exemption from the Federal program.

The committee intends that in those States where a cost containment program is already attaining the goals of this title, it is reasonable to exclude hospitals located in that State from the application of this title. The requirement that a State have a program, means that a State must have a program for containing hospital costs, rather than the interpretation that the State must be the sole operator of the program. Responsible parties, including hospital associations, insurers, and consumer groups, can be permitted to participate and share with the State in operating the State's program.

The committee developed the criteria set forth in section 117 in order to assure that only sound programs are approved by the Secretary. However, a sound program can take on several forms, and the Secretary should not restrict his approval to those programs that are based in legal authority. A contractual agreement is sufficient authority to assure the quality, continuity, and responsiveness of a State program. A State program could be considered acceptable, even if it were not based completely on a legislated program as long as the Governor or chief executive of the State could provide the necessary assurances to the Secretary. A State program would have to assure the accountability of all hospitals participating in the program, whether that participation is grounded in State law or in a binding agreement reached either under State law or under the sponsorship of the Governor or chief executive of the State. Upon termination of such agreement, all hospitals would revert back into the program mandated in title I, even if the termination of the agreement under which the section 117 exemption had been granted occurred during a fiscal year. Thus there would be no time when hospitals in these States would not be subject to any cost containment program.

In using the phrase "capable of containing hospital costs" in section 117(1), the committee intends that the Secretary have discretion in approving State projects. In exercising such discretion, the Secretary should examine the program for the following characteristics:

(a) A mutually binding agreement or statute, that commits the various parties to engage in cost containment.

(b) An assurance that hospitals will participate in the program.

(c) An assurance that sanctions exist, that are sufficient to assure participation.

(d) A history in the State that shows innovation, experience, and effectiveness in various aspects of health planning, and cost controls (whether they are existing programs or predecessors).

In making the determination, that a State meets the requirements of section 117, the Secretary should look for one or more of the following: (1) Rate review program; (2) experiments in prospective review; (3) certificate of need; (4) decertification program;

(5) effectiveness of planning regulations; (6) effectiveness of voluntary programs; (7) statutes, contracts, or agreements relating to cost containment.

The committee included an optional wage pass through for nonsupervisory hospital employees in states exempted from the Federal cost control program pursuant to section 117. The committee believed that to require a mandatory wage pass through in those states that may qualify for an exemption pursuant to section 117 would necessitate legislative action in many of these states which would disrupt state cost control efforts that are already successfully underway.

Section 118 would exempt from the Federal ceiling certain prospective reimbursement experiments operating under existing law. The committee accepts the administration's recommendation that such programs be permitted to operate free of additional constraints until the potential of various prospective reimbursement methodologies being tested may be fully evaluated.

The committee intends that section 119 of the bill stimulate the development of new cost containment programs by the States not qualifying for exemptions under sections 117 or 118. The criteria contained in section 119 are designed to be as flexible as possible and still insure that State programs meet Federal priorities.

Section 119(a)(8) authorizes the Secretary to promulgate such additional criteria as the Secretary deems necessary to accomplish the cost containment objectives of title I. The purpose of this provision is to provide the Secretary with some measure of administrative flexibility to meet changing and unforeseeable conditions; however, the Committee intends that such additional criteria be published by the Secretary early enough to give the States sufficient advance notice to develop cost containment programs with full knowledge of all qualifying conditions. If a State program meets the criteria of section 119, including those announced under subsection (a)(8), the Secretary would be required to approve an exemption for that program.

The committee avoided more detailed restrictions on State programs in the interest of local experimentation and flexibility. However, it would urge States developing cost containment plans to consider the following points:

1. The "identifiable unit of State government" designated to administer a cost control program should be an agency which is not under the supervision of the State medicaid Administrator. Such separation will help avoid potential conflicts of interest between a State's role as a regulator of costs and a purchaser of care.

If a State establishes a cost control commission, its members should be appointed for staggered terms, should have an understanding of the delivery and financing of health services in the State, and should not be otherwise employed by the State, a local government, a health care institution, or be otherwise engaged in the delivery of financing of health services.

2. Although the use of varying cost-saving methodologies are acceptable under section 119, the committee encourages the further development and refinement of prospective budget review techniques which examine the feasibility of budget review under a system which classifies hospitals by bed size, type, and diagnostic case mix.

3. Although this section provides for aggregate rate of increase in hospital revenues, the committee feels that State programs should discourage the shifting of costs between purchasers. However, rate differentials between payers may be justifiable where the financial relationship between any payer and the institutional provider results in an identifiable saving in required or necessary costs.

4. Positive incentives to reduced costs and administrative efficiency should be an integral part of any long term cost containment effort. These might include programs permitting hospitals to retain achieved savings, up to specified limits, and application of costs savings to experiments in administrative efficiency.

5. In implementing legislation, the States should clearly identify a viable means for continued financing of cost containment programs which might include taxation of institutional providers.

6. State programs should include a policy review board, with membership appointed for staggered terms and representative of health care providers, third party payers, and the public. The board must actively encourage coordination between health planning, quality review, and cost containment activities.

7. In evaluating revenues related to the financing of capital expenditures, the State cost control agency should approve revenues only for those facilities and services which have been approved by the appropriate health planning authority.

The committee intended that States receiving an exemption pursuant to section 119 include a mandatory wage pass through for non-supervisory hospital employees. The committee believed that the implementation of State cost control efforts pursuant to section 119 would not be delayed by requiring a mandatory wage pass through as these States presently do not have cost control programs and will need to enact enabling legislation establishing cost control programs. A mandatory wage pass through could, therefore, be included as part of a single legislative action.

Recognizing that many States may be reluctant to initiate hospital cost control programs without Federal assistance, a $10 million authorization for startup grants is included under section 119, in addition to existing authorizations for experimental programs under section 402 of the Social Security Amendment of 1967, 222 of the Social Security Amendment of 1972, and 1526 of the Public Health Service Act.

The committee, when it exempted from the revenue increase limits those hospitals that had in the 3 previous accounting years preceding the subject accounting year, an average annual admissions of between 2,000 and 4,000 admissions, intended that only those within a standard metropolitan statistical area and are sole community providers be included for the exemption. It is the committee's intent that the definition of sole community provider used by the Secretary for this exemption be the same definition as is used under title XVIII of the Social Security Act. The committee, after careful review of data on the aggregate costs of medical care in these small hospitals, was of the belief by excluding these hospitals the administration of the program would be considerably easier and the resultant loss of savings relatively small.

Federal hospitals are especially excluded from coverage by the provisions of each title of the committee bill. These Federal hospitals include Veterans' Administration hospitals, Department of Defense hospitals, Public Health Service Hospitals, Bureau of Prisons Hospitals, or any other hospital run by a Federal department, agency, or instrumentality. The committee intends that the Secretary define a Federal facility so as to include a facility which was a Federal facility for any day in an accounting year.

Although Federal hospitals are excluded from the revenue limits of title I, the committee believes that such hospitals should work closely with the other health care providers in their respective areas and that the Federal budgetary process should take into account the limits promulgated under section 112.

The above illustrates the importance of close Congressional scrutiny of the interrelations in planning for health services between the Federal hospitals and non-Federal hospitals.

Under section 124 of the committees' bill the revenue increase limit otherwise applicable in the case of a particular hospital would be adjusted to reflect increases in the wages of the hospital's nonsupervisory employees.

It is the committee's view that nonsupervisory personnel have in the past sometimes been subjected to financial discrimination by individual hospitals. The committee thus exempted from the revenue limit the wages of nonsupervisory personnel as defined by the National Labor Relations Act. The committee intends that shift differential and overtime be included in this wage exemption.

Section 124(b)(3) provides that to the extent that a hospital's exempted wage increases to nonsupervisory employees does not exceed the adjusted inpatient hospital revenue increase limit applicable under section 124(b)(2), the difference may then be applied toward wages for increased numbers of employees whose wage increases in future years would be subsequently exempted under the provision of that section.

Under section 125 of the bill, each hospital (including those exempted under an approved State program) would be required to submit to its health systems agency a semiannual report reflecting its rates for the 30 most frequently used hospital services; an annual report describing its ownership, management, and financial status; and copies of all cost reports submitted to cost payers including the percent increase in wages for nonsupervisory personnel. All such reports would be made available to the public by the health systems agency.

It is the committee's belief that the public needs to be made more aware of the costs of health care and their effects and should be more involved in planning for changes in the financing and delivering of health care at the local level. By having access to the information required under section 125, the health systems agencies, the State health planning and development agencies, and individual citizens will be better informed. The health systems agencies by having comparable information from multiple hospitals will be able to develop, along with the State health planning and development agencies, a more sophisticated State medical facilities plans and State health plans.

Section 130 of the bill provides that citizens may bring civil suits against the Secretary and any other person or provider alleged to have violated or failed to have carried out the various requirements of the bill. This section is intended to provide a measure of accountability under several specified sections of the bill: 124 (Exemption of Nonsupervisory Personnel Wage Increase from the Revenue Limit), 125 (Disclosure of Fiscal Information), 126 (Improper Changes in Admissions Practices), 128 (Excise Tax on Excessive Payments for Inpatient Hospital Limits, 129 (Payment Below the Established Limits). These provisions, although not part of the basic restraint mechanism are important safeguards of the integrity of the entire cost containment program and are worthy of special provisions to assure that they are implemented and followed to the full extent.

The court, in issuing any final order may award cost of litigation including a reasonable attorney's fee based on the prevailing rates for such services. The purpose of this provision was to assure that legitimate actions under this section will not be discouraged because of lack of financial resources of a party contemplating such action. The setting of an award by the court is designed to discourage spurious challenges yet not discourage action brought in the public interest.

Within 1 year of the date of enactment of this bill after consultation with the Bureau of Labor Statistics of the Department of Labor, the Bureau of Economic Analysis of the Department of Commerce, and other appropriate public and private organizations, the Secretary is required to promulgate a figure that more accurately reflects the rate of increase in the prices of the inputs necessary for the production and delivery of hospital services. When this index is promulgated it will replace that promulgated pursuant to section 112. The purpose of this provision is to replace the general economy measure of inflation, the GNP deflator, as the basis for establishing limits on revenue increases. This market basket will more accurately represent the actual proportions in which hospitals combine their inputs. The new figure is to be based on the best information available at the time it is promulgated, and should be sensitive to the goals of the national transitional cost containment program.

Additionally, at the same time the Secretary promulgates this new index, he is expected to make changes in the exception process as deemed necessary or appropriate. It is the committee's expectation that changes in the exception process should reach a balance between effective administration and against the needs of the individual institutions. The exception process should allow greater attention to the unique or special needs of institutions, but any exception must be specifically for costs incurred which are greater than the limits promulgated in this section.

In order to qualify for an exception the committee believes that the State health planning and development agency designated under section 1521 of the Public Health Service Act for the State in which the hospital requesting the application is located should make a finding that the hospital has demonstrated the need for the appropriateness of the proposed service or facility.

The purpose of these provisions is to grant the Secretary the flexibility to expand the exceptions process after 1 year based on his assessment of the need for such expansion and the methodologies and administrative resources available to administer them. The section further emphasizes the concept of community needs and appropriateness as determined by the State health planning and development agencies.

In order to insure an orderely transition to the new provisions, with a minimum amount of administrative burden to hospitals, the government, and other third party payers, the changes in the program will apply to hospitals in the accounting years that begin after the changes are in effect.

The Secretary is required to submit his proposed changes in the inpatient revenue increase limit and in the exceptions process to the Congress together with a detailed statement of the reasons underlying these changes. The changes will go into effect unless either House acts to prevent the changes within the prescribed time. The purpose of this section is to provide for a streamlined process for congressional comment or disapproval of the Secretary's proposed changes, but one that does not require the Secretary to request new legislation which could significantly delay implementation of changes designed to improve the responsiveness of the cost containment program to the needs of the individual hospitals.

The committee believes that the Hospital Cost Containment Act is only a first step toward controlling the escalating costs of health care. It fully expects the Secretary to arrange for the conduct of a study or studies as mandated in section 133 of the committee's bill of methods for controlling the cost and/or revenue received for outpatient hospital services, long term care services, and ambulatory care services including physician services. These studies are required to be completed within 1 year, and submitted to Congress within 30 days of completion. The reports are to include the recommendations for legislative and administrative action should also include a report of the economic impact of the ongoing cost control program.

The committee believes that long term reform in the health care system will not take place until the excess capacity in the health care system is reduced including the reduction of unneeded surplus beds and facilities.

The committee has found in its initial review of the implementation of the National Health Planning and Resources Development Act of 1974 (Public Law 93–641) that the necessary regulations for the development of State medical facilities plans, State health plans, health systems plans, and annual implementation plans have *not* been promulgated by the Secretary of the Department of Health, Education, and Welfare in a timely fashion, and expects that the Secretary will proceed immediately to issue these overdue regulations.

The Secretary in promulgating regulations under section 1602 of the Public Health Service Act should include, among other standards. occupancy standards and bed to population ratios as part of the requirements for individual State medical facilities plans.

V. CONGRESSIONAL BUDGET OFFICE—COST ESTIMATE

1. Bill number: S. 1391.

2. Bill title: Hospital Cost Containment Act of 1977.

3. Bill status: As reported by the Senate Committee on Human Resources.

4. Bill purpose: To establish a means of containing the cost of hospital services by establishing an annual revenue growth limit. This limit would, initially, be based on a formula reflecting overall economic growth (the GNP deflator) and an intensity factor for inpatient costs (rises in hospital prices over the previous two years). These controls are only applied to short-term community hospitals and exclude federal facilities, long-term care institutions, and hospitals with 4,000 admissions where the facility is a sole community provider outside of Standard Metropolitan Statistical Areas (SMSA). Adjustments in the growth ceiling can be made in a given year for a specific hospital based upon increases in patient volume of more than 2 percent over the previous year or upon the rate of increase in wages for non-supervisory personnel.

5. Cost estimates:

[In billions of dollars]

Savings	1978	1979	1980	1981	1982
Medicare	1.15	2.60	4.04	5.93	8.30
Medicaid	.09	.23	.39	.60	.87
Total	1.24	2.83	4.43	6.53	9.17

6. Basis of estimate: Savings are calculated on the basis of CBO's current policy projections for total costs of Medicare and Medicaid hospital costs from 1978–1982 as compared to growth in these programs using the growth formulae as indicated in S. 1391. Also, base year expenditures in fiscal year 1977 do not reflect actual expenditures but, rather, an adjusted level as required by the legislation which excludes hospital increases of over 15 percent and under 6 percent. An annualized rate of 14.5 percent over fiscal year 1976 was used (because of a change in the fiscal year, increases were calculated on the basis of five quarters—July 1976 to September 1977). The following table shows the growth rates in total Medicare and Medicaid hospital costs as projected by CBO and the growth ceiling (with adjustments) calculated as outlined in S. 1391.

Percent measure over previous year

	Medicare	Medicaid	Growth ceiling [1]
1978	17.25	13.83	9.96
1979	16.10	13.72	10.29
1980	16.06	12.68	9.42
1981	16.18	12.74	8.88
1982	16.57	13.10	9.02

[1] Growth ceilings are those used in the CBO document "The Cost Containment Act of 1977: An Analysis of the Administration's Proposal", as published by the Senate Committee on Human Resources, July 1977.

The basic growth ceiling (i.e., without adjustments for volume or wages) for fiscal years 1978 and 1979 was calculated using the following formula:

Growth Ceiling=GNP deflator [1] ÷ ⅓ (Total hospital expenditure increase [2]—GNP deflator [2])

[1] For the previous 12 month period.
[2] For the previous 2 calendar years.

For fiscal years 1980–82, the basic growth ceiling was assumed to be 8 percent, 7 percent, and 7 percent respectively. Under Section 131 of the bill, the Secretary is required to promulgate a growth limit based upon an index that "more accurately reflects the rate of increase in the prices of the inputs necessary for the production and delivery of hospital services." Although no exact data is available, the experience of certain states in establishing such a limit would indicate that the yearly rate of increase would be approximately 7 percent. In the first year, an 8 percent rate is used to account for some phasing-in of this growth limit.

Actual revenue limits include adjustments for both wage increases and volume adjustments. Under Section 124, the growth rate is modified by requiring that each hospital's limit be adjusted to reflect the average percentage increase in wages for non-supervisory personnel. This adjustment to the limit is based upon the following formula:

Adjusted Growth Limit = .35 (increase in wages) ÷ .65 (Basic growth ceiling)

where .35 and .65 represent weighting factors for the proportion of wage and non-wage costs (i.e., wages for non-supervisory personnel account for 35 percent of total hospital costs). Adjustments used in this cost estimate for wages are based upon CB projections for compensation per man hour for hospital employees for fiscal years 1978–82. An increment of 0.5 percent per year was added to currently projected levels in order to reflect the mandatory nature of this provision which would tend to force wages up to a higher level than exists under current policy. The adjusted wage increases used in this estimate are: 1978, 9.4; 1979, 9.2; 1980, 9.2; 1981, 9.5; 1982, 9.9.

Under Section 113, an adjustment to the hospital revenue increase limit can be made on the basis of volume load. These adjustments will be permitted for an individual hospital when the average increase (or de-

crease) in numbers of admissions and total patient days exceeds 2 percent (in the case of increases) or 10 percent (in the case of decreases) of the previous year. In each case, every one percent increase above 2 percent or decrease below 10 percent will lead to a half percent increment or decrement in the revenue increase limit. Thus, if a hospital has a 4 percent increase in admissions and a 2 percent increase in total patient days (for an average increase of three percent) it would have its limit adjusted upward by 0.5 percent (or 50 percent of 3–2). In the same way, a hospital that had a 12 percent decrease in admissions and a 14 percent decrease in total days (for an average decrease of 13 percent) would have its limit adjusted downward by 1.5 percent (or 50 percent of 13–10). Increases or decreases, however, are limited to 15 percent and changes above that level are calculated to be 15 percent. For the purposes of this estimate, it was assumed that total hospital revenues would be increased by 1.0 percent as a result of this provision.

In calculating the total savings, another provision that was considered was that of Section 121(a) (3 and 4) which excludes hospitals from the revenue limit that either have less than 2,000 admissions per year or have 2,000 to 4,000 admissions per year and are sole community providers physically located outside of an SMSA. According to information provided by the Human Resources Committee, this would account for approximately 7 percent of total expenditures and, thus, this proportion of the savings was deducted in the estimate. Also, because of the fact that fiscal year 1978 will begin shortly, savings in the first year were assumed to be for only three-quarters of that year.

Although Section 117 exempts certain states which have cost-containment programs from the provisions of this title, only two of these states' programs now applies to Medicare reimbursement. This, it was assumed that, although states might receive an exemption under Section 117, the savings accrued from this Bill would not be significantly diminished.

Lastly, while Title II of S. 1391 provides for a moratorium on the acquisition of new health care equipment and facilities, no additional savings above those attributed under Title I will be accrued. While Title II might help facilitate hospitals' efforts to meet the limits established under Title I, they would not reduce expenditures below that amount. Also, because of existing capital commitments of facilities and the lag in experiencing the effect of new commitments, no significant impact of this provision will be seen until fiscal year 1981 or 1982.

7. Estimate comparison: None.
8. Previous CBO estimate: None.
9. Estimate prepared by: Jeffrey Merrill.
10. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Analysis.

VI. REGULATORY IMPACT STATEMENT

Regulations issued pursuant to the provisions of this bill will potentially limit cost increases in about 4,000 non-Federal short-term acute care and specialty hospitals. It is estimated that approximately 60 percent or 2,400 hospitals affected by the bill may have costs of inpatient services which increase at a rate in excess of the limit. This number, however, is subject to further reduction to the extent that exceptions and exemptions are allowed pursuant to sections 115, 117, 118 or 119 of the bill. Hospitals requesting exceptions or exemptions as sole community provider under section 121 will incur some additional paperwork in preparing and documenting the request and meeting disclosure requirements. The bill will not apply to the smaller hospitals with 2,000 admissions or less and those sole community hospitals with between 2,000 and 4,000 admissions annually. Although these smaller hospitals make up approximately 40 percent of all hospitals in the nation, they account for less than 10 percent of the total operating expenses that would be subject to the cost control program.

Section 115 of the bill allows exceptions to the revenue limits for certain specified reasons and requires the hospital requesting the exception to provide satisfactory documentation to support the request. It is estimated that approximately 700 hospitals may file a request for exception and that on an average, each request will require about 40 hours to prepare and accumulate required documentation such as balance sheets, certificate of State health planning agency approval, schedules of computation of exception amount, etc.

Section 116 provides that where a hospital imposes inpatient charges in excess of the limits specified in the bill, it will be subject to the Federal excise tax specified in section 128 of the bill and to possible exclusion from participation in Federal programs. A hospital may avoid these penalties by maintaining an amount equal to the excess charges in an escrow account. It is estimated that in the first year approximately 300 hospitals may be required to place funds in an escrow account to avoid the penalty and that approximately 8 hours will be required to establish the account. It is also estimated that the impact of this section will be much less significant in subsequent years.

Section 124 of the bill exempts nonsupervisory personnel wage increases from the revenue limit. This section will require additional work for all hospitals subject to the provisions of this bill to identify nonsupervisory employees and calculate the average percentage wage increases. The amount of this additional work will vary among hospitals as a result of the sophistication of their payroll systems. Hospitals with computerized payroll systems would be able to perform this task with a minimum amount of additional work. If the hospital uses a manual payroll system, approximately 40 hours of additional work will be required to identify the nonsupervisory positions, the number of employees in such positions, the basic wage for each position and compute the amount of wage increase.

Section 125 of the bill which addresses "disclosure of fiscal information," requires that the names and annual compensation of the hospital's principal operating personnel, the name and address of any person who has an ownership interest of over 5 percent or who has a 5 percent or more interest in any mortgage or other obligation secured by hospital property or assets and the name and address of any individual or firm with which the hospital had business transactions aggregating over $5,000 and where an owner of the hospital or note holder has an interest of 5 percent or more in the firm be reported annually. To the extent that this information is disclosed, the bill could have a possible effect on the privacy of the individual concerned.

In addition, each hospital must annually report information describing its financial status (balance sheet and statement of revenue and expenses), copies of all cost reports submitted to each cost payer, and its budget. Moreover, the hospital must report twice a year the rate charges for each of 30 hospital services including average semi-private room rates. Although the information be readily available to most hospitals, this section will require about 30 hours of additional work to photocopy the information and prepare the reports.

Where a hospital fails to comply with the reporting requirements, it is subject to a 5 percent reduction in Federal payments.

Section 132 of the bill requires that the Secretary establish within 1 year of the date of enactment an accounting and uniform cost reporting system for determining operating and capital costs of hospitals providing services. Upon implementation of this part of section 132, hospitals will be required to modify their present accounting system to conform to the new requirements of this section. Also, sections 132 (e) and (f) direct the Secretary to establish a system which will identify hospitals which provide "better than average care" and develop a system for reimbursing such hospitals. This would impact the reimbursement for these hospitals although neither the extent nor the direction of the impact can be determined until the system is developed.

In addition, all hospitals subject to the cost limits will experience some increase in paperwork as a result of other additional cost reporting requirements. Except for those hospitals not currently participating in existing Federal programs, such increase would not be significant since much of the required information is already provided as part of cost reporting requirements for these programs. For example, each hospital will be required to submit information relative to base year average reimbursement per admission by any cost payer, average inpatient charges per admission, and total admissions by each type of third-party payer. It is estimated that an additional 35 hours will be required to collect and submit miscellaneous required information.

The estimated additional paperwork discussed above applies for hospitals currently participating in Federal programs. For hospitals not currently participating in existing Federal programs, the additional paperwork required is estimated to be approximately twice the estimate for hospitals participating in Federal programs.

VIII. SECTION-BY-SECTION ANALYSIS OF THE HOSPITAL COST CONTAINMENT ACT OF 1977 (S. 1391) AS REPORTED BY THE COMMITTEE ON HUMAN RESOURCES

Section 1. The first section contains the short title of the bill—"The Hospital Cost Containment Act of 1977." Section 2. The second section requires that by March 1, 1979, the Secretary of Health, Education, and Welfare—referred to as "Secretary" in later provisions—will submit a report by March 1979, setting forth his recommendations for permanent reforms in the delivery and financing of health care, which will replace the transitional provisions of the bill. The remainder of the bill is as follows:

TRANSITIONAL HOSPITAL COST CONSTRAINT PROVISIONS

PART A—PURPOSE AND GENERAL DESCRIPTION OF THE PROGRAM

Sec. 101 Purpose

Section 101 defines the general purpose of the transitional hospital cost-containment program established by this title. The overall purpose of title I is to constrain hospital cost increases by limiting the amount of revenue which may be received by hospitals or paid to hospitals from medicare, medicaid, private insurers, and paying patients. The provisions will go into effect on January 1, 1979 and remain in place until such time as permanent reforms in health care financing are adopted. The method by which the transitional cost constraint program will be carried out is to limit increases in inpatient costs by limiting the allowable increase in inpatient revenues of short-term acute care and specialty hospitals—other than new hospitals, certain small hospitals, and certain HMO-related hospitals—in the manner outlined.

PART B—ESTABLISHMENT OF HOSPITAL COST CONTAINMENT PROGRAM

Sec. 111 Imposition of limit on hospital revenue increases

Section 111(a) provides that for any period affected by this title, the average reimbursement per admission for inpatient serv-

ices paid by each class of payer—medicare, medicaid, each other cost payer, and all charge payers together—may not exceed the base year average reimbursement per admission for inpatient services by a percentage greater than the product of the factors set forth in paragraphs (1), (2), and (3) of this subsection.

Paragraph (1) of section 111(a) sets a factor which identifies the extent to which costs—that is, total hospital inpatient costs per admission as determined for medicare purposes—would have increased between the end of the base accounting year and the effective date of the program if they had increased by the average annual rate actually experienced by a hospital during the 2-year period ending with the close of the base year except that the percentage will not be less than 106 nor more than 115.

Paragraph (2) of section 111(a) sets a factor by which costs would have increased from the effective date of the program to the start of any subject accounting year if they increased at an average annual rate consistent with the basic limit set under section 112(b). That is, for purposes of computing the total limit applicable in a subject accounting year, the basic limit without any adjustment for patient loads is applied to the period intervening between January 1, 1979 and that accounting year. This percentage will be zero for the first subject accounting year since there will be no intervening period for that particular year.

Paragraph (3) of section 111(a) sets a percentage equal to the adjusted—that is adjusted for differences between subject year and base year admissions—inpatient hospital revenue increase limit set under section 112(a) applicable to the subject accounting year.

Subparagraphs (1), (2), and (3) of subsection (a) set forth the components of the percentage increase over the fixed 1976 base to be allowed in any subject accounting year. Paragraph (1) allows a percentage increase for inflation from the end of the 1976 base year to the January 1, 1979 effective date of the cost containment program. This inflation rate is set by using the actual experience of a past period. The increase which can be carried forward is limited to 15 percent. A rate of at least 6 percent is allowed when past increases have been low. Paragraph (2) adds the basic limits in effect for periods intervening between the January 1, 1979, effective date of the hospital cost containment program and the start of any subject accounting year to allow for inflation at the target rate for such periods. Paragraph (3) allows the limit for the subject accounting year to be adjusted for changes in admissions. Allowable revenues are either increased or decreased based on the marginal cost changes resulting from admission changes.

Section 111(b) provides that where less than a full accounting year falls within the first year (Dec. 31, 1978 to Dec. 31, 1979) for which the limits are set, the limits will be applied to reimbursement and charges in the hospitals accounting period in the same proportion as the number of days in the accounting period falling within the period for which the limit is applied bears to the total days in that accounting year. Thus, for a hospital with an accounting year ending September 30, 1978, and assuming an annual rate of cost increase of 15 percent in the 24-month period ending December 1977, and a 9-percent basic limit with no adjustments effective for the period January 1, 1979 through December 3, 1979, the allowable percentage increase would be 10.5 percent. This 10.5 percent figure is derived by adding the 15-percent annual inflation allowance for the one-fourth of the year between the end of the base accounting year (Dec. 31, 1977) to the effective date of cost containment (Jan. 1, 1979), or 3.75 percent, to the basic 9-percent limit applied for the three-fourths year following after the effective date, or 6.75 percent. The 10.5-percent would be the limit on increases in reimbursement per admission for the last three quarters of the accounting year ending September 1979. This limit would be applied on a monthly basis only to that portion of the year which falls after enactment. Reimbursement for the months prior to enactment is based on existing practices. For any subject year which follows the first subject year one basic limit figure is added to the limit calculated for the first subject year.

Section 111(c) provides that in the case of an admission for which a hospital will be reimbursed by more than one cost payer, the first cost payer who pays for any services rendered to the patient will count the patient and all costs attributable to that patient as one of its admissions. The purpose of this provision is to avoid double counting of admissions and costs through a simple administrative mechanism that is consistent with current practices.

Sec. 112. Determination of adjusted inpatient hospital revenue increase limit

Section 112(a) provides that the adjusted inpatient hospital revenue increase limits (adjusted limits), applicable to a hospital during any accounting year under section 111(a)(3), will be the inpatient hospital revenue increase limits (basic limits) promulgated under section 112(b) for the 12-month period in which the subject accounting year ends modified by the "volume load formula" promulgated under section 113. The adjusted limit, then, is the limits derived from the percentage increase in the GNP deflator and in total hospital expenditures as specified in the following section, modified to account for changes in a hospital's admissions and number of patient days during a subject accounting year.

Section 112(b) requires the Secretary to promulgate the "inpatient hospital revenue increase limit" (basic limit) which will apply during any period subject to this title.

Paragraph (1) of section 112(b) provides that the Secretary will, between October 1, and December 31 of 1978 and each succeeding calendar year, promulgate a figure which will be the basic limit applicable to the following calendar year period. The figure will be the sum of (A) the percentage increase in the implicit GNP price deflator (published by the Department of Commerce and used to adjust the gross national product calculated by that Department for the effects of inflation—hereafter referred to as the "GNP deflator"—for the 12-month period ending October 31 of that year as compared to the preceding 12-month period), plus, (B) a factor that allows for continued expansion of essential hospital services. The expansion factor will be one-third the difference between (i) the average annual rate of increase in total hospital expenditures which is found by the Secretary to have occurred during the 2 years ending December 31 of the prior year, and (ii) the average annual rate of increase in the GNP deflator for the 2 years ending December 31 of the prior year.

Paragraph (2) of section 112(b) provides that the Secretary may adjust or readjust the limit to compensate for actual inflation of more than 1 percentage point above the GNP deflator used to set the limit in section 112(a). Any adjustments will affect all accounting years which end in the calendar quarter preceding the calendar quarter in which the adjustment was made, and all subsequent accounting periods.

Sec. 113. Promulgation of volume load formula

Section 113 provides that basis on which the volume load formula will be promulgated. The formula will be promulgated by the Secretary within 30 days of enactment of the act and will then be applied under the terms of section 112 of this act.

Paragraph (a) provides that the volume load formula will consist of the arithmetic average of the percentage increase in inpatient admissions over the base year and the percentage increase in inpatient days since the base year. This provision allows for recognition of volume changes in setting the revenue increase limits.

Paragraph (b) of section 113 provides that the volume load formula will be such that it establishes a range of percentage change in volume load, decreases of up to 10 percent in the base year and increases of up to 2 percent, within which a hospital will not be subject to any adjustment in total revenues for any changes in patient load over the patient load experienced during the base accounting year.

Paragraph (b)(2) of section 113 provides that the formula will be such that it allows total revenue to increase by one-half of the revenue which would be allowed in paragraph (1) when there is no change in volume loads multiplied by the percentage increase in volume above the range set forth in paragraph (1), but not beyond a 15-percent increase in volume load.

Paragraph (b)(3) provides that if volume load declines by more than 10 percent but by less than 15 percent the formula must require a decrease in allowable total revenue equal to one-half of the revenue which would be allowed under paragraph (b)(1) if there were no change in volume load multiplied by the percentage decline in volume between 10 and 15 percent.

Paragraph (b)(4) provides that if volume load increases by more than 15 percent the volume load formula will provide that the hospital can receive no more total revenue increase than the maximum specified in paragraph (b)(2).

Paragraph (b)(5) provides that if volume load decreases by 15 percent or more the volume load formula will require that the maximum allowable revenue shall decrease from the lower limit set in paragraph (b)(3) by one-half the revenue specified in paragraph (b)(1) if there were no changes in volume load multiplied by the percentage decline in volume below 15 percent.

Sec. 114. Based accounting year and modification of changes and reimbursement for that year

Paragraph (a) of section 114(B) provides that the base accounting year will be a hospital's accounting year which ended in 1977. In the case of a new hospital, which did not meet the definition of a hospital under this title for at least 1 full accounting year prior to its accounting year ending in 1977, the base year will be that accounting year which immediately precedes the accounting year in which the new hospital satisfied the definition in section 121.

Section 114(c) provides that charges attributable to inpatient services determined by a State planning agency to have been inappropriate will not be deducted from the base year as otherwise required by subsection (b).

Sec. 115. Establishment of exceptions

Section 115 authorizes the Secretary to grant exception from the limits established under title I to hospitals which meet certain requirements. The hospital must request the exception and must provide any and all evidence necessary for the Secretary to make a determination.

Paragraph (1) of section 115(a) sets out the two reasons why exceptions may be granted as (A) changes in volume load beyond (either higher or lower than) 15 percent, and (B) changes in the capacity of a hospital, significant changes in the type of services offered in the hospital, or major renovation or replacement of facilities but only if such changes have increased in-

patient costs per admission (as determined for medicare purposes) more than the intensity growth factor—one-third of the difference between increases in the GNP deflator and increases in hospital costs—allowed for hospital growth under subparagraph 112(b)(1)(B).

Paragraph (2) of section 115(a) requires that, to be considered for an exception, a hospital must demonstrate that without an increase in the revenue otherwise allowable under the limit (taking into account all other available resources, including such resources as unrestricted endowment) the major changes in volume load, capacity, facilities, or services would cause it to experience a current ratio of assets to liabilities of less than 2.0. For purposes of this paragraph, "current ratio of assets to liabilities" is defined as the sum of the cash, notes and accounts receivable (less reserves for bad debts), marketable securities, and inventories divided by the sum of all liabilities of the hospital falling due in the accounting year for which the exception is requested.

Paragraph (3) of section 115(a) requires that if a hospital is to be considered for an exception, the appropriate State health planning and development agency (which has been designated under section 1521 of the Public Health Service Act) must find that the major changes in admissions, capacity, plant, or services are necessary to the health needs of the community and are appropriate to the prevailing conditions in the community

Section 115(b)(1) provides that the Secretary shall grant exceptions from the limits for hospitals that demonstrate that there has been a change in the inpatient hospital services for which reimbursement is made by a cost payer or in the basis for calculating reimbursement. This exception is designed to accommodate significant changes in policy coverage by an insurer.

Section 115(b)(2) provides that the Secretary shall grant an exception if the percentage of inpatient charges attributable to any cost payer has changed, and the change has reduced the total revenue of the hospital by at least the percentum specified in section 112(b)(1)(B). This exception is designed to accommodate a major shift in the type of patients served in a hospital, where the shift is not away from nonpaying and medicaid patients. Section 115(c) requires the Secretary to make a determination on every exception request within 90 days after the request is satisfactorily filed. This subsection assures that all exceptions will be approved or denied in a timely manner.

Section 115(d) provides that the Secretary may require a hospital which has been granted an exception to undergo an operational review. The findings of the review would be public. A hospital will be required to implement recommendations made as a result of the review if it wishes to maintain its exception. This subsection provides that any hospital that receives an exception, and, therefore, added revenue, may be closely examined to determine whether or not its operating procedures might be contributing to the need for an exception. If factors contributing to the need for an exception are identified, suggestions for correctional measures must be followed.

Section 115(e) defines how a new limit will be set for a hospital which has been granted an exception.

Paragraph (1) of section 115(e) provides that if a hospital is granted an exception on the basis of changes in volume load of more than 15 percent, then its maximum allowable revenues will be increased or decreased according to a per centum limitation determined by the Secretary.

Paragraph (2) of section 115(e) provides that if a hospital is granted an exception for major changes in capacity in the type of service offered, or in its plant, it will be allowed an increase in its total allowable revenues no greater than the amount necessary to maintain a current ratio of assets to liabilities of 2:0.

Paragraph (3) of section 115(e) provides that if a hospital is granted an exception on the basis of changes in a cost payer's reimbursement practices, then the hospital will be allowed an increase in its total allowable revenue as is necessary to offset the changes for which the exception was granted.

Paragraph (4) of section 115(e) provides that if a hospital is granted an exception on the basis of changes in the type of patients it serves (as indicated by the type of payers covering the patients), then the hospital will be allowed an increase in its total allowable revenue as is necessary to offset the changes for which the exception was granted.

Paragraph (1) of section 115(f) entitles a hospital which is dissatisfied with the Secretary's determination on its exception to request a hearing before the Provider Reimbursement Review Board established under section 1878 of the Social Security Act. For a case to be heard the amount in controversy must be over $10,000 and the petition for a hearing must be filed within 180 days after receipt of the Secretary's decision. Paragraph (2) of section 115(f) authorizes the Secretary to appoint five additional members of the Provider Reimbursement Review Board for the purpose of reviewing appeals which may arise from the exception process.

Section 115(g) provides that upon request by a hospital, the State health planning and development agency designated under section 1521 of the Public Health Service Act for the State in which the hospital is located shall make a finding as to the appropriateness of specific institutional health services for purposes of subsection (a)(3) of section 114(c), after requesting the recommendations of the appropriate health systems agenecy. The findings of the State health planning and development agency under this subsection will not be subject to further review.

Sec. 116. Enforcement

Section 116(a) provides that medicare payments may be made only to the extent that reimbursements are within the established limits on payment for inpatient hospital services. Section 116(b) provides that state medicaid and maternal and child health and crippled children's services programs need not pay amounts in excess of the established limits on payments for inpatient hospital services. Subsections (a) and (b) limit Federal payments to hospitals within the established limits so that compliance with respect to Federal payments is automatic.

Section 116(c) provides for sanctions on hospitals and cost payers who do not comply with the limits on payment for inpatient hospital services established by this title. Receipt on a cost or charge basis of any amount in excess of the established limits on payment for inpatient hospital services will subject a hospital to (1) a Federal excise tax of 150 percent of the excess amount under section 4991 of the Internal Revenue Code of 1954 (as added by section 128 of the act), and (2) exclusion, at the Secretary's discretion, from participation in any or all of the medicare, medicaid, and maternal and child health and crippled children's services programs established under titles V, XVIII, and XIX of the Social Security Act The same sanctions are applicable to any nongovernment cost payer that makes payments in excess of the established limits on payment for inpatient hospital services.

Section 16(d) provides the enforcement mechanism which will apply to billed charges and additionally provides that a hospital will be exempt from the sanctions set forth in paragraphs 116(c)(1) and 116(c)(2), that is, the excise tax and exclusion from the Government programs, if it holds aggregate excess billed charges attributable to charge payers in esrow until equivalent aggregate amounts in charges below the limits are experienced. Any hospital which bills for charges in excess of the limits must make a public announcement in its own community that such excessive charges did occur.

Sec. 117. Exemption for hospital in certain States

Section 117(a) provides that where a State has a satisfactory program for containing hospital costs, the Governor or chief executive of the State may request that the Secretary exclude the hospitals physically located in the State from the application of title I. Paragraphs (a), (b), (c), and (d) set forth the conditions under which a State program can be approved for this purpose.

Paragraph (a) requires that a State program must be in effect as of the date when a request is made. Such a program must cover at least 90 percent of the hospitals which would be covered by title I.

Paragraph (b) requires that the State program must apply to at least all inpatient revenues, and must have applied for at least 1 year prior to the date of such request to at least half of those revenues (excluding those received from the medicare program under title XVIII of the Social Security Act).

Paragraph (c) requires that the Governor or chief executive must certify that the aggregate rate of increase for inpatient hospital revenues for all hospitals in the State will not (1) exceed 110 percent of the basic limit established by the Secretary under paragraphs 112(b)(1) and 112(b)(2). However, at the option of the State, increases which would be exempt under the nonsupervisory wage passthrough in section 124 will increase the limit in the manner prescribed in that section. No State program shall require an increase in aggregate inpatient revenues less than the increase in the GNP deflator applicable to that fiscal period.

Paragraph (d) requires that the Governor or chief executive must submit, and have approved by the Secretary, a plan for recovering any excess revenue which may occur under the State's plan.

Sec. 118. Exemption for hospitals in certain experiments or demonstrations

Section 118 provides that the Secretary may exclude a hospital or group of hospitals from application of title I if (1) such exclusion is necessary to facilitate an experiment or demonstration entered into under section 402 of the Social Security Amendments of 1967, section 222 of the Social Security Amendments of 1972, or section 1526 of the Public Health Service Act and (2) the experiment or demonstration is consistent with the purposes of this title. This provision may apply to a single hospital, to a group of hospitals, or to an entire State.

Sec. 119. Exemption for States with cost containment programs

Section 119(a) provides that a State desiring to conduct a hospital cost containment program may submit a plan to the Secretary. He would be required to approve that plan if it satisfied the criteria set forth in the section. Paragraph (1) requires that there be an identifiable unit of State government which has the authority to supervise the administration of the program. Paragraph (2) requires that there be a methodology that assures that the aggregate rate of increase in revenues for inpatient hospital services for all hospitals in the State will not exceed 110 percent of the inpatient hospital revenue increase limit determined pursuant to section 112(b)(1) and section 112(b)(2), nor

be required to be less than the increase in the GNP deflator applicable to that fiscal period. The section also provides that the methodology may include alternative methods for classifying hospitals, for establishing prospective rates of payment, and for implementing on a gradual, selective, or other basis the establishment of a prospective payment system. Paragraph (3) of section 119(a) requires that the plan include a methodology for recovery of any excess of total revenues. Paragraph (4) of section 119(a) requires that the plan include sanctions and enforcement procedures to insure complaints. Paragraph (5) of section 119(a) requires that the plan provide for uniform definition of all costs. Paragraph (5) of section 119(a) requires that the plan include provisions for the evaluation of standards of institutional performance.

Paragraph (7) of section 119(a) requires that the plan provide for the mandatory exemption of wage increases for nonsupervisory personnel as specified in section 124 from any revenue or cost limits. Paragraph (8) of section 119(2) requires that the plan comply with such other criteria as the Secretary deems necessary to accomplish the purposes of title I and which are not inconsistent with the provisions of title I.

Section 119(b) authorizes the awarding of $10 million in grants to assist States in implementing cost containment programs which meet the criteria of section 119(a).

Section 119(c) requires that the Secretary promulgate regulations to implement section 119 within 180 days of the date of enactment of the act.

Sec. 120. Revocation of exemptions under section 117, 118, and 119

Section 120(a) provides for an annual review by the Secretary of any program, experiment, or demonstration that has received an exemption under section 117, 118, or 119.

The Secretary may revoke any exemption if he determines that the conditions of the exemption are no longer being met. The revocation may occur only after a notice of intent has been published and an opportunity for a hearing on the record has been provided.

Section 120(b) provides that upon revocation of an exemption each affected hospital will become subject to the limits imposed by title I for each full accounting year, any part of which was not covered by the exemption.

PART C—DEFINITIONS AND MISCELLANEOUS PROVISIONS

Sec. 121. Definition of hospital

Section 121(a) defines the term "hospital," for purposes of this title, and with respect to any accounting year, as an institution (including a distinct part of an institution participating in the medicare program established by title XVIII of the Social Security Act, which (1) satisfies paragraphs (1) and (7) of section 1861(e) of the Social Security Act, and (2) has an average length of stay of 30 days or less in the preceding accounting year. Paragraph (1) of section 1861(e) of the Social Security Act defines a hospital as an institution primarily engaged in providing diagnostic and therapeutic services for medical diagnosis, treatment, and care of injured, disabled, or sick persons by or under the supervision of physicians, rehabilitative services by or under the supervision of physicians. Paragraph (7) of that section requires that the institution be licensed or meet the requirements for licensure, where State law so requires.

Section 121(b) provides that an institution shall not be a hospital except for purposes of section 125, if it meets the criteria set out in paragraph (1), (2), (3) or (4) below during any part of a period to which title I applies. However, all institutions which meet the criteria established in section 121(a) will be subject to the disclosure provisions of section 125 of this act.

Paragraph (1) excludes institutions which otherwise meet the criteria for hospitals, but are less than 2 years old.

Paragraph (2) excludes institutions which otherwise meet the criteria for hospitals, but derive more than 75 percent of their inpatient care revenues, disregarding revenues received from the medicare program, from one or more health maintenance organizations (as defined in subsection 1301(a) of the Public Health Service Act). A health maintenance organization is defined by section 1301 of the Public Health Service Act as a legal entity which provides basic and supplemental health services to individuals enrolled with the organization on the basis or a prospective periodic rate without regard to the "frequency, extent, or kind of a health service . . . actually furnished" and meets certain other criteria specified in the Public Health Service Act.

Paragraph (3) excludes institutions which have had, in the 3 previous accounting years preceding the subject accounting year average annual admissions of 2,000 or less.

Paragraph (4) exempts those hospitals that had in the 3 previous accounting years preceding the subject accounting year an average annual admissions of between 2,000 and 4,000 admissions and that are not physically located with a Standard Metropolitan Statistical Area and are sole community providers as defined by the Secretary.

Section 121(c) establishes for purposes of sections 117 and 119 the definition of a hospital. This definition, in contrast to the one generally applicable to title I, requires the inclusion of small hospitals and new institutions covered by acceptable State cost containment programs on the grounds that such programs can deal appropriately with the special problems experienced by these hospitals.

Section 121(d) exempts any hospital that is a Federal hospital.

Sec. 122. Other definitions

Section 122 defines five major terms for purposes of this title. Paragraph (1) of section 122(a) defines the term "accounting year" for purposes of this title as:

(A) a period of 12 consecutive full calendar months which correspond to the last full period allowed for medicare reimbursement purposes (for a hospital participating in the medicare program established under title XVIII of the Social Security Act); or (B) a calendar year, or if requested by the hospital, some other 12-month period as designated by the Secretary (for hospitals not participating in medicare).

Paragraph (2) of section 122(a) provides that the Secretary may establish an accounting year of less than 12 months, and make appropriate adjustments in the application of this title, for a hospital whose "accounting year" under paragraph (1) is changed from one 12-month period to another.

Section 122(b) defines the term "inpatient hospital services" as services so defined for medicare purposes plus the services of a private-duty nurse or other private-duty attendant.

Section 122(c) defines the term "inpatient charges" as regular rates, applied to all inpatient services, which are used in apportioning costs between medicare beneficiaries and all other patients.

Section 122(d) defines the term "admissions" as the formal acceptance of an inpatient by a hospital. Newborn children (unless retained after discharge of the mother) and transfers between inpatient units of the same hospital are excluded from this definition of admission.

Section 122(e) defines "cost payer."

Paragraph (1) of section 122(e) defines a "cost payer" as one of the programs established by or under title V, XVIII, or XIX of the Social Security Act. These are the maternal and child health and crippled children's services, medicare, and medicaid programs.

Paragraph (2) defines a "cost payer" as any organization which (A) meets the definition of a carrier in section 1842(f)(1) of the Social Security Act and (B) reimburses a hospital on the basis of costs. Section 1842(f)(1) of the Social Security Act describes a carrier as "a voluntary association, corporation, partnership, or other nongovernment organization which is lawfully engaged in providing, paying for, or reimbursing the cost of health services under group insurance policies or contracts, medical or hospital services agreements, membership or subscription contracts or similar group arrangements in consideration of premiums or other periodic charges payable to the carrier, including a health benefit plan duly sponsored or underwritten by an employee organization." Section 122(f) defines "reimbursement payable by a cost payer" as the sum of (1) the amounts payable by the cost payer to a hospital for inpatient hospital services, and (2) the amounts payable by an individual to the hospital for inpatient hospital services if the individual's expenses for such services are payable in part by the cost payer, to the extent that those amounts are calculated as a portion of the costs or other basis on which the amounts payable by the cost payer are determined. Section 122(g) defines a "State" to include Puerto Rico, Guam, the District of Columbia, and the Virgin Islands.

Sec. 123. Determination of inpatient reimbursement

Section 123 provides that the base inpatient hospital reimbursement for the maternal and child health and crippled children's, medicare, and medicaid programs will be determined without adjustment for the following regulations: carry forward of costs disallowed under limits on reasonable costs (CFR 405, 460(g)), carry forward of costs disallowed under the lower of cost or charges (CFR 405.455(d)), recapture of accelerated depreciation (CFR 405.415(d)(3), and section 405.415(f)). Thus, the revenues used in base and subject-year calculations will be that portion of revenues directly attributable to costs which are incurred in those years.

Sec. 124. Exemption of nonsupervisory personnel wage increases from revenue limit

Section 124(a) provides that the Secretary shall modify the basic limit, and its adjusted limit as applied to each hospital subject to this title to allow, without restriction, revenue equal to the average amount of any increase in regular wages granted to nonsupervisory personnel. For purposes of title I, the term "nonsupervisory personnel" means any employee who does not meet the criteria for a "supervisor" as defined in the National Labor Relations Act. This exemption does not apply to physicians, but does apply to State and local employees. A hospital must provide all data necessary for the required calculation. This section is applied to all hospitals, except for those exempted under section 117 or 118, for any accounting year beginning before April 1979.

Section 124(b) provides that the modified limit will be calculated by adding together the percentages in paragraphs (1), (2), and (3).

Paragraph (1) of section 124(b) sets forth one part of the formula as the average percentage increase in wages granted to nonsupervisory personnel since the close of the preceding accounting year multiplied by the percentage of total inpatient cost (as determined for medicare purposes) attributable to such wages.

Paragraph (2) of section 124(b) sets forth one part of the formula as the limit (basic or adjusted, as appropriate) otherwise applicable under title I multiplied by the percentage of total inpatient cost (as determined for medicare purposes) attributable to all other expenses in the preceding accounting year.

Paragraph (3) of section 124(b) provides that to the extent that a hospital's exempted wage increases to nonsupervisory employees does not exceed the adjusted inpatient hospital revenue increase limit applicable under section 124(b)(2), the difference may be applied toward wages for increased numbers of employees whose wage increases in future years would be exempted under the provisions of this section.

Section 124(c) provides that the modified limit calculated in section 124(b) will constitute that hospital's basic or adjusted limit for purposes of imposing a limit on revenues under section 111 of the title, and for all other purposes of this title.

Sec. 125. Disclosure of fiscal information

Section 125(a) requires that on March 1 and September 1 of each year every hospital must submit the charges for 30 designated services, including its average semiprivate room rate, to the appropriate health systems agency (as designated under section 1515 of the Public Health Service Act). For purposes of this title, the Secretary will designate 30 services to be reported which he finds to be the most frequently used or most important for purposes of comparing hospitals.

Section 125(b) requires that a hospital shall submit annually to the appropriate health systems agency, within 90 days of the close of each its accounting year, a report, in a form prescribed by the Secretary, which contains information describing the ownership, management, and financial status of each such hospital, as specified by the Secretary, including:

(1) A balance sheet as of the end of such accounting year, setting forth assets and liabilities at that date, including all capital, surplus, reserve, depreciation.

(2) A statement of operations for that accounting year, setting forth all operating and nonoperating revenues and expenses including the percent increase in wages for nonsupervisory personnel during that accounting year (including a comparison with all previous accounting years subsequent to the date of enactment).

(3) The name and address of any person—

(A) who has (directly or indirectly) an ownership interest or lease or rental interest of 5 percent or more in such hospital, or who is the owner (directly or indirectly) of an interest of 5 percent or more in any mortgage, deed of trust, note, or other obligation secured (in whole or in part) by such hospital or any of its property or assets, or

(B) who is an officer or director of the hospital if it is organized as a corporation.

(4) The name and address of any individual, corporation, partnership or other legal entity with whom the hospital has had, during the previous 12 months, business transactions in an aggregate amount in excess of $5,000 if a person described in paragraph (3) or a person who exercises discretionary control respecting the financial management of the hospital is such an individual or has (directly or indirectly) an ownership interest of 5 percent or more in such corporation, partnership or other legal entity.

(5) The names and annual compensation including salary and benefit increases of the hospital's principal operating personnel, as defined by the Secretary.

Section 125(c) requires the hospital to make available to the health systems agency in its area all cost reports submitted to cost payers and submit the annual overall plan and budget required for medicare participation.

Section 125(d) provides that if a hospital fails to comply with the disclosure provisions of this section the Secretary may reduce by 10% any payment due to the hospital under programs established under titles XVIII, XIX, or XX of the Social Security Act.

Section 125(e) requires that each health systems agency make available to the public material collected under the provisions of this section.

Sec. 126. Improper changes in admission practices

Section 126 requires that the Secretary must investigate a written complaint by any person to the Secretary that a hospital is attempting to avoid its revenue limits by intentionally reducing the proportion of patients not expected to pay full charges.

If the Secretary finds that the complaint is justified, he may impose the sanction (exclusion from Government programs) set forth in section 116(c)(2) of title I.

Sec. 127. Review of certain determinations

Section 127 provides that the determinations made on behalf of the Secretary (excluding exceptions under section 115 and improper changes in admissions under section 126) are subject to the provisions for hearings on appeals of such determinations before the Provider Reimbursement Review Board.

Sec. 128. Excise tax on excessive payments for inpatient hospital services

Section 128(a) amends subtitle D of the International Revenue Code of 1954 (relating to miscellaneous excise taxes), by adding the following new chapter:

CHAPTER 45—TAX ON CERTAIN EXCESSIVE PAYMENTS FOR INPATIENT HOSPITAL SERVICES

Sec. 4991. Imposition of tax

The new chapter establishes a tax equal to 150 percent of the amount of any payments a hospital receives in excess of the limits established by title I of the Hospital Cost Containment Act of 1977. The same provisions apply to payments by a cost payer which are made in excess of the applicable limits. Subsection (b) of the new chapter exempts a hospital from the tax where it holds the excess charges in escrow as set forth in section 116(d)(2) of the Hospital Cost Containment Act of 1977. Section (c) of the new chapter ties all definitions, where applicable, in the new section to the meanings given them in title I of the Hospital Cost Containment Act of 1977. Subsection (d) of the amendment provides for the administration of the excise tax.

Sec. 129. Effect of act on payments below the established limits

This section provides that the act not require any Federal or State program or any person to pay a hospital more than that program or person would have been required to pay had this act not been enacted.

Sec. 130. Citizen's civil actions

Section 130(a) provides that in general any person may undertake a civil action for injunctive relief on his own behalf against any person (including the Secretary) who is alleged to be in violation of sections 125, 126, 128, or 129 of this title, or the regulations promulgated thereunder. Similarly, the section provides that action may be commenced against the Secretary for an alleged failure to perform any act or duty pursuant to sections 124, 125, 126, 129, or 130. The U.S. district courts will have jurisdiction over actions brought under this section.

Section 130(b) limits the ability of a person to commence a civil action prior to 60 days after the plaintiff has given notice to the alleged violator (if suit is brought for alleged violations of the above sections) or to the Secretary (if suit is brought against the Secretary for alleged nonperformance of requirements under these sections). No suit for alleged violations may be commenced by a person if the Attorney General or the Secretary has commenced and is diligently pursuing judicial proceedings or administrative action with respect to such alleged violations.

Section 130(c) provides that in any action under this section, the Attorney General or the Secretary may intervene as a matter of right. However, the Secretary is not limited by any findings of a court under this section with respect to his ability to institute judicial proceedings or administrative action against a party to such judicial proceeding. Further, the Secretary is not limited by the factual findings of any proceeding (with respect to subsequent judicial proceedings or administrative action) unless he was a party to the proceedings under this section.

Section 130(d) provides that a court, in issuing any final order in any action brought pursuant to section 130(a) may award costs of litigation (including a reasonable attorney's fee, based on the prevailing rates for such services, and expert witness fees) to any party whenever the court determines that such an award is appropriate.

Section 130(e) preserves the right of any person to seek enforcement at any regulation or order or seek any other relief under any statute or at common law.

Section 130(f) provides that nothing in section 130 shall require the disclosure of any trade secret information or any other confidential information except as provided by the Federal Rules of Civil procedure.

Sec. 131. Additional provisions

Paragraph (1) of section (a) provides that within 1 year of the date of enactment of the act, and after appropriate consultation, the Secretary shall promulgate a figure that more accurately reflects the rate of increase of the prices of the inputs necessary for the delivery of hospital services. This figure is to replace the figure promulgated pursuant to section 112 as the inpatient hospital revenue increase limit.

Paragraph (2) of section 131(a) provides that at the same time that the Secretary promulgates a new figure under paragraph (1) of section 131(a), he shall make any changes in the exceptions process as deemed necessary or appropriate. Such changes shall be made in order to insure that—

(A) Only hospitals that are experiencing financial crises, as defined by the Secretary, and that have not incurred expenses in excess of those found to be necessary pursuant to section 1861(v)(1)(A) of the Social Security Act are allowed to receive exceptions; and

(B) Exceptions will only be granted to hospitals that qualify under clause (A) and that have—

(*i*) experienced an unforeseeable or unavoidable rise in the price of malpractice insurance, other liability insurance, energy, or such other items as the Secretary deems appropriate which result in hospital expenditures in excess of the figure promulgated pusuant to paragraph (1) of this subsection;

(*ii*) experienced a change in patient mix resulting from expanded institutional capacity provided such expansion has been approved pursuant to section 1122 of the Social Security Act or title XV of the Public Health Service Act;

(*iii*) experienced unusual increased expenses, as defined by the Secretary, associated with the closure, modification, or change in usage of all or part of its facilities resulting from the elimination of excess bed capacity; discontinuance of an underutilized service for which there are adequate alternative sources; or substitution for the underutilized service of some other service which is needed in the area and which is consistent with the findings of an appropriate health planning agency; or

(*iv*) experienced such other change in condition that the Secretary deems an appropriate justification.

A hospital granted an exception under

these provisions must have demonstrated the need for and appropriateness of the proposed services or facilities to the State health planning and development agency designated under section 1521 of the Public Health Service Act for the State in which the hospital requesting the application is located.

Section 131(b) provides that changes in the program established under subsection (a) will apply to hospitals for their accounting years commencing after such changes are in effect.

Section 131(c) provides the Congress with a 60-day review period for any changes proposed by the Secretary pursuant to section 131(a). The Secretary is to submit these changes to the Congress together with a detailed statement of the reasons underlying such changes. The changes will go into effect automatically unless either House passes a resolution during the 60-day period stating in substance that it does not favor such changes.

Sec. 132. Additional provisions

Section 132 provides that after consultation with appropriate public and private organizations, the Secretary shall establish several new monitoring and accounting systems within 1 year after the date of enactment of this act.

Section 132(a) provides for the establishment of an accounting and uniform functional cost reporting system (including uniform procedures for allocation of costs) for determining operating and capital costs of hospitals providing services.

Section 132(b) provides for the establishment of a system which will classify hospitals according to size, geographical location, and other criteria which will reflect efficiency and services provided.

Section 132(c) provides for the establishment of a system that more accurately measures the changes in hospital costs associated with changes in hospital volume.

Section 132(d) provides for the establishment of a system that monitors, on a current basis, shifts in case mix including shifts of cases with higher than average costs per admission.

Section 132(e) provides for the establishment of a system that measures the output of hospitals which includes a way to identify hospitals that provide better than average care than hospitals of similar characteristics.

Section 132(f) provides for the establishment of a system that would reimburse hospitals of similar characteristics differently based on the system established pursuant to subsection (e).

Sec. 133. Additional provisions

Section 133(a) directs the Secretary to arrange for studies of methods for controlling the costs of and/or revenue received for hospital outpatient services, long-term care services and ambulatory care including physician services. This provision specifically details for the Secretary which areas should be examined in order to develop a long-term strategy to contain increases in health costs.

Section 133(b) provides a 1 year deadline for completion of the studies mandated in paragraph (a) and requires that within 30 days after completion they be submitted to the Congress along with any associated reports completed by the Secretary, including recommendations, if any, for legislative and administrative action.

Sec. 134. Additional provisions

The Secretary is required to monitor, on a current basis, the economic impact of all the provisions of this title, including sections 117, 118, 119, and 124. He is to report annually to the Congress the results of such monitoring including the percentage of increase in the cost of energy, malpractice, and other liability insurance, and the cost of wage increases for nonsupervisory personnel.

Sec. 135. Additional provisions

This section states that in carrying out the purposes of this title the Secretary or a State is authorized to enter into contracts with State or national cooperative information centers established under section 304 or 306 of the Public Health Service Act.●

NOTICES OF HEARINGS

SUBCOMMITTEE ON HUD-INDEPENDENT AGENCIES APPROPRIATIONS

Mr. PROXMIRE. Mr. President, I wish to announce that the Subcommittee on HUD-Independent Agencies of the Committee on Appropriations will hold a hearing on House Joint Resolution 1088—the New York City loan guarantees bill on this coming Friday, August 18, 1978, at 10 a.m., in room 1318, Dirksen Senate Office Building. Mr. Roger C. Altman, Assistant Secretary for Domestic Finance at the Department of the Treasury, will testify on this measure which will, if approved, provide financial assistance for the city of New York.

SELECT COMMITTEE ON SMALL BUSINESS

● Mr. NELSON. Mr. President, the Select Committee on Small Business will hold 2 days of hearings, beginning on Friday, August 18, on inflation as it relates to certain segments of the economy and small business. The second day of hearing will be on Monday, August 21. Specific times and witnesses are not yet available. More information may be obtained from the committee, 224–5175.●

SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND FEDERAL SERVICES

O Mr. GLENN. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Energy, Nuclear Proliferation and Federal Services. The hearing is scheduled for Friday, August 18, 1978, beginning at 9:30 a.m., in room 3302, Dirksen Senate Office Building. The purpose of the hearing is to receive testimony from the administration and others on S. 1493, the energy impact assistance bill of 1978.

For further information regarding the hearing, you may contact Ms. Donna Lavigne at 224–2627.

Those who wish to submit a written statement for the record should write to the Subcommittee on Energy, Nuclear Proliferation and Federal Services, room 6206, Dirksen Senate Office Building, Washington, D.C. 20510.●

COMMITTEE ON THE JUDICIARY

● Mr. ABOUREZK. Mr. President, I wish to announce that the grand jury reform hearings which are scheduled for August 17, 22, and 24, 1978, will begin each day at 9:30 a.m., in room 2228, Dirksen Building, instead of at 10 a.m., as previously scheduled.●

ADDITIONAL STATEMENTS

CETA SUCCESSES

● Mr. JAVITS. Mr. President, the Senate is expected this month to take up S. 2570, the Comprehensive Employment and Training Act (CETA) Amendments of 1978.

While there will be, of course, debate on the specific provisions of the committee bill—and I believe S. 2570 is a very good bill—often inadequate attention is given to the many success stories in the CETA program.

The National Association of Counties has selected 27 county prime sponsors in the United States to receive its 1978 County Achievement Award for special CETA employment and training projects. The award winners operate special programs for: for example, youth; women; veterans; public assistance recipients, and the handicapped.

I ask that an overview of some of these special CETA programs, which appeared in the June 1978 issue of the County Employment Reporter, be printed in the RECORD.

I know I will be joined by many of my colleagues in paying tribute to the dedicated personnel of these county prime sponsors who have worked so faithfully to make the CETA program a vital influence in the lives of the unemployed poor of our country.

The article follows:

CETA SUCCESSES CITED

In an effort to give national recognition to progressive county activities that demonstrate improvements in local structure, management, or services, NACo conducts the County Achievement Award Program each year. For 1978, twenty-seven counties have received awards for employment and training projects. Many troubled youths, displaced homemakers, handicapped persons and Vietnam-era veterans would be among those unemployed if it were not for special projects conducted by county government.

Highlighted below are several of the award-winning programs. They are divided into seven subject areas.

YOUTH

The Cooperative Diversified Occupations Education Program, Mercer County, New Jersey. Operated through CETA, this dropout prevention and employment program concentrates on potential dropouts or those who have recently left school. The program provides academic preparation for graduation in conjunction with occupational skill training to enhance employability.

For the supervised, on-the-job, vocational training program, a coordinator develops private-sector work stations with local businesses and industries. Participants work on a full-time basis. Wages are paid by the employer.

Classroom instruction is given two evenings each week for thirty-six weeks at a local high school. Instructors cover materials related to employment situations, and provide individual and group counseling. Both parts of the program must be completed successfully for participants to receive a high school diploma. After graduation, the adult evening school staff and county office of manpower administration offer placement assistance so graduates may acquire full-time employment or further their education.

Over a three-year period, forty-nine youths have participated in the program. Eighty-eight percent of the enrollees have obtained their degrees and 82 percent acquired unsubsidized full-time employment. Graduates have been placed into entry- and intermediate-level jobs with accounting and auditing firms, engineering firms, computer-related industries, automotive-related industries, pharmacies, machine shops, and food service firms.

For more information, contact the Office of Manpower Administration, 577 South Broad Street, Trenton, New Jersey 08611, 609/989–6824.

Youth Conservation Corps Program, Oswego County, New York. Last summer, eighty youths working thirty-five hours a week for eight weeks built and upgraded recreational facilities and public lands. Ten crews performed such activities as transforming vacant county land into a multi-use recreation area for hiking, picnicking and cross-country skiing, cutting logs, winterizing camp buildings, and installing subsurface drainage.

In addition to work experience, the program offered enrollees a chance for career exploration on two levels. Professionals conducted career workshops at several locations in the county. Health occupations and industrial opportunities were two of the sessions offered. Secondly, crews tried out their newly acquired skills on a competitive basis at the annual woodsmen's field day. Events included chopping and bow-sawing contests, a pulp toss, a log roll, an obstacle course and a greased-pole climb.

Accomplishments of the Oswego County Conservation Corps include acquisition of basic skills, participation in teamwork effort, peer group interaction, formation of good work habits and attitudes, introduction to various occupational areas, and appreciation of the nation's natural resources. In addition, the community felt the benefits of the program in needed beautification, conservation and modernization.

The summer program, funded through CETA and 4–H donations, will be offered again this summer in Oswego County, which ranks first in unemployment among New York's counties. With additional CETA funds, the program has been expanded year-round to serve high school dropouts. Three crews, each with four young adults between the ages of sixteen and twenty-one, work on environmental projects and study to obtain their high school diplomas.

For more information, contact the Office of Employment and Training, 200 North Second Street, Fulton, New York 13069, 315/598–0840.

Outreach Program Unit, Broward County, Florida. The county youth development division of the department of human resources has implemented an outreach program unit which has established projects in thirteen communities. Each unit works within the community to modify the behavior of its target population through individual and group interaction; assist youths and their families in meeting emotional and social needs; provide guidance for youth in education, employment, family life and social adjustment, and develop resources and a service system for meeting the needs of youths and their families.

A joint study conducted by a non-profit service provider, the county, the school board, and the state had revealed a lack of community-based youth programs in Broward County.

The programs are located in areas of minimal or nonstable social service intervention, unemployment, and high environmental potentials for delinquency. In these areas, the average income for a family of five is $7,000 and the density is 5,134 persons per square mile. Many in these communities were unaware of resources and services; others did not feel free to use the facilities, and some turned to activities that caused greater problems.

Each outreach location has meeting facilities and a few offer recreational equipment. Activities have ranged from personal grooming and youth club activities to career guidance and educational programs.

To ensure the quality of service delivery and enhance professional development, each staff counselor receives 120 hours of initial training followed by monthly in-service training. In addition, each staff member participates in a personal development project. The staff also works with other social service and community-based agencies to set up "client systems" for meeting the total needs of families on a preventive basis.

Annual objectives were outlined for program implementation and subobjectives must be met before a program can be terminated. The outreach unit's goal is to accomplish its objectives in an area within three years and then move to another area that needs its services.

The program started in January 1977 and is financed through the county's general fund at $345,812 for salaries and operating expenses. Donations and fund-raising projects provide for various activities.

CETA funds, under Title III and the Youth Employment and Demonstration Projects Act of 1977, are available for these activities.

For more information, contact the County Youth Development Division, Department of Human Services, 10 35th Avenue, N.W., Fort Lauderdale, Florida 33311, 305/584–8810.

Experiences in Child Care for Young Adults, Westchester County, New York. Through a grant from CETA, the county youth bureau established a day care service for working parents which provides meaningful employment and learning experiences for young adults between the ages of sixteen and twenty-one. Youths assist state-licensed family day care mothers and receive training in child development. Other objectives include developing healthy work attitudes and self concepts, fostering the development of skills in working with adults and children, and preparing the youth for parenthood.

During the second program year, training was expanded to include the following components:

Child Development: Materials are supplemented by workshops and youths are placed in family day care homes and group centers.

Vocational Counseling: Training for youth is provided in choosing, finding, getting and keeping jobs, and some youths participate in a summer internship in the career of their choice.

Group Counseling: Regularly scheduled sessions are conducted, and individual referrals are made when necessary.

Sex Education: Through family planning groups, project participants receive sex education.

Funds for the project director and salaries for youth are provided by the office of employment and training. To be eligible, youths must meet the family income criteria under the Youth Employment and Training Program (YETP). Twenty youths were served in the first year of the program, which began October 1, 1976. This program year, thirty youths are participating and about half are in school.

For more information, contact the County Youth Bureau, 148 Martine Avenue, Room 944, White Plains, New York 10601, 914/682–3064.

WOMEN

Minority Women's Training for Nontraditional Jobs, Monmouth County, New Jersey. Through a competitive grant from the Department of Labor (DOL), the county received $203,000 to operate a minority women's employment and training program. Welfare mothers, housewives returning to the job market, and husbandless women with children are the target groups served by the program.

Intensive classroom and experimental training in conjunction with counseling and guidance are offered to participants to develop salable skills that would afford them higher salaries, career advancement and flexible hours. In addition, training is aimed at changing their expectations and role perceptions toward nontraditional employment in commissioned sales fields.

Low-income women were bitterly disillusioned with previous programs that offered little or no support during the critical job search period. This program has been successful in several areas: Fifty-eight percent of the participants have been placed; all women agree that their self-esteem has increased and their skills, abilities and potentials are marketable; a private firm under contract with the Employment and Training Administration chose the program as one of the top twelve in the United States that are recommended for replication; and major companies are permitted to recruit and have hired about 6 percent of the graduates for sales positions.

For more information, contact the county Comprehensive Employment and Training Agency, Building 427, Fort Monmouth, New Jersey 07724, 201/542–5400.

Women Working in Nontraditional Careers, Westchester County, New York. The county was awarded a $400,000 one-year grant from DOL under Title III of CETA to place women in nontraditional careers, those areas in which women make up less than 38 percent of the total work force. The grant funded a three-part program consisting of public service employment (PSE), skill training on an individual referral basis, and on-the-job training (OJT).

In the PSE component, fourteen women were placed in municipalities, nonprofit agencies, and school districts in jobs such as apprentice electrician, assistant commissioner of public works, bus mechanic trainee and laborer. The PSE slots have been terminated and eleven women have obtained unsubsidized employment.

Skill training had the largest enrollment with eighty-one women in vocational training schools where they learned such occupations as truck driving, electronics, radio engineering, plumbing, printing, and heating and air conditioning repair. A low dropout rate and a high placement rate were attributed to specially trained employment counselors and workshops that emphasized goal development and decision making. In addition, another twenty-three women attended school due to the efforts of the Women's Center staff who helped them apply for other grants and loans.

In OJT, women were placed in positions such as manager trainer, printer and van driver. A key to this program's success was counseling. After women atended an appropriate workshop program, the counseling and support continued through their job training situation. The eight-day workshop series included orientation to nontraditional careers, career assessment, an overview of the job market, assertiveness training, job finding methods, and interviewing techniques.

More than 150 women have been placed in nontraditional jobs. Prior to their participation in this program, most of these women received some form of public assistance.

Other important program services included an interagency referral service for women with personal problems, and efforts to educate women and businesses about occupational areas open to women.

For more information, contact the Employment and Training Office of the County Executive, 201 County Office Building, White Plains, New York 10601, 914/682–3048.

New Phase: A Career Readiness Center for Women, Montgomery County, Maryland. This program is designed to meet the needs of displaced homemakers and women reentering the labor force. It offers individual career counseling in conjunction with workshops and group discussions that clarify goals, needs, and ways to overcome obstacles.

Participants attend workshops on an overview of the job market, skills assessment and transfer, stress management, life plan-

ning, career changing, resume writing, and interview techniques. At New Phase, women also receive information from and referral to any public or private service that may help solve their problems.

In a six-week period, 154 women participated in the program. The majority of clients are over thirty-six. Half indicated that they were separated, divorced, or widowed.

For more information contact Commission for Women, 50 Monroe Street, Rockville, Maryland 20850, 301/279–1800.

VETERANS

Veterans' Emplyment Service, Oakland County, Michigan. The county's Manpower Division and Veterans' Service Division joined forces to diminish an unemployment rate that neared 17 percent for Vietnam-era veterans in November 1975. Four approaches were used to assist veterans in obtaining gainful employment:

Create employer awareness of the program.

Create veteran awareness of employers,

Counsel veterans in the techniques of interviewing,

Place veterans directly into jobs.

A mass mailing campaign and free spot media announcements are used to increase the awareness of private employers. This results in hundreds of new job listings.

A "jobs board" helps veterans become more aware of potential employers. Want ads, with military skill requirements, are highlighted and all levels of government employment are categorized for convenience. The listings are posted and updated on a weekly basis.

The counseling of veterans was expanded to include resume writing, employment markets, educational counseling, and veterans' benefits.

The service helped to place 194 veterans at a cost of $206 per person. In terms of taxes paid and government services terminated (i.e., unemployment compensation, welfare), the dollar return was $5,922 per person. As of December 31, 1977, the unemployment rate for veterans had been reduced to 7.8 percent. The civilian rate had been reduced from 11.6 to 6.2 percent.

Through CETA Title III, on-the-job training programs with employers have been established. All services will be sustained until the veterans' unemployment rate no longer exceeds the average rate.

For more information, contact Veterans' Service Division, 1200 North Telegraph Road, Pontiac, Michigan 48053, 313/858–0790.

PUBLIC ASSISTANCE

Special Employment Counseling Group, Monroe County, New York. The program was created in October 1977 to provide special counseling and job referrals for Home Relief recipients. Its goal is to find jobs for employable recipients, thus removing them from the welfare rolls or reducing their dependence.

The Home Relief Program in New York is a public assistance program to meet the needs of those who do not qualify for federally funded programs such as Aid to Families with Dependent Children or Supplemental Security Income. Program costs are shared equally by the state and localities.

By law, recipients must be enrolled in a work program to receive public assistance. Monroe County was the first to implement a work experience program (WEP) and it became a model for other localities. The county found that WEP, however, was insufficient in meeting the needs of its clients. As a result, the Special Employment Counseling Group was established through a CETA grant.

Through a one-to-one approach, the staff evaluates job skills, monitors job listings, contacts potential employers and counsels a select group on how to apply for a job and the importance of self-confidence and good work habits. Forty-five employable recipients are enrolled in the six-week project, and another is cycled in when a client leaves the program. If a client completes the six-week program and has not found a job, he or she returns to WEP.

In less than a two-month period, twelve persons had found permanent jobs and were removed from the welfare rolls. The program's goal is to place at least 50 percent of the enrollees.

For more information, contact the county Department of Social Services, 111 Westfall Road, Rochester, New York 14620, 716/442–4000.

HANDICAPPED

Vocational Rehabilitation Services Work Experience Project, Heartland Manpower Consortium, Florida. Counseling guidance, evaluation, training, and job replacement services are provided to enable physically and mentally handicapped people to return to work. The consortium uses Title I funds to pay a person's wages while he or she works at a public or private nonprofit agency to gain practical work experience.

To be eligible, an applicant must meet Title I criteria and be:

A person who has satisfactorily completed vocational training but has no work experience.

A high school graduate who possesses a skill or has the potential to learn a vocation.

Someone who is skilled but cannot locate unsubsidized employment.

The program started October 1, 1977 with twenty agencies participating in a five-county consortium—Polk, Okeechobee, Highlands, Hardee and DeSoto counties. By December 22, thirty job slots had been filled in Polk County, and the program has expanded into Highlands and Hardee counties. Job positions include secretary, bookkeeper, respiratory therapy technician, child care aide, sales manager and nursing assistant.

In addition, six high school seniors who cannot function in the classroom will graduate with their classes thanks to the project. They have been provided accredited jobs and will have the opportunity to enter public service jobs upon graduating.

The participating agencies are gaining the benefit of workers for which their budgets don't allow, and are learning firsthand about the skills of the handicapped.

For more information, contact the Heartland Manpower Consortium, 1555 West Main Street, Bartow, Florida 33830, 813/533–0621.

Program for Mentally and Physically Handicapped, Somerset County, New Jersey. With a $400,000 grant from DOL the county offers a variety of services: transportation for clients, classroom training programs, work experience, job developer services, access to a county CETA job bank, on-the-job training, public service employment, job-seeking skills training, support services, job placement services and alcohol-related counseling. An open line of daily communication is maintained among all of the participating agencies to coordinate their efforts.

In a three-month period, the program enrolled 326 individuals and terminated 261, placing 145 in unsubsidized employment. An additional forty-five participants were placed into public service employment positions.

The county is trying to find funding to maintain the level of services after the federal grant expires. For more information, contact the county Employment and Training Agency, County Administrative Building, Somerville, New Jersey 08876, 201/725–4700.

PUBLIC AWARENESS

Public Awareness Pilot Program, Cumberland County, New Jersey. The county CETA department received a grant from the state's discretionary fund to promote and publicize the county's $6 million CETA services. The program involved information dissemination, public speakers, press tours, and publicity for CETA programs and learning centers.

When this program started in April 1977 there was little reference material on CETA programs, policies, benefits to the community, successes and failures. In a short time, the Public Awareness Program created a library of materials which explained CETA to county residents.

The program informs the public about CETA opportunities and services, contributes to the private sector's understanding and involvement, and projects a positive image of CETA through the local media and in Congress. It is under consideration for refunding by the state to transmit expertise to other prime sponsors.

For more information, contact the county CETA, P.O. Box 457, Bridgeton, New Jersey 08302, 609/451–8920.

GENERAL EMPLOYMENT AND TRAINING

Nontraditional Training of Human Service Generalists, Humboldt County, California. A recruiting and training program for human services workers has been part of the county's service delivery system since 1976, when the program's federal funding expired. The New Careers program involves the county mental health department, CETA, a local college, and many local service providers. Community college classroom training is combined with accredited work experience.

The program was founded on the premise that human services can be more effective when delivered by those who have been users of the system and have learned how to provide assistance. Accomplishments include a rise in the level of services offered by the county, development of career ladders for participants, and recruitment of those with the most severe barriers to employment. Seventeen of twenty-four persons completed the first two-year training cycle.

Further evidence of the program's success is the comparison of salary levels achieved by the participants. When they entered the program, only six persons earned $3 or more an hour. At the end of the training cycle, fifteen were earning $3 or more and eight of these over $5 an hour. An example of a new careerist is a forty-five year-old woman with two children who was an alcoholic and receiving public assistance. She is now a recovering alcoholic and director of a women's recovery home.

For more information, contact the county CETA Department, 922 Fourth Street, Eureka, California 95501, 707/445–7715.

School District Counseling Intake Agencies, Oakland County, Michigan. The CETA intake and counseling program was decentralized to ensure that CETA services were provided equitably to county residents in a 900-square mile area. A comprehensive approach to the delivery of employment and training services is exemplified by the county's use of school districts, the state employment office, local government, nonprofit agencies and private businesses in establishing the intake agencies.

Ten agencies provide intake counseling, development of employability plans, referrals to training programs, on-the-job training and job placement services. In fiscal year 1977, the agencies placed 3,000 enrollees into unsubsidized jobs, a placement rate of 66 percent. Over seventy classroom training courses representing twenty-two occupations were offered which resulted in a twenty-five percent increase in wages for participants when compared to their wages prior to training.

For more information, contact the Department of Manpower, 2370 Pontiac Lake Road, Pontiac, Michigan 48054, 313/858–1078.

Preemployment Evaluation Program, Cumberland County, New Jersey. The county CETA office initiated a program to help skilled people find employment. Many did not know how to look for a job, prepare a resume, market their backgrounds and present their talents to prospective employers.

Through an intensive four-week course, participants learn how to choose a vocational goal and reach it.

Although the program began in October 1977, about 70 percent of the students have found employment. Those who do not find a job are assigned a job developer for assistance.

For more information, contact the county CETA Department, P.O. Box 457, Bridgeton, New Jersey 08302, 609/451–8920.

CETA/Public Service Employment Aimed at Private Sector Jobs, Baltimore County, Maryland. The program is designed to develop transfer skills so that workers can be trained in the public sector and find jobs in private industry. CETA workers and their supervisors attend a series of workshops which emphasize private sector placement. Local community college staff act as trainers and resume consultants. A job developer visits local businesses to distribute resumes.

Other courses such as speed writing, turf management, stress management and high school equivalency examinations are offered with paid release time. In addition, private employers speak at special seminars.

The total rate of positive terminations is 66 percent. After completing the program, the average wage of a participant rose from $3.31 per hour to $4.02.

Also contributing to the program's success are paid time for job search activities and a mandatory eighteen month limit on participation.

For more information, contact Research and Public Affairs, CETA/PSE Office, Courthouse Mezzanine, Towson, Maryland 21204, 301/494–2470.

South Dade Skill Center, Dade County, Florida. The county population includes many Spanish-speaking seasonal farm workers who have been displaced by automation and lack the skills needed to obtain other jobs. Through the efforts of the county, school board and community organizations, the skills center was built in 1976 with local and federal funds. Additional funds were obtained from the Community Development Administration to build a child care center at the same facility in 1977.

The center has classrooms, a learning lab, a cafeteria, landscaped grounds, patios and parking facilities. A primary goal is to assist persons seventeen years and older to choose, prepare for, and secure a vocation. The county manpower division has responsibility for recruiting trainees, orientation, supportive services, job development and placement. The school board develops course content and provides teachers and equipment. Community organizations provide transportation and other support services.

The center serves the entire community with an emphasis on the migrant farm worker. The staff also seeks to recognize and deal with the social, personal, occupational and motivational problems that are part of unemployment. During fiscal year 1977, of the 585 persons who entered training, 64 percent completed the program and 54 percent obtained jobs.

For more information, contact the Department of Human Resources, 140 West Flagler Street, Room 1503, Miami, Florida 33130, 305/579–5416.

South Shore Chamber Job Fair, Norfolk County, Massachusetts. Through the joint efforts of the county and the chamber of commerce, a job fair was held in which more than fifty companies and 5,000 job seekers participated. More than 525 jobs were filled ranging from unskilled to professional.

For more information, contact the county Economic Planning and Development Office, 1776 Heritage Drive, North Quincy, Massachusetts 02171, 617/326–1600.●

CRITICISM OF CONGRESS

● Mr. HATHAWAY. Mr. President, we in Congress have been subject to an increasing crescendo of criticism. There is no question that Congress recent performance has been disappointing, especially to many Members. Much of the criticism, unfortunately, is unfounded or shrill. It is most helpful, therefore, to read a thoughtful and concerned analysis of our situation by someone who is intimately familiar with Congress. Such a commentary was published in the Boston Globe on this past Friday by Steven Pearlstein, administrative assistant to Representative MICHAEL J. HARRINGTON of Massachusetts, who, unfortunately for Congress and for his constituents, has recently announced his intent to retire.

I think that all of us can profit by reading Steve's balanced and penetrating analysis, and I ask that it be printed in the RECORD.

The commentary follows:

[From the Boston Globe, Aug. 11, 1978]

WHY CONGRESS DOESN'T WORK ANY MORE

(By Steven Pearlstein)

Congress doesn't work.

It's not just that Congress doesn't work well, or that it has made mistakes, or that it's misdirected. More fundamentally, Congress no longer provides a legitimate forum by which a democracy of 210 million people define the parameters of public policy. Perhaps all that can be said is that Congress each year finances the continuing operations of an increasingly independent bureaucracy.

In school, they used to teach the competing interest theory of legislation. According to that theory, the competing special interests exercise their weight in the halls of Congress on issues of concern. The product that comes out is an accommodation to those interests in rough proportion to their size and influence. It assures the greatest good for the greatest numbers, or so the theory goes.

It can now be revealed that the theory is out of date because it predicated on two assumptions which are no longer valid.

The first is that members of Congress, and the public generally, have a commitment to the process of legislating which transcends individual or group interests in any particular issue. Whether because they are frustrated or because they want to cast themselves in the role of "The Scrapper" for the folks back home, many members have decided to be legislative "kamikazes," willing to halt, subvert, corrupt the entire process of legislation until they get their way. These legislators are spurred by special interest groups who look to the Vietnam era protesters for their models: keep disrupting, make no compromises, and eventually you'll win. And all too often, it works.

Recent examples include the right-to-life campaign, which is content to hold up any important piece of legislation as hostage to its cause—usually at the expense of the elderly the poor, and the disabled. Foes of natural gas deregulation are willing to allow the United States to drift for another decade without an energy policy rather than accept a policy containing a natural gas compromise. Business lobbies are willing to tie up the Senate for the equivalent of an entire legislative year by fueling filibusters on labor law reform, antitrust enforcement and consumer protection.

Now, as the House and Senate trip over themselves to adjourn by Sept. 30, so many pieces of legislation will be held hostage pending defeat or passage of other legislation, that the leadership will need a computer to sort the whole thing out. Majority rule is a myth.

In short, there is no longer, on the part of many congressmen and interest groups, a commitment to the process of legislation sufficient to support the acceptance of a full or partial defeat on a controversial issue. No legislation at all is seen better than unacceptable legislation in a particular area. And it is no legislation that we are getting. In 18th Century jargon, the checks no longer balance.

The second false premise among political theorists is that there are basic human values which are accepted by the actors in the process of legislation—congressmen, staffs, lobbyists, the press and constituents. Those values would translate into a set of beginning assumptions: that a congressman is honest until proven otherwise; that what is said is what is believed; that a commitment to a cause or another politician is a commitment not to be lightly dissolved; that there is a minimum level of civility by which intelligent human beings should interact; that a secret is confidential. Those assumptions are no longer valid, and the civility is no longer there.

Felix Rohaytan, speaking to a group of Harvard Business School graduates in New York the other day, summed it up nicely: "The ruthlessness of political relationships, the callous disregard for a minimum level of human kindness, have to be seen to be believed."

The very fabric of the legislative process has been torn asunder and as a result, the process has degenerated to a point that Congress doesn't function any more. It is simply more than coincidence that we have no energy policy, no government reorganization, no anti-inflation policy, no handle on the dollar slide abroad, no coherent approach to the Russians or the Chinese, no sense of what an equitable tax code would look like, no strategy for ameliorating the poverty at home and abroad. The problem is not so much that we have no solutions to these problems, but that we have no viable framework by which to fashion them collectively.

The blame for this predicament can be spread very neatly all around the landscape, a healthy dose of it to the press, which often panders to the obstructionists and reactionists and ignores most attempts at thoughtful legislation. The solution will involve a very slow and painful process of mending the fabric by which individuals and interests interact in the congressional setting. Without that solution, the Congress will soon rival the Italian parliament in its ability to tie itself in knots.●

PRIVATE PSYCHIATRIC HOSPITALS

● Mr. MATHIAS. Mr. President, I commend to my colleagues an article in private psychiatric hospitals written by Dr. Robert W. Gibson, medical director and trustee of the Sheppard and Enoch Pratt Hospital of Towson, Md. The article appeared in the July 1978 edition of the American Journal of Psychiatry. Its discussion of the contributions of the private sector to the development of psychiatric care in this country merits the fullest consideration. I ask that the article be printed in the RECORD.

The article follows:

PRIVATE PSYCHIATRIC HOSPITALS: "EXCELLENCE IS THEIR WATCHWORD"

(By Robert W. Gibson, M.D.)

Although private psychiatric hospitals accounted for only 3 percent of the total pa-

tient care episodes in 1975[1] and have probably never provided more than 5 percent of that care, they have been and continue to be a major force in psychiatry. During the 1800s a small group of psychiatric hospitals, by their espousal of the moral treatment of the insane, were instrumental in bringing patients out of the almshouses, attics, and prisons. John S. Butler, M.D., who served from 1843 to 1873 as the fourth Superintendent of the Hartford Retreat (now the Institute of Living), was a leader in the movement toward humanitarian care of the mentally ill. Describing his visit in 1842, the year before Dr. Butler moved to the Hartford Retreat from the state hospital in Boston, Charles Dickens marveled that "every patient in this asylum sits down to dinner every day with a knife and fork, and in the midst of them sits the gentleman [Butler] whose manner of dealing with the charges I have just described. . . . At every meal moral influence alone restrains the more violent among them from cutting the throats of the rest: but the effect of that influence is reduced to an absolute certainty and its found even as a measure of restraint to say nothing of it as a means of cure, a hundred times more efficacious than all the strait waistcoasts, fetters, and handcuffs that ignorance, prejudice, and cruelty have manufactured since the creation of the world."[2]

In 1948, when Albert Deutsch wrote The Shame of the States,[3] this same humanistic concern within private psychiatric hospitals provided the evidence that the mentally ill deserved more than the custodial warehousing and neglect to which they were then relegated. Some private psychiatric hospitals engaged in major programs of research, and virtually all were innovators in applying the newly emerging concepts to their treatment programs. As freestanding accredited training centers or in affiliation with academic centers, many private psychiatric hospitals offered physicians an opportunity to learn from intensive work with a small number of patients under the tutelage of experienced clinicians. As treatment services increased and patterns of care changed, private psychiatric hospitals, frequently in collaboration with newly developing facilities, continued as models of excellence committed to serving the patient. Guided by Francis J. Braceland, M.D., the Institute of Living continued to be an outstanding example of excellence.

A CHANGING MENTAL HEALTH DELIVERY SYSTEM

Action for Mental Health (4), the report of the Joint Commission on Mental Illness and Health, contributed to several important changes in health care delivery during the past two decades: a significant increase in the number of psychiatric units in general hospitals, the development of community mental health centers with federal support, and sharp decreases in the number of beds in state and county mental hospitals. Patient care episodes[14] more than quadrupled, increasing from 1.7 million episodes in 1955 to 6.9 million in 1975. The rate of patient care episodes per 100,000 population tripled, increasing from about 1,000 in 1955 to 3,000 in 1975. Inpatient episodes accounted for 77 percent of the total in 1955 but only 27 percent of the total by 1975, with 70 percent outpatient and 3 percent day treatment patient care episodes.[5]

Despite these increases total admissions and patient care episodes still fall short of the estimated need. In its preliminary report of September 1977 (5), the President's Commission on Mental Health estimated that "between 20 and 32 million Americans need some kind of mental health care at any one time". As a consequence—

"The current direct cost of providing mental health services is about $17 billion a year. The social costs, when measured in terms of lost wages and a shortened life span, is estimated to be another $20 billion.

And beyond these statistics—

"There are millions more who seek help for emotional problems elsewhere, especially from their personal physicians or from health care clinics. For example, 15 percent of patients seen in general medical practice are found to have psychiatric or emotional problems. At any given time, 25 percent of the population is under the kind of emotional stress that results in symptoms of depression or anxiety."

The increase in patient care episodes should continue. The need is there, and progress is gradually being made to overcome the stigma that impedes the treatment of mental illness. The trend toward greater reliance on community mental health centers, general hospitals, and private psychiatric hospitals is appropriate. The financing of mental health care is grossly inadequate but is improving slowly. Improved financial resources should reduce the dependence on government institutions, and state mental health programs are making a deliberate effort to shift care toward the private sector. Private psychiatric hospitals are already modifying their role and can be expected to do so without compromising quality.

CHANGES IN PRIVATE PSYCHIATRIC HOSPITALS

Until 1972 the numbers of patients served by private psychiatric hospitals and the distribution between inpatient and outpatient services were relatively stable. Bethel[6] reported that during the period 1968–1971 the number of hospitals stayed at about 150. The number of inpatients in residence at year-end varied only from about 10,200 to 11,000; annual admissions fluctuated from a low of about 87,000 in 1970 to a high of 92,000 in 1969. Changes in the distribution of admission diagnoses were slight, with depressive disorders accounting for approximately 40 percent of the total and schizophrenic reactions for 20 percent. However, there was a trend toward the admission of younger patients; patients under age 25 at the time of admission constituted 18 percent of all admissions in 1968 and 24 percent in 1971.

Substantial changes began to occur during the period 1972–1975, when the number of hospitals increased to 180, the number of inpatients in residence at year-end rose 10 percent to about 11,500, and annual admissions rose to 130,000. The growth in the number of hospitals was due largely to new investor-owned hospitals. By 1975 nearly two-thirds of all private psychiatric hospitals were operated by corporations, individuals, or partnerships on a for-profit basis, with the other third operated by not-for-profit groups, including church foundations. The greatest number of hospitals and beds was concentrated in the mid-Atlantic region, with the smallest number in the Northwest. Private psychiatric hospitals in New England had the greatest number of beds per 100,000 U.S. resident population. About 15 states had no private psychiatric hospitals, and 11 states had only 1; California had 27, and New York had 14.[7]

Although private psychiatric hospitals are organized to provide inpatient care, alternatives to inpatient treatment are being developed. Between 1971 and 1975 admissions to private psychiatric hospital outpatient programs increased 80 percent, day treatment, 67 percent; and inpatient care, 44 percent.[8] By 1975, of a total of about 180 private psychiatric hospitals, 42 percent provided day treatment; 35 percent, outpatient care; 24 percent, emergency services; and 8 percent, halfway houses.[9]

CHARACTERISTICS OF THE PRIVATE PSYCHIATRIC HOSPITAL—1975

In an effort to clarify the role of the private psychiatric hospital in the mental health delivery system, the National Institute of Mental Health and the National Association of Private Psychiatric Hospitals jointly conducted a survey of one month's admissions to private psychiatric hospitals.[10] This study yielded information from three-fourths of the hospitals surveyed, making it reasonably representative of the total. During May 1975, the month surveyed, 7,864 people were admitted to the inpatient services of 139 private psychiatric hospitals.

Of the total number of patients admitted, 42 percent had depressive disorders; 22 percent had schizophrenia; 9 percent had alcohol disorders; 6 percent had adjustment reactions of adolescence, adulthood, or late life; and 5 percent had personality disorders. The remaining 16 percent suffered from drug disorders, organic brain syndrome, childhood disorders, and neuroses excluding depressive states. About 45 percent of the patients admitted were male and 55 percent female. The trend toward younger patients continued, with 27 percent under 25 years of age, 37 percent aged 25–44, 27 percent aged 45–64, and 10 percent 65 years old or older.[10]

The survey indicated that the three major referral sources of all inpatient admissions were private psychiatrists (44 percent), followed by self, family, or friends (24 percent) and by other physicians (11 percent). Approximately three-fourths of the patients admitted reported previous psychiatric care. Thirty-nine percent had received previous inpatient care in the same hospital to which they were admitted, and 30 percent had received inpatient care in another psychiatric hospital.[10] About 3 out of 10 patients had seen private psychiatrists, and more than 1 out of 10 had had other types of nonpatient psychiatric care. This suggests that most of the patients admitted posed serious therapeutic problems and many had been treatment failures.

The types of psychiatric treatment most frequently received by the patients in the survey were individual psychotherapy (90 percent), drug therapy (83 percent), group psychotherapy (61 percent), family therapy (20 percent), and electroconvulsive therapy (8 percent). Ninety-four percent of the patients received two or more types of treatment, and about 70 percent received three or more types. The median number of days spent in the hospital was directly related to the number of treatments, presumably because of the greater severity of illness in those patients receiving multiple therapies. Patients receiving one type of treatment stayed a median of 8 days, two types 17 days, three types 21 days, four types 25 days, and five or more types 31 days.[10]

Staff-patient ratios are too gross to be an indicator of the quality or adequacy of treatment programs. Many factors are not taken into account in such an index—for example, the patient mix in terms of age, diagnosis, or severity of condition, and the type and intensity of the program. Nevertheless, comparisons of staff-patients ratios for the various types of mental health facilities do illustrate major differences in the intensity of patient care and give some indication of the level of care in private psychiatric hospitals.

According to Taube and Witkin,[11] in January 1974 the staff-patient ratio for all private mental hospitals in full-time equivalents of staff per 100 average resident patients was 204 total staff, with 124 patient-care staff (66 professional and 58 other). Not-for-profit private hospitals had a ratio of 238 total staff compared with 173 total staff in investor-owned hospitals; there were 140 patient-care staff in not-for-profit hospitals compared with 110 in investor-owned hospitals. Within the nonpublic general psychiatric hospital units the total number of staff per 100 patients was 130, with 115 patient-care staff (65 professional and 50 nonprofes-

Footnotes at end of article.

sional). In state and county mental hospitals the total staff per 100 patients was 88, with 57 patient-care staff (18 professional and 39 other).

Of the May 1975 admissions to private psychiatric hospitals, about 95 percent of the patients were discharged in 4 months or less. Over 90 percent of all patients were discharged within 12 weeks, with 23 percent in 7 days or less, 17 percent in 8–14 days, 25 percent in 15–28 days, 14 percent in 29–42 days, and 13 percent in 43–84 days. Of the patients discharged, about half had been referred to private psychiatrists for further treatment and one-fourth to out-patient psychiatric clinics or services.[10]

In summary, about two-thirds of the patients admitted had depressive disorders or schizophrenia. Over half were referred by psychiatrists or other physicians and one-fourth by self, family, or friends. Most patients had had previous psychiatric treatment, often inpatient care. Psychotherapy (individual, group, and family) and drug therapy were the principal treatment modalities, with the vast majority receiving multiple therapies. Staff-patient ratios were generally higher in private psychiatric hospitals than in other mental health facilities, with the not-for-profit hospitals highest at 238 total staff and 140 patient-care staff per 100 patients. About two-thirds of the patients were discharged within 4 weeks and 90 percent within 12 weeks, with three-fourths referred for continued treatment.

A PLURALISTIC SYSTEM

At this juncture there is no reason to believe that one type of facility is in all respects superior to another. Each has its strengths depending on the mission and characteristics of the institution. For this reason a pluralistic approach is in order and will probably continue indefinitely. However, it is helpful to examine the differences among facilities in order to understand how each can best serve the patient.

In the psychiatric units of nonpublic general hospitals, inpatient services are stressed and about 50 percent of the patient care episodes involve this treatment mode. Treatment is usually short-term, with an emphasis on crisis resolution and reliance on somatic therapy. The ready availability of surgical and general medical services gives the psychiatric unit of the general hospital a particular advantage in the treatment of patients with interrelated physical illness, psychiatric complications of medical and surgical conditions, severe psychosomatic illnesses, substance abuse requiring detoxification, and severe organic disorders. Because an attending psychiatrist can follow a patient through all modes, including inpatient, outpatient, and day treatment, continuity of care is enhanced. However, physical space, facilities for activities, and specialized treatment services are often limited, particularly in smaller units. Hospital support services designed for the needs of medical and surgical patients are not always well suited to the needs of psychiatric patients, particularly those requiring intermediate or long-term care. Daily costs are usually higher than in psychiatric hospitals, but this is offset by generally better third-party coverage. Some patients and families find treatment more acceptable in the psychiatric unit of a general hospital because these units are in the mainstream of the medical care system.

Community mental health centers place heavy emphasis on outpatient and day treatment (about 81 percent and 7 percent, respectively, of patient care episodes in 1975)[11] as alternatives to hospitalization. As an organized system of care, most provide at least the five basic services initially required for federal funding (inpatient, outpatient, day treatment, emergency, and consultative services). They are expected to identify and meet the needs of residents, particularly the underserved, within a defined catchment area and to strive for early and prompt intervention. There is less reliance on psychiatrists, with correspondingly greater use of other mental health professionals and paraprofessionals. Matching funds helped community mental health centers get started, but severe fiscal problems have been created by the withdrawal of these funds. Somewhat belatedly, the centers are looking to other sources of financial support such as Blue Cross, commercial carriers, and personal payment.

State mental health systems, particularly state hospitals, have come under intense pressure as the cost of health care has escalated and budgets have not kept pace. This has caused an erosion of resources available to the hospitals and has provided only limited funds for new outpatient and day treatment services in the community. Deinstitutionalization programs all too often have been imposed by politicians with the intent of cutting costs rather than meeting the needs of patients. The leaders of many state mental health programs have recommended that rather than being direct providers of care, states should assume the initiative in identifying needs, planning, coordinating, determining priorities, setting standards, allocating resources, and evaluating. Despite the problems, many state programs are excellent. As direct providers of care the state systems potentially are in the best position to provide programs that fill needs not currently met by the private sector. In many instances these efforts can be enhanced by collaborative arrangements with private hospitals, general hospitals, and community mental health centers.

ROLE OF THE PRIVATE PSYCHIATRIC HOSPITAL

The main purpose of the private psychiatric hospital is to serve the patient. Many private hospitals, as collateral purposes, engage in teaching, research, and community consultation. Most private psychiatric hospitals strive for excellence that goes beyond simply meeting needs at an acceptable level of quality. As a consequence, they have, over the years, served as models against which to measure other programs.

In private psychiatric hospitals, treating the mentally ill is not simply one of many specialty services as it is in the general hospital. Even though private hospitals are expanding day treatment and outpatient programs, the emphasis continues to be on the inpatient treatment of individuals with severe psychiatric disorders, whereas community health centers stress emergency, crisis intervention, outpatient, and day treatment services. This allows the private psychiatric hospital to maintain programs to meet the needs of patients with more severe psychiatric disorders that require more specialized care.

Because of the emphasis on the treatment of psychiatric patients, the private psychiatric hospital is so organized that the institution becomes a therapeutic instrument in its own right. There has been a natural evolution from the moral treatment of the 1800s to the therapeutic community of the mid-1900s. The private psychiatric hospital provides the setting and resources for a coordinated treatment program in which most patients receive multiple therapeutic modalities. The potential is greater for definitive treatment beyond crisis intervention and symptom removal.

The private psychiatric hospital has an advantage over other types of facilities in preserving a more direct relationship with the patient. A higher degree of confidentiality can be maintained despite the encroachment of some third-party payers and government requirements. The greater freedom of choice enhances the patient's capacity to develop a therapeutic alliance. The direct relationship to those they serve has made private psychiatric hospitals more directly accountable to the patient than is usually possible in large public systems dominated by the political process and government bureaucracy.

As part of the private sector, private psychiatric hospitals have relied on revenue from patient care as their major source of funding. Of the total admissions to private psychiatric hospitals in 1975, the principal sources of payment were as follows: Blue Cross, 37 percent; commercial insurance, 30 percent; Medicare, 11 percent; other types of government payment, 10 percent; and personal payment, only 6 percent.[12] This reliance on revenues from services to patients has made private psychiatric hospitals cost conscious and has stimulated the development and refinement of management services. As part of the private sector, they have retained close ties with the majority of private psychiatrists, some 2,000 of whom serve as staff and resident psychiatrists, with several thousand more on attending or courtesy staffs.

Private psychiatric hospitals have struggled against such external regulation as the growing requirements of health planning, certification of need, and government third-party funding. The constraints are considerably greater than they were 10 years ago, but the private psychiatric hospital still has a greater flexibility and opportunity for self-determination than do most other psychiatric institutions. With its multiple funding sources, the private psychiatric hospital has greater latitude in responding to the dictates of third-party payers. Addressing the National Association of Private Psychiatric Hospitals, Dr. Braceland noted. "Government money is 'soft money,' and when economy programs are in vogue that money disappears just as government training and research money is disappearing now. Your hospitals are immune, for they should be dependent upon themselves."[13] Individually, and through areawide and national associations, private psychiatric hospitals have been vigorous advocates and effective leaders in influencing the funding policies of government and private insurers.

THE FUTURE

In the future, inpatient care of high quality for children, adolescents, and adults should continue as the hallmark of the private psychiatric hospital. Major expansions should be made in outpatient and day treatment programs. More specialized alternatives to inpatient care, such as halfway houses and community services, are needed. To be more accessible and responsive to community needs private psychiatric hospitals should initiate more diagnostic, evaluation, emergency, and crisis intervention services. The spectrum of patients served should be broadened by greater emphasis on alcoholism programs, active treatment for the elderly, programs for the drug abuser, and special education for the mentally disabled. Greater involvement is needed in preventive programs of (1) consultation to community agencies, (2) public education, especially for those who influence others, such as executives, teachers, labor leaders, judges, and politicians, and (3) counseling, school guidance, and vocational rehabilitation.

Private psychiatric hospitals should participate actively in continuing education for mental health professionals and place greater emphasis on in-service training as a method of maintaining and improving the quality of psychiatric care. In keeping with their emphasis on excellence they should utilize, refine, and assess the new techniques for quality assurance. Private psychiatric hospitals can make significant contributions to research, particularly in the application and evaluation of newer therapeutic approaches. They should explore the opportunities for

Footnotes at end of article.

collaboration with public and private agencies, general hospitals, and state mental health systems, as well as with other organized health care systems such as health maintenance organizations and community mental health centers. As more resources are made available through government and private insurers, private psychiatric hospitals should strive to provide more patient services to the underserved.

As Dr. Braceland has so succinctly put it, "As to the future of the private mental hospitals, it is bright providing excellence is their watchword".[13]

[14] Patient care episodes are defined as the number of residents in inpatient facilities at the beginning of the year (or the number of persons on the rolls of non-inpatient facilities) plus the total new admissions, readmission, and returns from long-term leaves during the year.●

STOPPING THE INTERNATIONAL BIDDING GAME

● Mr. METZENBAUM. Mr. President, last week the Ford Motor Co. announced that it will build a $533 million engine plant in Ontario, Canada, instead of in Lima, Ohio, where the company had also been conducting negotiations. That plant would employ 2,600 people and will produce a newly designed V–6 engine that will be used in the Ford cars of the 1980's. Ford's decision to locate the plant in Ontario will not create any new unemployment in Lima, so that is not the major concern for me. However, I am deeply upset with the role of the Canadian Government during negotiations for this plant.

According to reports from the Department of Treasury and in the media, the Canadian national government offered a variety of cash subsidies to Ford worth $61.2 million to attract the plant to Ontario. Other reports indicate that the Canadian Government has proposed to give General Motors $77 million to locate a foundry near Montreal. Mr. President, I find this kind of government subsidy to private car manufacturers unacceptable. It pits one country against another in a bidding war that hurts the overall interests of each country. Canada is our longtime ally. We exchange goods and commodities on a massive scale. We share a common border and many common interests. I am not saying that American car manufacturers should not be allowed to build their plants in Canada, but I do not believe that the Canadian Government should be involved in this game of international auctioning, where manufacturers locate a plant in the country of the highest bidder.

The Department of Treasury has already registered its strong objection to the Canadian Government's subsidies. Last Friday, Assistant Treasury Secretary, Fred Bergsten, went to Ottawa to discuss this urgent problem and others relating to trading relations between the United States and Canada. I have not been in touch with Mr. Bergsten since he has returned, but news reports from that meeting have stated that the Canadian Government and U.S. Government have agreed in principle to stop the government-incentive competition to attract new auto industries. This is a necessary first step to ending what Secretary Bergsten referred to as a "mugs' game" to attract private corporations with taxpayers' dollars, and I welcome this agreement. In recent testimony before the Housing Banking Committee, Assistant Secretary Bergsten stated that the United States "cannot sit by while these interventionist practices are escalated to the Federal level." I would urge the Treasury Department to stand fast in its efforts to end this kind of Government subsidy system which undermines our international trading agreements. I would also urge the Canadian Government to cooperate in these efforts to prevent another round of international subsidy competition, which would greatly harm our history of cooperation and mutual understanding.●

PODRABINEK'S TRIAL AND THE MISUSE OF PSYCHIATRY FOR POLITICAL PURPOSES

● Mr. LEAHY. Mr. President, 25-year-old Aleksandr Podrabinek will stand trial today under Article 190—1 of the RSFSR Criminal Code, "circulation of fabrications which defame the Soviet State and the social system". He faces a possible sentence of 3 years in a Soviet labor camp. The "fabrications" that Podrabinek has circulated are in fact accurate and detailed descriptions of the grim conditions prevailing in Soviet psychiatric hospitals where political prisoners are often sent for mental and physical punishment.

The misapplication of the law in the Podrabinek case is clear. As a founding member of the Working Commission to Investigate the Abuse of Psychiatry for Political Purposes set up on January 5, 1977. which is closely affiliated with the Moscow Public Group to Promote Observance of the Helsinki Agreement, Podrabinek has been a target of KGB reprisals for some time: In July 1977 Podrabinek was interrogated twice in connection with the case of Yuri Orlov of the Moscow Group and told that he would be arrested if he did not cooperate in testifying against Orlov. The Soviet authorities tried to blackmail Podrabinek into emigrating from the USSR by threatening to arrest his brother, Kirill. After Podrabinek refused to leave the country on the condition that he take his father and brother with him, his brother, on December 31, 1977, was indeed arrested and convicted on the basis of false evidence that was planted in his apartment by KGB agents. On May 15, 1978, the opening day of Orlov's trial, Podrabinek himself was arrested.

The Soviet practice of sending perfectly sane dissidents to insane asylums on the contention that their dissent is a manifestation of schizophrenia and that the constant KGB persecution of which they complain is nothing more than paranoid delusion is by far the most damning example one can find of the mis-application of law in the USSR.

In his book entitled "Punitive Medicine", that appeared in samizdat form in 1977, Podrabinek described many instances where the Soviet authorities have converted places of healing into torture chambers for political undesirables. In the name of medicine, perfectly healthy people are made to suffer physical and psychological abuse and often leave the hospital broken men and women.

These abominations are unconscionable.. That Podrabinek has risked his freedom to make them public does defame the USSR and condemns the Soviet state and social system in the eyes of the world—but it is a justifiable defamation for it is based on fact and not fabrication.●

ALASKA LANDS BILL

● Mr. HATHAWAY. Mr. President, I am pleased to join in support of S. 1500—amendment 2176, as proposed by my colleague from New Hampshire, Senator DURKIN. This is the Alaska lands bill, which is supported by a broad coalition of groups, from the National Council on Senior Citizens and the United Auto Workers to the major environmental and conservation organizations.

For most of us, Alaska truly represents America's last frontier, a State of unequaled pristine beauty and an abundance of natural resources. In the past decade, we have all come to realize the value of wilderness itself as a rich natural resource. In Alaska, we have the oppor-

tunity to avoid the errors committed during the development of the lower 48 in the past century, while still permitting the development of the mineral, forest, and petroleum resources needed for this century and the future.

S. 1500, with amendment 2176, strikes a sound balance between conservation and development. The Senate Energy and Natural Resources Committee is giving the Alaskan legislation top priority. I commend my colleagues on that committee for the long hours and thoughtful consideration they are putting into this issue so important to all of us.

The specific authority under which 80 mililon acres of Federal land was withdrawn from the State selection process or development—the so-called d–2 lands—expires at the end of this calendar year. It is not in anyone's interest to prolong the uncertainty as to the future status of these lands. The Secretary of the Interior has indicated that if Congress does not act, he will use his administrative authority to protect these lands. Failure to act this year will result only in prolonged uncertainty; such uncertainty does not produce gas or oil nor serve the interests of those who have reservations about the legislation. It is essential that we make every effort to have final action on this question in this session of Congress.

Any mineral and petroleum resources which will be affected by the new conservation units under the legislation will be a hedge against the future, both the for Alaskans and for all Americans. They are not "locked up" for all time; they are preserved just as the wilderness will be preserved for future generations to use and develop. These future years are likely to bring increasingly sophisticated ways both to exploit the resources and to preserve the pristine values, side by side.

Mr. President, at this time, I ask to have printed in the RECORD a brief background memorandum on the Alaskan issue and on the impact of S. 1500/amendment 2176.

The memorandum follows:

BACKGROUND ON THE ALASKAN "d–2" ISSUE

Alaska is approximately 375 million acres, nearly all of which is federally owned. In the 1958 Statehood Act, the state was to choose 104 million acres by 1984. In 1966, a freeze was put on this state selection process until native claims could be resolved.

This was accomplished in 1971 when Congress passed the Alaska Native Claims Settlement Act. Under Section 17(d–2) of that Act, 80 million acres of Federal (Bureau of Land Management) land was protected from state selection or development to see if it should be further protected in conservation units. Decision on these "d–2" lands is due from Congress by the end of 1978.

S. 1500/Amendment 2176 would provide protection for 110 million acres of Alaskan lands. Along with existing conservation units, the bill would put a total of 37% of Alaskan lands into one of 4 conservation units—the National Park System, the National Wildlife Refuges, Wild and Scenic River System, and the National Forest Service.

40 percent of Alaskan lands would be available to the state, to Native Corporations authorized under the 1971 Settlement Act, and to private landowners. These lands are thought to be those with the most mineral and petroleum potential.

The following is a statistical breakdown of Alaskan lands under the bill:

—40 percent (149 million acres) will be the property of the State, private landowners or Native Corporations.

—23 percent (86 million acres) will be Federal land open to mineral entry, logging and other uses.

—63 percent (235 million acres, the sum of the above) will be open to a wide variety of uses.

—37 percent (140 million acres) will be in one of the conservation units already existing or designated under the bill.

—70 percent of the metallic mineral potential in Alaska will be outside conservation system units.

—90 percent of all the land in Alaska could be open to sport hunting.

—95 percent of all high potential oil and gas lands in Alaska will be open to possible development.

—100 percent of all Federal lands in Alaska will be open to mineral assessment by the Department of Interior.●

PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD at this point the notification I have just received.

The material follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., August 14, 1978.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78–72, which concerns the Department of the Army's proposed Letter of Offer to Iran for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $185.9 million and support costs of $6.1 million for a total estimated cost of $192.0 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
Lieutenant General, USA.
Director.

[Transmittal No. 78–72]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Iran.
(ii) Total Estimated Value:
Major Defense Equipment*, $185.9 million.

Other, $6.1 million.
Total, $192.0 million.

(iii) Description of Articles or Services Offered:

Eighty four (84) self-propelled 8" Howitzers, M110A1 and two hundred fourteen (214) self-propelled 155mm Howitzers M109A1B.

(iv) Military Department: Army.

(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: Aug. 14, 1978.

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).●

SIX MILLION UNEMPLOYED—HUMPHREY-HAWKINS ESSENTIAL

● Mrs. HUMPHREY. Mr. President, on August 4 the Bureau of Labor Statistics reported that over 6 million Americans who wanted to work were unable to find jobs in July. The overall unemployment rate rose from 5.7 percent in June to 6.2 percent in July—the largest monthly increase since March 1975.

While these figures represent a tragedy for all Americans, minorities, women and young people have been hardest hit. The jobless rate for blacks is up to 12.5 percent, more than twice the rate for whites. In fact, while the national unemployment rate has eased from close to 7 percent last year, black unemployment has been little changed since last December, hovering between 12 and 13 percent. For women, the unemployment rate went up to 6.5 percent. Moreover, 1 out of 10 women who heads a family was unable to find work to support herself and her dependents. For teenagers the situation can only be termed a depression. Official statistice indicate jobless rates of 16.3 percent for all teens and a whopping 37 percent for minority teens. In some inner-city neighborhoods unofficial surveys find 2 out of 3 teenagers unable to find a job and a generation of young people growing up without skills, work experience or a stake in our society.

Mr. President, we should all be jolted by these statistics and the economic and social costs they represent. But more important than simply reacting to monthly variations in the economic indicators, we should be focusing on the critical task of devising long-term policies and effective programs to insure that in future months Americans will not be denied the opportunity to earn a living.

That is why I believe that passage this session of S. 50, the Full Employment and Balanced Growth Act is so vital. This legislation establishes in law this country's commitment to a job for every American able and willing to work and sets in motion a comprehensive planning process to reach this goal. It brings a critical dimension of rationality and concern for the jobless into our economic decisionmaking and as such is an absolutely essential first step toward achieving a genuine full employment economy.

The legislation sets interim targets and a timetable for the reduction of unemployment: A 3-percent rate for those 20 and older and a 4-percent rate for those 16 and over within 5 years of passage. Thereafter, the goal would be to attain genuine full employment as soon as practicable and to maintain it.

In addition, the bill recognizes the special importance of finding jobs for

those segments of society—women, minorities, and young people—who experience the most severe rates of joblessness. It contains a very strong commitment to reduce and eliminate unemployment gaps for such groups. Among the methods proposed for achieving these goals are targeted training programs, improved labor market information and antidiscrimination enforcement. The coordination of monetary and fiscal measures with these structural policies are key to reducing the overall unemployment rate without adding to inflationary pressures.

Unfortunately, some have called for delay or drastic changes in this legislation based on the mistaken notion that it ignores the threat of inflation. This is false. S. 50 includes major anti-inflation provisions far stronger than current law or policy. It declares that relative price stability is a high national priority for the first time in law. More specifically, the bill requires that the President set forth each year, in his economic report annual numerical goals for prices for that year and for each of the next 4 years. These explicit inflation goals would parallel the other goals in the bill and be considered by Congress in all of its deliberations on national economic policy questions. The bill provides an annual process for the appropriate committees of the Congress and the Congress as a whole to review the numerical goals and timetables set by the President and, if it wishes, modify them. The bill also calls for the use of a set of specific policies to be initiated by the President to combat inflation.

The Senate Banking Committee, in my view, unwisely added a provision which sets a zero-percent inflation goal by 1983. Others have proposed a goal of 3 percent inflation by 1983. Neither of these goals makes any sense to me. They are not based on any careful objective analysis, serious study or open debate on what percentage makes sense or what year such a percentage can reasonably be expected to be reached. Frankly, Mr. President, this is just the kind of unsubstantial and misleading congressional action that undermines the credibility of this institution with the public. And, I am afraid it detracts from any serious attempt to provide national leadership from the Senate of the United States.

Mr. President, I have dealt with this proposal in great detail in my testimony to the Senate Committee on Banking, Housing, and Urban Affairs. I will not repeat those arguments here. Let me conclude on this subject by simply saying that those who propose to reach heroic inflation goals must be willing to propose specific, credible steps to be approved by Congress at the time such goals are set. Otherwise, the Congress risks adding to public cynicism and reducing the momentum to really reduce inflation.

Combating inflation will require sensible monetary and fiscal policies, specific actions to stem cost and price pressures in many sectors of the economy, and at least some good luck. The job will not be enhanced by establishing unrealistic and inflexible inflation goals and timetables. A far better course is the process of policy coordination, and annual inflation targets already contained in the legislation.

Mr. President, S. 50 provides a major improvement in the way in which economic policy decisions are made. It establishes a process of comprehensive and integrated policy planning and coordination involving the President, the Congress, and the Federal Reserve Board.

Mr. President, for too long our economic policies and programs have been established and carried out in fragmented, uncoordinated and too often futile ways. The American people desperately need and deserve a better performance from their Government. S. 50 provides the framework for comprehensive and flexible economic policymaking. It sets long-range and short-range goals which are realistic and achievable. In setting our sights on these goals we will be able to measure year by year the progress of particular policies and programs rather than myopically reacting from month to month as economic indicators fluctuate. We cannot afford to wait for more monthly unemployment data to tell us what is already obvious—our Nation needs prompt enactment of the Full Employment and Balanced Growth Act.●

CANADIAN/UNITED STATES GRAIN PRODUCTION SIMILARITIES AND DIFFERENCES

● Mr. MCGOVERN. Mr. President, I have taken a substantial interest in the agricultural affairs of our traditional neighbor to the north, Canada. This interest has taken me earlier this year to Winnipeg, Manitoba, together with Senators MELCHER and BELLMON, to discuss world wheat prices with the marketing agents and legislators of that great country. In my judgment, these talks were a forerunner to what can become a better deal for United States and Canadian wheat producers in developing a mechanism for getting these producers a price for wheat which approximates North American production costs plus a reasonable profit.

Many Members of Congress are not as familiar as they might be with the Canadian agricultural system. Though we coexist on the same continent, our method of doing business substantially differs. Warren Wolfe, an unusually gifted reporter for the Minneapolis Tribune, has authored an excellent article entitled "Canadian Farmers See U.S. Policies as Income Barometers" in the August 6, 1978, edition of that newspaper. Because of its unusual merit on an important subject, I ask that the text of the article to which I have referred be printed in the RECORD.

The article follows:

CANADIAN FARMERS SEE U.S. POLICIES AS INCOME BAROMETERS

(By Warren Wolfe)

STE. AGATHE, MANITOBA.—When the U.S. Congress starts its juggling act with alternative agriculture policies, Canadian farmer Lorne Parker holds his breath.

"Every major agriculture policy in Washington affects my business," Parker explained. "I keep one eye on the (Canadian) Wheat Board and the other on Washington, eh?"

Agriculture Secretary Bob Bergland's decision recently that U.S. farmers could pawn their wheat for a dime more, to $2.35 a bushel, at the government hock shop, for instance, meant that the Chinese might pay slightly more for their next shipload of Canadian wheat leaving Vancouver.

How the U.S. deals with problems of world hunger, trade barriers, beef shortages and farmer unrest may mean more income—or less—for Parker and his neighbors at the northern end of the Red River Valley, 75 miles above the Minnesota border.

It is one of many examples, Canadian officials say, of how the United States dominates hemispheric economics, politics and culture.

"I don't know why that comes as a surprise to so many Americans," Parker said.

There is a touch of gentle criticism in his voice as he explains that most people from the United States don't know much about Canadian agriculture.

"You people hear about how our Wheat Board guarantees us a price, and the railroads guarantee us a rate, and it seems very popular in the United States to believe that the Canadian farmer is reaping the reward while you are taking all the risk," he said.

"If that were true, Canadian farmers would earn more than U.S. farmers, and we don't," he said.

Canadian farm income averaged about $11,100 in 1974, compared with the U.S. average of $26,500 that year. Incomes of farmers in both countries have dropped since then with falling crop and livestock prices.

South-central Canada is the end of a 7,000-mile ribbon of grain fields that winds down the Americas through Argentina. Canada and the United States are the Western Hemisphere's leading grain producers. Both countries compete for buyers of their vast supplies of wheat and other small grains.

Although Canada is the world's No. 2 exporter of wheat, American prices and policies dominate the world. More than half the wheat in international trade is grown in the United States. Less than one-fourth comes from Canada.

But wheat is one of Canada's leading sources of foreign currency. It accounts for about half of Canada's agricultural exports, or about $2 billion. Dependence on wheat for trade income—plus a history of government involvement in agriculture—has transformed Canada's agriculture system into one quite different from the U.S. system.

The Canadian system falls somewhere between America's government interest in agriculture and the Soviet Union's complete government control of agriculture.

Parker can plant and harvest all the wheat, barley and oats he can handle, but he's guaranteed a price on only specified amounts of those crops.

He knows that the Wheat Board this year will pay him at least $3.34 (in U.S. dollars) a bushel for a specific number of bushels per acre—a number based on expected demand and sometimes updated during the growing season—of top-quality wheat he grows.

Each farmer is assigned a number of "quota acres," his share of Canada's grain-marketing opportunities. He may use those acres anyway he wants. He could plant it all to wheat, or split it among the board or non-board crops.

In the United States, a farmer also can plant any amount of any crop—although this year he may not be eligible for some government income-support programs if he harvests too much wheat or corn.

But the American farmer's only guarantee is a government loan. He depends for his livelihood on the vagaries of the marketplace. Some years he earns more per bushel than a Canadian farmers. Some years, such as last year, he earns less.

The Canadian Wheat Board guarantees prices and marketing of only the three "board" crops—wheat, barley and oats. Rape-

seed (an oil-seed crop), sunflowers, potatoes, corn, rye, soybeans, vegetables and other crops are marketed by private traders. Beef, pork and other livestock are sold at markets or, in some cases, are raised under contract to meat companies.

If Parker, 47, sounds a bit like a government official when he describes how Canadian agriculture works, that's because he is not an average Canadian farmer.

He represents the eastern half of the province on the Wheat Board Advisory Committee; he's first vice president of the Manitoba Farm Bureau, an amalgam of most farm groups in the province; he's on the boards of the Manitoba Beef Growers, the Canadian Grains Council, the Canadian Federation of Agriculture and the Prairie Rail Action Committee.

He's an agricultural-economics graduate of the University of Minnesota; he has spent months overseas representing Canada in various agricultural-development projects and at meetings; and this year he's been a farmer observer at international trade talks at Geneva.

Like more than a score of other farmers, grain-trade people and government officials interviewed, Parker is convinced that Canada's agriculture system fits its dependence on a handful of crops for its agricultural livelihood.

Despite striking differences between U.S. and Canadian agriculture systems, there are similarities between farmers such as Parker, a grain and livestock farmer with 1,600 acres, and their counterparts in the United States.

Both know that their incomes will depend largely on the livestock and crops they produce. Both produce far more than their countrymen can eat.

Consequently, both closely monitor agriculture production and policies of other countries, because a big slice of each dollar they earn comes from exports of their agriculture products overseas.

Both worry about rising costs, taxes, undue government restrictions, the weather, crop and livestock diseases and excessive paperwork.

But the differences between U.S. and Canadian agriculture—from weather to marketing systems—are vast:

Climate—Short summers allow farming only in southern Canada—and good farming only in the southernmost 200 miles. But good farming in Canada provides an average wheat yield that's 20 percent less than in the United States.

Crops—That short season allows only selected crops to flourish in Canada. Wheat accounts for about 70 percent of Canadian grain production. Other small grains, such as barley, rye and oats, make up most of the rest. Canadian grain production is concentrated in the prairie provinces of Manitoba, Saskatchewan and Alberta.

With new, short-season hybrids, Canadian farmers are beginning to grow a smattering of corn and soybeans for livestock feed.

The United States, with a climate that makes most of the soil productive throughout the country, has an agriculture belt 2,000 miles deep. It produces more volume and variety of grain, fruit, vegetables and other crops than any other country.

Livestock—Cold winters and short summers also make raising livestock a tougher job than in the United States. Most livestock production is confined to dairy farms and beef-breeding herds that produce calves.

Some of the calves are raised on grass and hay feed and sold to make hamburger; some are fed wheat or other grain and make better grade beef cuts. Some of those calves are sold in the United States to feedlot operators who turn out choice beef.

Most of the livestock in Canada is produced in areas that are less suitable for crops.

Here is how the two countries rank in the world in various livestock-production categories: beef and veal, U.S. No. 1, Canada No. 8; pork, U.S. No. 1, Canada No. 15; mutton, lamb and goat, U.S. No. 3, Canada No. 25; milk, U.S. No. 1, Canada No. 7; chicken, U.S. No. 1, Canada No. 13.

Land in farms—With agriculture confined to a narrow, southern belt, productive land constitutes only 16 percent of Canadian soil, compared with 48 percent of the land in the United States.

Canada has about 339,000 farms averaging about 500 acres each, a total of 169 million acres. The United States has 2.78 million farms averaging about 390 acres, a total of 1.08 billion acres.

Transportation—With an agriculture belt 200 miles deep and 3,000 miles long, moving grain to Canadian export terminals is no mean feat. One-third of the export grain must move across the Rocky Mountains to West Coast ports.

And all rail traffic must squeeze through Crowsnest Pass, which last year was closed for more than a week during a snowstorm. The snow froze so solidly that it had to be dynamited. That delay in moving grain to waiting ships—combined with other snags in the rail-transportation system—is still being felt.

Marketing—Grain buying, handling and marketing is far different in Canada. It's done through a mixture of farmer-owned wheat pools and the government's wheat board, with a little free enterprise on the side.

The four regional wheat pools were formed in the late 1920s because, said Parker, "the private grain companies had been taking advantage of us shamefully."

The companies had divided up the territory, paid low prices and precipitated a farmer revolt that led to the wheat pools, he said.

After nearly going under, the wheat pools were rescued with an injection of government money and promises of guaranteed minimum prices for the basic grains.

Now, farmers grow the grain and store it at wheat pool elevators. They receive their guaranteed payments when they deliver the grain. The wheat board charts the movement of grain to domestic users or to export facilities.

The Wheat Board decides how much grain the market will bear the next year, then sets a minimum price that farmers will be paid. The board negotiates agreements with foreign buyers and if those deals bring in more money than the farmers were promised, they get bonus payments.

But if the grain sales bring in less money, the government makes up the difference.

This year, for the first time since 1970, the government probably will shell out some money to back up its guarantee of a minimum $3.34 a bushel for wheat. Minnesota farmers last year earned an average $2.50 a bushel for their wheat.

No one will know how much the guaranteed-payment program will cost the government until early next year, after all the income and bills have been toted up. The Wheat Board is not yet admitting officially that government money will be needed.

The Winnipeg Grain Exchange is still an active market for "non-board grains," but it's primarily a domestic market doing far less volume than during its heyday 50 years ago.

"It's a system that works for us, but I'm not sure it'd work in the United States," Parker said.

That is a message that visiting American farmers frequently take home with them after visiting the Canadian Wheat Board main offices in Winnipeg, board officials say.

"We've had lots of Americans up here—some of them the farm strikers who were looking for a better system than you've got—who think they'd like to take the wheat board plan back to the states with them," said John Morriss, a spokesman for the board.

"That's before they hear about the quota system. Ideally, what the Americans would like is guaranteed prices with no production restrictions. Our farmers would like that, too, but I don't know how it can be done," Morriss said.

Canada needs that system so it can cope with the monumental barriers of climate and topography facing Canadian farmers, Parker said.

"You have more alternatives than we do. We've got wheat, and you've got that plus everything else; we've got railroads to move our grain, and you've got rail and truck and barge; you've got a good, integrated private market system, and ours has atrophied," he said.

"One of the big differences between Canadian and American farmers is that most of us don't know how to market our crops. You Americans are pretty adept at watching the markets and selling when the price is right. We haven't had the experience."●

PROPOSED MILITARY BASE REALINEMENTS

● Mr. PERCY. Mr. President, Senator STEVENSON, Congressmen ED MADIGAN, MEL PRICE, and I attended a meeting this morning at the Department of Defense on the department's proposed plans for military base realinements.

About 40 leaders of the communities in Illinois affected by the possible changes met with Dr. John P. White, Assistant Secretary of Defenese for Manpower, Reserve Affairs and Logistics as well as high-ranking officials from the three services.

I would like to make the statements of these Illinois leaders a matter of public record, because they raise issues crucial to the local communities and important to Department of Defense decision-making.

Mr. President, I ask that the statements be printed in the RECORD.

The statements follow:

CITIZENS FOR CHANUTE, MUNICIPAL BUILDING, RANTOUL, ILL.

We feel these facts are important and must be factored into any decision affecting the status of Chanute Air Force, Base.

1. If Chanute Air Force Base closes the economic "impact" would be the loss of $176.7 million in personal income. This represents 18% of all personal income received in this area.

2. The base closure would adversely affect approximately 5,000 jobs in the surrounding area.

3. Local Government would lose $9 million and the State of Illinois would lose $11 million in revenue.

4. Chanute Air Force Base procurement for operating supplies, maintenance and other services would be cut by $6.8 million annually for those business firms within a 50 mile radius of Rantoul, $10.2 million for other business firms within the State of Illinois, and $8.3 million for the remainder of the United States which is a total cut of $25.3 million.

5. Just this year, 1978, a total of 2,527 civilian workers are employed at Chanute Air Force Base.

6. Over 74% of the civilian employees live in Rantoul, Gifford, Ludlow, Thomasboro, and Fisher.

7. Sixty-three percent of these civilian base workers who live in Champaign County reside in Rantoul.

8. The 1,165 civilians residing in Rantoul and working at Chanute comprise 22.9% of the village's civilian work force.

9. Assuming there will be no job replacements the unemployment rate could jump as high as 9.7% for Champaign County, 31% in Rantoul alone.

10. The income loss due to the disappearance of base income and the loss of secondary jobs in Ford County would be $7,986,000.00. Iroquois County would lose $2,046,000.00 and Vermilion County would lose $2,922,000.00.

11. While Thomasboro is not a major retail/service center, its few commercial establishments are heavily patronized by Chanute personnel; therefore, its sale tax revenues, would be hit extremely hard.

12. The 362 civilian base workers residing in Paxton make up 21.3% of the communities civilian labor force.

13. There is also Loda which includes 7.9% and Buckley at 9.8% of the total civilian workers.

School aid

City	Federal "impact" Aid	State Aid	Total aid received	City	Federal "impact" Aid	State Aid	Total aid received
Rantoul—High school	$305,000	$650,000	$955,000	Thomasboro	$9,065	$19,242	$28,307
Rantoul—City schools	1,100,000	1,480,000	2,580,000	Buckley-Loda	9,987	5,280	15,267
Urbana	55,000	112,140	167,140	Paxton	46,228	217,427	263,655
Champaign	55,000	85,000	140,000				
Gifford	10,900	12,500	23,400	Totals	1,591,180	2,581,589	4,172,769

PRESENTATION BY LEO F. KUKLA, MAYOR OF NORTH CHICAGO

As Mayor of the City of North Chicago which has a conditional annexation of the Great Lakes Naval Base, I am here with grave concern regarding the recently publicized plans of the Pentagon, which are in the preparatory stages, for a partial closedown of the Great Lakes Naval Training Recruit Command in our city and Fort Sheridan Army Base in Highwood, Illinois. I would like to state publicly that our city of North Chicago would suffer a very severe economic setback by the closing of these facilities as many citizens of North Chicago are employed at the Base of which I am told approximately 362 jobs in that area, not withstanding the fact that a great majority of our business in whole or part are patronaged by the naval personnel. I am speaking mainly of our two motels, the Holiday Inn of North Chicago and the Pagoda Motor Inn which without the support of the visitors at weekly Recruit Training Graduation can and will prove that without this support the businesses will virtually close. Our food services, which are mainly fast food services, almost 75 to 80% realize in whole or in part patronage of the naval personnel.

Getting down to the City of North Chicago which would be drastically affected by this closing, as the current population of the City of North Chicago comprises part of the base wherein the City of North Chicago receives Illinois State Income Tax and Motor Fuel Funds. Notwithstanding the fact that the federal government presently has declared North Chicago to be an economically distressed municipality and at this time is considering some applications which involve federal funds to help pump the economy into our community. We are confused as to why at this critical time, we will be receiving help through possible federal funds on one hand and the elimination of jobs on the other.

The removal of Great Lakes Recruit Training would further add to and make an almost impossible economic drain on the city and on the municipal government of the city. The City of North Chicago wants to do all within it's power to convince the United States that the continued operation of Great Lakes at it's current level is absolutely imperative to the economic existence of the City of North Chicago.

Speaking from the latest census dated 1970, North Chicago had a population of 47,275. That population includes Great Lakes, however minus Great Lakes, the total population of North Chicago from the same census is 12,999 of which the racial mix comprises of 6,644 whites, 5,546 blacks, 184 other, 465 Spanish and 160 Puerto Rican. In the 1970 census data, our median family income was $8,899 and the mean family income $9,889. The unemployment rate data from the Illinois Bureau of Employment Security average unemployment rate for 1976 was 8.41, far above the national level. The average unemployment rate for 1977 was 6.98. So as you can see we do have our problems.

Besides the tremendous economic burden placed on North Chicago by the closing of Great Lakes Recruit Training Command, I would also like to state, and the facts bear me out, that Great Lakes Naval Training Recruit Command is by far the most modernly equipped than any other base and has much more to offer including the area and space for much needed expansion if need be.

As far as our concern for Fort Sheridan is concerned, this is also a grave and serious concern because of it's direct and indirect effect on the citizens of our community. The direct effect of the loss of 123 jobs for North Chicago citizens as of April 1978 plus the indirect economic effect of the spending power of these employees. There is some talk about a needed beach in the Fort Sheridan area. What about the much needed beach for North Chicago where we don't have any facility for a beach for our citizens because of the erosion of Lake Michigan upon our shores.

In closing, I would just like to remind the President, the Department of Defense and all concerned, that we have another problem of possible unemployment and that is the possible closing of the U.S. Steel Mill, Waukegan Works, which borders North Chiago and our sister city of Waukegan further eliminating 450 jobs. We have also just recently been informed that Goodyear Tire which uses a North Chicago mailing address and is adjacent to our community is closing down it's plant in the very near future and will be phasing out an additional 493 to 495 jobs in our immediate area. I am willing to go to any length to get more specific information to show that the city sincerely desires with all it's earnestness in it's heart to call upon the Department of Defense to realize the absolutely devastating effect that the removal of any part of Great Lakes and the Fort Sheridan Army Base, it's growth level or operation, would have upon the city of North Chicago and it's citizens. In fact, Gentlemen, if you could look at the true picture, I am sure you would wholeheartedly agree with me that this area does not and should not have any type of cut backs but should have added impetus in creating the necessary jobs for the many, many unemployed we are strapped with.

I would like to at this time to sincerely thank the Honorable Adlai Stevenson III for setting up this hearing. I would also like to thank the Department of Defense, Senator Charles H. Percy, Congressmen Robert McClory, Philip M. Crane, Melvin Price, Edward R. Madigan and Dan Rostenkowski for their time and effort in allowing the city of North Chicago to plead it's case.

Thank you.

TESTIMONY SUBMITTED BY CHARLES C. ISELY, PRESIDENT OF THE WAUKEGAN/LAKE COUNTY CHAMBER OF COMMERCE

Ladies and Gentlemen, it is a pleasure for me to present testimony to you on behalf of the Waukegan/Lake County Chamber of Commerce and its over 800 members located in Lake County.

For many years, the Chamber has been cognizant of the economic input of these military installations in our area. It has been through past efforts, that various economic facts have been researched and published. One of the most interesting items has been the residency of employees at these two installations within the county. The average one-way trip of employees at these installations is 21 miles; therefore, the economic input is not limited to the immediate adjacent community. It affects the county as a total unit. The cost effectiveness for the operation of these two installations is constantly being stated as "high cost!" The Chamber is interested in learning if there is a "normal" cost which the Department of Defense utilizes as an average to operate a square foot of space for administration of training functions, and if so, we should be apprised of this cost, and how it would be cheaper in another location.

Even though the Department of Defense says there is no collation between the Army and Navy Recruiting Commands, to the layman, it would appear their mission and function would be the same. Both military commands do conduct recruiting actiivties specifically for their element within the corporate limits of the United States. The central location here in the Chicago metropolitan area was given as one of the reasons why the Army Recruiting Command was moved here. The empty space at Fort Sheridan was an economic factor, since the Army was leasing space in the Washington area. However, since it has come to our attention that construction of additional space at Fort Benjamin Harrison would be necessary to accommodate the Army Recruiting Command, it is hard for us to accept that money is going to be saved, because if you build additional space, you are going to increase your annual upkeep cost to compensate figures that exist currently at Fort Sheridan.

In connection with the relocation of the Navy Recruit Training Command we raise the following questions. This Chamber is cognizant of the previous request made by the community of Orlando, Florida, to have their Navy Recruit Training Command Facility closed down. They felt they did not need that economic input to their community. Since the manning level of the Navy does not support the need for three recruit training stations, why not close down the one that the communit does not want? Also, we think it is significant to note that there are many service school ratings that are only taught at Great Lakes, and since the trend is to maintain a one-station training facility, why

not have it be Great Lakes, because if the recruits are trained at other locations, they will still have to come here for this additional training, with added travel expenses and other related costs.

Therefore, the Chamber feels, given the central location of these two facilities, and based upon the information and facts we have been able to obtain at this point in time, the proposed realignment seems to be unreasonable and financially unsound.

It is the Chamber's intent to support all the activities of the Lake County group to maintain the military facilities on an economic and sound basis for the overall mission of providing support to the military establishment.

I appreciate very much, the opportunity to meet with you today.

TESTIMONY OF BRUCE GIANGIORGI

My name is Bruce Giangiorgi. I am here in my capacity as Co-Chairman of the "Save the Bases Committee", which is a subcommittee of the Lake County Economic Development Commission. Our Committee was created by resolution of the Lake County Board. We are here today for the express purpose of addressing problems relating to the possible closure of Ft. Sheridan and proposed base realignment at Great Lakes Naval Training Center.

Our members represent all facets of the County: namely Chambers of Commerce, School Districts, (both public and parochial), Township Supervisors, Veterans Associations, Council for Senior Citizens, Retired Military, Civil Defense Groups, N.A.A.C.P., County Board, American Federation of Government Employees and City Governments, etc.

Based on information in our possession, we have strong reason to believe that not only our County, but the entire State of Illinois would suffer severe economic and social hardships.

A recent article appearing in a local newspaper stated:

A total of $116.9 million in annual income will be lost in the Lake County area if Ft. Sheridan and Great Lakes Naval Bases are closed. . . .

The economic impact figures were compiled by the State Commission for Economic Development.

In 1976, Ft. Sheridan generated some $39.9 million in civilian and military paychecks and supply purchases. As this basic income circulated in the area, the Commission estimates it created additional non-basic income of approximately $30.2 million. Total personal income of the operation of Ft. Sheridan, therefore, is estimated to have been $70.1 million in 1976.

This impact is what would be lost in income to the area if the federal funds coming into Ft. Sheridan were to be discontinued. . . . Close to 2,000 jobs in the private sector near the Fort could also be affected by the loss.

The Great Lakes Recruitment Training Command in 1976 generated about $27.3 million in basic income, and another $19.5 million in non-basic income. The total person income impact of the operation of the Training Command, therefore, is estimated to be $46.8 million annually.

Some 1,200 jobs in the private sector near the base could be affected by the termination of the Training Command program.

In addition to all that income loss, it's been estimated that the closing of the two installations would bring about a $7 million income tax loss to the State of Illinois, plus $5.4 million in local tax loss in the county.

The effects of Ft. Sheridan's closing on School District No. 111 invariably covers the economic effects, such as the loss of $558,000 in Federal Assistance in Federally Affected Areas, commonly called Impact Aid; the 38 certificated and noncertificated jobs which would be eliminated; and the 18–20 classrooms which would be vacated.

Another very significant effect is that a vital part of the District would be lost—425 of its 1408 students, over 30% of their enrollment, together with their parents who contribute so much to the schools as parent-teacher organization officers, and members, tutors, etc. Large portions of two of the District's Schools were built with Federal Public Law 815 moneys because of Ft. Sheridan.

Twenty-two Lake County public school districts received a total of more than three million dollars in Federal Impact Aid last year. Also, many students in the 34 parochial schools in Lake County are dependents of Federal Military and Civilian employees. St. James Parochial School would lose between 25 and 30% of its students which could mean the ultimate closure of the school.

Township High School District #113, operating two high schools, received $218,661.-00 during 1977–78 for their claim of Impact Aid. Estimates for 1978–79 are $225,000.00. A survey conducted showed 219 federally connected students attend school with a potential count distribution to be 155 residing on Ft. Sheridan, another 23 working on Post, 18 in other military services and 23 working on other federal property.

North Chicago would suffer a very severe economic set back by the closing of the facilities. Approximately 362 jobs would be affected.

In 1970, North Chicago had a population of 47,275, however, minus Great Lakes, the population would be 12,999 of which the racial mix comprises of 6,644 Whites, 5,546 Blacks, 465 Spanish, 160 Puerto Rican and 184 Other. In the 1970 census data, the medium family income was $8,899 and the mean family income was $9,889. The unemployment rate data from the Illinois Bureau of Employment Security stated that the average unemployment rate of 1976 was 8.41%, far above the national level. The average unemployment rate of 1977 was 6.98%.

There were 123 employees from North Chicago working at Ft. Sheridan as of April 1978.

The Federal Government presently has declared North Chicago to be an economically distressed municipality and is considering some applications which involve Federal funds to help pump the economy into the community. Why help through possible Federal funds on one hand and the elimination of jobs on the other?

North Chicago also faces another problem and that is the possible closing of the U.S. Steel Mill, Waukegan Works, which border North Chicago and the City of Waukegan, further eliminating 450 jobs.

It is our expressed feeling that the closure of Ft. Sheridan and the realignment of Great Lakes would be detrimental to the social and economic well-being of Lake County and the State of Illinois. We respectfully request that information to be developed from the impact study be made available to our committee for review before being implemented. We strongly urge you to reconsider your original proposal and transfer more activities to both Ft. Sheridan and Great Lakes.

PRESENTATION BY MELVIN L. KLAFTER

Ladies and Gentlemen: I am highly privileged and honored in being allowed to appear before this august body and address myself to the question of retaining the three military installations in the great State of Illinois, namely: Fort Sheridan, Great Lakes, and Chanute Field. My remarks will apply only to Fort Sheridan. Others will direct their attention to the other installations.

As you know, Fort Sheridan was established at about the turn of the century so as to have army troops close to the great City of Chicago in the event of domestic or other troubles. Before the turn of the century, it was necessary to bring troops from Fort Leavenworth, Kansas in times of domestic troubles.

The City's Elders and Fathers in their good judgment dedicated the land which is now Fort Sheridan to meet crises and calamities confronting Chicagoland.

The said actions did portend future events, for over the years Fort Sheridan served this metropolitan area to the full expectations of the dedicating city elders. Needless to say, that through two world wars, Korea, and Vietnam, Fort Sheridan was the hub of military activity in the State of Illinois. Without this outstanding military facility. Chicagoland and the surrounding area would have been handicapped for obvious and manifold reasons.

In the event that Fort Sheridan is closed and in the event of another national military crisis, there would not be an installation or facility in the Midwest that could replace its loss. If for no other reason Fort Sheridan must remain open.

However, your attention is directed to the Fort's comparatively recent military contributions. During the riots when the National Guard was alerted in 1965; when the National Guard was actually called out in 1966; and during the riots when the National Guard was again called out and the Regular Army brought in in 1968, Fort Sheridan was the focal point of logistical operations for the troops participating. In 1965 during the National Guard alert, Fort Sheridan furnished additional rations. In 1966 when the National Guard was called out in the "Cicero, Illinois Episode", Fort Sheridan furnished the rations and ammunitions. In 1968 during the riots when the West Side of Chicago was almost burned out, Fort Sheridan gave necessary logistical support to the Regular Army.

Attention must additionally be called to the year 1967 when a tornado struck Oak Lawn and Belvidere, Illinois, when the National Guard was called out to alleviate the damage and suffering at those localities. Additional vehicles were needed, food rations had to be given to the troops, together with winter clothing. The Army had to send stoves, cots, blankets, food and tents to the citizens of those localities in the same manner that they had to send the same type of equipment to those people who were burned out during the riots of 1968.

Since 1968 the Army has repeatedly helped the citizens of Illinois when struck by catastrophies, both man-made and natural. Such as when tornadoes and storms caused power failures, and generators had to be brought in for power in hospitals and other public and quasi-public facilities; when the water power systems failed in down-state Illinois the Army brought in mobile purification systems and plants. In these above cited calamities it was Fort Sheridan that had the materials and equipment at hand to do the job. It was Fort Sheridan that had the manpower readily at hand; and it was Fort Sheridan's commanders who directed these operations either directly or indirectly.

Obviously, if Fort Sheridan is closed, these disasters and crises will not stop. What will happen in such events when the nearest army installation, Fort Benjamin Harrison, hundreds of miles from Chicagoland, will be depended upon to do the job that Fort Sheridan has done in the past, but without Chicago's airfields, railway lines, general communication systems, truck and bus terminals, manpower and manufacturing capabilities.

Notwithstanding the foregoing, the Army in its computing, figures that there are 2,000 military personnel assigned to Fort Sheridan and in that it disperses $144,000,000 yearly it costs $7,200 per individual to maintain

the post, and that amount is too costly. *We disagree.* There are in fact about 200,000 military related personnel serviced by Fort Sheridan, which brings the cost to about $72.00 per individual as distinguished from $7,200.00.

The 200,000 manpower figure is not exaggerated. Fort Sheridan supports 100,000 reservists from Illinois, Wisconsin, Michigan, Northern Indiana and Iowa. These reservists are paid from Fort Sheridan when on active duty, and their families can use the PX facilities at Fort Sheridan. In addition—reserve units have its weapons and vehicles repaired at Fort Sheridan without having to travel hundreds of miles for these purposes at great extra expense.

Additionally, there are about 47,000 National Guard troops served by Fort Sheridan. There are about 28,000 army retirees, widows and orphans who use all the facilities at Fort Sheridan. There are 1,900 R.O.T.C. students from both the colleges and the high schools. There are about 1,200 Department of the Army civilians; 4,000 active duty army people who both serve on the post and use the post as their headquarters; and about 90,000 eligible dependents of these said individuals. I repeat $144,000,000.00 divided by 200,000 persons equal $72.00 per person.

Moreover, so long as we have a volunteer Army, and recruiting is important, it must be remembered that Fort Sheridan offers such attractions as a golf course, arts and crafts studies, education facilities—there is a full college course offered, including one for advanced degrees.

As a senior vice-president of the Chicago U.S.O., I can report that in 1977, 49,000 service people used the U.S.O. facility at Chicago O'Hare Airport, the world's busiest airport, and 46,500 used the U.S.O. facility in Downtown Chicago. These U.S.O. facilities are supported entirely by private funds—not a dime of government money is involved; and I can say without equivocation that if Fort Sheridan was closed so would the Chicago U.S.O.—or at least the O'Hare facility would be closed.

Attention is directed to the fact that the Chicago District Recruiting, Middle Western, and National Recruiting Commands are all located at Fort Sheridan. The latter two, if Fort Sheridan closes, are scheduled to go to Fort Benjamin Harrison in Indiana, and the Chicago District Recruiting Command will have to rent space in Chicago as do units now located in the 1819 Pershing Road Building, together with the North Central Division of the United States Army Corps of Engineers, and the Chicago Engineers District. If the Army is really trying to save money, it should move Army units which rent space in Chicago to Fort Sheridan where there is ample and available space instead of trying to close it.

And may I add parenthetically, Fort Sheridan should be used to its fullest potential. One way to do this would be to move installations from other sections of the Country to it—to be perfectly blunt—let's stop stripping the military from "Yankee Country".

Further, in regard to recruiting attention is invited to the fact, I do not have the exact figures, but I am told that a great number of the recruits come from the Chicagoland area. In Chicago, parades, ceremonials and display of military hardware materially help recruitment. Without Fort Sheridan such activities should be impossible and recruitment would therefore suffer.

As a retired Army JAG Colonel, AUS, I can attest to the fact that Fort Sheridan has over the years proven to be a great training facility for troops. In 1959 when I activated, organized—and then commanded the 7th JAG Detachment, I can well remember with fond memory Fort Sheridan and all its training and recreational facilities.

As a past Commander of the Chicago and Illinois Chapters of the Military Order of World Wars; as a past Illinois Department President of the Reserve Officers Association of the United States; as a past Chief of Staff of the Military Order of the Purple Heart; as a Mason, Shriner and Knight Templar; as a senior partner in an established Chicago law firm, and as a fourth generation Chicagoan; I abhor the thought, and I am terribly distressed by the proposal to close Fort Sheridan.

May I say in conclusion, it would be a crying shame if the second largest city in the United States was denied a nearby military post.

Thank you, and I especially thank the elected officials from Illinois.

TESTIMONY OF THOMAS H. COULTER, CHIEF EXECUTIVE OFFICER, CHICAGO ASSOCIATION OF COMMERCE AND INDUSTRY

Illinois' and Metropolitan Chicago's vital importance to the nation's economy stems from its central location at the focal point of commerce, industry, agriculture and population.

Because of the enormous cost savings which central location implies for movement of freight, executive flight, long distance toll charges, postal rates, employee movement and other geographically related costs, Chicago has become the nation's leading manufacturing center. According to the 1976 Survey of Manufactures of the U.S. Department of Commerce, Metropolitan Chicago led all other areas in manufacturing shipments with 51 billion dollars. The 1978 Survey of Industrial Purchasing Power puts the current year's total at 68 million dollars—ahead of all other areas. The same report indicates manufcturing shipments of 103 billion dollars for the State of Illinois—the highest total for any state.

Geography has also created the largest transportation industry in the nation in Chicago. Metropolitan Chicago ships 27 millions of manufactured tons by truck and 23 million tons by rail, according to the U.S. Census of Transportation, to top the tonnage of any other area. Chicago employs more trucking and warehousing employees than any other area.

Chicago's air passenger volume will top 50 million passengers in 1978, the largest in the world. Its airline schedules service 231 direct non-stop flights. Both totals exceed those of any other metropolitan area. O'Hare International Airport handles more air cargo tons than does any other air facility in the country.

Chicago's manufacturing importance and its housing growth within the last ten years cf 367,000 units . . . tops for any area . . . have boosted its construction industry to the highest level of expenditure anywhere in the U.S. From 1967 through 1976, the area spent over 21 billion dollars for construction contract awards, highest in the nation. Last year, Chicago spent 3.5 billion dollars on all kinds of construction, again to lead all other areas. Chicago's expenditures for new industrial plant and equipment, 13 billion dollars in the six-county area and 18 billion dollars in the eight-county area from 1963 through 1976, far exceeded comparable totals for other metropolitan areas.

Metropolitan Chicago and the State of Illinois are leaders in research and development of nuclear energy through the Argonne National Laboratories and Fermi Labs, and in the development of energy by conversion of coal and petroleum to natural gas at the Institute of Gas Technology and the ERDA facility downstate. Chicago's research facilities led by those of The University of Chicago, the Illinois Institute of Technology, Northwestern University and The University of Illinois have provided the academic springboard for much of this research.

In 1975, the State of Illinois contributed 19 billion dollars in taxes to the federal government—the third highest total among the states. Illinois' net outflow of taxes—that is federal taxes minus federal expenditures in the state—was 5.3 billion dollars, the highest net outflow of federal taxes of any state.

In 1886, at the time of Chicago's Haymarket riot, The Commercial Club of Chicago, a private civic organization of business leaders, donated almost 600 acres of land to the U.S. Army for the construction of Fort Sheridan. They were motivated to do so because of their great public concern for the protection of the city's population and resources from the ravages of civil disturbance. At the time, Chicago had a population of only 600,000. Today, the area and its suburbs contain 7.6 million persons, and has grown to be the nation's largest industrial complex with vast resources for the defense of the U.S.A. The Chicago Ordnance District was the largest producer of military equipment and supplies during World War II and has grown in potential since then.

It is unthinkable to the Chicago Association of Commerce and Industry that any federal military establishment so essential to the security of this area be drastically reduced. This is especially true for Fort Sheridan which plays a major traditional role in supplying all kinds of material and manpower for natural disasters, civil disturbances and military operations. Under no circumstances should Fort Sheridan be closed or drastically reduced from its present level of operations.

For many years, Metropolitan Chicago has attracted the largest new capital investments by U.S. industries which obviously must seek the most efficient, low-cost locations in the nation. The Department of Defense can enjoy many of the same advantages. Chicago and Illinois need their fair share of defense establishments. We feel confident that, with objective judgments, the Department of Defense must arrive at the same conclusion.

TESTIMONY OF LYNETTE M. KEATING, PRESIDENT OF THE AMERICAN FEDERATION OF GOVERNMENT EMPLOYEES, LOCAL 1426

What? Move again? The Army's current plan for moving the Army Recruiting Command to the Great Lakes Naval Base 10 miles north of Fort Sheridan or anywhere else leaves me puzzled.

With an eye to cost, which apparently is the motivation for the recently announced plans to study the closing of Fort Sheridan, it doesn't make sense. The Recruiting Command has already moved once—from Hampton, VA in 1974.

When the Senate Armed Services Committee becomes concerned because the volunteer Army is in distress, perhaps we would be better off to spend the money recruiting and training rather than moving.

The Army has made some of its moves pay off. Units which had been renting commercial facilities in Chicago or paying rent to other federal institutions were moved to Fort Sheridan for that very purpose—to save Army dollars which the taxpayers provide. These same units are under consideration for another move.

But some moves just don't make economic "cents". Some of the Army's already well-laid plans include moving some of the maintenance work for reserve unit equipment to Fort McCoy, WI. Currently, McCoy is operating at near maximum capacity for the number of personnel they have. With work coming from Fort Sheridan they would have to hire more people and in all probability erect more buildings. Again, the payroll would not be decreased, just moved to another locale. That means more jobs for Wis-

consin, fewer government paychecks in Illinois. This state can ill-afford more reduction in defense spending when, as it is now, for every dollar in taxes that leaves the state, the Pentagon sends only three cents back.

With repair work and maintenance of Army equipment in Wisconsin there would be added fuel consumption for units forced to travel the additional 210 miles—something to consider in light of the energy crisis, which is apparently not just going to go away.

Military vehicles are not known for their economy. Some trucks get only three miles per gallon. Fort Sheridan services equipment for some 44,000 reservists in Illinois, Michigan, and Indiana. People cannot drive and do other jobs at the same time. In addition, they have to be paid—$35 a day for food and lodging for every day they are away from their duty station.

Fort Sheridan has been described as being near the heart of the nation's most "park-starved" metropolitan area. That hardly seems to be the case when there are 26,000 acres of state recreational areas in northeast Illinois alone, not to mention the county recreational areas.

Who could agree that 389 acres is worth the 1,188 military jobs and the 1,365 civilian jobs that will be lost if the post closes? Is 389 acres worth 390 minority jobs? That's how many blacks, Spanish, Indian and Orientals are employed at the post now.

The school districts will undoubtedly be hurt. There are few not already feeling the economic pinch. Voters are becoming notorious for turning down bond issues, trimming "luxuries" such as athletics from school programs.

And it's not only Lake County that will be affected. Even schools in Chicago and suburbs benefit from the $1,281 per pupil contribution that the federal government pays to the districts. Of course, it will hit hardest closest to home. Last year in Highland Park, over 600 dependent school age children were enrolled in the school system. The 400 who attended grade school comprised about 29 percent of the district's total enrollment. The support which the schools received amounted to almost $900,000. Without these pupils and the federal funds, what will happen to the budget one can only imagine. Cuts will have to be made in teaching staff and physical facilities.

The schools will feel the crunch, but who will benefit from it? Will it be the taxpayer spent on local purchases in the area because of Fort Sheridan. Money doesn't grow on trees nor in communities where there are no people renting homes or eating in restaurants or purchasing the services of the community.

And if the government plays landlord, who will benefit from it? Will it be the taxpayer or private individuals or corporations waiting in the wings for this valuable property to become available.

AMERICAN FEDERATION OF GOVERNMENT EMPLOYEES, LODGE 1426

We have endeavored through the attached enclosures to relay the feelings of *The People* relative to the closure of Fort Sheridan and the maintenance of our military strength.

In a recent opinion poll, the citizens favor maintenance of strong military forces and are concerned by their doubts about the nation's defense posture.

Fort Sheridan's prime purpose is the "Readiness of Reserve Components of the Army." However, due to an antiquated formula, Fort Sheridan is referred to as the most expensive Army base per capita of military personnel in the country. If properly and fairly evaluated, Fort Sheridan is as cost effective as other installations because it directly supports over 44,000 Reserve personnel which is not taken into consideration.

It is realized that Fort Sheridan is located on property of "extraordinary value" in the exclusive North Shore suburbs of Chicago. However, this land was donated for the purpose it has and is now serving. Its strategic location to Chicago was considered when concerned citizens donated the property. None of the functions Fort Sheridan performs will be eliminated, only transferred. Does it make economic "cents" to transfer functions to other bases, that will have to hire more people and spend more taxpayers money to erect more buildings and increase the cost of support of the Reserves?

Can the Closure of Fort Sheridan Save the Nation the Millions of Dollars As Proposed?

How can you hurt one state's economy and not have it reflected in the overall picture?

As Fort Sheridan is the only "Army" base in the state of Illinois, should not the taxpayers money be spent on studies to add and preserve rather than abandon this base and the people involved?

"FORT SHERIDAN, ILLINOIS COST EFFECTIVENESS"

There is a justifiable need to clarify the cost effectiveness of the Fort Sheridan, Illinois operation and to set the facts straight.

The indication that "Fort Sheridan is one of the most expensive Army Bases per capita of military personnel in the country" is a very misleading half truth. If properly and fairly evaluated, Fort Sheridan is as cost effective as most installations.

The Army utilizes an old formula which is based on the military population of the Post. This is OK for large Divisional Posts whose primary mission is to train/support active Army troops, but is unrealistic for a small post, such as Fort Sheridan with approximately 700 acres, whose primary mission is supporting off post Reserve troops.

The reorganization of the Army in 1973 under Project Steadfast recognized, planned for and adopted the policy that the Reserve Components should be depended upon for 50 percent of the Army's requirements for Mobilization.

Fort Sheridan's Military Post Population is only 1870, however it directly supports over 44,000 Reserve personnel for which it receives no credit. Additionally, Fort Sheridan supports retirees and their dependents totalling about 43,800 for which no credit is allowed.

The Army needs to revise/update its formula in consonance with the Steadfast Reorganization and give proper credit for this work load. This would bring Fort Sheridan's cost ratio down with other Posts.

Since Fort Sheridan's Budget is over $32.6 million for P5–OMAR (Operation and Maintenance Army Reserve) versus $18.5 P2–OMA (Operation and Maintenance Army) funds, consideration should be given to carrying Fort Sheridan as a P5 Type Funded Post rather than P2, similar to Fort McCoy, Wisconsin whose mission also is supporting Reserve components. Accordingly, we would not be unfairly compared against the large P2 Active Army Divisional Type Posts, and would be in a similar category with Fort McCoy which is excluded from P2 comparison.

There are personnel cost figures to be considered if Fort Sheridan functions are transferred.

Four hundred seventy-eight employees would be entitled to severance pay. Figuring approximately $7 per hour for 20 weeks, each individual would draw approximately $5,600. Thus the total cost of severance pay would be $2,676,800.00.

Seven hundred eighty-five employees would be entitled to draw unemployment compensation. Using a median figure of $125 per week for 26 weeks, this would result in a cost of $2,551,250.00. It would also add to the unemployment rate of the State of Illinois.

The above represents an irrecoverable loss.

NOTE.—90 percent of the personnel own their homes. If 500 were transferred, based on a family of four, it would cost the government $10,000 for each family for a total of $5,000,000.00.

SO THEY SAY! SHOULD FEDS CLOSE ILLINOIS MILITARY BASES?

(By Mercedes Meyers)

CARPENTERSVILLE.—The Carter administration is considering moving all or most of four military bases out of Illinois as part of a nationwide economy action. The bases are Chanute Air Force at Rantoul, parts of Fort Sheridan, parts of Great Lakes Naval Training Center and an Army agency at the Rock Island Arsenal.

Shoppers at the Meadowdale Shopping Center were asked if they favored the Defense Department's economy proposal to cutback or close the Illinois bases. Their views appear below:

Ronald Knox, of Carpentersville, said: "A cutback could hurt the economy in Illinois.

"I was stationed at a base in Japan that closed its facility and saw what happens. Many jobs were lost. It really hurt a lot of civilians working at the base canteen and other civilian jobs.

"And, can you picture a business area like Meadowdale Shopping Center being near a base and what would happen to their businesses if the base moved out?

"It's a simple case of supply and demand. Take away the military base personnel's demand for consumer goods and you drastically reduce the supplier's income and the local and state revenue.

"And, as to transferring thousands of civilian personnel working at the military bases, not everyone can tear up their roots that easily.

"It can mean pulling children out of one school and transferring them to a new school in another state. That can be a traumatic change for a child to make the adjustment. It can mean breaking a lease or selling a house and clearing up old debts before moving across the country. It's not as easy as it sounds."

Mrs. Ronald (Deana) Knox, of Carpentersville, said: "I agree with my husband. Not many civilians can afford to move."

Mrs. Edward (Florence) Pfeiler, of Barrington, said: "I don't think the Defense Department should cutback or close the bases in Illinois. We need the facilities.

"If they remove the operation, the facilities will deteriorate into an eyesore and safety hazard. If the area were converted into, say, parkland, that would be at the expense of Illinois taxpayers.

"A cutback or closing of four bases in our state would definitely hurt Illinois economy. Many civilians would be out of work. Many more people who are spending consumer dollars at the bases would be gone to pour their dollars into some other state's economy.

"On top of all that, it is difficult for people to transfer from one job site to another, especially to another state clear across the country, away from friends and relatives."

Mrs. Tom (Caroline) Johnson, of Schaumburg, said: "I don't like it at all.

"It would mean laying off so many people. We don't need more unemployment here.

"It also means cutting back defense areas. It wouldn't make me feel too secure.

"It just involves too much. Thousands of military and civilian jobs would go down the tube. How would that help the nation's economy?"

Mrs. Bob (Margo) Price, of Hanover Park, said: "It would swell the unemployment lists here drastically. We don't need that.

"I can't see how the proposed cutbacks will save the nation the millions of dollars the administration says it will. How can you

hurt one state's economy and not have it reflected in the overall picture."●

LAWYERS AND THE CORPORATE BOARD ROOM

● Mr. McGOVERN. Mr. President, a line of modern court decisions has placed increasing personal burdens on those who serve on the board of directors of the Nation's corporations both large and small. Indeed, because of the increasing risks of personal responsibility for corporate decisions many Americans are becoming reluctant to be board members unless they have the time, resources, and personal expertise to serve.

The modern corporation, especially the large ones, have become models of complexity requiring the most sophisticated of legal representation and counsel. Too often the chief client of the corporate counsel is a tight band of central executive officers to the exclusion of other board members who oftentimes serve on the board nominally—their chief interests being their own individual businesses. In many instances management decisions of great magnitude turn out to be disasters much to the chagrin of the board and ultimately the public stockholders. Legal advice either fell short of the test of competency or was only available to the principal operating officers.

Mr. Victor H. Palmieri, a noted financial analyst in Los Angeles, has written eloquently and purposefully of these matters of sufficient and competent legal counsel in an article which appeared in the Wall Street Journal on August 14, 1978. The article is entitled "Officers of the Board" and I ask that the text of the article be printed in the RECORD.

The article follows:

OFFICERS OF THE BOARD?

(By Victor H. Palmieri)

The subject of "corporate governance" has become a favorite preoccupation of Congressmen, SEC commissioners, legal scholars and Naderites.

"How can we improve the way corporations are run?" is the question they are asking. The answers come in three clusters: (1) Making sure that directors are "independent" (i.e., not under management domination); (2) increasing the responsibility of the audit committee of the board for monitoring sensitive disclosure issues such as questionable payments; and (3) raising the level of federal and state standards for corporate behavior in relation to investors and the public.

All the principal actors on the corporate stage—directors, managers, and auditors in particular but also regulators and legislators—have received their fair share of criticism in the course of this debate. All, that is, but lawyers. In the wave of corporate disasters that followed the Penn Central debacle—National Student Marketing, Equity Funding, the R.E.I.T. bankruptcies, the foreign payments cases—lawyers have by and large managed to stay out of the line of fire.

To anyone reasonably familiar with the real world of the board room this immunity is bound to be puzzling, because in practice the quality of corporate governance is so clearly and consistently linked to the performance of counsel in the board room.

As a practical matter, neither the existence of tougher standards on the books nor a majority of independent directors in the board room is likely to make an important difference in the quality of corporate governance. Access to information in depth by itself is no guarantee of understanding, even with the most sophisticated directors. The classic example is the Penn Central, where an independent board majority composed of the nation's business elite remained oblivious to the problems and essentially inert month after month while the company lurched toward the biggest bankruptcy in history. Penn Central may be a classic in the annals of corporate disasters, but it is not unique.

The biggest problem in my judgment is the corporate lawyers' traditional concept of their own role. Until a crisis arises, the lawyers who sit with the board typically see themselves as the chief executive's counsel. Because they are usually selected by the CEO and serve, if not at his pleasure, with their compensation and tenure highly dependent on the CEO's pleasure, corporate lawyers tend to relate to the chief executive as the client. They deal with the board as a specially important constituency of management which, like other constituencies, has to be managed. This perspective, consciously or unconsciously, governs their participation in all interactions between the board and management.

In these situations lawyers have obviously failed to identify their clients, in the words of the ABA Code of Professional Responsibility, the lawyer "owes his allegiance to the entity and not to a stockholder, director, officer, employe, representative, or other persons connected with this entity."

This does not mean that company lawyers should fail to be responsive to the needs of the CEO. It is important to the company for the chief executive to be able to rely on a confidential relationship with the company's counsel. It does mean that lawyers in no instance should compromise their legal judgment to satisfy the purposes of the chief exectuive. If this imposes a burden on counsel, it is simply an occupational hazard that has to be accepted to make the system work.

In relating to the board, corporate counsel needs to use its best efforts to perform three critical tasks on a consistent basis:

1. Detecting and calling attention to any material inaccuracy or non-disclosure in management's presentation on the issues under discussion;

2. Explaining fully and fairly to the board the latent as well as patent risks involved in proposed actions or decisions;

3. Making themselves available to discuss the concerns of the independent directors away from the board meetings and out of the presence of the chief executive.

Lawyers' traditional reluctance to be drawn into "matters of business judgment" often insulates them from important information and leaves them without sufficient understanding of problems which they and the board should know about. In today's world, for instance, corporate lawyers who lack a firm grasp of financial and accounting principles and practice, or who are innocent about corporate relations with politicians or journalists, or who are not up to date on the changing contour of regulatory policy are simply not equipped for their job.

In particular, the emergence of the audit committee as the prime board instrumentality for monitoring sensitive issues such as executive perquisites, questionable payments, political contributions and other required disclosures creating a need for sophistication in dealing with audits and auditors that many lawyers simply do not possess.

Corporate counsel must be energetic in assisting the board to develop a philosophy of governance and a process so structured that, formally or informally, all information and viewpoints which may enhance the directors' capabilities to monitor the performance of management and to make sound decisions are brought to them. It is not a role for a technician, or an advocate, or a lawyer's lawyer. Rather it calls for an entirely different level of professional consciousness and independence, one in which corporate counsel come to be viewed as "officers of the Board" in the same sense that trial lawyers have long been viewed as "officers of the court."●

SUPPORT FOR S. 3007

● Mr. HASKELL. Mr. President, today I join with Senator DOLE in cosponsoring S. 3007, as amended. I agree in the principle of this bill, having already sponsored S. 3037. I believe that all businesses in addition to real estate, need relief in this area. However, I reserve the right to offer amendments to S. 3007, as amended, if the bill as drafted needs to be tightened up to prevent abuses.●

THE BLACK HILLS PASSION PLAY

● Mr. McGOVERN. Mr. President, for almost 40 years, the Black Hills Passion Play has excited and inspired millions of Americans who witnessed these moving performances at Spearfish, S. Dak.

In his sensitive portrayal of Christ, Mr. Josef Meier has brought to this demanding role an historic and religious understanding that is equaled by few in the world today.

Internationally acclaimed for the perceptions he brings to this exacting drama, Mr. Meier continues to create new meaning for his audiences in this "greatest story ever told."

Mr. Tom Zito of the Washington Post has recently visited with Mr. Meier and has seen the Black Hills Passion Play.

Mr. President, I ask that his article be printed in the RECORD.

The article follows:

THE MAN WHO PLAYS CHRIST: 8,000 PERFORMANCES AND 50 YEARS IN THE PASSION PLAY

(By Tom Zito)

SPEARFISH, S. DAK.—Josef Meier has spent the last 50 of his 74 years playing Christ—more than 8,000 performances in "The Black Hills Passion Play," set here in a natural amphi-theater near Mt. Rushmore and Devil's Tower.

It's an eerie, impressive setting. A three-block stage under the West's magnificent and awesome skies, where camels and sheep parade forth and a cast of 250 act out the last week of Christ's life, right down to the crucifixion of Josef Meier, on a mountain specially carved out for the play.

Never mind that Meier has been playing Christ for much longer than the 33 years Christ himself lived.

"His mission would have continued in the same vein if he hadn't been killed," Josef Meier said.

Indeed, Meier himself has taken on the passion play as his mission in life. Raised in Luenen, Germany, having studied medicine as a boy, he was chosen to play Christ in the town's Lenten passion drama. In 1932, after a Pittsburgh Shriner had seen the play in Germany, the enterprising Meier brought the production to that town's Sylvia Mosque. From there Meier put it on the road (including an evening at Washington's Constitution Hall) for five years, carting sheep, camels, horses, costumes, sets, and players on railroad cars.

"It was a pleasure to travel by rail in those days," he says, lost in the intricacies

of managing a road troupe. Meier is rummaging through the desk in his office at the amphitheater, looking for his old diary and fondling his pet miniature poodle, Teeney.

He could be a Russian count out of a Marx Brothers film, with his tiny mustache, close-cropped beard and foreign accent. His fiery eyes have a glint that make him seem like a character out of an outrageous '40s comedy film.

"We approach our work with a serious attitude," he says of himself and his company of 250 actors. Thirty-eight of them are professionals, and two—Harold Rogers, who plays Peter, and Meier's wife as Mary the mother of God—have been with him since the onset. "We bring to our work a sense of faith and believing. If this became a commercial, cold business, the essential symbolic value would be lost."

With money from the road production, Meier built the amphitheater in 1939 and has presented the passion play in the Black Hills every summer since. It is seen by 6,000 people three nights each week. In the fall the production moves to Lake Wales, Fla., where Meier built an amphitheater in 1932.

"I first came here for political reasons," Meier says. "You could sense then in Germany that things were not going in the right direction. I'm worried that the situation in this country today is not unlike the situation in Germany then. We've lost a sense of responsibility and inflation is eating up people's money.

"When I began to travel around this country with the play, I really saw the need for it. The separation of church and state here is extreme. In Europe, every school has a serious religious program. Here we would find that children really knew very little about religion, but they were fascinated by the character of Jesus. You must always reinforce, never disturb people's concept of Jesus."

After 8,000 performances in the same role, you might think an actor would become tired. But not so with Meier, who says that every performance is a re-dedication to his life's goal.

"I gain by the role," the Roman Catholic says. "People often say to me, 'It's a heavy cross. Aren't you tired?' He said, 'Ask and ye shall receive.' And if I need strength, I get it. The good Lord will tell me when it's time to retire. (Meier is grooming a nephew to take on his role and his daughter for the role of Mary.) He's the one who'll make the joints go stiff and the voice grow cold."

Meier often relies upon scripture to express his point. Referring to Christ's words to Peter at the Last Supper he says " 'The Kingdom of which I speak is different than the one you have known. The greatest will become the least.' These are the qualities that must remain with you in every single line when you are on stage. Otherwise it becomes a hollow role."

If all this sounds obsessive Meier says he is careful not to let his role become the world's most amazing case of method acting.

"I'm too terribly aware of my shortcomings, and always want to remain so," he says. "Doing something like that would be a form of insanity."

Which is not to deny that there is some religious spillover from the play into Spearfish's secular life.

A young girl who had just begun appearing in a crowd scene surprised her father one evening when he arrived home from work. She came running out of her bedroom, waving a branch of palm and shouting, "Hail Hosanna." ●

CONSPIRACY AGAINST THE ARMY

● Mr. GOLDWATER. Mr. President, in recent months, I have been very disturbed at the number and quality of criticisms being directed at the All-Volunteer Army. Admittedly, the present system of recruitment has encountered serious problems. But I hardly think the situation calls for the kind of attacks which have been appearing in the news media on the quality of the men and women in our military services. In this connection, former general of the Air Force, Ira C. Eaker, recently wrote an interesting article entitled "Conspiracy Against the Army." I submit for the RECORD the article by General Eaker which appeared in the July issue of the magazine Officer Review.

CONSPIRACY AGAINST THE ARMY

(By Ira C. Eaker)

Last month an hour-long television program on one of the major networks charged that the present-day Army was a collection of misfits from the lower strata of our society. It pronounced the all-volunteer recruitment system a failure. No one would think of joining the Army, it implied, unless he had failed to find any other employment.

More recently, a headline in a Washington paper's Sunday edition read, "As Officers Forget Duty—Honor—Country and Learn to Look Out for No. 1, the Military Loses Its Fight. It's Happening in the U.S. Army."

These are not isolated cases. There have been many other scurrilous attacks in the news media on the quality of the men and women in the military services. These examples are but the latest and most vicious.

Who is behind this effort to denigrate, defame and destroy our Army today? A careful analysis will show it is comprised of two groups, one subversive, the other pacifist, both dedicated to the disarmament of the U.S.

Since Congress, in misguided zeal, has gutted the FBI and castrated the CIA, the influx of enemy agents and money has more than doubled.

For example, within 48 hours after Moscow vehemently opposed the B–1 bomber, 25 pacifist groups in the U.S. obediently took up the refrain. As a result, the B–1 was cancelled. Exactly the same process and result occurred in the case of the neutron bomb.

The pacifist, the unilateral disarmament group in this country, most of whose members may not realize that they are being used as tools by the Kremlin, is busily engaged in destroying the military power of the U.S. The principal components of military power are modern weapons and competent Defense Department people in adequate numbers.

The joint campaign of the left-wing liberal groups has succeeded thus far in preventing the deployment of any new weapons to modernize our defense forces. The present effort concentrates on reducing military manpower.

Taking full advantage of the antimilitary sentiment growing from the Vietnam war and its slanted reporting, these critics now charge our failures there were due to defective Army leadership.

Actually, it was not Army but political leadership which failed us in Vietnam.

The crux of the present campaign is to use Army people to condemn the Army. There are always a few people in the Army, as in any large organization, who cannot measure up and who must be eliminated. Some of these "early-outs" become embittered and dedicated to revenge against the organization which found them defective.

Many flee to the tenured, sheltered status of academia and write books and articles viciously attacking the military. They have learned, unfortunately, that critical books, emphasizing controversy, have more sales appeal.

The facts are that our Army today is representative of the average of the U.S. population. It is admirably trained and dedicated to the defense of the country. Its officer corps, noncommissioned and commissioned, is not only adequate, but superior, the best we have ever had.

If the present conspiracy against the all-volunteer system of recruitment is allowed to succeed, by 1984 the Army will be at half-strength, completely inadequate for its critical defense mission.●

NOTICE CONCERNING NOMINATIONS BEFORE THE COMMITTEE ON THE JUDICIARY

● Mr. ROBERT C. BYRD. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

Robert J. Cindrich, of Pennsylvania, to be U.S. attorney for the western district of Pennsylvania for the term of 4 years vice Blair A. Griffith.

Tyree A. Richburg, of Alabama, to be U.S. marshal for the southern district of Alabama for the term of 4 years vice Harold S. Fountain, resigned.

On behalf of the chairman (Mr. EASTLAND) and the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Tuesday, August 22, 1978, any representations or objections they may wish to present concerning the above nominations, with a further statement whether it is their intention to appear at any hearing which may be scheduled.●

AMENDMENT NOS. 3456 AND 3457 TO S. 1392 (CHAP)

● Mr. CRANSTON. Mr. President, on August 10, I submitted for printing two amendments to S. 1392, amendment Nos. 3456 and 3457, and asked that they be printed in the RECORD at the close of my introductory remarks.

Through an inadvertence, several amendments were printed in lieu of the two amendments I introduced. I ask, Mr. President, that the two amendments I submitted, Nos. 3456 and 3457, be printed at this point in the RECORD, and that the permanent RECORD be changed accordingly.

The amendments follow:

AMENDMENT No. 3456

On page 2, line 22, strike out "six" and insert in lieu thereof "twenty-one".

On page 3, line 19, strike out "SIX" and insert in lieu thereof "TWENTY-ONE".

On page 4, line 1, strike out "six" and insert in lieu thereof "twenty-one".

On page 4, line 24, strike out "six" and insert in lieu thereof "twenty-one".

On page 3, line 12, insert "when the care or services for those conditions are not provided pursuant to paragraphs (1) through (5) of section 1905(a)" after "disabilities".

On page 3, at line 14, insert "or discovered by a dentist if the dental assessment is done by direct referral to a dentist" after "assessment".

On page 3, at line 18, insert a comma and "and for the referral of any individual under the age of 21, who has received his periodic assessment, for appropriate care and services not available under this title" before the semicolon.

On page 5, at line 9, insert "for physical and mental problems" after "assessments".

On page 11, at line 21, strike out "September 30, 1977" and insert in lieu thereof "June 30, 1974".

AMENDMENT NO. 3457

On page 12, after line 13, insert the following:

MEDICAID COVERAGE OF PREGNANT WOMEN

SEC. 9. Section 1905 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(m) (1) For purposes of this title—

"(A) any pregnant woman shall be deemed to be a relative specified in section 406(b)(1) with whom a child is living who is a dependent child as defined in section 406(a), and

"(B) any pregnant woman who would meet the income and resources requirements of the State plan approved under part A of title IV if she had borne a child with whom she was living shall be deemed to be receiving aid under that State plan.

"(2) Any woman who is eligible for care and services under this title by reason of paragraph (1) of this subsection shall remain eligible for such care and services for a period of two months following the month in which the pregnancy terminates. Notwithstanding any other provision of law, any such woman shall remain eligible under this title for one additional pregnancy-related check-up beyond such two-month period if the fee for the check-up has been included in a single overall charge for all pregnancy-related care and services.".●

THE SALE OF OIL MACHINERY TECHNOLOGY TO THE SOVIET UNION

Mr. THURMOND. Mr. President, it was with great disappointment that I read in the newspapers yesterday that President Jimmy Carter had approved the sale to the Soviet Union of a large plant for producing oil well drilling bits.

Central to this sale is turning over to the Soviets a sophisticated electron-beam welding machine which is operated with its own computer. Neither President Carter nor the people in his administration seem to understand that the Soviet Union is in a race with the United States for political and economic power. History is replete with their efforts to expand communism to all states of the world.

Why are we transferring to them the technology their system cannot produce? Why are we making it easier for them to obtain oil to run a war machine which threatens us in Europe? Why are we helping them get oil when their ships are undercutting our merchant marine fleet, and their trucks and war machines are spreading Communist doctrine and supporting Communist dictators in Africa?

The Soviets have not lived up to agreements they have entered into on human rights or anything else. We should not give them our technology irregardless of Soviet policy on human rights. By transfer of technology we are strengthening a nation and a system which is spending billions and billions of dollars more than the United States to build a war machine far in excess of anything they could conceivably need for national defense.

Our own defense expenditures could be greatly reduced if it were not for the huge drive by the Soviets to attain military dominance over the United States and export their system throughout the world.

Mr. President, it is shortsighted policies, such as sale of this oil drill machinery, and especially the electron beam and computer techniques, that will lead to real U.S. problems in the future. Computers are at the heart of all advanced defense technology. The Soviets have been working directly and through other nations to get our computer technology. Now we are handing it to them on a platter.

Only an outcry in Congress has prevented other sales of high technology items to the Soviets. Apparently Congress did not make enough noise on this one. The administration should be providing leadership on this subject as the director of our foreign policy, but it seems Congress has to fight to stop such sales to the Soviets.

Mr. President, this particular sale is part of a larger policy carried out throughout the West. In the last 6 years the Soviet debt to Western sources has risen from $2.5 billion to $14.4 billion. I certainly would urge that this country not finance any loan for the $144 million involved in this sale.

Mr. President, it is time Congress started giving attention to legislation to end these technology transfers, if the administration is going to follow the type policy they seem intent on promoting.

This particular sale includes three important transfers: First, it involves a plant which includes our advanced manufacturing techniques. a feature the Soviets lack and which they can apply to military production; second, we are enhancing their capability to get oil, a fuel which they need for their huge war machine; and third, the electron beam and computer technology has significant application to defense weapons, such as the long range ballistic missiles targeted on this city and all over the United States.

Mr. President, I ask unanimous consent that an article entitled "U.S. To Allow $1 Million Soviet Sale," which appeared in the August 10, 1978 issue of the Washington Post newspaper be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 10, 1978]

U.S. TO ALLOW $1 MILLION SOVIET SALE

(By Don Oberdorfer)

The Carter administration, in a decision with political and economic significance for relations with the Soviet Union, has decided to allow the sale to that country a large plant for producing oil well drilling bits.

The $144 million deal worked out by Dresser Industries, a Dallas firm, was the subject of widespread speculation and a new round of government policymaking when President Carter ordered reprisal actions last month for the political trials of dissidents Anatoly Scharansky and Alexander Ginzburg.

At that time Carter canceled the sale of a computer ordered by Tass news agency and decided to ban most travel to the Soviet Union of policy-level U.S. officials. Carter also announced that future exports of oil technology to Russia would be placed under a high-level review.

Most of the Dresser sale had been previously approved, but a $1 million segment to provide a sophisticated electron-beam welding machine was subjected to study under the president's order. This machine contains a computer of its own.

According to the Deputy Assistant Secretary of Commerce Stanley Marcus, the decision was made yesterday to approve the export license for the welding machine, which will permit the entire Dresser deal to go forward.

White House officials said Carter had decided to allow the case to be decided on its bureaucratic and technical merits, without regard for the state of U.S.-Soviet political relations.

The effect of the decision is to limit, at least for now, U.S. economic reprisals for the dissident trials to the single case of the Tass computer.

There had been a sharp division of opinion within the administration about such actions, with Secretary of State Cyrus R. Vance and Secretary of Commerce Juanita Kreps opposing the use of trade as political leverage, and presidential assistant Zbigniew Brzezinski and some of his National Security Council staff on the other side.

Ten days ago Vance informed the Commerce Department, which is charged with processing of export licenses, that he favored moving ahead with the sale of the oil drill plant.

Several senators, including Henry W. Jackson (D-Wash.), had called for cancelation of the Dresser oil deal. Jackson expressed regret last night that the final element of the arrangement has been approved, and said his permanent subcommittee on investigations will look into the matter.

He said providing such sophisticated technology is a poor idea at a time when the United States is attempting to persuade the Soviet Union to "live up to its commitments" on human rights.

Advocates and critics of the Dresser deal agreed that it would enhance the Soviet Union's ability to exploit its potentially vast oil resources.

Proponents of the sale said, among other things, that it is in the United States' interest that Russia be relatively self-sufficient in petroleum rather than be forced to draw large amounts of oil from the tight international market expected in the 1980s.

HUMPHREY ARTICLE URGES UNITED STATES TO RATIFY THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, the United States has long been active on the human rights front. Both at home and abroad, this country has steadfastly stood for the sanctity of individuals. Since we declared our independence in 1776, we have continuously worked to guarantee certain inalienable rights to every citizen of the world.

In recent years, our commitment to human rights has become more vocal and more vehement. Universal human rights has become the leading tenet of our foreign policy, and we have become the leading advocates of universal human rights.

But is our moral leadership secure? Are we doing all that we can to further the cause of human rights? Will our present policies successfully achieve universal human rights?

One of the Senate's most beloved and respected Members, Senator Hubert Humphrey, addressed this very issue. He warned the Senate about our human rights leadership. In an article for the American Bar Association, Humphrey wrote:

The success or failure of attempts to institutionalize international human rights law and development of workable enforcement

mechanisms may be determined by the continuity and consistency the U.S. gives to this issue within our overall foreign policy framework.

Do we have a consistent human rights policy? Do we indeed lead the world struggle for human rights?

Mr. President, I fear not. Sadly, I must concur with the late Senator Humphrey when he wrote:

. . . The moral leadership which the U.S. could exercise in this critical area is diminished by our failure to ratify numerous human rights conventions, including, that most fundamental of documents—the Genocide Convention.

Is not our failure to accede to the Genocide Treaty inconsistent with our human rights policy? It most certainly is. We who so strongly support human rights have not yet acted to protect the most fundamental of human rights—the right to live.

How can we profess to be the leading advocates of human rights when we have not yet ratified the Genocide Convention? Eighty-three nations, including our major NATO and SEATO allies have already signed the treaty. Are we not undermining our own leadership?

Mr. President, universal human rights is a goal that Senator Humphrey sincerely cherished and that we all deeply desire. To make our policy more consistent and more successful, we must ratify the Genocide Convention.

THE 20-YEAR HITCH

Mr. THURMOND. Mr. President, an article entitled "The 20-Year Hitch" by Brig. Gen. J. D. Hittle, U.S. Marine Corps, retired, appeared in the June 24, 1978, issue of the New York Times.

This article offers a very concise and informative exploration of why 20-year retirement is so important to our career military personnel. As usual, General Hittle does not engage in hazy theory, but goes to the practical and real aspects of the issue of 20-year retirement. He clearly points out its effect on the serviceman and his family and on retention of personnel. He cites the dangers of scuttling it as has been proposed by some groups in the Defense Department.

As the Members of this Senate who know Don Hittle recognize, he has unique credentials for speaking out on such matters. He has commanded Marine Corps field units from a platoon to a battalion. He has served as Legislative Assistant to the Comandant of the Marine Corps and later as Assistant to the Secretary of Defense for Legislative Affairs. Following retirement from active service, he served as consultant to the House Armed Services Committee. Then, as Special Counsel to the Senate Armed Services Committee, he conduced the investigation of absenteeism in the armed services. During the Vietnam war, he was appointed and confirmed as the Assistant Secretary of the Navy for Manpower and Reserve Affairs.

When General Hittle resigned to return to private business, a leading service publication editorially said he had been "the greatest civilian personnel chief any service ever had."

Mr. President, in this article he offers a view well worth consideration. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE 20-YEAR HITCH

(By J. D. Hittle)

ARLINGTON, VA.—The President's Commission on Military Compensation has made the big decision to recommend junking 20-year retirement for future career servicemen. So, it's just a matter of time before the White House and Congress will have to come to grips with the issue.

Unfortunately, few outside the career military community really understand how important 20-year retirement is to the serviceman and to our national security. The fact is that the 20-year retirement is what the serviceman and his family can look to as the nation's recognition and appreciation for putting up with the conditions of service life that the average civilian wouldn't put up with.

The average person wouldn't for a good reason—it's a different kind of life, a life of family separation, long hours with no overtime pay, and frequent moves that pull the kids out of school and plop them down in a different community, or even a different country. It's the wife keeping the home fires going, while, as in the Navy, the husband is on foreign deployment.

It's not enough to say that the fighting man is well-paid—even overpaid, according to some "experts"—for what he does. If service pay is so good, why aren't civilians breaking down the recruiting-office doors?

Whatever opinions I had on 20-year retirement I found reaffirmed as a member of the "white hats' panel," which consisted of retired military personnel and members of Congress, and was sponsored by the Fleet Reserve Association, national association of retired Navy and Marine Corps enlisted personnel. Seven public hearings were held at major naval bases, and testimony was heard from 164 active-duty enlisted men and women.

In Norfolk, Va., for instance, the panel listened to noncommissioned officers and petty officers representing 20 commands. What they said, in plain language, boiled down to this: 20-year retirement is the main reason for staying in service now, and it will be needed for the same reason in the future.

Twenty-year retirement is not a one-sided benefit, all in favor of the serviceman. It, of course, is good for him. But it is both a "carrot" and a "stick." The "stick" part of it is seldom recognized. It's this: It's an all-or-nothing proposition. There isn't any real in-between departure point. No "vesting," no delayed retirement if he leaves short of 20 years retirement.

To put it bluntly, he has to give his first 20 working professional years to the service or he gets no 20-year retirement. This is the way the Government keeps his training, experience, schooling and his devoted service for these two decades.

Retirement pay is computed on base pay. This does not include allowances and incentive pay. So, 20-year retirement pay actually works out to about 35 percent of gross pay. Civil Service retirement is based on gross pay.

A senior petty officer told the panel he had done an analysis of his first 20 years in the Navy, and his hours on duty. On the basis of an eight-hour day, five-day week, he had put in at least 30 years of service.

The 20-year retirement is a psychological "escape hatch." With all of a service career's separations, poor duty assignments, housing crises and schooling problems for the kids, the fighting man's continuing incentive is the 20-year retirement.

After he's close to the end of his second hitch, he can handle the disadvantages of service life. He can say to himself that he has "his leg up on 20" and that he can do it "standing on his head" if necessary until he has time in for retirement. Without that "magic 20" point, a lot of good, needed servicemen would leave much earlier. Of course, a lot do leave at 20. But, also, there are a lot who don't and go for 30.

I'm puzzled that so much effort is being devoted to end the system of 20-year military retirement. What about other Federal Government retirement systems? Some could be judged as good or better than what the military man has. Why aren't these being downgraded?

Too many overlook how 20-year retirement serves a very constructive personnel purpose. Voluntary retirement at 20 years reduces the number who have to be forced out, as the pyramid of rank structure narrows, in order to provide flow of promotion, and avoid top-level accumulation of "dead wood." Without 20-year retirement, the force-out percentages would rise to impair morale and cast doubt on the wisdom of a military career.

Yeoman 2d Class B. T. Brollini of the Coast Guard pointedly summed up 20-year retirement in his testimony at the white hat's panel: "If there were no 20-years retirement system there would be few people in the military. Almost everyone I know would not be in the service if it were not for the retirement system. If you want to disband the services, change the 20-year retirement system.

It's possible that Yeoman Brollini and his shipmates could be right, and the blue-ribbon commission could be wrong.

TRIBUTE TO MR. WILLIAM BENJAMIN BYRD OF NORTH AUGUSTA, S.C.

Mr. THURMOND. Mr. President, on July 28, 1978, I attended a dinner sponsored by the North Augusta Chamber of Commerce honoring Mr. William B. Byrd of North Augusta, one of the outstanding citizens of that city and of our State. William Benjamin Byrd has led a life well worth emulating by others, and our State and Nation are justly proud of him.

A large crowd of several hundred people attended the dinner and many tributes were paid to him at that time.

Mr. President, I ask unanimous consent that a copy of the W. B. Byrd appreciation dinner program and the following additional items be printed in the RECORD:

First. Welcoming remarks by Mr. Mel Storey;

Second. Invocation by Dr. Sam Smith;

Third. Toast offered by Mr. W. Hammond Burkhalter;

Fourth Remarks by Mrs. Mary Strickland;

Fifth. Letter of appreciation signed by Mrs. Frances Hom;

Sixth. Remarks by Mr. Bill Fuqua, president of the Greater North Augusta Chamber of Commerce;

Seventh. Remarks by Hon. BUTLER DERRICK, Member of Congress;

Eighth. Remarks by Dr. Stanyard Bell, president of Erskine College, Due West, S.C.

Ninth. Proclamation signed by Mayor Henry McKenney for the city of North Augusta.

Tenth. Proclamation from the Aiken County Council signed by its chairman, Hon. Carrol Warner;

Eleventh. Resolution signed by Hon. Cecil Collins for the South Carolina House of Representatives;

Twelfth. Resolution signed by all Members of the South Carolina Congressional Delegation;

Thirteenth. Newspaper article by Mrs. Mim Woodring from the Star of North Augusta entitled "Byrd Testimonial Draws Accolades from City, County, State and Nation";

Fourteenth. Remarks by Senator STROM THURMOND.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

W. B. BYRD APPRECIATION DINNER

7:30 p.m. Social Hour.

8:00 p.m., Welcome, Mel Story. Invocation, Dr. Sam Smith, Director (Retired) Connie Maxwell Children's Home.

8:15 p.m. Dinner. Tributes: Friend—Hammond Burknalter; Family—Mary B. Strickland; Employee—Katherine Mobley, Frances Hon; Business & Community—W. D. Fuqua, President, Greater N.A. Chamber of Commerce; Government—Hon. Butler Derrick; U.S. Congressman, Third Congressional District; Education and Religion—Stanyard Bell, President, Erskine College.

Presentations: City—Hon. Henry McKenney, Mayor, City of North Augusta; County—Hon. Carrol Warner, Chairman, Aiken County Council; State—Hon. Cecil Collins, S.C. House District 83; Federal—Hon. Strom Thurmond, United States Senator.

Closing Remarks—Mary G. Mittelberg.

Benediction—The Reverend Larry Scales, Associate Pastor, First Baptist Church of N.A.

WELCOMING REMARKS BY MR. MEL STOREY

Welcome. We are all here tonight to demonstrate our appreciation to Mr. William B. Byrd. We will hear many different verbal expressions and see many gestures of love and respect. A paraphrased version of a poem by Will Allen Dromgoole expresses some sentiments I would like to share.

THE BRIDGE BUILDER

An older man, going a lone highway,
Came at the evening, cold and gray,
To a chasm, vast and deep and wide,
Through which was flowing a sullen tide.
The man crossed in the twilight dim—
That sullen stream had no fears for him;
But he turned, when he reached the other side,
And built a bridge to span the tide.

"Wise Sir", said a fellow pilgrim near,
"You are wasting strength in building here.
You never again must pass this way.
You have crossed the chasm, deep and wide,
Why build you the bridge at the eventide?"

The builder lifted his grey head
"Good friend, in the path I have come," he said,

"There followeth after me today
A youth whose feet must pass this way.
This chasm that has been naught to me
To that fair-haired youth may a pitfall be.
He, too, must cross in the twilight dim;
Good friend, I am building the bridge for him."

Bill Byrd has built many bridges. That's why we're here tonight. Mr. Byrd will come in at approximately 8:15 and join us. As he enters, please stand and sing "For He's A Jolly Good Fellow." Until then, please remain seated and enjoy the fellowship.

INVOCATION BY DOCTOR SAM SMITH

Our Heavenly Father, we invoke thy blessings upon this special occasion which brings together family, friends, and business associates of one whom we seek to honor. We express the gratitude of our hearts for his rich and full life of service to his family, to his church, his community, and to his God, for this quality of faith and courage; for his integrity of character and his delightful sense of humor; or his devotion to duty and his boundless energies directed toward his life's goals; for his spirit of generosity in sharing of the products of his heart and hands; and for his stewardship of life itself.

Our lives have been blessed by the impact of the influence of this, thy servant and our friend, and we are grateful for these ties of friendship and or those ties which bind us together in the family of God.

And now, our Father, we express our thanks to those who planned for this special occasion and for the food and fellowship of this hour, in the Name of Christ, our Savior, Amen.

TOAST TO WILLIAM B. BYRD (1978)

(By W. H. Burkhalter)

Every town or community which thrives and progresses must have a nucleous of a few concerned citizens who not only possess much more than the average ability, initiative and intelligence, but they must be willing to unselfishly contribute of their talents for the common good of their fellow citizens. William B. Byrd is such a man and it has been North Augusta's good fortune that he came here to live a number of years ago. He has given of himself and his finances without stint during the entire time he has lived in our city.

As a result of his contributions, the religious, civic and business facets of our town have all profited greatly through sharing his far above the average abilities.

I have always considered it a great privilege to have Mr. Byrd as my friend and to feel that I can call on him at any time for help, information, and advice. This in spite of the fact that we are something of competitors in business. He has never let this prevent him from offering his assistance. In fact, on occasion he has become so caught up in some of my business problems that you would almost think he was the principal who was involved instead of an outsider just offering his suggestions and help!

Edgefield County is famous for producing so many outstanding men and leaders in many different fields. Therefore, it is no surprise that W. B. Byrd is an Edgefield County product. He came from Pleasant Lane. If you don't know where that is, you probably could not find Colliers or Poverty Hall either!

Mr. Byrd attended Furman University where he roomed on the second floor, west wing of Montague Hall. Montague Hall was noted as the home of many athletes. As you know, usually the athletes are the "Big Men On Campus", but during Mr. Byrd's tenure there, he dominated Montague Hall even if he was not an athlete.

He was an exceptionally bright student and he managed to have enough spare time to be constantly planning and devising tricks, pranks and schemes for the purpose of his enjoyment and providing fun for his fellow students (and sometimes for their embarrassment). Throughout his college career he was noted for his wondefully pleasant disposition and good humor.

W. B. Byrd's early contribution of service to Aiken County was as an educator, serving as a teacher and principal of the Clearwater Elementary School for a number of years. His administrative and business ability was soon recognized by the people of Aiken County when they elected him to the office of Superintendent of Education of Aiken County during the depression years of the mid-thirties. He served in this office with distinction for about ten years before resigning in 1946.

When Mr. Byrd assumed leadership of the Aiken County schools, there were some 35 or 40 separate and independent school districts in the county and they were almost all in desperate financial condition as a result of the depression. In one district the previous deficit was more than all the taxes due that district for the current year.

I had some first hand experience with the financial condition of the county schools when I was one of the first school boy bus drivers in 1933 and 1934. My salary was $15 per month but then usually the school district did not have any money to pay, so they issued a voucher which would be good when they did get some money! I was only able to cash the last of these two years after I finished high school and after Mr. Byrd had taken over and brought some financial order out of the chaos.

Mr. Byrd's business acumen and financial ability came to light early during his time as County Superintendent and under his leadership and in cooperation with the county delegation a school district consolidation program was begun. Legislation was enacted for a county-wide equalization fund and by the time Mr. Byrd left office, the schools were on a sound financial basis. It is interesting to note that while accomplishing this the county education staff consisted of Mr. Byrd, his secretary and one clerk.

While putting together a strong school program and at the same time balancing the school budget with available tax moneys, Mr. Byrd had to make some hard decisions and deny many requests. Some of these were from prominent politicians but he did so very smoothly. On one occasion he had to use some strong words in denying the request of one of the district superintendents. Realizing he may have hurt this man's feelings, Mr. Byrd then made a special trip to his house to apologize, thus demonstrating a sensitivity of concern for the feelings of his fellow man—a characteristic we all recognize as so evident in Mr. Byrd today.

Mr. Byrd's interest and talents were directed towards buying land and building houses in a number of different developments after 1950. As a result of Mr. Byrd's interest in developing subdivisions, the city of North Augusta has had millions of dollars worth of utilities and streets installed by Mr. Byrd and deeded to the city at no cost to the taxpayers. Approximately a thousand families live in homes built by Mr. Byrd.

Mr. Byrd has been an outstanding success story financially. You know the definition of success, don't you? "Success depends upon the proper functioning of the glands—especially the sweat glands." His motto has been: "God helps those who help themselves" and "Either push, pull or get out of the way." I assure you that Mr. Byrd is always in there pushing and pulling; he is never just going to get out of the way and stand on the sidelines.

Mr. Byrd has shared his wealth with many worthwhile causes. He has been a very heavy contributor to Furman University and to Connie Maxwell Orphanage, as well as the First Baptist Church of North Augusta, Grace Methodist Church and many, many other causes too numerous to mention. He has given aid to many high school and college students and others in need. This all being done very quietly and inconspiciously.

In the world of politics, many local, state and national leaders have been the recipients of his wise counsel.

All in all, Mr. Byrd's many achievements in all his various fields of endeavor, and his many contributions to society are exceeded only by his modesty!

REMARKS BY MRS. MARY STRICKLAND

Dear William! How proud and honored we are to be members of your family!

You have always been completely selfless, sharing materially, intellectually, and spiritually, asking nothing in return.

In times of trouble and sorrow, you are the first one we call upon, and always you have responded without hesitation.

It is said, "A good name is rather to be chosen than great riches." How good and honorable you have made your name. How proud and fortunate we are to be your family!

SOUTHERN PINE PRODUCTS, INC.,
North Augusta, S.C.

Mr. BYRD. Mrs. Mobley and I have been associated with you for over twenty years; and as time goes on, we realize more and more what a truly great man you are.

We enjoy working for you and matching the wonders you accomplish with telephone, pen and pencil, and most of all your remarkable mind. We know how much pleasure you receive from working and helping others.

We love, admire and respect you. You are the finest man we know.

FRANCES HOM.

GREATER NORTH AUGUSTA,
CHAMBER OF COMMERCE,
North Augusta, S.C.

The North Augusta Business Community is indebted to Mr. Byrd for his vision and ability. He has been, and still is, a major catalyst in the growth and development of our area, having developed 10 sub-divisions and approximately 1000 homes.

He was elected Citizen of the year in 1955 by the Chamber of Commerce, has been a faithful supporter of the Chamber and its activities, particularly the Industrial Development Board and its successor, the Industrial Development Corporation.

By giving unselfishly of his time and energies, he has in some measure touched the financial lives of many of us. From the business community a sincere "Thank You", Mr. Byrd.

BILL FUQUA,
President, Greater North Augusta, Chamber of Commerce.

HOUSE OF REPRESENTATIVES,
Washington, D.C. July 28, 1978.

It is my highest pleasure to say a few words about my good friend, William Byrd.

I, like most of you here, have known this man most of my life. And, I suppose, it is only natural to think of "Mr. William" as a builder of homes, simply because the splendid evidence of this facet of his life is all over Aiken County. This, along with his excellent leadership in the Aiken County Industrial Development Board, truly means that William Byrd is a man who has transformed Aiken County.

Before "Mr. William" was in the lumber and building business, he was Superintendent of Schools in Aiken County, and I always like to think that his commitment to education led to his interest in politics. Though this man never ran for public office, his influence in the political process has been keenly felt in this county and state for many years. His advice and help to me have gone far beyond the bonds of our friendship, and I both respect and enjoy his counsel.

So, I would like to propose and extend a toast to William Byrd and end the way I began. He is my fine friend and valued counselor, and I am both pleased and deeply honored to be here tonight.

BUTLER DERRICK,
Member of Congress,
Third District, S.C.

ERSKINE COLLEGE.

Society's bank of accumulated knowledge is its college and university system. To this bank, society sends its most brilliant sons and daughters to withdraw sustenance for enhancing their life and the life of their neighbor. Doctors, lawyers, engineers, teachers, ministers, business economists, homemakers and many others participate regularly in a centuries-old tradition which lifts baskets from lights, identifies, stretches and enriches talents, seeks, knocks and asks with divine sanction; and above all suffer the young over to draw nearer to their Creator in all of His splendor.

Mr. Byrd, you have paved a way for students who had no way to this depository. You have left the name of Orene Irwin Byrd as a perpetual witness to love, hope and encouragement.

May the only clouds in your life be those that make for a beautiful sunset.

STAN BELL, *President.*

PROCLAMATION

Whereas, Mr. W. B. Byrd has made significant contributions to the growth and development of the City of North Augusta, South Carolina, and

Whereas, He has given of his time, wisdom and patience to individuals and groups within the City of North Augusta, and

Whereas, He has been a willing listener to the dreams and aspirations of many persons in the community and has worked tirelessly to participate in the fulfillment of these dreams and aspirations,

Now, therefore, I, Henry R. McKenney, Jr., as Mayor of North Augusta and representing the Council and citizens do commend Mr. W. B. Byrd and recognize his gifts to his community and its citizens and award him the Key to the City of North Augusta this 28th day of July in the year of our Lord, nineteen hundred seventy-eight, and do proclaim this day to be his day in North Augusta, South Carolina.

PROCLAMATION

Whereas, William B. Byrd has made significant contributions to the City of North Augusta, the County of Aiken, the State of South Carolina, and the United States of America, and

Whereas, William B. Byrd was elected County Superintendent of Education in the 1930's when the County was divided into more than thirty individual School Districts, and

Whereas, Mr. Byrd's business education and ability provided the knowledge and expertise to organize a School District consolidated program, and

Whereas, Mr. Byrd's efforts in the area of school administration put the Aiken County Schools on a sound financial basis, and

Whereas, Mr. Byrd spent exhaustive work and time in the formation and organization of the Aiken County Planning and Development Commission, and

Whereas, Mr. Byrd served as Chairman of the Commission, which provided information to potential industries in the County, and

Whereas, Mr. Byrd realized the need of a greater tax base in Aiken County by bringing industry to the County, and

Whereas, William B. Byrd's interest in education has provided the way for many Aiken County students to receive college education, and

Whereas, Mr. Byrd has encouraged many of these young people to settle in the County and subsequently become solid citizens of the County, and

Whereas, these contributions have added significantly to the growth and prosperity of Aiken County, Now therefore, be it

Resolved, That the Aiken County Council does hereby proclaim and designate Friday, July 28, 1978 as William B. Byrd Day in Aiken County and calls on all the citizens thereof to appropriately acknowledge the massive contributions of William B. Byrd to the growth, prosperity, peace and well being of said County.

Signed: CARROL WARNER.

A HOUSE RESOLUTION TO JOIN WITH THE NORTH AUGUSTA COMMUNITY IN HONORING AND RECOGNIZING THE OUTSTANDING COMMUNITY SERVICE OF WILLIAM BENJAMIN BYRD OF NORTH AUGUSTA

Whereas, the North Augusta community is honoring William Benjamin Byrd of North Augusta with a banquet on July 28, 1978, recognizing his outstanding service to the community; and

Whereas, Mr Byrd, a former Aiken County Superintendent of Education, is successfully engaged in the lumber and building business in the North Augusta community where he has developed more than ten subdivisions and built more than one thousand homes frequently with his personal financial assistance thereby enabling many residents of Aiken County to own their own homes; and

Whereas, Mr Byrd has been an active supporter in local, county, state and national politics where he has a strong force in the establishment of good government and where his efforts and contributions to education both at the local and state levels have manifested a genuine and dedicated interest in young people and in the development of their careers; and

Whereas, Mr Byrd has been an active member in the Greater North Augusta Chamber of Commerce and the Industrial Development Board of Aiken County and was the recipient of the North Augusta Citizen of the Year Award; and

Whereas, it is appropriate that the General Assembly join with the North Augusta community in recognizing the long and productive career of community service of this distinguished South Carolinian: Now, therefore, be it

Resolved by the House of Representatives: That by this resolution the members of the House of Representatives recognize the long and distinguished career of public service performed by William Benjamin Byrd of North Augusta who has contributed so much to the development of the North Augusta area and to the improvement of education at both the local and state levels by his generous support and contributions to numerous educational institutions and his active participation in other community activities: Be it further

Resolved, That a copy of this resolution be presented to Mr Byrd at the banquet in his honor on July 28, 1978, in North Augusta.

RESOLUTION

DATED: JULY 28, 1978.

Whereas William Benjamin Byrd has been a citizen and resident of North Augusta, in Aiken County, South Carolina, for most of his adult life, and

Whereas the said William Benjamin Byrd has given increasingly of his energies and abilities in making significant contributions to the religious, education, financial, civic, cultural, political, and social development of his community and fellow citizens, and

Whereas the said William Benjamin Byrd's life exemplifies in purest tradition and spirit that moral exercise of the freedom which is the cornerstone of our American society, so sacred to each of us, and typifies the boundless success obtainable to one who is willing to honestly work and avail himself of his opportunities, and

Whereas William Benjamin Byrd has generously and selflessly shared life's rewards, both tangible and intangible, with his community and his fellow man, and

Whereas friends, acquaintances, and fellow citizens have found it fitting and proper to express their appreciation and to pay some small tribute and honor to this distinguished gentleman, whose sincere modesty would

never allow him to claim credit for his accomplishments and deeds, and

Whereas state and national leaders are likewise acutely aware of the wisdom of this leader and the enrichment to the life of Community, State, and Country which he has made possible, and

Whereas the Congressional Delegation of the Sovereign State of South Carolina would therefore find it fitting and proper to share in honoring this distinguished American, now therefore, be it, and it hereby is,

Resolved, That the Congressional Delegation of the Sovereign State of South Carolina join with local and community leaders and friends in paying tribute, respect, and honor to William Benjamin Byrd, and in offering earnest thanks for his past and continuing contributions to the life of his Community, State, and Nation; further, be it, and it hereby is.

Resolved, That a copy of this Resolution be reproduced in the United States Congressional Record.

Ernest F. Hollings, Floyd Spence, John W. Jenrette, Jr., Mendel J. Davis, Strom Thurmond, Butler Derrick, James R. Mann, and Ken Holland.

[From the North Augusta (S.C.) Star, Aug. 3, 1978]

BYRD TESTIMONIAL DRAWS ACCOLADES FROM CITY, COUNTY, STATE AND NATION

(By Mim Woodring)

("Rings and other jewels are not gifts, but apologies for gifts. The only gift is a portion of thyself."—Emerson)

William Benjamin Byrd was honored at a dinner last Friday as friends gathered to say thank you to a man small in stature but giant in heart who has given a portion of himself continuously throughout his life.

A series of toasts by his family, business associates, civic leaders and educators was followed by proclamations honoring him and proclaiming July 28 William B. Byrd Day in the city and county.

Coming to Aiken County as a teacher at Clearwater Elementary School, Bill Byrd was elevated to principal. In the mid-1930's he was elected county superintendent of education at a time when there were between 35 to 40 separate independent school districts in the county with most in desperate financial condition, according to Hammond Burkhalter who spoke concerning his friend at the appreciation dinner held at Houndslake Country Club.

"Mr. Byrd's business acumen and financial ability came to light during this time," Burkhalter continued, "and under his leadership and in cooperation with the County Delegation a school district consolidation program was begun. It is interesting to note that while accomplishing this the county education staff consisted of Mr. Byrd, his secretary and one clerk."

Long-time employees Frances Hom and Catherine Mobley spoke of their employer's "remarkable mind" which was molded at Furman University where he graduated. He continued his education at University of Georgia, receiving a master's degree.

Mr. Byrd entered the world of free enterprise with a $500 loan. This propelled him into several expansive lumber businesses and launched him in the home contracting business in 1951.

With the advent of the Savannah River Plant, W. B. Byrd saw the necessity of housing in the city and, realizing the opportunities in this business, first developed Rose Hill on Old Edgefield Road, followed by a group of housing on Crosland Avenue.

Perhaps the largest section was Lynnhurst. Many newcomers in the area have wondered why all the streets in this subdivision, which has been built in three phases, are named for birds. Mr. Byrd uses a theme in street naming of his subdivisions.

Streets in Pinehurst and Pinecrest have names of the various evergreens and in the Colony the streets are named after two famous South Carolinians who were friends of Mr. Byrd. One was the late James F. Byrnes, renowned statesman, and the other the late John Riley, former congressman.

The influence of W. B. Byrd has been experienced by thousands and much of his wealth has been shared with young people he felt needed the boost which would give them a solid foundation.

A firm believer in education, Furman University has named this North Augustan a life member of its Founders Club. Hundreds of students have been educated as a result of Mr. Byrd's generosity to his alma mater. Representing Furman at the dinner was vice president Dr. Robert Christenberry.

The largest single scholarship benefactor at Erskine College is W. B. Byrd who established a fund in memory of his beloved wife, Orene Irwin Byrd. As Dr. Stan Bell, president of Erskine, toasted this man, he stated, "Society's bank of accumulated knowledge is its college and university system. To this bank society sends its most brilliant sons and daughters to withdraw sustenance for enhancing their life and the lives of their neighbors . . . Mr. Byrd, you have paved a way for students who had no way to this depository . . ."

Connie Maxwell Children's Home is of major interest to W. B. Byrd. Not only has he given gifts to the home in money and land, he is developing a section of this land so that the proceeds will go toward this home for children, with the same scrutiny he has pursued his own business ventures.

Representing the home were Maxie F. Moorhead, secretary-treasurer, and retired director Sam Smith.

Many couples have become home owners because of this man's penchant for development of potential. "Lending institutions cannot make loans because they believe in a person," said Mel Story, "but Mr. Byrd has found great satisfaction in this endeavor. His judgment has been 100% correct because every person he helped purchase a home has paid their loan."

Described as a "major catalyst in the growth and development of the area" by Bill Fuqua, president of the Greater North Augusta Chamber of Commerce, Mr. Byrd has developed 10 subdivisions and approximately 1,000 homes. In 1965 the Chamber named him its Citizen of the Year.

Fuqua continued, "He has been a faithful supporter, particularly of industrial development . . . By giving unselfishly of his time and energies he has in some measure touched the financial lives of many of us."

Foresight is another personality trait which has served Aiken County well. Mr. Byrd helped establish the County Planning and Development Commission which was the nucleus that first began attracting industry to the county. County council chairman Carrol Warner commended Mr. Byrd for his devotion to the county, both in education and in laying the ground work for a good industrial base, in a proclamation read at the dinner.

In a proclamation read by North Augusta Mayor Henry R. McKenney, he described W. B. Byrd as having been "a willing listener to the dreams and aspirations of many persons in the community and he has worked tirelessly to participate in the fulfillment of these dreams and aspirations." As he gave Mr. Byrd the ceremonial Key to the City of North Augusta, McKenney said it was a small way to "recognize his gifts to the community."

Cecil Collins, representing House District 83, read a tribute and proclamation to become a House resolution and stated, "Mr. Byrd had been a strong force in the establishment of good government. . . ."

A toast was offered by the Honorable Butler Derrick. Both natives of Edgefield County, Derrick spoke of this gentle man in glowing terms as did the Honorable Strom Thurmond whose resolution will be reproduced in the United States Congressional Record.

Both Derrick and Thurmond alluded to the extreme modesty and humility of the man who sat at the head table and, later, hand on hip declared himself undeserving.

Senator Thurmond declared Mr. Byrd's "life exemplifies in purest tradition and spirit that moral exercise of the freedom which is the cornerstone of our American Society, so sacred to each of us, and typifies the boundless success obtainable to one who is willing to honestly work and avail himself of his opportunities."

The most poignant of tributes was a toast which began the series of tributes. Mrs. Bishop Strickland, niece of W. B. Byrd, spoke for the Byrd family which had come from all sections of the state to take part in an almost surprise event.

Mrs. Strickland said, "Dear William! How proud and honored we are to be members of your family. You have always been completely selfless, sharing materially, intellectually and spiritually, asking nothing in return. In times of trouble and sorrow, you are the first one we call upon, and always you have responded without hesitation. It is said 'A good name is rather to be chosen than great riches.' How good and honorable you have made your name. How proud and fortunate we are to be your family!"

Life has not been free of pain and suffering for this determined man. But a congenital disability has been just another personal challenge to this man of discipline and persistence.

A quiet person recognized by his cane, cigarette-holder and wit, W. B. Byrd was overwhelmed with the well-deserved accolades. Time and again he commented as people congratulated him there were many more deserving persons than he.

His reticence in having his philanthropic activities made public makes this man all the more genuine and humble. His help at First Baptist Church, Nancy Carson Library, North Augusta High School Stadium, Boy Scouts of America and list of community causes are innumerable. However, much of his real joy has come from serving as an anonymous benefactor.

"The only gift is a portion of thyself" succinctly portrays the life of William Benjamin Byrd.

REMARKS BY SENATOR STROM THURMOND, REPUBLICAN, SOUTH CAROLINA

It is indeed a pleasure for me to be present on this auspicious occasion and to have a small part in honoring a long-time friend and an outstanding citizen, William B. Byrd. Mr. Byrd served in many capacities and performed well his duties in all of them.

He served as a teacher for a number of years and then as Superintendent of the Clearwater High School and developed a fine reputation as a leading educator in our State. He has always been vitally interested in young people, and as an educator, he manifested great concern about them and inspired and encouraged them to great heights.

As a businessman, Mr. Byrd was one of the finest. He was possessed of a lot of commonsense and good judgment. He built over 1,000 houses in the North Augusta area and provided homes for many people. In his dealings as a businessman, he was never known to take short cuts or take advantage of people. He was always honest and fair in his business relations with others and developed an outstanding reputation in this regard.

Mr. Byrd took a special interest in public affairs. He was a good judge of human nature and when candidates were offering for office,

he would study them and decide who would best serve the public and did not hesitate to support such candidates openly and above board.

He was a student of governmental affairs and was well posted on the issues at the local, State, and national levels. He could discuss intelligently questions of the day with anyone interested and was always able to make a fine contribution in such discussions.

Mr. Byrd was a dedicated church leader. He served as teacher of his Sunday School class, as a Deacon in his church, and was looked up to as one who lived an exemplary life.

Mr. Byrd was an outstanding civic leader. He was always eager to promote the welfare of the city in which he lived as well as that of the citizens who lived there. He took a leading part in promoting activities for the betterment of his community. He was always ready to lend a helping hand to promote progress.

There is one quality about Mr. Byrd with which a number of people may not have been familiar. He was a philanthropist who helped many worthy causes; he also helped many worthy individuals in need. He not only helped members of his own family but assisted hundreds of other people in one way or another.

Many institutions have benefited from his generosity. Numerous young people have been aided by him to continue their training at college, a technical school, or in some other institution.

Mr. Byrd was a good neighbor. He was respected and loved most by those who knew him best. His sterling qualities endeared him to others who enjoyed the privilege of his close friendship.

Mr. Byrd was a true friend. He is one of the best friends I ever had and countless others felt the same way. He stood ready to advise, counsel and assist people who appreciated his wisdom and sound judgment. If those whom he has befriended could speak out, they would come forth by the legion, as the love and friendship he has demonstrated for his fellow man were unexcelled.

Mr. Byrd believed in the American form of government and supported it to the fullest. He believed in the principles that made our Nation great. He realized that we must keep it strong militarily if we are to remain free. He enjoyed the benefits of our free enterprise system and was a strong exponent of it. He believed in competition, which is the bedrock of the private enterprise system in this Nation. He was of the opinion that if people will prepare themselves in their calling and are willing to work, that the opportunities our Nation afford are superior to those of any place in the world.

He was a sound financier and was opposed to deficit spending by our Government and strongly advocated balanced budgets. He felt that government, like people, should not spend more than is taken in so that it can remain strong economically. Mr. Byrd's life exemplifies in purest tradition and spirit that moral exercise of freedom, which is the cornerstone of our American society, so sacred to each of us, and typifies the boundless success obtainable to one who is willing to honestly work and avail himself of his opportunities.

Mr. Byrd came from a large family which lived in the country, and he was brought up the hard way, like so many other successful leaders. However, he never complained of any disadvantage of any kind and forged ahead, making his own way and setting an example which could well be emulated by others in accomplishing their goals. His spirit was undaunted and his determination was without end. He was the type of man that obstacles did not deter.

I think the following words describe Mr. Byrd's life as well as any one could, and I give them here to illustrate the qualities of that great American, William B. Byrd:

"I do not choose to be a common man; It is my right to be uncommon, if I can.

"I seek opportunity, not security.

"I do not wish to be a kept citizen, humbled and dulled by having the state look after me.

"I want to take the calculated risk, to dream and to build, to fail and to succeed.

"I refuse to barter incentive for a dole. I prefer the challenges of life to the guaranteed existence; the thrill of fulfillment to the stale calm of utopia.

"I will not trade freedom for beneficence nor my dignity for a handout. I will never cower before any master nor bend to any threat. It is my heritage to stand erect, proud, and unafraid; to think and act for myself; enjoy the benefits of my creations; and to face the world boldly and say this I have done with the help of God.

"All this is what it means to be an American."

ARTICLE ON STATUS OF S. 274, THURMOND BILL TO BAR MILITARY UNIONS

Mr. THURMOND. Mr. President, I am pleased to report to the Senate that S. 274, the bill which prohibits military unions, has now been reported out favorably by both the Armed Services and Post Office and Civil Service Committees of the House.

This legislation passed the Senate on a 72-to-3 vote earlier this year and its passage in the 2d session of the 95th Congress is essential if the threat of military unions is to be stamped out.

Mr. President, the threat and even the likelihood of military unions will hang over the Armed Forces if the Congress fails to follow through on this legislation. As the session wears on, I have been informed union interests are urging their supporters in the Congress to let the bill die.

Nothing could be more dangerous to the welfare of the All Volunteer Force. If Congress fails to act on S. 274 it will, in effect, be saying the danger has passed and we could witness union efforts overnight. In fact, the failure to act could be seen as an invitation to the unions to renew their interests as Congress would have demonstrated it lacked the will to say "no" to the unions.

Mr. President, the sentiment in the Congress is strong against unions in our military. That fact was proven by the huge vote in favor of S. 274 in the Senate. I urge the House membership to consider carefully the work of the two House Committees which have reported the bill out favorably, and to bring the will of the membership to bear on its consideration on the floor soon.

In closing, Mr. President, I ask unanimous consent that an article by Marine Capt. P. G. C. Coulter, entitled, "Three Strikes; Is the Union Out?" which appeared in the August 1978 issue of the Marine Corps Gazette, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THREE STRIKES; IS THE UNION OUT?

One sunny day, not long ago, a brand new recruit from Alabama encountered a gruff old officer, "Mawnin," drawled the recruit pleasantly.

The outraged officer launched into a stinging lecture on military courtesy with a great deal of emphasis on saluting.

"Lawdamighty," said the rookie, "if I'd a knowed you was gonna carry on like that, I wouldn't of spoke to you a-tall!"

This joke has made the rounds for many years now, but has only recently taken on a second meaning.

Military customs and courtesies are not quite etched in stone but most can be traced back hundreds, if not thousands, of years. In all those years, as they developed, there was never a real threat to the well structured and disciplined lifestyle they represented—that is, until just these past couple of years as the possibility of military unions became a reality.

Many military leaders and authors have devoted considerable time and effort exploring the reasons behind this new and heretofore unthinkable phenomenon. Depending upon whom one listens to, the main problem is an actual or perceived erosion of traditional benefits. Anyone who has been in Service more than an hour is aware of this situation. Gen. George S. Brown, USAF, past chairman of the Joint Chiefs of Staff, put it very well when he delivered his 1978 posture statement before the House Armed Services Committee:

"Since 1972 there have been repeated attempts to reduce, eliminate, transfer and transform military compensation and entitlements—factors which help to induce the individual to enlist or to make the military service a career."

This was the second year in a row the outgoing Chairman of the JCS made a strong appeal to Congress to act on this matter. He went on to point out that unions are not only attractive to the younger Service members, the ones hurt the most when benefits are cut, but more and more careerists are giving unions a serious once over. Brown urged the lawmakers to act:

"Fundamental causes that would make union membership attractive within the military must be addressed, such as uncertainty about the economic stability of a military career."

Numerous studies, reports and articles in the various news media have offered wide-ranging discussion of the union movement and how it has come to be a real threat to the Armed Forces of this country. Maj. B. J. Fagan in his "Commentary on the Corps" (Gazette, October 1977) presented an interesting corollary when he observed that "if 1976 can be taken as the year of the union challenge, 1977 may well become the year of confrontation." How perceptive he was! In the last days of 1977 there were three major confrontations between union advocates and those opposed to a unionized military. They may well be called the three strikes that could put the union out:

The American Federation of Government Employees (AFGE) vote not to proceed with plans to unionize the military.

The U.S. Senate vote on a bill aimed at banning military unions.

The Department of Defense (DoD) directive that was designed to halt meaningful union activity among military personnel.

This article updates this highly emotional issue and analyzes these three recent actions that could impact significantly on each and every military person.

THE AFGE VOTE

In September 1976, the American Federation of Government Employees (AFGE) amended its constitution to allow military

membership. Immediately the storm flags went up in the Department of Defense. Union watchers zeroed in on the AFGE to find out what its next move would be.

In less than six months, it came. On 7 March 1977 the union's National Executive Council Military Committee issued "Memorandum: 14–Military." This memo told union leaders that unionization of the military was "inevitable." Beginning in May, AFGE locals began to poll their members. To many observers, this referendum to learn how members felt about actively seeking out military memberships, was seen as the final step in the unionization drive by AFGE.

Specifically what did the union really want? According to "Memorandum: 14–Military" it was after actual shop steward representation. This would include bargaining with base commanders and DoD itself over housing, leave, foreign service, education and training, travel allowances, commissary and PX priviliges, recreational facilities, parking, day care, dress and hair codes, political rights and their exercise, health and dental care, efficiency ratings, promotions, equal employment opportunity matters (women's rights), safety and reprimands or discipline under Article 15 of the Uniform Code of Military Justice (UCMJ).

The memo went on to detail other areas of negotiation the union sought: the legal representation to be supplied by the union "primarily in connection with administrative (discharge) boards and UCMJ proceedings. They also pledge "legislative an policy representation." This last category is interpreted by many to mean bargaining with Congress on pay, retirement and benefits. At this point we begin to enter areas that are clearly covered by law.

When he learned of this move by the AFGE, Gen. Maxwell D. Taylor, retired former chairman of the Joint Chiefs of Staff, said:

"Collective bargaining over such matters as pay, overtime and safe working conditions has no place since pay is fixed by law, overtime has no meaning in a profession always on duty, the work is of necessity often dangerous."

Once all this had been presented to the membership, the vote was an overwhelming 4 to 1 against attempting to unionize the military. The actual count was 151,582 against and 38,764 for.

Undoubtedly, many in Congress, the Pentagon and elsewhere throughout the Administration, not to mention the upper echelons of the AFGE, heaved a collective sigh of relief at the outcome of the referendum. AFGE president, Kenneth Blaylock has said a number of times since then that his union will abide by the vote, but he personally believes the military needs union representation.

When asked why the membership was so strongly opposed to unionizing the military, Blaylock replied in a Navy Times interview, "It's obvious the main concern was they felt that AFGE resources and money ought to be spent for the civilians and not the military." Blaylock went on to express concern about this attitude among the members of his union. He said:

"If they are philosophically opposed to the military having unions because of the effects it may have on combat effectiveness, and you've got to have a chain of command, control and authority, that's one thing. I understand that. But for trade unionists to take the position 'Let's help ourselves and the hell with anybody else,' that bothers me."

A number of other union leaders agree with Blaylock that this issue is far from dead. Most feel that now that AFGE is out of the picture for the forseeable future, some stronger and perhaps more aggressive unions will step into the void.

There is little doubt that unless something is done to address the underlying causes of military unrest, unions will continue to be an attractive option for those in uniform who feel no one is aware of or cares about them, except maybe in time of war. In fact, after the votes had been counted and the AFGE position announced, Leo Pulerzi, the general counsel of AFGE, was asked on a radio talk show if all this activity had really accomplished anything at all. He replied:

"To the extent that our input into organizing the military has gained the attention of responsible defense officials, and perhaps members of the Congress and the President, we feel it's been very salutary in and of itself, because it has called to the attention of the appropriate policy officials of this government a condition that needs to be addressed in some way."

And, indeed, it had done that, and, indeed, it was this problem that the lawmakers of the land addressed.

THE SENATE VOTE

Even before the AFGE had finished voting, strong voices in Congress were deliberating long and hard on this complicated and emotion-charged issue. Less than a week after the vote by AFGE had been announced to the media, the Senate voted overwhelmingly 72–3 in favor of a bill, the sole purpose of which was to ban military unions.

This action by the legislative branch of the government, like that of the AFGE, is not a recent phenomenon. It did not just happen in 1977, although it may appear that way.

The banner headlines and editorials across the country told the American people that the lawmakers of this land were not about to sit by and watch some union come in and wrest command of our soldiers and sailors from the generals and admirals. Before the Senate vote, we saw:

"Democracy in Ranks Essential" and "Strikes too Horrible to Imagine," The Chicago Tribune

"The Senate Vote," The Atlanta Journal

"Military Union Talk Stirs Opposition," The Christian Science Monitor

Then shortly after the Senate passed S–274 and sent it on to the House, we read in the papers:

"Senate Panel OK's Ban on Military Unions," The Washington Post

"No GI Unions," The Cleveland Plain Dealer

"Ban Military Unions," New Orleans Times Picayune

These newspaper articles are but a brief sampling of what was being printed by the media. Military-oriented publications, of course, went into considerable detail in their coverage of the Senate action.

Samuel Gompers, the great labor leader, was once asked what American Labor wanted, and his response may well be the most eloquent speech he ever made.

"More," he said.

That response, perhaps is the key to why so many in Congress are reluctant to let the unions make even the slightest inroads to the Services.

The AFGE has often used the argument that a Serviceman (or woman) has all legal rights ascribed all other citizens of the U.S. under the First Amendment of the Constitution—that is the right to "assemble, and to petition the government for redress of grievances." To the contrary, argued Senator Strom Thurmond (R-S.C.) who first introduced legislation early in the 95th Congress (March 1976) to ban military unions. His rationale at that time was to ensure "a sound and responsive defense force for our country." His bill did not make it through that year, but in January 1977, he reintroduced it as S–274.

In an essay for the Chicago Tribune, Thurmond responded to the AFGE argument headon:

"While members of the military are not deprived of the freedom of association granted by the First Amendment, the different character of the military community and of the military mission requires a different understanding of this right. The fundamental need for obedience and the consequent need for discipline make it impossible for servicemen to do some of the things that civilians are entitled to do."

While the debate raged in the Senate, the House was also busy on this issue. During the same time period the House considered no less than twenty-six measures dealing with military unions.

Maj. Fagan pointed out that the Congressional basis for legislation against unionization of the Services also cited the U.S. Constitution, specifically Article I, Section 8, as authority for Congress to "provide for the common defense and general welfare of the United States . . . raise and support armies . . . make rules for the Government and Regulation of the land and naval forces . . . provide for organizing, arming and disciplining the militia and for governing such part of them as may be employed in the service of the United States . . . (and) make all laws which shall be necessary and proper for carrying into execution the foregoing powers . . . ."

As with most legislation, S–274, by Senator Thurmond and forty-nine other Senators, could have languished in committee for some time. It was the action by the AFGE, however, that injected a sense of urgency into the efforts to get this type of bill on the floor for full consideration and vote. Public hearings began on 18 March 1977 and concluded in July.

The Senate Armed Services Committee (SASC) chaired by Senator John Stennis (D-Miss.), a cosponsor of the bill, passed it to the full Senate with the blessing of all eighteen members. They expressed a fear of an "immediate threat" of unionization.

Briefly S–274 was designed to make it unlawful for:

A Service member to join a military union or solicit or maintain membership, knowing its activities or objectives.

A labor organization to enroll military members, or solicit or accept dues, to negotiate or bargain with the government for military members or to represent them in grievance proceedings.

Any military or civilian Defense official to negotiate or bargain with a purported military union or authorize union activity on government property.

Any individual to bargain on behalf of Service members to use military property for union purposes, or organize a strike or other concerted effort against the government.

There was considerable debate at the time on the floor of the Senate. One needs only to review the Congressional Record to get a feeling for the mood that prevailed as discussions progressed. Most of the talk centered around two amendments that were proposed by Senator James Abourezk (D-S.D.). His amendments (numbers 859 and 860) were an attempt to resolve the unusual status civilian technicians hold in the reserve forces.

These technicians work for National Guard or reserve units during the week and are also members of these same units. According to the National Guard Bureau, which lobbied to put the prohibition on technician unions into the bill, about 14,000 of these 61,000 people are union members in connection with their civilian status.

Senator Abourezk was clearly outnumbered in his fight to get his amendments accepted.

Senator Stennis began the argument by anticipating the objection to S-274 based on the reserve technicians. Contending that if these reserve technicians were allowed to remain in their unions and retain their reserve status it would be planting "the germ" of unionism in the services. Stennis said:

". . . we would have a situation where

some men and women in the military were permitted to have union membership and to others it was denied. To the great majority it would be denied."

He then turned his attention to the effects unions could have on the traditional customs, courtesies and disciplines inherent in the military, saying:

"The military is built on discipline and immediate response to orders, and any development which would damage the chain of command weakens that discipline and response. Unions would inevitably create a second loyalty which would affect the chain of command and as a result cannot be tolerated."

The bill, as written, would have given these technicians a period of ninety days to give up their union status or quit their jobs. Abourezk felt this was too harsh and opposed the bill as an abridgement of the free speech rights of military people. In support of the amendments, Senator Jacob Javits (R-N.Y.) said:

"The key rationale stated by the Senate Armed Services Committee—that unionization is incompatible with the discipline and obedience necessary to maintain an effective military establishment—can easily be overgeneralized. Our citizens do not surrender all their rights just by putting on a military uniform."

Senator Abourezk questioned the constitutionality of the bill. He found it to be "especially reprehensible," because it did not allow a civilian technician to have some sort of representation. He and Javits felt this provision, if challenged in court, would cause the bill to be ruled unconstitutional. They cited Executive Order 11491, and said these technicians should be afforded "the same rights as other Federal civilian employees of the Department of Defense and all other Federal agencies."

Senator Thurmond countered these arguments by assuring all present that the SASC had considered the constitutionality issue from every angle. They had a number of the best legal minds of the country go over the bill word by word, and they were convinced it would be sustained in court.

Thurmond also included in his argument for passage:

A reiteration that it was not an antiunion bill, but rather a promilitary bill.

A discussion of the total force concept and the issue of benefit erosion.

A review of the problems European countries were having with military unions.

Examples of how an AFGE local in an Air National Guard unit in New Jersey had engaged in a work stoppage.

A discussion of the bans on unions applicable to the FBI and CIA as well as Foreign Service officers. He emphasized the unique status of these organizations and related them to the military.

Perhaps his strongest argument came as he effectively closed out the debate on the two amendments when he said they would negate entirely S-274's purpose of prohibiting military unions:

"Any member of the Senate who supports this (these) amendment(s) might as well recognize and understand that he is voting in favor of unionizing the military."

The votes that followed were solid defeats of the amendments. Amendment 859 which would permit unions to represent active and reserve forces in matters that did not include combat, combat readiness and tactical training exercises was soundly rejected by a vote of 3 yeas, to 73 nays. Amendment 860 which sought to exempt the civilian technicians from the ban on soldiers in suits by a union was also defeated, but not as resoundingly. The final vote was yeas 34, nays 43.

Once these votes were completed and the results announced, the bill itself came up for decision. The outcome—72 yeas and 3 nays. The vote was followed by the usual round of praises for those who worked to get the bill passed.

Interestingly enough, the final words on this issue were spoken by one of the dissenting voters. Senator Javits again took the floor to remind the assemblage that he was against unionization of the Armed Forces, even though he had voted against S-274. He was convinced the way to deal with the issue of the civilian technicians was by executive order. He felt the fatal defect in this bill was the way it treated those technicians. He closed his remarks, and ultimately the debate on the Senate side of Congress, by making a plea to the House of Representatives to:

". . . take a very hard look at this technician question and perhaps make whatever revision in the bill that would be dictated by elementary justice in that regard."

Immediately following the announcement of the Senate vote, AFGE President Kenneth Blaylock said that his union and other labor organizations would fight the bill. He said they did not expect to defeat it but they did think they could eliminate the requirement that technicians give up their union membership or lose their jobs.

At this writing it still is not clear when action on the bill will be completed by the House. The bill is stalled in the Post Office and Civil Service Committee after being reported favorably by the Armed Services Committee.

Representative Robin Beard (R-Tenn.), a member of the HASC, urged his colleagues to consider this type of legislation at the earliest possible date. He warned that they should not be lulled into a false sense of security by the AFGE vote, saying:

"This is likely to be only a temporary condition. The AFGE leadership is not about to give up the substantial economic and political gains which would result from bringing the military into the union fold."

THE DOD DIRECTIVE

All the while the legislative branch was busy with S-274, the executive branch was equally engaged in formulating its own solution to the union question.

Defense Secretary Harold Brown urged Congress to hold off on legislation banning military unions until he could issue DOD regulations dealing with them. He told Congress that rules constraining unionization efforts had a better chance than law of surviving a constitutional challenge. He recommended trying them for about a year.

Secretary Brown was attempting to hold off passage of S-274 while his aides could draft what was subsequently issued as DoD Directive 1354.1. The first published hints of exactly what language would be contained in the new regulation came when a draft version was published in the Federal Register of 16 August 1977. After reading what the Secretary was proposing, Senator Thurmond called it "weak-kneed."

While Brown was urging restraint on the part of Congress, Thurmond, who was equally committed to his bill, continued his attack against the Secretary and the Department for not taking a strong enough stand against military unions. He said the DoD proposal would not prohibit union membership by military members or prohibit union activities on or off base. He also charged the Brown proposal would weaken the ability of DoD to cope with this problem in the future.

When finally issued, the directive was quite lengthy but can be summarized briefly as follows:

It prohibits commanders and supervisors from engaging in negotiations or collective bargaining.

It prohibits members of the Armed Forces from engaging in strikes, slowdowns, work stoppages or other job actions by two or more persons which are intended to and do obstruct or interfere with the performance of military assignments, and picketing for the purpose of causing any of the foregoing, when such actions are related to terms or conditions of military service.

It proscribes specified efforts on military installations to recruit members of the Services into certain types of organizations and, in specific circumstances, prohibits membership of Service people in certain organizations.

It vests responsibility for assuming compliance in the hands of the various Departments (each Service).

With the DoD directive published and on the way toward implementation and the Senate bill in the hands of the House with no real substantive barrier to passage, the debate over which is the better course of action continues, albeit at a lower key for the time being. I believe it is reasonable to expect it to remain so through the hearings in the House with the volume and vigor increasing in direct proportion to the closeness of the final vote. It is also reasonable to assume that the DoD order will come under increasing attack as it ages.

Those involved in this deliberation would be well advised to keep the following variables in mind during 1978:

The AFGE vote has taken a good deal of the sense of urgency out of this issue. There are no large unions that appear interested or ready to actively seek out military members. Even the Teamsters has adopted a "wait and see" attitude toward the military. The threat has diminished.

Consequently, the House may be inclined to direct its attention to more urgent matters, and final action could be held in abeyance until some "clear and present danger" of unionization is once again perceived by the lawmakers.

As a result of the extensive debate on S-274, there is a new awareness among top-level government officials of the root causes of military dissatisfaction with current conditions. It follows, therefore, that a good deal of the attractiveness and appeal of the unions to those in the Services who thought "no one knew or cared" may have been lost or at least somewhat tarnished.

All of this can be traced back to the awareness or perception of an erosion of traditional benefits. It came to a head when a national public sector union (AFGE) on the decline in membership, turned its attention toward the Services. The time was right. The first ball was thrown:

The Union vote—strike one.

The Senate vote—strike two.

The DoD Directive—strike three.

Third strike. Is the union movement out? That may have been the last union player at bat for this inning, but the game is far from over. The players have returned to the dugout to rest.

Many think the rest may be long lasting. A recent editorial in the San Diego Union said:

". . . a GI is wiser with a dog tag only and not, say a card from the AFL-CIO. It is safe to say that the attempt to organize the military is dead. So the nation need not worry, it will be an enemy's line, not any picket line, that needs crossing."

I disagree! The editor was premature in his statement. The problems that Gen Brown and others have expressed concern about are still there. Congress has done little, if anything to change most Service members' perception that their benefits are, in fact, dwindling.

Back in the ball park, it is the leaders of the legislative and executive team at bat now, with the judiciary serving as umpire, standing by to render a decision if called upon to do so. They will stay at bat as long as they pay attention to the needs of those troops in the field. The balls being thrown by those who serve.

The first team has a good chance to build a solid lead. But if they strike out in 1978 and the union gets another turn at bat, it could be a whole new ball game.

THE DANGERS OF TRANSFER OF U.S. COMPUTER TECHNOLOGY TO SOVIETS CITED BY JACK ANDERSON'S COLUMN

Mr. THURMOND. Mr. President, in today's issue of the Washington Post newspaper the columnist Jack Anderson has offered an interesting and informative column entitled "U.S. Computers Feared Vulnerable."

Mr. Anderson draws the attention of the public to still another danger involved in the transfer of U.S. computer technology to the Soviets, the possibility that by studying our computers they will gain the knowledge to render them ineffective in a national crisis.

This new danger involved in technology transfers of computers rests on the expert testimony of Dominic Paul Baron who raised the issue of computer security in an article prepared for the London based Foreign Affairs Research Institute.

Mr. Baron warns that by selling some of our computers to the Soviets, as we have already done, we may be enabling them to develop means to render ineffective our computers in wartime. He also points to the great dependence of the West on computers, thus increasing our vulnerability.

The writer is also a strong opponent of transfer of computer technology to the Soviets. He warns that "the damage already done is incalculable."

Mr. Baron also finds great fault with U.S. business in its rush to sell the computers to the Soviets. He writes "The Western businessman's sheer naivete in dealing with the astute Soviet negotiators is quite depressing."

Mr. President, I would like to point again to the fact that we have laws to prevent the transfer of valuable technology to Communist nations if only the executive branch has the will and judgment to use them. It is the lack of will and judgment in the executive branch that resulted in the recent approval for the sale to the Soviets of a $141 million oil well drilling bit plant.

That sale also included transfer of a electron-beam device which contained its own computer, an extremely advanced state of our technology. I urge the President to stop these sales immediately.

Mr. President, I place this article by Mr. Anderson to be printed in the RECORD:

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 15, 1978]

U.S. COMPUTERS FEARED VULNERABLE

(By Jack Anderson)

The star wars that are fought on our movie screens may not be as futuristic as they seem. The wars to come, in the opinion of some strategists, may be just about as fantastic as the scriptwriters have portrayed them.

These strategists are convinced that the next war could be won or lost, not on the battlefields, but on complex, whirring and fishing computer panels.

Yet the military brass, though geared for supersonic warfare, continue to base their strategy on past wars. They seek to apply old solutions to new situations. Around the world, the generals and admirals have deployed U.S. forces as though they were preparing to fight World War II, the Korean war and the Vietnam war again.

But some planners are looking behind the great missile, air and sea armadas at the computer systems that will control them. These authorities believe that the military brass, enamored of their growing stockpiles of sophisticated weaponry, are ignoring the vulnerability of computers to attack by enemy forces or terrorists.

A recent report by computer expert Dominic Paul Baron, prepared for the London-based Foreign Affairs Research Institute, examines the problem of computer security. Baron's conclusion:

"If at a time of international tension, a relatively small number of key computers in a modern industrial state could be put out of action by terrorist, commando or sabotage attacks, such a state would be desperately vulnerable when faced with an ultimatum from a hostile foreign power.

"Enemy missiles, forces, ships and submarines could not be monitored; reserve forces could not be mobilized; electric power could not be depended upon; money could not be paid for wages and transport and communications would be paralyzed."

It should be borne in mind, says Baron, that a war effort would not depend only upon the heavily guarded military computer centers. Virtually every system that keeps western civilization ticking is run by computers. Financial institutions, for example, "would grind to a halt almost overnight if their computers ceased functioning."

The United States, moreover, has been far too eager to supply the Soviet Union with sophisticated computer technology and training, Baron believes. "Computer companies in the West fall over each other in their enthusiasm to compete for the favors of the Soviet buying agencies," writes Baron. "The Western businessman's sheer naivete in dealing with the astute Soviet negotiators is quite depressing."

The one-sided exchange, Baron believes has given the Soviets "a sizable quantity of personnel fully acquainted with the characteristics of our systems . . . No one in the West has anything like the in-depth knowledge of Soviet computer systems that the Soviets have about our . . . systems. The damage already done is probably incalculable."

As a result of the technology give-away, the free world has "made it that much easier for [the Soviets] to train their experts to devise methods of exploiting our own computer facilities." With their well-trained cadre, he warns, Soviet agents could, in time of war, take over our computer systems and bend them to the Kremlin's will.

But the ultimate fear is the frightening prospect that a ruthless band of terrorists may crack computer security and make off with a nuclear weapon. Technically trained terrorists, says, Baron, could use "ever cheaper and sophisticated micro-processors . . . to perfect systems to neutralize elaborate electronic protective devices around sensitive installations in order to steal a nuclear weapon."

ORDER FOR MODIFICATION TO TIME AGREEMENT ON S. 3073

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the following modification be entered with respect to the time agreement on Calendar Order 764, S. 3073, the highway bill; provided that the text of S. 2441 be inserted without debate, and be considered as original text for the purpose of further amendment.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The text of the agreement follows:

Ordered, That when the Senate proceeds to the consideration of S. 3073 (Order No. 764), a bill to amend title 23, United States Code, to authorize Federal aid and highway programs through fiscal year 1980, and for other purposes, debate on any amendment (except the following amendments: 3 by Senator GRAVEL, one each on planning, the hydrofoil, and the Alaskan Railroad, on each of which there shall be 1 hour; one by Senator KENNEDY, relative to truck lengths, on which there shall be 1 hour; 2 by Senator ROTH, relative to bridges and beach erosion, on each of which there shall be 1 hour; one by Senator GRAVEL, relative to New York streets, on which there shall be 1½ hours; one by Senator HUDDLESTON, relative to coal haul roads, on which there shall be 1½ hours; one by Senators ZORINSKY and ANDERSON, relative to rail crossings, on which there shall be 1½ hours; one by Senators KENNEDY and WEICKER, relative to the highway trust fund, on which there shall be 1½ hours; one by Senator KENNEDY, relative to planning, on which there shall be 2 hours; and one by Senator CULVER, relative to bridges, on which there shall be 2 hours) shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill; and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 20 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided*, That amendments first be offered to title I, and then to title II, with no amendment in order to either title once the amending process ends on each title: *Provided further*, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: *Provided further*, That no amendment which is not germane to the provisions of the said bill shall be received.

Ordered further, That on titles I and II of the said bill, debate shall be limited to 3 hours, with 2 hours on title I of the bill, to be equally divided and controlled by the Senator from Texas (Mr. BENTSEN) and the Senator from Rhode Island (Mr. CHAFEE), and with 1 hour on title II of the bill, to be equally divided and controlled by the Senator from Nevada (Mr. CANNON) and the Senator from New Mexico (Mr. SCHMITT): *Provided*, That after the disposition of title II, the bill be set aside to be called up at a later time by the majority leader to add a title III: *Provided further*, That when the majority leader calls up the bill to add the text of S. 2441 as title III, it be agreed to without debate and be subject to amendment as original text with germane amendments: *Provided further*, That when the amendment proposing title II is called up it be added without debate and considered as original text for the purpose of further amendment: *Provided further*, That the said Senators, or any one of them, may, from the time under their control on titles I and II of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

ORDER VITIATING RECOGNITION OF LEADERS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the standing order for the recognition of the two leaders tomorrow be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS TOMORROW AND FOR CONSIDERATION OF THE PENDING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the prayer tomorrow, Mr. MORGAN be recognized for not to exceed 15 minutes, that he be followed by Mr. BELLMON and Mr. DANFORTH for not to exceed 15 minutes each, and that at the conclusion of the orders for the recognition of Senators the Senate resume its consideration of the pending business.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS TO 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 9:30 a.m. tomorrow.

The motion agreed to; and at 9:39 p.m., the Senate recessed until tomorrow, Wednesday, August 16, 1978, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate August 15, 1978:

HOUSE OF REPRESENTATIVES—*Tuesday, August 15, 1978*

The House met at 10 a.m.

Rev. Ronald W. Cadmus, Verona United Methodist Church, Verona, N.J., offered the following prayer:

By faith we live and trust in the past; by hope we live in the future; by love we live in the present. Remove the clumsy vestments of traditional expressions of religion by making us sensitive as we strive for character ideals within people. Help us to show that life is worth living. The decisions we make can make life vibrant and valuable. Guide us from making life an absurdity—an absurdity when we are confronted by human needs yet remaining unreasonably silent to a people yearning for dignity. It is easy to assume that as we dedicate ourselves to the principles of our leadership that we are governed by our own motivations. Make us wise to know that You work within us, so that through our minds and our hearts You give us the will and the power to achieve Your purposes. Amen.

CALL OF THE HOUSE

Mr. BAUMAN. Mr. Speaker, under clause 1, rule I, of the rules of the House, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members failed to respond:

The SPEAKER pro tempore (Mr. ROONEY). On this rollcall 357 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 687. Concurrent resolution directing the Clerk of the House of Representatives to make a correction in the enrollment of H.R. 10732.

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 12106. An act to amend the Independent Safety Board Act of 1974 to authorize additional appropriations.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 2333. An act for the relief of James Edward Slowey, Carole Anne Slowey, Christopher James Slowey, Elaine Margaret Slowey, and Carole-Ann Slowey.

PRIVATE CALENDAR

The SPEAKER pro tempore. This is Private Calendar Day. The Clerk will call the first individual bill on the Private Calendar.

KWONG LAM YUEN

The Clerk called the bill (H.R. 1798) for the relief of Kwong Lam Yuen.

There being no objection, the Clerk read the bill, as follows:

H.R. 1798

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provision of section 212(a)(23) of the Immigration and Nationality Act, Kwong Lam Yuen may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that Act: *Provided,* That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MORRIS AND LENKE GELB

The Clerk called the bill (H.R. 3084) for the relief of Morris and Lenke Gelb.

Mr. BAUMAN. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

IRENE HOFFMAN

The Clerk called the bill (H.R. 5612) for the relief of Irene Hoffman.

Mr. WYLIE. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

BALL STATE UNIVERSITY AND THE AMERICAN ASSOCIATION OF COLLEGES FOR TEACHER EDUCATION

The Clerk called the bill (H.R. 1415) for the relief of Ball State University and the American Association of Colleges for Teacher Education.

Mr. WYLIE. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

STEFAN KOWALIK

The Clerk called the bill (H.R. 1400) for the relief of Stefan Kowalik.

There being no objection, the Clerk read the bill, as follows:

H.R. 1400

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Stefan Kowalik may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by Barbara and Leon Andrzejczyk, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

With the following committee amendment:

On page 1, line 7, strike out the name "Leon Andrzejczyk" and insert in lieu thereof "Leon Andrzejczyk,".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JUANA TODD ATHERLEY

The Clerk called the bill (H.R. 1931) for the relief of Juana Todd Atherley.

There being no objection, the Clerk read the bill, as follows:

H.R. 1931

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Juana Todd Atherley shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under paragraphs (1) through (8) of section 203(a) of the Immigration and Nationality Act.

With the following committee amendment:

Strike out all after the enacting clause and insert: That, in the administration of the Immigration and Nationality Act, Juana Todd Atherley may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Cecilia and Guillermo Todd, a citizen and lawful permanent resident of the United States, respectively, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

IRMA VICTORIA BOLARTE ALVARADO

The Clerk called the bill (H.R. 3613) for the relief of Irma Victoria Bolarte Alvarado.

There being no objection, the Clerk read the bill, as follows:

H.R. 3613

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Irma Victoria Bolarte Alvarado may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Leo and Celia Bolarte, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MARINELLE KHRISTY CRUZ

The Clerk called the bill (H.R. 5163) for the relief of Marinelle Khristy Cruz.

There being no objection, the Clerk read the bill, as follows:

H.R. 5163

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Marinelle Khristy Cruz may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Mr. and Mrs. Alfredo Criz, a lawful permanent resident and citizen of the United States respectively, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sister of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

With the following committee amendment:

On page 1, beginning on line 6, strike out the following language: "Mr. and Mrs. Alfredo Cruz, a lawful permanent resident and citizen of the United States respectively", and substitute the following language: "Mrs. Nellie Lenora Cruz, a citizen of the United States".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING APPOINTMENT OF COL. LLOYD LESLIE BURKE TO THE GRADE OF BRIGADIER GENERAL ON THE RETIRED LIST

The Clerk called the bill (H.R. 13268) to authorize the appointment of Lloyd Leslie Burke, colonel, U.S. Army, to the grade of brigadier general.

There being no objection, the Clerk read the bill, as follows:

H.R. 13268

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the President is authorized and requested to appoint Lloyd Leslie Burke ([redacted], colonel, United States Army, to the rank of brigadier general in the United States Army upon his retirement from active duty on June 30, 1978, after thirty-four years of military service. No increase in basic pay, retired pay, allowances, or other benefits shall accrue to Lloyd Leslie Burke as a result of such appointment.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following:

That, notwithstanding any other provision of law, the President is authorized and requested to appoint Col. Lloyd Leslie Burke ([redacted]), U.S. Army, Retired, to the grade of brigadier general on the Retired List of the U.S. Army. No increase in basic pay, retired pay, allowance, or other benefits shall accrue to the said Lloyd Leslie Burke as a result of such appointment.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to authorize the appointment of Colonel Lloyd Leslie Burke, United States Army, retired, to the grade of brigadier general on the Retired List of the United States Army."

A motion to reconsider was laid on the table.

LING-YUNG KUNG

The Clerk called the bill (H.R. 10407) for the relief of Ling-Yung Kung.

There being no objection, the Clerk read the bill, as follows:

H.R. 10407

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purposes of section 203(a)(1) and 204 of the Immigration and Nationality Act, Ling-Yung Kung shall be held and considered to be the natural-born alien son of Byron Jerome & EaLing Lee Dudding, citizens of the United States: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

With the following committee amendment:

On page 1, strike out lines 3, 4, 5, 6, and line 7 through "United States:" and insert in lieu thereof the following:

That, in the administration of the Immigration and Nationality Act, Ling-Yung Kung may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by Byron Jerome and Ealing Lee Dudding, citizens of the United States, pursuant to section 204 of the Act:

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ROSARIO A. CALVIN

The Clerk called the bill (H.R. 1402) for the relief of Rosario A. Calvin.

There being no objection, the Clerk read the bill, as follows:

H.R. 1402

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Rosario A. Calvin shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien, as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant admissions authorized pursuant to the provisions of section 21(e) of the Act of October 3, 1965.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following:

That for the purposes of section 203(a)(1) and 204 of the Immigration and Nationality Act, Rosario A. Calvin shall be held and considered to be the natural-born alien daughter of Carol Lee Calvin, a citizen of the United States: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NOEL ABUEG EMDE

The Clerk called the bill (H.R. 7387) for the relief of Noel Abueg Emde.

There being no objection, the Clerk read the bill, as follows:

H.R. 7387

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Noel Abueg Emde shall be deemed to be an immediate relative within the meaning of section 201(b) of that Act and may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that Act.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following:

That, in the administration of the Immigration and Nationality Act, Noel Abueg Emde may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by Mr. and Mrs. Arthur Emde, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FRANCESCO GIUTTARI

The Clerk called the bill (H.R. 8751) for the relief of Francesco Giuttari.

There being no objection, the Clerk read the bill, as follows:

H.R. 8751

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purposes of sections 203(a)(4) and 204 of the Immigration and Nationality Act, Francesco Giuttari shall be held and considered to be the natural-born alien son of Tindaro Giuttari, a citizen of the United States: *Provided,* That the natural mother of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

With the following committee amendment:

On page 1, line 7, after the word "natural" strike out the word "mother" and insert the following: "parents or brothers or sisters".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

RAYMOND VISHNU CLEMONS

The Clerk called the bill (H.R. 9610) for the relief of Raymond Vishnu Clemons.

There being no objection, the Clerk read the bill, as follows:

H.R. 9610

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Raymond Vishnu Clemons may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by David J. and Sally Ann Clemons, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act, relating to the number of petitions which may be approved, shall be inapplicable in this case.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EUSTACE JOHN D'SOUZA

The Clerk called the bill (H.R. 9613) for the relief of Eustace John D'Souza.

There being no objection, the Clerk read the bill, as follows:

H.R. 9613

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Eustace John D'Souza may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by Mr. and Mrs. Kenneth Cartier, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act. Section 204(c) of the Immigration and Nationality Act, relating to the number of petitions which may be approved, shall be inapplicable in this case.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DIRECTING THE SECRETARY OF THE INTERIOR TO CONVEY CERTAIN LANDS IN CLEAR CREEK COUNTY, COLO., TO HAROLD AND DORIS HARLAN

The Clerk called the bill (H.R. 10029) to direct the Secretary of the Interior to convey certain lands in Clear Creek County, Colo., to Harold and Doris Harlan.

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is hereby authorized and directed to convey to Harold Harlan and Doris Harlan, Idaho Springs, Colorado, all right, title, and interest of the United States in and to a tract of land in lot 17, section 1, township 4 south, range 73 west, sixth principal meridian, Clear Creek County, Colorado, known as the Thomas C. Austin Building Site, and more particularly described as follows:

Beginning at Corner Numbered 1, whence corner Numbered 2, Survey Numbered 2053,

Gardner Placer, bears south 1 degree 15 minutes west 377.0 feet; thence north 37 degrees east 226.0 feet to corner numbered 2, whence the Shaft Honor on the Gold Medal Mine bears north 30 degrees 40 minutes east and a prominent point of rocks bears north 86 degrees 28 minutes east; thence north 53 degrees west 121 feet to corner numbered 3; thence south 37 degrees west 226.0 feet to corner numbered 4; thence south 53 degrees east 121.0 feet to corner numbered 1, the place of beginning.

SEC. 2. The conveyance authorized by this Act shall be made upon the payment of such sum as may be fixed by the Secretary to reimburse the United States for the administrative costs of the conveyance.

With the following committee amendment:

Page 1, line 6, strike out "17," and insert in lieu thereof "18,".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read a third time, and passed, and a motion to reconsider was laid on the table.

ELISABETTA BASSO GALLIZIO

The Clerk called the bill (H.R. 4530) for the relief of Elisabetta Basso Gallizio.

There being no objection, the Clerk read the bill, as follows:

H.R. 4530

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in the administration of the Immigration and Naturalization Act the provisions of section 312(1) of that Act shall be in applicable in the case of Elisabetta Basso Gallizio: *Provided further,* That any fee received by any agent or attorney on account of services rendered relating to the introduction of this bill shall be unlawful, any contract to the contrary not withstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

On page 1, strike out all of lines 5 through 12 and insert in lieu thereof the following: "be inapplicable in the case of Elisabetta Basso Gallizio."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MARGARET SOMERVILLE JEFFERIS

The Clerk called the bill (H.R. 7604) for the relief of Margaret Somerville Jefferis.

There being no objection, the Clerk read the bill, as follows:

H.R. 7604

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provision of section 212(a)(23) of the Immigration and Nationality Act, Margaret Somerville Jefferis may be issued a visa and admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of that Act: *Provided,* That this exemption shall apply only to a ground for exclusion which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The Clerk called the bill (H.R. 6664) for the relief of Lily Lirio Galindo.

There being no objection, the Clerk read the bill, as follows:

H.R. 6664

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Lily Lirio Galindo shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(c) of such Act.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following:
That, in the administration of the Immigration and Nationality Act, Lily Lirio Galindo, the widow of a citizen of the United States, shall be held and considered to be within the purview of section 201(b) of that Act and the provisions of section 204 of such Act shall not be applicable in this case.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JOANNE LAPOINTE

The Clerk called the bill (H.R. 7550) for the relief of Joanne Lapointe.

There being no objection, the Clerk read the bill, as follows:

H.R. 7550

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Joanne Lapointe shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under paragraphs

(1) through (8) of section 203(a) of the Immigration and Nationality Act.

With the following committee amendment:

On page 1, line 4, strike out the name "Joanne Lapointe" and substitute the name "Johanne LaPointe".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read:

"A bill for the relief of Johanne Lapointe."

A motion to reconsider was laid on the table.

LESTER BRUCE PRIDAY

The Clerk called the bill (H.R. 1446) for the relief of Lester Bruce Priday.

Mr. WYLIE. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

ROLANDO R. GAZA AND TERESITA C. GAZA

The Clerk called the bill (H.R. 2655) for the relief of Rolando R. Gaza and Teresita C. Gaza.

Mr. BAUMAN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

MONIKA GRANTZ

The Clerk called the bill (H.R. 8977) for the relief of Monika Grantz.

There being no objection, the Clerk read the bill as follows:

H.R. 8927

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provision of section 212 (a) (23) of the Immigration and Nationality Act, Monika Grantz may be issued a visa and admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of that Act: *Provided,* That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JAMES WILLIAM DIBBEN

The Clerk called the bill (H.R. 9352) for the relief of James William Dibben.

There being no objection, the Clerk read the bill as follows:

H.R. 9352

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provision of section 212 (a) (23) of the Immigration and Nationality Act, James William Dibben shall be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of such Act. This exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the date of enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CRAIG DAY

The Clerk called the bill (H.R. 9611) for the relief of Craig Day.

There being no objection, the Clerk read the bill as follows:

H.R. 9611

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provision of section 212 (a) (23) of the Immigration and Nationality Act, Craig Day may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that Act: *Provided,* That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DERRICK TAN

The Clerk called the bill (H.R. 2939) for the relief of Derrick Tan.

There being no objection, the Clerk read the bill as follows:

H.R. 2939

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in the administration of the Immigration and Nationality Act, Derrick Tan may be classified as a child within the meaning of section 101 (b) (1) (F) of the Act, upon approval of a petition filed in his behalf by Constante and Pearl Tan, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

With the following committee amendments:

On page 1, line 4, strike out the name "Derrick Tan" and substitute the name "Derrick Mariano Tan".

On page 1, lines 6 and 7, strike out the following:

"Constante and Pearl Tan, citizens of the United States," and insert in lieu thereof the following: "Constante and Pearl Tan, a lawfully resident alien and a citizen of the United States, respectively,".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed.

The title was amended so as to read: "A bill for the relief of Derrick Mariano Tan."

A motion to reconsider was laid on the table.

ESTABLISHING THE TRUE LOCATION OF A PORTION OF NORTHERLY BOUNDARY OF THE ANGELES NATIONAL FOREST, CALIF.

The Clerk called the bill (H.R. 11451) to establish the true location of a portion of northerly boundary of the Angeles National Forest, located in Los Angeles County, Calif., on the common line between sections 16 and 17, township 4 north, range 10 west, San Bernardino meridian, and to establish the center quarter corner of said section 16.

Mr. WYLIE. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PROVIDING FOR THE CONVEYANCE OF CERTAIN PUBLIC LANDS IN MONTANA TO THE OCCUPANTS OF THE LAND

The Clerk called the bill (H.R. 7849) to provide for the conveyance of certain public lands in Montana to the occupants of the land.

There being no objection, the Clerk read the bill as follows:

H.R. 7849

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is hereby authorized to convey to Francis T. Oleson and Zona I. Oleson, husband and wife; Dan Raymond and Elizabeth Louise Raymond, husband and wife; and Edward J. Bonderenko or their successors in interest, all right, title, and interest of the United States, except right, title, and interest in deposits of all minerals, in lands identified as tracts numbered 1, 2, and 3 in that part of the west half, southwest quarter of the northwest quarter, section 2, township 10 north, range 1 west, Montana principal meridian, Lewis and Clark County, Montana, lying east of the "Erroneous Survey Line", lying north of the county road right-of-way as shown on Bureau of Reclamation drawing numbered 296–604–170, dated September 24, 1971, and as determined available for sale by the Secretary of the Interior. Such conveyance shall be made only upon application therefor within six months after the date of this Act, and upon payment of the appraised fair market value of the land as of the date of sale plus the administration costs of making the conveyance, as determined by the Secretary of the Interior within one year after notification by the Secretary of the Interior of the amount due. In determining the fair market value of the land, the Secretary of the Interior shall not include any values added to the land by Francis T. Oleson and Zona I. Oleson, husband and wife; Dan Raymond and Elizabeth Louise Raymond, husband and wife; and Edward J. Bonderenko or their successors in interest, or their heirs. Any conveyance made pursuant to this Act shall reserve to the United States all deposits of all minerals in the lands together with the right to mine and remove the same, under applicable laws and regulations established by the Secretary of the Interior.

SEC. 2. Acceptance of Francis T. Oleson and Zona I. Oleson, husband and wife; Don Raymond and Elizabeth Louise Raymond, husband and wife; and Edward J. Bonderenko or their successors in interest of any conveyance made hereunder shall constitute a waiver and release by them of any and all claims against the United States arising out of the operation, maintenance, or construction

of the Canyon Ferry Unit, Pick-Sloan Missouri Basin program, as now or hereafter authorized.

With the following committee amendments:

Page 2, line 7, strike "application" and insert in lieu thereof "applications by such aforementioned individuals".

Page 2, line 11, strike "administration costs" and insert in lieu thereof "administrative costs, including costs of a land survey,".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FACILITATING THE EXCHANGE OF CERTAIN LANDS IN THE STATE OF OREGON

The Clerk called the bill (H.R. 12772) to facilitate the exchange of certain lands in the State of Oregon, and for other purposes.

There being no objection, the Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) in order to facilitate the exchange of certain lands in the State of Oregon for purposes of enlarging the Ecola State Park, the Secretary shall convey to the State of Oregon the reversionary interest retained by the United States under the first proviso of the first section of the Act of August 11, 1916 (39 Stat. 505) in a tract comprising about one hundred and sixty acres and described as the northwest quarter, Section 8, Township 5 North, Range 8 West, Willamette Meridian. Such conveyance shall be made, upon relinquishment of patent numbered 602062 by the State, by issuance of a new patent describing all lands which were described by patent numbered 602062.

(b) The new patent issued under subsection (a) shall contain all reservations and exceptions required by the Act of August 11, 1916, and contained in patent numbered 602062 except that the reverter provision contained in the proviso referred to in subsection (a) shall not apply to the one hundred and sixty acre tract in subsection (a).

With the following committee amendment:

Page 1, beginning on line 3, strike out all after the enacting clause and insert in lieu thereof the following:

That (a) in order to facilitate and exchange of certain lands in the State of Oregon for purposes of enlarging the Ecola State Park, the Secretary of the Interior (hereinafter referred to as "the Secretary") is authorized and directed to convey to the State of Oregon the reversionary interest retained by the United States pursuant to the first proviso of the first section of the Act of August 11, 1916 (39 Stat. 505) in a tract comprising about one hundred and sixty acres and described as the northwest quarter, section 8, township 5 north, range 8 west, Willamette Meridian. Such conveyance shall be made, upon relinquishment to the Secretary of patent numbered 602062 by the State, by issuance of a new patent describing all lands which were described by patent numbered 602062. The conveyance directed by this section shall be made only if, in the judgment of the Secretary, the requirements of sections 2 and 3 of this Act have been met by the State.

(b) The new patent issued under subsection (a) hereof shall contain all reservations and exceptions required by the Act of August 11, 1916, and contained in patent numbered 602062 except that the reverter provision contained in the proviso referred to in subsection (a) shall not apply to the one-hundred-and-sixty acre tract described in subsection (a) of this section.

SEC. 2. No conveyance shall be made and no new patent issued pursuant to this Act unless the State of Oregon has shown to the satisfaction of the Secretary that:

(a) the lands described in the first section of this Act will be exchanged for lands of at least equal value, or if not of at least equal value that the values will be equalized by payment of money or other consideration to the State;

(b) the lands received by the State in exchange are at least as suitable for park purposes as the lands conveyed;

(c) the lands obtained by exchange by the State will be used for public park purposes in perpetuity; and

(d) any amount of money or other consideration paid to the State to equalize values on a land exchange under this Act will be used for park purposes.

SEC. 3. The Secretary, upon his determination that the requirements of Section 2 of this Act are satisfied, is authorized and directed to enter into an agreement or agreements with the State of Oregon whereby, in consideration of a conveyance of the reversionary interest of the United States in the lands described in the first section of this Act, and issuance of a new patent, the State of Oregon agrees that:

(a) title to the lands acquired and dedicated for public park purposes pursuant to Section 2 of this Act will vest in the United States if such lands ever cease to be used for public park purposes; and

(b) the State of Oregon will include provisions to this effect in any document of transfer of such property; and

(c) the State will execute a document to this effect and deliver such document to the Secretary.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Private Calendar.

IMPOUNDMENT OF THE NATIONAL COMMISSION ON SOCIAL SECURITY

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, I come today to talk about presidential impoundment, not impoundment of appropriated funds but impoundment of a commission.

In December we passed the social security bill creating a National Commission on social security to provide some long-term answers. This was to be composed, among others, of actuaries and pension people to completely review the system.

Twice I wrote to the President asking him to name members. It is my understanding the Speaker and the majority leader of the Senate have done so, but President Carter has not sent a single name of his five appointments on the Senate list for confirmation. The Commission has 2 years, after members are picked, to come up with some recommendations. By then if nothing happens, payroll taxes will soar—if nothing is done.

Mr. Speaker, it is incumbent upon the President of the United States to appoint these members of this Commission so that next year we can have some true social security reform.

VIETNAM VETERANS' WEEK

(Mr. HILLIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HILLIS. Mr. Speaker, I am today joining many of my colleagues in cosponsoring House Joint Resolution 1091 to authorize the President to declare "Vietnam Veterans' Week" commencing November 11, 1978.

The Vietnam veteran is perhaps the most maligned veteran of our Nation's history. He served in an unpopular war and when he returned home, he was greeted with mistrust—"where have you been, where did you go?"

The passage of this resolution will lay to rest once and for all the notion that America is not grateful for the service these veterans performed. They did not question the correctness of serving in Vietnam—they simply answered their Nation's call and served with the same honor and valor as have their predecessors in earlier years—from 1776 forward.

Passage of this resolution will not only pay tribute to the Vietnam veteran, but it will also serve to remind all Americans that were it not for these and all veterans we might not be here today enjoying the privilege of living in freedom—free from the autorcratic rule imposed on other citizens of the world, free to protest governmental decisions we conside to be wrong, free to pay tribute to those who have gone before us.

BILL LINKING BUDGET RESOLUTIONS TO LONG-TERM BUDGET GOALS

(Mr. REGULA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REGULA. Mr. Speaker, my colleague on the Budget Committee from South Carolina BUTLER DERRICK and I will introduce a bill today that forces us to realistically look at the future of the Federal budget. Our bill requires that each budget resolution include 5-year projections for budget authority, outlays and Federal revenues. In order to insure that this information is presented as a safeguard in every resolution, our bill amends the Congressional Budget and Impoundment Control Act of 1974.

The need for this 5-year targeting is acute. Right now the Budget Committee is barraged with many spending projections that play a subtle role in our final targets and ceilings. But we never present these as part of the resolution, for our colleagues to examine and act upon.

A second problem with our current system of resolutions is the lack of continuity between one year's budget and that for the next. We regard each spending resolution in the isolated context of that year alone. As a result we never sift

through the special interest demands for funds. We merely produce an incremental budget. The consequences of this annual lapse into pork-barrel wisdom are a whopping deficit and increased expenditures.

The only way to correct this is by linking each resolution to long term budget goals. Our bill accomplishes this. We will be forced to take a much harder look at potential increases if we also have to see their consequences over the next 5 years.

Under our present system, we reduce to simple rhetoric the concepts of a balanced budget and reduced spending. Each resolution is created in a short term context. We are losing the discipline and control for which the Budget Committee exists in the first place.

This legislation also provides for periodic updates on spending bills compared to the 5-year targets. This will give us direction in pursuing our budget goals once they are in place.

What our bill does is force us to confront our spending actions head on. There is nothing we need more in order to make the purposes of the budget act a reality. I encourage my colleagues to join us in cosponsoring this legislation.

U.S. POSTAL CORPORATION—RIGHT STAMP, WRONG PLACE

(Mr. JOHN T. MYERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHN T. MYERS. Mr. Speaker, the U.S. Postal Corporation has once again used its usual good judgment by issuing a commemorative stamp honoring automobile racing and having on that stamp an Indianapolis racing automobile, the roadster racing automobile, but issuing the first issue in Ontario, Calif.

I think everyone knows that the granddaddy of automobile racing, the greatest spectacle in automobile racing, is the Indianapolis 500. The Postal Corporation honors that racing sport, but releases the first issue in Ontario, Calif. It would be similar to honoring the Liberty Bell located in Philadelphia by releasing the first issue in Las Vegas.

I am not speaking against the fine race that takes place at Ontario annually. They put on a good race I am sure, and that race is a tribute to the sport.

This morning, Jane Pauley, of the Today Show spoke about this situation. At the end she quoted that the Postal Service had advised her that a commemorative stamp was issued last year showing a butterfly and the first issue was in Indianapolis. They say it was the best seller and that Indianapolis should be pleased with that. That is not the issue. Every race driver dreams of driving the Indianapolis 500. Indianapolis is recognized worldwide as the greatest automobile race and the first issue should be made there.

Mr. Speaker, we in Indiana think it is again an example of how efficient and how capable and what good judgment the U.S. Postal Corporation uses.

COMMENDING CONGRESSMAN LESTER WOLFF ON DRUG ENFORCEMENT WORK

(Mr. FREY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FREY. Mr. Speaker, I just would like to commend the gentleman from New York (Mr. LESTER WOLFF) and the Committee on Drugs for the work they have done and the effect it has had in Florida. About a month or two ago the committee met in Florida and found that about 90 percent of the cocaine coming into the country was coming in to our State and about 70 percent of the marihuana. Since the push given by the committee, there has been a tremendous amount of drugs recovered and a lot of pressure put on the drug traffic.

I will put into the RECORD the exact tonnage, and I say tonnage of marihuana, that has been recovered; but it points out the need for tougher action against the pusher, not the kid or the addict, but the drug smuggler.

AUTHORIZING APPOINTMENT OF COLONEL BURKE AS BRIGADIER GENERAL

(Mr. BOB WILSON asked and was given permission to address the House for 1 minute.)

Mr. BOB WILSON. Mr. Speaker, I strongly support H.R. 13268, which just passed on the Private Calendar. The bill authorizes and requests the President to appoint Col. Lloyd Leslie Burke as a brigadier general on the retired list of the U.S. Army, but without any added cost to the Government.

I am pleased that my colleagues on both sides of the aisle have seen fit to confer this well-deserved honor on Col. Burke as a small token of our respect and admiration for a man and a soldier who in three wars and over a military career of more than 30 years has rendered unstinting service to the Army and to the Congress. He has literally devoted his entire adult life to the service of the country and has unhesitatingly risked his life on the battlefields of World War II, the Korean war and the Vietnam war.

Here is a man who was awarded the Medal of Honor during the Korean war. I will not read the entire description of the series of acts which gave rise to that award, but listen to these few words from the citation:

> . . . he charged the third emplacement, catching several grenades in midair, and hurling them back at the enemy. Inspired by his display of valor, his men stormed forward and overran the hostile position.

Mr. Speaker, I think the award that we are giving Colonel Burke this morning is much deserved, and I am sure it will be much appreciated.

PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 638, PROPOSED EQUAL RIGHTS AMENDMENT EXTENSION

Mrs. CHISHOLM. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1295 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1295

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 638) extending the deadline for the ratification of the equal rights amendment. After general debate, which shall be confined to the joint resolution and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the joint resolution shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the joint resolution for amendment, the Committee shall rise and report the joint resolution to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the joint resolution and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentlewoman from New York (Mrs. CHISHOLM) is recognized for 1 hour.

Mrs. CHISHOLM. Mr. Speaker, I yield 30 minutes to the gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, let me say that during the consideration of this resolution, I will yield for the purposes of debate only.

House Resolution 1295 provides for the consideration of House Joint Resolution 638, a bill extending the deadline for the ratification of the equal rights amendment. This is an open rule providing for 2 hours of general debate to be equally divided and controlled by the chairman and ranking minority member of the Judiciary Committee. All amendments that are germane can be offered under this rule. It also provides for one motion to recommit.

Mr. Speaker, House Joint Resolution 638 is a resolution which authorizes an additional 3 years, 3 months, and 8 days for the States in this Nation to ratify or reject House Joint Resolution 208 as passed by the 92d Congress by an overwhelming vote of 354 to 24 in the House in 1971, and by 84 to 8 in the Senate in 1972. As you are aware, House Joint Resolution 208 is the proposed equal rights amendment which states:

> Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex.
>
> The Congress shall have the power to enforce, by appropriate legislation, the provisions of this article.
>
> This amendment shall take affect two years after the date of ratification.

As of this date 35 States have ratified this proposed amendment. Three more States are necessary to ratify this proposal if the amendment is to become part of our Constitution.

Because many Members of this House consider the equal rights amendment an issue affecting the human rights of our citizens, a resolution was introduced to extend the period for ratification for an additional 7-year period to allow the State legislatures to discuss this important issue free of the time-related pressure that the initial 7-year limit created. It was felt by the sponsors that additional time was needed to allow the States to consider the proposed amendment based on its merits.

Once the resolution was introduced, the Subcommittee on Civil and Constitutional Rights of the Judiciary held extensive hearings on the extension resolution. A number of important constitutional questions were raised and considered fully by the committee. After careful examination of the proposal, the Judiciary Committee deemed that Congress has the authority to extend the deadline for ratification. In addition, the committee decided that the discussion of the proposed equal rights amendments is, indeed, timely and is therefore, worthy of an additional 3 years, 3 months, and 8 days to allow the States the opportunity to further consider ratification of the ERA.

Mr. Speaker, arguments which assert that all debate on the ERA has subsided or should subside are not accurate representations of the feelings of the American people. The current debate over the equal rights amendment is very heated, with a great deal of confusion among supporters and opponents as to what the amendment would actually do. For Congress to allow debate to be limited to the original 7 years would thwart the greatly needed educational process which must go along with an amendment of this magnitude. Moreover, I think my colleagues realize that the U.S. Congress has the responsibility of oversight in all laws that it creates. Therefore, it seems legitimate, that as a part of oversight responsibility we must reassess the political climate of our times and extend the deadline for ratification of the equal rights amendment.

Mr. Speaker, I strongly believe that the extension resolution before us is both a necessary and constitutional means of granting the American people additional time to consider a most historic issue of constitutional and human rights. I request that we adopt House Resolution 1295 so that we may proceed with the consideration of the extension resolution.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentlelady from New York has spoken eloquently about this rule which proposes to make in order House Joint Resolution 638, the extension of the deadline for ratification of the equal rights amendment. The rule provides for 2 hours of general debate and that the resolution will be open to germane amendments.

At the outset I think it is absolutely necessary, regardless of whether one is for or against ERA, to define the sole issue confronting the House at this time: Should not the full House of Representatives have the opportunity to decide whether House Joint Resolution 638 must pass by a two-thirds vote of the Members present?

In order to arrive at a determination of the question, it is necessary to examine the U.S. Constitution, the statutes, case law, and the precedents. Article I, section 7 of the Constitution states:

> Every Order, Resolution, or Vote to which the Concurrence of the Senate and House of Representatives may be necessary (Except a question of Adjournment) shall be presented to the President of the United States; and before the Same shall take Effect, shall be approved by him . . .

The footnote to this section follows with:

> It has been settled conclusively that a joint resolution proposing an amendment to the Constitution should not be presented to the President for approval (*Hollingsworth v. Virginia*, 3 U.S. [3 Dall.] 378 [1798]). Such joint resolutions, after passage by both Houses, are presented to the Administrator of General Services (1 U.S.C. 106b)."

In article V we find the requirement that whenever two-thirds of both Houses propose constitutional amendments, such amendments must be ratified by the legislatures of three-quarters of the States. Again, in the footnote succeeding this article, we are reminded that constitutional amendments "are proposed in the form of joint resolutions * * * but are not presented to the President for his approval." Instead, such amendments are filed with the Administrator of GSA who is responsible for their certification and publication once they are ratified by the States.

The footnote to article V continues by providing:

> The vote required on a joint resolution proposing an amendment to the Constitution is ⅔ of those voting, a quorum being present, and not ⅔ of the entire membership. The requirement of the ⅔ vote applies to the vote on final passage and not to amendments, or prior stages, but is required where the House votes on agreeing to Senate amendments, or on agreeing to a conference report.

Section 397 of Jefferson's Manual lays down the precedent that a joint resolution "is a bill as far as the processes of the Congress in relation to it are concerned. With the exception of joint resolutions proposing amendments to the Constitution, all these resolutions are sent to the President for approval and have the full force of law."

From these citations we can extract several principles applicable to the issue before us. These rules may be outlined as follows:

First. A two-thirds vote of those members present of both Houses is required on final passage of any proposed amendment to the Constitution;

Second. The President has no power of participation in the constitutional amendment process;

Third. Subsequent to the passage by two-thirds of both Houses of a proposed constitutional amendment, such amendment is filed with the Administrator of General Services for certification and publication once ratified by three-fourths of the States;

Fourth. Amendments adopted prior to final passage of a constitutional amendment require only a simple majority vote, but a two-thirds vote is required where the House votes on agreeing to Senate amendments or on agreeing to a conference report; and

Fifth. Under a majority vote procedure, a joint resolution must be signed by the President.

So what do we have here? House Joint Resolution 638 seeks to amend House Joint Resolution 208 of the 92d Congress. House Joint Resolution 208, the proposed equal rights amendment, passed the House and Senate by the necessary two-thirds vote and was submitted to the States for ratification. Any amendments to the resolution which were adopted before final passage needed only a majority vote. The 7-year limitation, imposed by Congress pursuant to its constitutional power to determine details of the ratification process (*Dillion* v. *Glass*, 256 U.S. 368), was part of the total package which passed the House by two-thirds vote. Consequently, every amendment to House Joint Resolution 208 proceeded past two obstacles—a majority vote and then a two-thirds vote.

To require anything less than a two-thirds vote on House Joint Resolution 638 flies in the face of proper parliamentary procedure, not to mention the U.S. Constitution. The coalition forged to obtain the necessary two-thirds when the resolution originally passed the Congress very likely would have been undone had the Members at that time anticipated a rules change prior to the end of the game. To renegotiate the terms now without mandating a two-thirds vote will violate law and policy.

The proponents of this extension resolution do not intend that it will be sent to the President for his signature. It is settled that the President has no power of participation in the constitutional amendment process. However, under a majority vote procedure a joint resolution must be signed by the President. Without his or her signature such a resolution can have only the effect of a concurrent resolution. Such a resolution expresses only the sense of the 95th Congress that States should have extended time to ratify and, accordingly, will have no binding legal effect.

Let there be no misunderstanding, House Joint Resolution 638 is an attempt by Congress to exercise its power to propose a constitutional amendment pursuant to article V. We are concerned, then, with a change in the fundamental law of the land. Every step along the way must be free from any cloud, legal or otherwise. To require anything less is insufficient.

I am advised that several constitutional questions arose during the consideration of the joint resolution of extension by the Judiciary Committee. Few, if any, of these questions were resolved conclusively prior to the vote to report the resolution. The question of a two-thirds vote requirement on final passage was but one such unresolved issue. But it is an issue of such magnitude that it should not be left to a single committee to determine. The full House of Representatives should be given the opportunity to speak directly on the subject.

For this reason I propose to offer an amendment in the nature of a substitute to the rule which will permit the offering of a motion to require a two-thirds vote on final passage of House Joint Resolution 638. This is similar to the amendment I offered in the Rules Committee which failed by an 8-to-8 vote. The motion would be in order after the vote on the motion to recommit and prior to vote on final passage. 30 minutes of debate time would be allowed, equally divided between the mover and the opponents of the motion. If the motion is not approved by a majority vote, then only a majority vote would be required for final passage of the resolution.

During consideration of the extension by the Rules Committee, testimony was received on the question of whether an amendment to allow States to rescind their prior ratification would be in order as an amendment to House Joint Resolution 638. The committee took no action with respect to his question. Hence, it still looms before us. In an effort to submit this issue to the full membership of the House for determination, I have incorporated it as part of my substitute rule.

I am convinced beyond any doubt of the constitutional requirement that House Joint Resolution 638 be passed by a two-thirds vote. I also am convinced of the merits of permitting a State to rescind a prior ratification. This rule neither provides such terms nor permits the House to decide if it wants to impose them. The rule, then, does not provide an adequate procedural framework for dealing with the general proposition of extending the time for ratification of the equal rights amendment.

The rule simply is incomplete. This consequence makes it necessary to defeat the previous question on the rule so that a substitute rule can be offered which is structurally sound.

I strongly urge the Members to vote down the previous question and allow the full House to speak on the serious constitutional questions of final passage by a two-thirds vote and the right of States to rescind prior ratification.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Illinois.

Mr. MICHEL. I thank the gentleman for yielding.

I commend the gentleman for the statement he has made.

As he knows, I was prepared to testify before the Rules Committee in support of an open rule that would leave these decisions up to all the Members of this body including the one having to do with whether the resolution should be adopted by a two-thirds vote or not.

I know there are a number of constitutional scholars and lawyers who will argue both sides of that question, and if this extension ever gets through both Houses of the Congress it will undoubtedly be argued in our courts.

In view of the fact that some of the States have ratified the amendment with the preamble of the original amendment and some without can very well be argued in the courts. I have predicated my own decision to support a two-thirds vote on the grounds that we have had the biggest turnover in this House of Representatives since the amendment was passed back in the 92d Congress.

I was here then. I supported the amendment, but I do not support the extension of time for its ratification, and here we have today more than half the Members of this body voting for the first time on the equal rights amendment. Even though the vote is simply on an extension of time, the original 7 years provided for was passed by a two-thirds vote of both Houses of Congress, and it just seems to me right and appropriate that a two-thirds vote be required to pass this resolution. Furthermore, I would be willing to wager that without its passing by a two-third vote, the other body will never take up the issue during this Congress.

Finally, Mr. Speaker, I hope Members will vote down the previous question and adopt the substitute rule proposed by the gentleman in the well. Then we can have a clear expression of the will of this House on all the issues. I personally intend to vote down the previous question and if that fails to vote for the privileged resolution that will be offered by the gentleman from Tennessee (Mr. QUILLEN). Furthermore, I intend to support the Railsback amendment, providing for rescission. That vote will indeed be a very close one, and I hope a majority of members will support the Railsback amendment. I commend the gentleman for making such a good case for his point of view, and thank him again for yielding so that I might outline my own position on this very important issue.

Mr. LOTT. Mr. Speaker, I thank the gentleman from Illinois for his comments.

I want to emphasize again this is not a question whether one is for or against ERA or even an extension. This is just a question of doing this matter properly, procedurally and constitutionally. Once those questions have been resolved, we can make our decision on the merits of the question.

Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. MCCLORY).

Mr. MCCLORY. Mr. Speaker, after all the battles fought on the House floor over closed rules, modified closed rules, and modified open rules, I never thought I would argue against an open rule. As others have so eloquently pointed out, we are considering a very questionable open rule. Any rule which prohibits the House from considering and resolving the questions which it is charged to decide is in effect a closed rule.

The heart of the issue, which was cleverly avoided by the Judiciary Committee and blocked from this House's consideration by the Rules Committee is simply what vote must this resolution attain in order to be lawfully and constitutionally passed by the House. Everyone has a different opinion on that, and my reading of the cases and listening to the scholars' testimony leads me to believe that the bottom line is right here in the House. This open rule, however, prohibits the House from making up its own mind on this crucial question.

Whether or not Members support a simple majority or a two-thirds vote, we should unanimously uphold the prerogatives of the House and not let the sponsors of House Joint Resolution 638 stifle the House's right to work its will.

The equal rights amendment permits no favoritism by the government based on sex. It mystifies me how some of the strong proponents of this amendment can, on the one hand, urge equal and fair treatment for all, and on the other hand, prohibit the House from deciding what vote is required for passage of House Joint Resolution 638.

Those of us who remember when this House attempted to expel a former Member, will recall that the key question was what vote was necessary for the House to take that action. A former Speaker at the time put the question to the House improperly and the Supreme Court reprimanded us for the error and reinstated the Member.

Let us not make the same mistake again. Even if you wish to see this extension passed, it is important that it be done correctly. To prohibit the House from deciding what vote is necessary to pass House Joint Resolution 638, after the reporting committee has failed to do so, is not only unfair but would clearly jeopardize any action we may take.

Mr. Speaker, I expect to vote against those who believe the resolution must have a two-thirds vote for final passage. But I will certainly support their right to have the House consider and resolve the questions. Any and all amendments, including rescission, should be protected by this rule and be eligible to be offered. What could be more fundamentally fair?

A vote against the previous question is in no way a vote against the equal rights amendment. A vote against the previous question is merely a statement that the House must face its responsibilities and decide just what this resolution purports to be and just what vote is necessary for it to be effective. It is most appropriate that the House have this opportunity. This is the first time in our history that anything like House Joint Resolution 638 has been before us. It is unprecedented. It is thus our duty to decide what procedure will make it an effective act of this body. The question cries to be answered. If we don't answer the question, who will?

I urge a "no" vote on the previous question.

Mrs. CHISHOLM. Mr. Speaker, I yield 2 minutes to the gentleman from Missouri (Mr. BOLLING).

Mr. BOLLING. Mr. Speaker, I supported this rule in the Committee on Rules. I think it is an important rule that should be passed nearly unanimously. It does not prevent any germane amendments. I think we should get on with this rule and proceed with the consideration of the extension of the time for ratification of this very important constitutional amendment.

Mr. LOTT. Mr. Speaker, I yield 3 minutes to the gentleman from Tennessee (Mr. QUILLEN).

Mr. QUILLEN. Mr. Speaker, at the appropriate time I intend to offer a privileged resolution requiring that the House

vote by a two-thirds majority on final passage of the joint resolution before us. When the rule is adopted, the privileged resolution will be presented and then the vote will occur on that particular resolution.

But, Mr. Speaker, I would urge the Members of the House to first vote down the previous question on the rule allowing Members a two-thirds vote on final passage of House Joint Resolution 638, and making in order an amendment to allow rescission, but if that fails, then I intend to offer my privileged resolution.

Mr. Speaker, my question of privilege arises under rule IX of the rules of the House. Rule IX provides as follows:

Questions of privilege shall be, first those affecting the rights of the House collectively, its safety, dignity, and the integrity of its proceedings; second, the rights, reputation, and conduct of Members, individually, in their representative capacity only; and shall have precedence of all other questions, except motions to adjourn.

Mr. Speaker, my question of privilege is based on the part of rule IX which states that those questions are privileged which relate to the integrity of the proceedings of the House. My contention is that passage of House Joint Resolution 638 by a simple majority vote, rather than by a two-thirds vote, violates the integrity of the proceedings of this House.

Mr. Speaker, in order to support my contention, it is necessary to review the facts in this particular situation.

First, it is clear that a two-thirds vote is necessary for Congress to propose an amendment to the Constitution. Article V of the Constitution begins with the following words.

The Congress, whenever two thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution, . . .

It was under this procedure in article V that the 92d Congress proceeded when it passed House Joint Resolution 208, which proposed the equal rights amendment in the first place.

Mr. Speaker, House Joint Resolution 208 was a short, simple resolution. Let me read the text.

HOUSE JOINT RESOLUTION 208

Proposing an amendment to the Constitution of the United States relative to equal rights for men and women.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That

The following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States *within seven years* from the date of its submission by the Congress:

"Section 1. Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex.

"Section 2. The Congress shall have the power to enforce, by appropriate legislation, the provisions of this article.

"Section 3. This amendment shall take effect two years after the date of ratification."

Mr. Speaker, it is important to note that the 7-year time limit is included as a part of the joint resolution. It was not a separate piece of legislation.

House Joint Resolution 208 was passed by a two-thirds vote in the House on October 12, 1971. The Senate passed the resolution by a two-thirds vote on March 22, 1972. Again the 7-year time limit was a part of the resolution.

Now, the House is ready to consider House Joint Resolution 638, changing the time limit provision of House Joint Resolution 208.

The integrity of the proceedings of the House will be violated if House Joint Resolution 638 is passed by a simple majority of the Members present and voting. What was done in a joint resolution requiring a two-thirds vote for passage should not be undone in a joint resolution requiring only a majority vote for passage.

The constitutional prerogatives of the House to propose amendments to the Constitution and to impose necessary conditions thereto would be violated if House Joint Resolution 638 is passed by a simple majority vote.

The SPEAKER. The time of the gentleman from Tennessee (Mr. QUILLEN) has expired.

Mr. LOTT. Mr. Speaker, I yield 1 additional minute to the gentleman from Tennessee.

Mr. QUILLEN. Mr. Speaker, I thank the gentleman for yielding.

My privileged resolution gets down to the heart of the matter and provides the same vote as on the originating Equal Rights Amendment resolution passed by the House in 1971, a two-thirds vote of the Members of this House, with a quorum being present. Unless this vote occurs, Mr. Speaker, I have grave doubts that the amendment will follow the unconstitutional process and be extended.

Mr. Speaker, I voted for ERA. I do not think that this is a question of pro- or anti-ERA. I think it is a question of preserving the integrity of this House; and at the appropriate time, I intend to offer my privileged resolution.

Mrs. CHISHOLM. Mr. Speaker, I yield 3 minutes to the gentleman from Louisiana (Mr. LONG).

Mr. LONG of Louisiana. Mr. Speaker, I rise in support of the rule on and the equal rights extension.

In reviewing the resolution for consideration of this bill, the Rules Committee received from the Judiciary Committee careful documentation from the Justice Department and guidance from many of our Nation's leading scholars on constitutional law. The overwhelming evidence supports the proposition that Congress does have the power to extend the time limit for State consideration of ERA and that it can do so with a vote of a simple majority.

I raise the majority vote issue only because it has been one of the more persistent questions surrounding the proposed extension. Efforts to require a two-thirds vote in order to change the time limit were defeated in the Judiciary Committee; they were rejected again by the Rules Committee during our consideration of the question. The committee determined, after hearing all arguments, that this is a procedural matter that clearly governs "setting the time period." It is a matter of detail which neither establishes a new amendment nor changes the nature or substance of the amendment in any way.

Mr. Speaker, further I am pleased to lend my support to the extension legislation because this gives me yet another opportunity to voice my unwavering support for passage of the Equal Rights Amendment.

This issue is one whose time has come, though it has been a long time coming.

Women waited 131 years to vote, and began working as far back as 1923 to include an amendment in our Constitution guaranteeing equality to women and men under the law of the land.

The interest shown by our legislative bodies, our communications media, our clubs and organizations, and by our families tells us that the issue is still vital and that further opportunity for discussion is in order. It is an issue that will not go away despite efforts in some quarters to distort the real purpose—to insure that all citizens share equally the rights and responsibility of citizenship under the law. Surely human rights begin at home. And in view of the long struggle women have had to earn the right to vote, to hold office, to own and control property, to have better working conditions, pay, pensions, medical benefits and fair credit, it seems reasonable to me to ask for more time to consider this very important basic piece of legislation.

If our State legislatures reflected the will of the vast majority—established through every legitimate public opinion poll ever conducted—and if a majority vote were all that were required in each State legislature, the equal rights amendment would be a part of our Constitution today.

I think it is important that we cut right to the heart of the matter and avoid extraneous talk about a two-thirds vote or rescission or any other diversion. I am convinced that Congress has the right to grant an extension; that it has the power to approve an extension through a simple majority vote; and that it can best resolve the recission question at the time three-quarters of the States have ratified, as it did during certification of the 14th amendment.

Never before has a fundamental issue of civil rights been resolved under traditional guidelines. It took a civil war to determine racial equality under the law. The suffrage amendment granting women the right to vote contained no time limit; my own State ratified only 8 years ago.

I believe there can be no time limit for equal rights for anybody. I believe, further, that the need exists for a clear message to the courts and to the legislatures that support has not waned for insuring that our laws are fair to everybody. I fully support the extension resolution. All I have to do is think of my mother—of my wife—of my daughter, and ask myself whether I want the same legal rights and responsibilities for them that I want for my son and for myself. The answer is "yes."

I urge my colleagues to adopt the rule and join me in voting to extend the

deadline for ratification of the equal rights amendment.

Mr. LOTT. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. Mr. Speaker, let me preface my comments on this rule by stating that I have long been a strong supporter of the equal rights amendment, I continue to be fully committed to its ratification today, and therefore I will vote in favor of this limited, 3¼-year extension of the ratification period. I do not happen to think that a 10-year ratification period in any way strains the "contemporaneous" approval standard as set forth by the Supreme Court in Dillon against Gloss. In that decision, the Court held the Congress could set a time limit on ratification, provided it was reasonable, and it further held that a 7-year ratification period could be considered reasonable.

In the case of Coleman against Miller, the Supreme Court held that after an amendment had been proposed with no time limit on ratification, a subsequent Congress could determine the reasonableness of the time period in passing on the validity of a ratification. It would therefore follow, in my opinion, that when Congress initially proposes an amendment and sets the ratification period outside the text of that amendment, a subsequent Congress may extend that ratification deadline, provided the extension period does not do violence to the "contemporaneous" approval standard. In this regard, I would point out that when this extension resolution was originally introduced with an additional 7-year ratification period, I opposed the resolution because I felt it did strain the bounds of the contemporaneous approval standard. But, in my opinion, this more limited extension period of 3 years, 3 months and 8 days, is a reasonable timeframe which will still permit contemporaneous approval by the States.

Mr. Speaker, the story of America's greatness has been one of adapting to the changing times. Our civilization—be it seen in our economic and military might, or our social progress, or our thriving democracy—has not been achieved with the philosophy of standing pat. In fact, it has been achieved by looking ahead rather than backward.

There should no longer be much question that someday the equal rights amendment will be enshrined in the American constitution. This amounts only to a simple recognition of the 20th century reality that the role of women is changing; and to a simple faith in the responsiveness of the American system to such change. The real question that faces us is whether the 95th Congress is to be remembered as the one that came to grips with this change, or one that swept it again under the rug for another day.

I do not question the sincerity or motives of those who oppose the ERA. But I am afraid that exaggerated claims about the effect of the amendment have colored the issue with much more emotion than it deserves. In truth, the equal rights amendment is simple and straight-forward, and the product of the most extensive and thoughtful consideration over the last 55 years since it was first introduced in Congress. The scare stories that the amendment will encourage homosexual marriages or unisex public restrooms, put women in the front lines of combat or require them to work if they want to be homemakers, are not only contradicted by voluminous legislative history, but, moreover, by any degree of commonsense. The Constitution has force only insofar as it is interpreted and enforced by the courts, the Congress, and the President. Why is it assumed that these branches of our Government would not be even half-way reasonable in performing their solemn constitutional responsibilities?

The amendment does not mandate wholesale changes in human behavior and social custom; it merely secures legal rights. It is not a prescription for disrupting our social system; rather, it is an accommodation to the change that has already occurred, something meant to ease the transition as new values and social roles evolve on their own. Traditions will be eroded much more by time and inclination than by this amendment.

Instead, this amendment has only the benign purpose of eliminating discrimination based on arbitrary State and Federal law, and of requiring that people be treated as individuals rather than stereotypes. Is it conceivable we could ever find ourselves debating the merit of racial-based classification, or religious-based classification, or political-based classification? Why are matters of gender to be treated any differently?

It is not surprising that 35 States, representing three-fourths of our Nation's population, have already chosen to ratify the amendment. Unfortunately, in part due to obstructionist tactics, the amendment is still three States shy of ratification. A 7-year period for ratification was originally established, because it was thought useful and customary to spell out a deadline. Court opinions, however, seem to make it clear that the duration of the ratification period need only be a "reasonable" one, and that its definition is a procedural detail and political question entirely within the province of Congress to decide. If 7 years is thought reasonable, in terms of making the various ratifications "contemporaneous" and reflective of a "prevailing national consensus," then one is hard-pressed to make the case that less than half-again as much time crosses the line to become "unreasonable." Indeed, the 3 years, 3 months, and 8 days arrived at by the Judiciary Committee very much represents a compromise from the 7-year renewal supporters originally sought.

Mr. Speaker, the equal rights amendment has now become as symbolic as it is real. It is not only that the 14th amendment, historically intended to relieve racial discrimination and only gradually applied more broadly, has proved inadequate as a basis for addressing sex-based discrimination; it is also that the ERA has now become a token of the respect this country is willing to observe for the pursuit by women of the equal opportunity and individual achievement that America has always proclaimed its creed.

The ERA is not just a women's issue; fundamentally, it is an issue of freedom and justice, and, as such, it affects all of us. Congress, in particular, has an obligation to care about these ideals. I urge extension for the ERA.

Mrs. CHISHOLM. Mr. Speaker, I yield 2 minutes to the gentleman from Missouri (Mr. VOLKMER).

Mr. VOLKMER. Mr. Speaker, I would first like to say that as a member of the subcommittee and the Committee on the Judiciary, I have come to the conclusion that it is necessary for final passage of this resolution that a two-thirds vote be required. I rise in opposition to the previous question on the rule and ask the Members to vote against the previous question so that we can offer an amendment to the rule to permit an up or down vote by this House on this very important constitutional question. Whether one is for it or against it, I believe that the issue needs to be addressed. The issue was not addressed directly on an up or down vote either in the subcommittee or the Committee on the Judiciary.

The issue we are addressing is not the merits of the equal rights amendment, of which I have been a long-time supporter and still am. It is the constitutional amendment process and the procedure to be followed. We must remember that whatever we do here today will be setting a precedent for future actions of later Congresses. I have tried to approach this matter objectively. We are not only concerning ourselves with the extension of time for ratification of the equal rights amendment, but we are also setting a precedent in the amendatory process of the Constitution, and because we are taking an unprecedented action, we should objectively examine all facets of this matter before deciding the substantive and procedural issues.

My research of the testimony and statements of the constitutional experts, the Supreme Court cases, the discussions of the constitutional debate, the Constitution, the statutes and precedents, have led me to the conclusion that the only proper constitutional procedure requires the use of a joint resolution passed by two-thirds of both the House and Senate.

The SPEAKER. The time of the gentleman has expired.

Mr. LOTT. Mr. Speaker, I yield 2 additional minutes to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman.

I am supported in this conclusion by several constitutional authorities, namely, Erwin Griswold, former solicitor general and former dean of the Harvard Law School, Charles L. Black, Jr., sterling professor of law, Yale Law School; Professor Thomas I. Emerson, lines professor or law emeritus, Yale Law School, who said:

> I think the general principle should be that you either have a two-thirds vote . . . or a Presidential signature; and this is a sound general principle.

And Professor William Van Alstyne, College of William and Mary, who also supports a two-thirds vote.

So I ask a no vote on the previous question so that the House will have the

right to vote on this issue. Whether you are for or against the two-thirds requirement, surely you would not deny the House this opportunity.

Mr. SANTINI. Mr. Speaker, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Nevada.

Mr. SANTINI. Mr. Speaker, I rise in support of the remarks of the gentleman and in opposition to the rule.

I think it is most unfortunate that the merit of the individual cause is used as a substitute for constitutional substance here. The Coleman against Miller decision did not say, nor even hint, suggest, or imply in any way, shape or form, that this body had the right to make two different decisions, at different times, and in different ways, with respect to what constituted or should constitute a reasonable time for amendments to the Constitution. That is precisely what is being proposed here.

I well understand the emotional motivation and the necessary political expediency that is implicit in this kind of expectation and request of the House; but we are wrong if we do it this way. We are wrong constitutionally and we are wrong in terms of what this body should stand for in terms of a response to a very reasonable request, and that is the equal rights amendment.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. Mr. Speaker, there is one option that ought to be available to us to consider in this very serious process that will not be available to us today unless an extraordinary thing happens, and that is defeating the previous question twice; but I think the Members ought to be aware there is another option described in two "Dear Colleague" letters that have gone to your offices to which very little attention may have been paid, perhaps. But you might be anxious to know that that additional option could be the fairest and best position for this House of Representatives to take with respect to the equal rights amendment; that is, in effect, the opportunity should be afforded to us to vote on the content of a new equal rights amendment which has been introduced in the House in House Joint Resolution 1066, which provides for the equal rights amendment to be submitted to the States again, but with a different section 2, which preserves to the States their role in our Federal system. It is exactly the same equal rights amendment, except that section 2 reads:

> The Congress and the several States shall have the power to enforce this article by appropriate legislation. This amendment shall not be so construed as to delegate to the United States any powers otherwise reserved to the States, or to the people.

That is the stumbling block problem of the equal rights amendment as currently proposed in section 2, which gives only to the Congress the power to enforce section 1 by appropriate legislation.

Many State legislators have felt that the Congress could and would preempt vast areas of law within the present jurisdiction of the United States, if the equal rights amendment is ratified in its present form. We will not have an opportunity to vote on that other option unless we defeat the previous question today.

Mrs. CHISHOLM. Mr. Speaker, I yield 3 minutes to the gentlewoman from Texas (Miss JORDAN).

Miss JORDAN. Mr. Speaker, I thank the gentlewoman from New York for yielding to me this time.

We have heard many pronouncements coming from those who oppose this rule. Some have made constitutional pronouncements and judgments apparently forgetting that they are legislators—not judges. The gentleman from Mississippi began his comments saying why go through this agony and ecstasy and agony again?

I would say to the gentleman from Mississippi (Mr. LOTT) that women have been going through agony and ecstasy all their lives, and we shall continue to do so until the words "equal rights under the law shall not be denied because of sex," are a part of the Constitution. We shall continue unrelentingly as long as is necessary.

There have been other statements made here. For instance, the gentleman from Nevada (Mr. SANTINI), an excellent lawyer, states that we are misreading the Coleman case, that the case does not stand for Congress making one judgment at one time and another judgment at a subsequent time. The gentleman is correct. Coleman certainly does not stand for that. But Coleman also does not say that Congress does not have the total power and the total authority to work within the framework of time limitations under the authority of the mode of ratification.

What the Coleman case says is that we can set the time, and if we can set the time, we can change the time.

What we are doing now is saying that we need more time, and we are asking this House to give us more time. Two-thirds versus one-half? I hope the Members will not require a two-thirds vote either by way of amendment or by voting down the previous question on this rule.

If we want to follow parliamentary procedure, if we want to follow Jefferson's manual, every decision that is made under general parliamentary law may be made by majority decision. If an extraordinary majority is required it has been so specified by the Founding Fathers who were astute enough to tell us exactly when we should have a supermajority. When the Senate ratifies a treaty between the United States and a foreign country, when we are engaged in the matter of the impeachment of a President, when we are voting on the expulsion of a Member of Congress—these are instances where it is clearly stated that a two-thirds majority would be required.

Why, I ask my colleagues in the Congress, would we set it upon ourselves to require that we have a supermajority in this instance? Why would we impose the requirement of a supermajority in a matter which can clearly be decided by a simple majority? Why the supermajority?

Mr. Speaker, I support the rule. I hope the Members will support and vote for the rule, and I hope they will vote against anything which would be crippling and destructive of House Joint Resolution 638.

We need your support on this day, and you will honor the spirit of the Founding Fathers if you decide that on this day you are going to give this country, the United States of America, just a little more time to find itself.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. FISH).

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. FISH. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I thank my colleague for yielding.

Mr. Speaker, I wish to rise and echo, if I may, the words of our colleague, the gentlewoman from Texas, Miss BARBARA JORDAN.

What more can really be said?—except perhaps to say that the negative symbol, if we vote against this today, will be heard around the world.

And that is not exaggerated. What does this say to the people of the developing countries and to the women in those countries? It says that even this country, the United States of America, does not really want to admit that women are equal citizens here.

What does it do to all the struggling people who are trying somehow to come out from under the terrible burdens this world has imposed upon women everywhere, and most awfully and most terribly in those areas where women are the poorest and the most deprived? What does it say?

It says that we are not prepared to accept women as equal citizens here, that this Nation under God, which was supposed to have a new birth of freedom, does not extend equal rights to women, and that somehow we did not really mean for it for half the population of this Nation.

I do not know what to say to my colleagues. How do we appeal to you? Nobody is going to be mistaken as to what we do here today. We discuss parliamentary procedures and voting the previous question, and we all know what is back of it. There is much emotion in some of the speeches here; they pretend to be concerned with matters that are strictly legal, but they are not. They are finding ways to avoid a step toward this new freedom. And that is the truth. They are evasions of a simple but important question. The positive symbol the adoption of the amendment is not even to be compared to the negative symbol that rejection would present.

Yes, women are equal citizens. That does not sound like much, does it? But when you say they are not, what does it say?

Mrs. CHISHOLM. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Speaker, we are told correctly that proposing a constitutional amendment requires a two-thirds vote of both Houses. But beyond that, we are told that unless House Joint Resolution 638 is enacted by a two-thirds vote it will have no more binding effect than a

concurrent resolution. To this I take exception, and will attempt to clarify the law as regards article V functions.

It has also been argued that Congress, under article VI, has but three ways it can create a legal obligation. We have been told that House Joint Resolution 638 is an attempt to create a legal obligation nowhere empowered in the Constitution.

My answer, Mr. Speaker, is that article VI has no relevance to the current debate over extending the time for ratifying the proposed equal rights amendment.

A unanimous Supreme Court stated in the case of *Dillon* v. *Gloss*, 256 U.S. 368 (1921),

> The power to amend the Constitution and the mode of exerting it are dealt with in article V * * *

The Dillon court later in that same opinion took care to reiterate that Congress power to act with regard to the amending process, including the power to establish a time period for ratification, comes from article V and not from Congress normal legislative powers. Indeed, this very point had been made the previous year in the case of *Hawke* v. *Smith*, No. 1, 253 U.S. 219 (1920).

In Hawke, the Court held that the power of State legislatures to ratify proposed Federal constitutional amendments found its source in article V and was not to be viewed as "legislation in the proper sense of the word," 253 U.S. at 229. In arriving at this result, the Court had occasion to reexamine one of its very early decisions, *Hollingsworth* v. *Virginia*, 3 Dall. 378 (1798), in which it had held that the President has no role to play in the process of amending the Constitution.

The "lesson" of Hollingsworth, as made clear by the court in Hawke, is that when Congress acts with regard to the constitutional amendment process, it does not perform an act of "ordinary" legislation that is subject to other procedural requirements in the Constitution. We look only to article V.

What we have then is an additional way that Congress can create a legal obligation. This occurs when Congress is performing an article V function. These actions by the Congress could be dealing with a time limit, choosing the method of ratification or certifying the validity of ratifications.

These court decisions tell us that when Congress sits to consider details of ratification, they are not considering legislation in its ordinary sense. Article V regulates the process. The power of Congress stems from article V itself and not out of the necessary and proper clause. The general rule whether or not an action by the Congress takes a simple majority is fully applicable here.

The Constitution is explicit where supermajorities are required. In those rare instances when the Constitution intends congressional action to require a two-thirds vote, it says so.

Article V of the Constitution prescribes a two-thirds vote only when Congress proposes a constitutional amendment. We are not here proposing an amendment. We are merely deciding whether a reasonable time for consideration by the States has passed. We are deciding whether a proposed amendment remains a vital contemporaneous issue so that debate and legislative considerations should be allowed to continue.

Article V leaves to the Congress matters of detail pertaining to reasonableness of time and the mode of ratification. Coleman versus Miller; Dillon versus Gloss. These article V actions are termed details and do not require a supermajority.

Applying the general rule, the Constitution does not require a supermajority, therefore, a simple majority will suffice.

I support the rule.

Mrs. CHISHOLM. Mr. Speaker, I yield 3 minutes to the gentlewoman from New York (Ms. HOLTZMAN).

Ms. HOLTZMAN. Mr. Speaker, I wish to thank my colleague, the gentlewoman from New York (Mrs. CHISHOLM), for permitting me to speak on the rule.

Mr. Speaker, it is not often that we are granted an opportunity to speak up for human rights and to do something about human rights. And this is that opportunity.

We celebrated only recently our country's 200th birthday. But in part, that celebration was incomplete because women were not fully protected under the Constitution.

Just a few weeks ago, in the well-known *Bakke* case, a Justice of the Supreme Court reiterated the fact that even though the 14th amendment requires that all persons be afforded equal protection and that all persons be afforded due process of law, that the term "persons" did not fully apply to women. Now is the opportunity to change that and to help insure that there is a fair and full debate in the States over the issues of human rights and equal rights for women.

This rule that comes before the House today is designed to do the same thing, to assure a fair and full and open debate.

The rule is an open rule. It allows 2 hours of debate. It allows all germane amendments. It waives no points of order. It permits full and fair debate.

Those who get up to attack the rule have made arguments that are really not accurate, I would say to may colleagues. In the first place, they claim something—it is not clear what—about rescission. In fact, amendments regarding rescission are germane. In fact, the gentleman from Illinois (Mr. RAILSBACK) withdrew his request before the Rules Committee to make his amendment specially in order, recognizing, conceding and admitting that his amendment would be germane here. It is the intention of everyone who has been connected with obtaining this rule that amendments regarding rescission should be germane, because we think the House should vote on that issue.

Those who attack this rule say, "Well, let's have a vote on two-thirds." I want to make two simple points about that. In the first place, if the previous question is defeated, the resolution that they would put in order would not allow the House to vote on the issue of two-thirds. It would mandate a two-thirds vote. The opponents of this rule will, therefore, not permit the House to vote on this issue, not one bit—and do not be fooled by that claim.

Secondly, on the two-thirds requirement, only 1 out of 11 scholars who testified before the House Judiciary Committee said it was mandatory under the Constitution. Ten out of eleven did not argue that there was any constitutional requirement for a two-thirds vote to make this resolution effective.

Mr. Speaker, I hope the rule is sustained.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from Virginia (Mr. BUTLER).

Mr. BUTLER. Mr. Speaker, ladies and gentlemen of the House, what we are about to do is to change the fundamental law of the land—the U.S. Constitution. It is very important that the process itself be free from question. To do otherwise is to encourage litigation and cast doubt over thousands of situations that arise under that process.

I think the Constitution requires that this action, if authorized at all, requires that it be done by two-thirds vote. Some think otherwise. The applicable cases indicate that the Congress is the ultimate body to resolve such questions.

The rule denies Congress the opportunity to vote on this question. I think this is wrong. It reflects on the integrity of Congress and reflects on the House of Representatives itself. It taints the entire process.

The only way to permit the House of Representatives the opportunity to decide this fundamental question for itself is to vote down the previous question and open the rule for amendment.

Contrary to what the previous speaker just said, the amendment to the rule does not mandate a two-thirds vote. The alternate rule would give the Members the opportunity to vote on whether we would require two-thirds or not. So, leaving aside for a moment the merits of the question, whether two-thirds are required or not, a decent respect for the process requires that we permit this body to determine this important question for itself. I urge the Members to vote down the previous question and give ourselves the opportunity to do what the Constitution tells us we should do.

I realize that it is difficult to ask the House not to support an open rule; however, we are faced with a most unique set of circumstances. The sponsors of House Joint Resolution 638 tell us they want no special favors or considerations and have, therefore, requested an open rule. Oddly enough, an open rule in this particular case is a limitation on the House's ability to consider amendments to this joint resolution.

The precedents of this House clearly prohibit amendments to the clause which proposes a joint resolution. Thus, an open rule could very well prohibit the House from making that determination.

On its face, the joint resolution does not speak to whether House Joint Resolution 638 requires a simple majority or a two-thirds majority vote for passage. Because we are taking an unprecedented step, all of the traditional sources which would normally help us resolve such a

question are silent. The Constitution does not offer any guidance. The Supreme Court has not addressed the issue specifically except to indicate that the amendment process is a matter for the Congress. The constitutional scholars who addressed this issue during our subcommittee hearings were divided over just what vote was necessary to pass this joint resolution.

The only consensus which seems to emerge after studying the authorities and the testimony of the scholars is that Congress must determine how this matter will be considered.

The Judiciary Committee did not have the opportunity to vote up or down on whether two-thirds was or was not necessary for the House to pass the joint resolution. The Rules Committee split 8 to 8 on simply giving the House the opportunity to decide. All I ask is that the House be permitted to do its duty and decide whether this resolution must be passed by a majority or a two-thirds vote.

It is also important to realize that while a rescission amendment may be in order, we have no guarantees. The rule should specifically make in order rescission amendments so that the House may work its will. If by some chance a point of order would lie against the amendment, which a majority of this House appears to support, the American people will have good reason to believe that the equal rights amendment will, in effect, be ratified by trickery and not by the established constitutional processes.

If this House is determined to extend the ratification period for the ERA, we would be foolish to attempt to taint the process. The sponsors of this extension have been so involved in parliamentary maneuvering in their efforts to secure passage of this resolution that they have forgotten the most important point: That is, whether the ERA will be ratified. If the American people believe that this extension was secured by manipulating the process, then a serious backlash will occur. The House must act responsibly on this question and insure that an amendment permitting rescissions and a vote on whether this motion should be considered by a simple majority or a two-thirds majority of the House are in order.

Mr. Speaker, I urge defeat of the previous question.

Mr. LOTT. Mr. Speaker, I yield 1½ minutes to the gentleman from California (Mr. WIGGINS).

Mr. WIGGINS. Mr. Speaker, the key vote will be on the previous question. I urge a no vote on the previous question to permit this House to work its will. At the risk of being arrogant, I am going to venture an opinion that the approval of this pending resolution by two-thirds of the House is constitutionally required if the resolution is to have any effect at all after January 3, 1979.

Article VI states that the supreme law of the land shall be the Constitution, laws enacted in pursuance thereof, and all treaties under the authority of the United States.

And there is no other way known to our Constitution to create a legal obligation. House Joint Resolution 638 is not a law, for it cannot and will not be submitted to the President. House Joint Resolution 638 is not a treaty. And House Joint Resolution 638 is not a proposed constitutional amendment, unless it is approved by two-thirds of the House.

If adopted by a majority vote, what then is House Joint Resolution 638? And the answer is: It is none of the above. If adopted, it is merely an opinion which will lack any force of law. To give any legal force to the resolution—and I am sure its supporters intend it to have legal force—it must be enacted pursuant to the Constitution and by a two-thirds vote. We have no other options.

Mr. LOTT. Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Speaker, I will oppose any extension of time for the ratification of the so-called equal rights amendment, and I hope that other Members of the House will do the same.

My constituents in Arizona's Fourth Congressional District are overwhelmingly opposed to such a time extension for the ERA.

And I have received communications from leaders of the Arizona State Legislature, where the ERA has been considered every year since it was proposed by Congress for ratification, who strongly oppose continuing this controversy beyond the 7-year period initially allowed for ratification.

I personally feel that the issue before us is not really whether the equal rights amendment is good or necessary.

But those arguments have inevitably become a central issue of the debate.

This could hardly be avoided. Section 2 of the proposed amendment opens the door to a Federal Government takeover of all matters dealing with marriage, divorce, child raising, child support, and so forth, by requiring Congress to pass all legislation considered necessary to implement total equality of the sexes.

Quite apart from the argument of whether or not the proposed ERA is necessary to obtain equal treatment and equal opportunities for men and women, section 2 of the proposed amendment is a diabolical further intrusion of the Federal Government into areas of State and local government concern and jurisdiction.

There is no way to avoid considering this element of the ERA controversy in connection with this proposal to extend the ratification period.

And it is for this reason as much as any other that this proposed time extension should be defeated.

A friend of mine once remarked sadly that, in his view, women had always been superior. Now they just want to be equal.

I do not think that the failure of the necessary 38 States to ratify the proposed ERA within the traditional 7-year time limit should be construed as a defeat for the cause of equal rights.

We have made tremendous progress over the past decades, through statute law in some cases, but more importantly through a changing attitude. And women have brought about this change. I applaud them for their concern, and for their participation.

It now seems to me that they are running the risk of sacrificing their dignity and their respect by asking for a change in the rules.

Three outs, and the inning is over. But they want more than three strikes, and more than three outs, when the game is almost over, and the proponents of the ERA are not winning.

This outrages the American sense of fair play.

But there is more involved here than just a sense of what is fair. The proposed extension will inflict irreparable harm on the integrity of the Constitution and the amendment process.

We have, as James Madison informed us in Federalist Paper No. 43, a procedure for amending the Constitution which "guards against that extreme facility which might render the Constitution too mutable, and that extreme difficulty which might perpetuate its discovered faults."

My hope is that we keep it that way.

Mr. Chairman, I cannot overemphasize my belief that this bill to extend the ratification period of the ERA is a real and present danger. It flouts the Constitution, would be destructive of responsible tradition, and makes a mockery of prudent provisions established to protect the integrity of the constitutional process.

Since the first 10 amendments were ratified in 1791—the group we call our Bill of Rights—there have been nearly 6,000 proposed constitutional amendments introduced in the Congress. Only 22 of these proposed amendments since 1791 have been passed by the required two-thirds majority of both Houses and sent to the States for ratification. Only 16 have been ratified by three-fourths of the States and become part of the Constitution.

It would be well to remember that article 5 of the Constitution provides two avenues for amendment. I want to quote those provisions verbatim from the Constitution. It says—

> The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution, or, on Application of the Legislatures of two-thirds of the several States, shall call a Convention for proposing Amendments, which, in either Case, shall be valid to all Intents and Purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, or by Conventions in three-fourths thereof, as one or the other Mode of Ratification may be proposed by the Congress: Provided that no Amendment which may be made prior to the year 1808 shall in any Manner affect the first and fourth Clauses in the Ninth Section of the first Article; and that no State, without its Consent, shall be deprived of its equal Suffrage in the Senate.

Alexis De Tocqueville, writing in his famous work "Democracy in America", states—

> The Federal system, therefore, rests upon a theory which is necessarily complicated and which demands the daily exercise of a considerable share of discretion on the part of those it governs.

The language of the proposals passed by the House and the Senate offering the ERA specifically called for ratification within 7 years.

In 1921, the U.S. Supreme Court, in its ruling in the case of Dillon against Gloss, stated—

Article 5 of the Constitution strongly implies that proposal and ratification were but succeeded steps in a single endeavor—

And further that amendments—

should be considered and disposed of presently—

And that—

ratification must be within some reasonable time after the proposal.

The Court stated that—

Nothing was found in Article 5 which suggested that an amendment once proposed was to be open to ratification for all time, or that ratification in some States might be separated from that in others by many years and yet be effective.

Clearly, any amendment must reflect the concurrent judgment of the required legislative bodies on a current proposal. In 1921, the term of 7 years was established as a reasonable period.

Every amendment to the Constitution added in the last 30 years has had the 7-year limitation. No amendment has taken as long as 4 years for ratification. The 24th amendment was ratified in 1 year and 6 months. The 23d amendment was ratified in 10 months.

The 22d amendment took 3 years and 11 months, but the 21st amendment was ratified in 10 months. The 20th amendment was ratified in 12 months, the 19th in 14 months, and the 18th in 18 months.

It would seem obvious to all of us that all parties involved—those in favor and those in opposition to the ERA—would recognize the possible destructive effect of extending the time limit for ratification of this proposed amendment, as proposed by legislation we are now considering.

We all know that laws are obeyed, not enforced. In this century, we have suffered the inevitable dislocation which occurs when citizens in disagreement with the law defy the law.

The social rebellion resulting from the Volstead Act, commonly known as Prohibition, is still remembered. If the time frame should be extended, and the ERA is ratified, it will certainly provide good cause for wholesale disobedience of the law.

To my mind, the action of those who propose to extend the time limit is comparable to the losers of an undisciplined, adolescent baseball team demanding the rules be changed, but only to suit them.

They want more than three strikes per player and more than three outs per inning in order to win. But they do not wish to allow additional strikes and outs for States that have already ratified ERA, in the event that these States wish to reconsider and rescind their ratification.

This action is more than sufficient grounds to question the sincerity and the maturity of those who now want to change the rules.

It is one-sided reasoning that Congress should reject. We cannot on the one hand require legislatures that have refused ratification to vote again and again on the ERA, which this legislation proposes, while at the same time refusing to allow States that have ratified the ERA to withdraw their ratification while the ratification process is still open.

It seems to me that this "heads I win, tails you lose" attitude is indicative of the arrogance now being manifested in those who are pressuring for an extension of time.

Eminent legal scholars have pointed out that the 7-year limitation was clearly a condition for ratification by those States which have voted in favor of ratification.

If the time limit is extended, the action of possibly 28 States is certain to be challenged on the solid ground that their original action embraced a covenant for the 7-year limitation.

It does seem strange to me that the sponsors of this proposed equal rights amendment, who appear to be fully persuaded of its merit, have not been forced by their failure to date to achieve ratification to reexamine the original proposal.

We should remember that proponents have been lavishly financed by tax dollars. The opponents of this amendment have been forced to depend upon the voluntary contributions of concerned citizens.

The wife of the President of the United States has lobbied State legislatures in favor of ratification. The President has taken a position in favor.

Those of us who oppose this bill are not merely unable to comprehend the true merits of this proposal, as its proponents have attempted to present them.

We are for equal treatment for women, equal pay for equal work, and all possible end to unwarranted discrimination. But these ends can be achieved—and are being achieved—through appropriate changes in people's attitudes and behavior, and where necessary by statutory changes in the law.

The proposed equal rights amendment is fraught with known and unknown dangers that enough State legislatures have had the wisdom to recognize, so that the necessary two-thirds ratification has not yet been obtained.

The proposed time extension for the ratification period is an unwarranted and diabolical assault on our constitutional process of amendment, and I urge its defeat.

Mr. LOTT. Mr. Speaker, to close the debate on our side, I yield my remaining time to the ranking gentlewoman of the House, the gentlewoman from Massachusetts (Mrs. HECKLER).

Mrs. HECKLER. Mr. Speaker, now we can appreciate the role of women in the Congress: I have 15 seconds, I understand.

Mr. Speaker, I would just simply say the basic concept here is this concept of fairness. I have seen those who oppose the ERA who wear buttons saying: "Vote for Fairness." I misunderstood this message. I thought they were on our side, because we the proponents of ERA have been the victims of unfairnesss.

I cite for the record the plea of the Washington Post which published an editorial called "ERA Resistance in Richmond," in which they said:

ERA: RESISTANCE IN RICHMOND

Once again a few members of Virginia's House of Delegates have kept their colleagues from voting on ratification of the Equal Rights Amendment. That isn't fair. And it isn't exactly in keeping with the sort of participatory democracy envisioned by the drafters of the Constitution.

The Constitution says that Congress "shall propose Amendments" that "shall be valid . . . when ratified by the Legislatures of three-fourths of the several States." Granted, Article V does not explicitly prevent Virginia's House Privileges and Elections Committee from bottling up ERA, as that panel has done since 1973 and last week voted 12 to 8 to do again.

But the spirit of the Constitution, at the very least, ought to encourage state legislatures to debate and vote on amendments that Congress has proposed. Changing the federal charter is a decision of far greater magnitude than the run-of-the-mill legislation the House usually considers. If representative government means much, it surely means that all the people, through their state representatives, should have a voice in that national decision.

Down in Richmond, though, four-fifths of the House of Delegates have never voted on ERA straight-forwardly, because a few of their colleagues—12 this year—have stood between the measure and the House and proclaimed, "It shall not pass." This may or may not reflect the views of most delegates or most Virginians. Nobody knows. ERA's backers are not counting on Virginia, though there are signs that the amendment does have considerable support throughout the state. The only fair way to find out is to have all the delegates answer a roll call—and then answer to their constituents for their votes.

Perhaps fairness is no longer a factor in this fray. Perhaps ERA has taken on so much emotional and political freight in Richmond that the House can no longer address it squarely at all. There have certainly been enough setbacks and shenanigans in the past six years to make even the most decorous ERA supporters scream a bit from sheer frustration. But the House of Delegates can still redeem itself. It should amend its rules, retrieve the measure from its committee, or otherwise bring ERA to a floor vote before the congressionally set deadline in March of next year.

The SPEAKER. The time of the gentlewoman from Massachusetts has expired.

Mrs. CHISHOLM. Mr. Speaker, I yield 1 additional minute to the gentlewoman from Massachusetts.

Mrs. HECKLER. I thank the gentlewoman from New York for yielding.

In this age of acronyms, the meaning of ERA is almost universally known: "Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex." It is a topic of nationwide debate. This debate goes beyond the substantive question of whether the ERA should or should not be the 27th amendment to the Constitution to a procedural issue of extending the deadline for its consideration by the States.

In my view, this procedural question of extension of the deadline for 7 years beyond the present March 1979, cutoff date goes to the heart of a concept basic to American society: the opportunity for full discussion of matters of national concern.

When the Congress overwhelmingly approved the ERA in the early part of this decade, it continued a recent practice of setting a 7-year limit for consideration by the States of a proposed amendment—no time limits at all were set for most of the first 20 amendments—in order to have the issue settled within a "reasonable" time. Reasonableness of time as to ERA was based partly on the

then prevailing view that the issue would be fully debated and acted upon—either positively or negatively—by middecade.

Instead, contrary to that view, the intensity of debate on this matter of significant political, social, and economic concern and the slowness of State legislatures in bringing the matter to a vote have combined to make the 7-year period now appear in retrospect to have been unreasonable.

At a time when more and more individuals, officials, and representatives of organizations are enterng the debate, there is the prospect that they will be denied their say, unless House Joint Resolution 638, which I am cosponsoring, is adopted, thereby extending the discussion period to March 1986. Complex economic issues such as discrimination against women in countless existing statutes, among them the social security law and the equal pay act, must be fully and fairly discussed, and the issue of supposed loss of rights must be fully considered, dispelling what are the myths and fictions, while resolving genuine questions.

Some States that have yet to act on ratification have no legislative sessions in 1978, among them Nevada and Arizona. In other States, such as Utah, where only the budget will be considered in 1978, legislators have used intricate procedural devices to preclude consideration of the amendment. Moreover, with the memberships of those legislatures slated to be voted upon in the November 1978, election, there is little opportunity—unless the period is extended—for voters to have their views, as expressed by their selections in the voting booths, truly reflected in legislative rollcall yeas and nays on the ERA.

Representatives of the Justice Department have testified that in their opinion the Congress has the constitutional and legal right to extend the deadline. When the ERA was drafted the 7-year provision was inserted in a procedural clause—the preamble—a clause which is separate and distinct from the ERA amendment already approved by 35 of the 38 needed States.

In my judgment Congress has not only the right but also the responsibility to extend the deadline, if only to demonstrate its concern for the issues to which the ERA responds, and to acknowledge the widespread public interest in and discussion of these issues.

I hope Congress will exercise that right and fulfill that responsibility, keeping the forum open for much-needed local, State, and national debate. To do otherwise—to allow the March 1979, cutoff to go into effect—would be to draw the curtain on many, both proponents and opponents, who are waiting in the wings to have their say.

Mrs. CHISHOLM. Mr. Speaker, to close the debate on the rule, I yield 4 minutes to the gentleman from New Jersey (Mr. RODINO), chairman of the Committee on the Judiciary.

Mr. RODINO. Mr. Speaker, I strongly urge the House to adopt the rule under consideration; it would be a mistake to defeat the previous question.

The Judiciary Committee did not approach its inquiry into this matter lightly. The constitutional and procedural questions were met head on—they were studied closely, they were the subject of lengthy testimony from the Nation's most eminent legal scholars.

Mr. Speaker, it is inaccurate to suggest that somehow we have overlooked the issue of whether House Joint Resolution 638 requires a two-thirds vote or can be passed by simple majority. That issue has been studied exhaustively by the committee.

Let me assure the House that a very hard look has been taken at that very question.

The Department of Justice was clear in its testimony before the Judiciary Committee. Assistant Attorney General Harmon said this:

> With regard to the question whether the resolution to extend the period must be approved by a two-thirds vote in each House or whether a simple majority is constitutionally sufficient, it is my opinion that a two-thirds vote is not required.

Mr. Harmon cited two Supreme Court cases to substantiate the Department's position. He pointed out that Dillon against Gloss and Coleman against Miller, read together, establish that it would frustrate constitutional principles to require a supermajority to resolve issues subsidiary to the text of the proposed amendment itself. And he concluded by saying:

> Moreover, a requirement of a two-thirds majority would be incompatible with the operating principle of our Constitution that those cases in which a greater than majority vote are to be required are clearly contemplated and made explicit in unmistakable language.

The committee, however, probed further. It sought the opinion of important constitutional thinkers outside the Department. And it found support for the Department's position. Professor Tribe of Harvard, Professor Emerson of Yale, Professor Ginsburg of Columbia—they all assured the committee that only a majority vote was required to pass House Joint Resolution 638.

Under the decisions of the Supreme Court, Mr. Speaker, and by historical precedent two things are clear: an amendment to the Constitution may become valid only if ratified "within some reasonable time" after its proposal, and the Constitution commits to Congress both the power and the duty to decide whether that implied condition of reasonableness has been satisfied. And the Justice Department emphasizes there is no reason whatsoever to believe the Constitution requires other than a majority vote on that issue, or on any issue subsidiary to the actual proposal of the amendment. Such was the case at the time of the ratification of the 14th amendment, and there is simply no reason to defeat the previous question on the rule to test that issue yet again.

This is a subsidiary matter. In considering it, surely, we need not impose upon ourselves a requirement not imposed by the Constitution itself. I urge adoption of the rule.

Mrs. CHISHOLM. Mr. Speaker, I move the previous question on the resolution.

The SPEAKER. The question is on ordering the previous question.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. VOLKMER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 243, nays 171, not voting 18, as follows:

NOT VOTING—18

Breaux	Milford	Shipley
Caputo	Mitchell, Md.	Sisk
Dent	Moffett	Teague
Harrington	Risenhoover	Tsongas
Le Fante	Ruppe	Young, Alaska
Lloyd, Tenn.	Russo	Young, Tex.

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Russo against.

Mr. Mitchell of Maryland for, wtih Mrs. Lloyd of Tennessee against.

Mr. Le Fante for, with Mr. Breaux against.

Mr. Moffett for, with Mr. Shipley against.

Until further notice:

Mr. Dent with Mr. Caputo.

Mr. Harrington with Mr. Ruppe.

Mr. Risenhoover with Mr. Milford.

Mr. Sisk with Mr. Tsongas.

Messrs. ROSE, WATKINS, and THONE changed their vote from "yea" to "nay."

So the previous question was ordered.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR A TWO-THIRDS VOTE OF MEMBERS PRESENT AND VOTING ON FINAL PASSAGE OF HOUSE JOINT RESOLUTION 638

(Mr. QUILLEN asked and was given permission to address the House for 1 minute.)

Mr. QUILLEN. Mr. Speaker, at the conclusion of my remarks I shall offer a resolution involving a question of the privileges of the House and ask for its immediate consideration.

Mr. Speaker, the "Resolved" clause of my resolution demands a two-thirds vote on final passage of the constitutional resolution extending the ERA. At the appropriate time I will offer my privileged resolution.

The SPEAKER. The Chair will state to the gentleman from Tennessee (Mr. QUILLEN) that now is the time for the gentleman to offer his resolution.

PRIVILEGES OF THE HOUSE—PROVIDING FOR A TWO-THIRDS VOTE ON MEMBERS PRESENT AND VOTING ON FINAL PASSAGE OF HOUSE JOINT RESOLUTION 638

Mr. QUILLEN. Mr. Speaker, I rise to a question of the privileges of the House and offer a privileged resolution (H. Res. 1315) involving a question of the privileges of the House, and I ask for its immediate consideration.

The SPEAKER. The Clerk will report the resolution.

First, the Chair will state that he has had an opportunity to examine the resolution as offered by the gentleman from Tennessee (Mr. QUILLEN), and in the opinion of the Chair the resolution presents a question of the privileges of the House and may be considered under rule IX of the rules of the House.

The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 1315

Whereas H.J. Res. 638 of this Congress amends H.J. Res. 208 of the 92nd Congress, proposing an amendment to the Constitution;

Whereas H.J. Res. 208 of the 92nd Congress was passed by an affirmative vote of two-thirds of the Members present and voting, as required by Article V of the Constitution, and submitted for ratification on March 22, 1972;

Whereas the integrity of the process by which the House considers changes to H.J. Res. 208 of the 92nd Congress would be violated if H.J. Res. 638 were passed by a simple majority of the Members present and voting; and

Whereas the constitutional prerogatives of the House to propose amendments to the Constitution and to impose necessary conditions thereto in accordance with Article V of the Constitution would be abrogated if H.J. Res. 638 were passed by a simple majority of the Members present and voting;

Resolved. That an affirmative vote of two-thirds of the Members present and voting, a quorum being present, shall be required on final passage of H.J. Res. 638.

Mr. EDWARDS of California. Mr. Speaker, I move to table the resolution.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. EDWARDS).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 230, nays 183, not voting 19, as follows:

[Roll No. 703]

NOT VOTING—19

Caputo	Moffett	Teague
Dent	Pursell	Tsongas
Harrington	Risenhoover	Wilson, Tex.
Le Fante	Ruppe	Young, Alaska
Lloyd, Tenn.	Russo	Young, Tex.
Milford	Shipley	
Mitchell, Md.	Sisk	

The Clerk announced the following pairs:

On this vote:

Mr. Mitchell of Maryland for, with Mrs. Lloyd of Tennessee, against.

Mr. Teague for, with Mr. Russo, against.

Until further notice:

Mr. Dent with Mr. Ruppe.

Mr. Risenhoover with Mr. Sisk.

Mr. Moffett with Mr. Caputo.

Mr. Le Fante with Mr. Harrington.

Mr. Tsongas with Mr. Milford.

Mr. Shipley with Mr. Pursell.

Mr. Charles Wilson of Texas with Mr. Young of Alaska.

So the motion to table was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER. The Chair recognizes the gentleman from California (Mr. EDWARDS) to offer a motion.

POINT OF ORDER

Mr. ASHBROOK. Mr. Speaker, I make a point of order against the present consideration of House Joint Resolution 638.

Mr. Speaker the committee report on House Joint Resolution 638, House Report 95–1405, clearly takes the position that the resolution about to be called up amends statutory law and does not amend the constitutional amendment which was submitted to the States by House Joint Resolution 208 adopted on October 12, 1971, by the House and March 22, 1972, by the other body. This position is further evidenced by the view of the majority of the committee that only a simple majority is required for the passage of the pending resolution, which position was just affirmed by vote of the House on tabling the Quillen resolution of privilege and in voting down the previous question on the rule.

Apparently the committee and supporters of the pending resolution feel that it will only amend the preamble of House Joint Resolution 208 which they deem to be statutory.

That being the case, I call attention of the Chair to clause 3 of rule XIII of the rules of the House, the so-called Ramseyer rule, which requires that any joint resolution amending "any statute" must contain in the report a proper printing showing the statutory changes set out in distinctive type. The report on the pending resolution does not comply, or even attempt to comply with the Ramseyer rule and, therefore, I make a point of order that it is not in order to consider the resolution at this time until such compliance is achieved.

Mr. EDWARDS of California. Mr. Speaker, may I be heard on the point of order?

The SPEAKER. The gentleman from California (Mr. EDWARDS) will be heard on the point of order.

Mr. EDWARDS of California. Mr. Speaker, I rise in opposition to the point of order raised by the gentleman from Ohio (Mr. ASHBROOK).

It is the position of the House Committee on the Judiciary that a "Ramseyer" is not required, and I ask for a decision against the point of order.

The SPEAKER. The Chair is prepared to rule.

In the opinion of the Chair, the joint resolution does not amend any law and a Ramseyer is not required.

The Chair will cite rule XIII on page 485 of the Rules of the House of Representatives:

In order to fall within the purview of the rule, the bill must seek to repeal or amend specifically an existing law. (Cannon's VIII, 2235).

So the point of order raised by the gentleman from Ohio (Mr. ASHBROOK) is not in order.

PARLIAMENTARY INQUIRIES

Mr. WIGGINS. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. WIGGINS. Mr. Speaker, upon the conclusion of our consideration of House Joint Resolution 638, including the adoption of any amendments to it, when the question is put on the final passage of that resolution, must the vote of the House to adopt the joint resolution be by a simple majority of those present and voting or by two-thirds of those present and voting?

The SPEAKER. In response to the parliamentary inquiry raised by the gentleman from California, the Chair feels that the action of the House in laying on the table House Resolution 315 was an indication by the House that a majority of the Members feel a majority vote is required for the final passage of House Joint Resolution 638. The Chair would cite the precedent contained in Cannon's VIII, section 2660, that affirmative action on a motion to lay on the table, while not a technical rejection, is in effect an adverse disposition equivalent to rejection.

The Chair, by ruling that House Resolution 1315 properly raised a question of the privileges of the House under rule IX, believed it essential that the question of the vote required to pass House Joint Resolution 638 be decided by the House itself. The House now having laid that resolution on the table, the Chair feels that the result of such a vote, combined with the guidance on this question furnished by the Committee on the Judiciary on page 6 of its report, justifies the Chair in responding that, following the expression of the House, House Joint Resolution 638 will be messaged to the Senate if a majority of those present and voting, a quorum being present, vote for passage.

Mr. WIGGINS. I have a further parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. WIGGINS. Do I understand the ruling of the Chair correctly to be that a vote not to consider a privileged resolution is equivalent to a rejection of the text of the resolution itself?

The SPEAKER. The vote was not on the question of consideration. The Chair will state that he believes he has answered the question raised in the gentleman's original inquiry. The Chair has stated that a motion to table is an adverse disposition.

Mr. WIGGINS. Mr. Speaker, I understood the answer, then, to be "Yes?"

The SPEAKER. The answer is "Yes."

PROPOSED EQUAL RIGHTS AMENDMENTS EXTENSION

Mr. EDWARDS of California. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 638) extending the deadline for the ratification of the equal rights amendment.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. EDWARDS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 638), with Mr. PIKE in the chair.

The Clerk read the title of the joint resolution.

The CHAIRMAN. Without objection, the first reading of the joint resolution will be dispensed with.

Mr. BAUMAN. Reserving the right to object, Mr. Chairman, I wonder whether we can have order, first of all.

Further reserving the right to object, Mr. Chairman, can the Chair do the

Committee of the Whole the honor of stating the rules of the House governing the conduct of those in the galleries during debate.

The CHAIRMAN. The Chair will simply state, as the gentleman is well aware, for the benefit of those in the gallery that those in the gallery are to remain silent during the debate and to show by neither expressions of approval or disapproval their views as to the proceedings on the floor.

Mr. BAUMAN. I thank the Chair and withdraw my reservation of objection.

The CHAIRMAN. Without objection, the further first reading of the joint resolutions will be dispensed with.

There was no objection.

The CHAIRMAN. Under the rule, the gentleman from California (Mr. EDWARDS) will be recognized for 1 hour and the gentleman from Virginia (Mr. BUTLER) will be recognized for 1 hour.

The Chair recognizes the gentleman from California, (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, I suggest that a reading of the newspapers over the past few weekends emphasizes the importance of this legislation.

Does the country need ERA? Listen to this.

The Justice Department admits that discrimination against women in professional positions at the Department of Energy has been so flagrant that the women will be paid up to $12 million in damages.

Since January 1975 women at the agency were hired for same jobs as men but were paid $3,000 less a year.

And, regardless of merit, the men got promoted.

And the U.S. Farmers Home Administration agreed to eliminate what one civil rights official called an alarming bias against women in farm loan programs.

Women farmers were being denied loans and farm widows were discriminated against at most critical time.

The regulations had references to "the borrower's wife."

Those examples just came to light recently and took place in our Federal Government.

In the U.S. Federal Code, the U.S. Commission on Civil Rights in 1977 found over 800 provisions which would assign to women an inferior role.

If the discrimination is that pervasive in the Federal Government, can you imagine how huge it is in the remainder of our national life.

A key problem is while the Supreme Court affords "close judicial scrutiny" to charges of discrimination against racial minorities, it has been unwilling to label sex an "inherently suspect classification" while ERA is pending.

In the 1973 Frontiero case (411 U.S.C. 677) Justice Powell's concurring opinion, joined in by Justice Blackmun and Chief Justice Burger, he said the Court was not going to make that decision—that it was up to the legislative process, specically the ratification or nonratification of ERA.

Mr. Chairman, cases since Frontiero have not resolved the issue. Yes, cases have been won by women. Some Federal and State laws have been enacted to eliminate sex bias.

But the case by case route is incoherent, expensive, and divisive. A single national mandate is required. Ratification of ERA is essential to achieve equity for the majority of American citizens.

Indeed, failure to enact this legislation—as reported by Judiciary Committee—will be taken as a signal by the courts and by the legislators that we do not want progress to continue—that we do not want equal rights for American women.

When the extension legislation proposed many months ago was assigned to the Judiciary Subcommittee I chair, as was the original ERA constitutional amendment 6 years ago, we determined to take a long, hard look at the proposition.

We wanted to be certain of two things: Is it constitutional and just as important; is it a wise and good thing to do?

On the first question; it is constitutional. The record compiled by the subcommittee is substantial. We have proceeded slowly and with caution. We have explored the issue carefully.

Some of the best legal minds in the country have been consulted. The large majority is of opinion that Congress has the authority to enact such legislation by majority vote. There are some who disagree, but in the end a majority of the subcommittee and of the full Judiciary Committee strongly believe that the legal case for extension is much stronger than the case against it.

Indeed, Mr. Chairman, the Judiciary Committee is more united in favor of this extension legislation than it was for the original ERA bill 6 years ago. Then, the Judiciary Committee refused to endorse the ERA proposal, and reported to the full House and emasculated version that was totally unsatisfactory.

The House then, in its wisdom, overturned the Judiciary Committee, rejected the ruinous amendment (Wiggins) approved by the committee, and went on to approve the bill by the overwhelming majority of 354 to 23.

Today we will have a replay, in a certain sense, of a vote on an amendment that if approved, would destroy the legislation just as surely as the Wiggins amendment of 6 years ago would have.

That amendment is the Railsback proposal that purports to amend article 5 of the Constitution.

The difference is that 6 years ago the Judiciary Committee supported Mr. WIGGINS by a single vote. In Mr. RAILSBACK's case, the Judiciary Committee defeated his amendment by a vote of 21 to 13. We ask that you make the same wise decision today.

Since James Madison first expressed the view nearly 200 years ago that the act of ratification by a State must be "in toto" and "forever," Congress, the courts, and virtually all legal scholars who have addressed the question have accepted the principle that article V of the Constitution recognizes the validity only of affirmative acts. With regard to the constitutional amendment process, the rule has meant that a State that first rejects a proposed amendment may later ratify it and a State, once it ratifies an amendment, may not later rescind the earlier ratification. Simply stated, article V gives a State the power to bind subsequent legislatures by its ratification, but not its rejection of a proposed constitutional amendment.

In 1788, the convention called in New York to consider ratification of the newly proposed Constitution followed Madison's principle. In 1789, the State of North Carolina, and in 1791, Pennsylvania, did the same. In 1868, the full Congress applied Madison's principle when it declared ratification of the 14th amendment. In 1870, 1913, 1919, and 1920 the Secretary of State (exercising the authority now granted to the General Services Administration under 1 U.S.C. 106b), recognized and applied Madison's principle in proclaiming ratification of the 15th, 16th, 18th, and 19th amendments. The Senate most recently acknowledged the historic acceptance of the principle in 1971, when it was considering a bill to establish procedures for calling constitutional conventions.

In 1939, seven Justices of the Supreme Court reaffirmed Madison's principle in *Coleman* v. *Miller*, 307 U.S. 433, stating the view that the law on this question had been settled by "historic precedent." Although the Coleman decision characterized the question as a "political" one, we share the view of Prof. Noel T. Dowling expressed the following year that the result reached by the Court "involve[d] something akin to a decision on the merits" and that this aspect of Coleman was in reality "a pronouncement on the law."

In light of the foregoing history, we believe that Madison's principle that a State's ratification must be "in toto" and "forever" is firmly embedded in our constitutional jurisprudence and that State legislatures and legislators are bound by that rule in 1978 as they have been throughout the life of the Constitution. Congress power, derived from article V, to tend to the subsidiary details of the amendment process cannot be extended to sanction recognition of the validity of a State's purported rescission, which would abrogate this basic constitutional principle.

Mr. RAILSBACK says in his amendment that even if article 5 does not permit rescission by the State, Congress can nevertheless provide for rescission by a majority vote resolution.

There are two answers to that proposition.

First, if article V itself requires a State's ratification to be "in toto" and "forever," we believe it indisputable that a congressional action providing for rescission would be nothing less than a repudiation of Madison's principle. If Congress wants to do that, it must amend article V.

Second, nothing the 95th Congress does with regard to rescission would prevent the 96th or a subsequent Congress

from refusing to recognize the validity vent the 96th or a subsequent Congress were to be presented the question of ratification of the proposed equal rights amendment. This proposition flows from the fundamental tenet that one Congress cannot bind a future Congress with respect to questions of constitutionality and policy, and also from the conclusion that questions involving the constitutional amendment process are governed by article V and not by the legislative judgment of a particular Congress. In other words, questions such as rescission inevitably must be resolved as a matter of constitutional interpretation rather than as a matter of policy choice.

This is not to say that Congress may not in appropriate circumstances express its views on constitutional questions, including the question of rescission. The 95th Congress might desire to communicate to future Congresses and to the States its view that the validity of rescissions by the States during an extension period should be recognized by Congress should the occasion to do so present itself. We do not recommend that course. As Prof. Charles Black wrote in a letter to Chairman Rodino in 1972, (arguing against the wisdom of S. 215), even though such a bill would not bind future Congresses, "it might be used as a specious talking-point supporting the assertion of an obligation which, on reflection, cannot be created, morally or practically," by the 95th Congress. On the contrary, based on 190 years of constitutional precedent, it may be unfair to the States to suggest at this time that their rescissions would be recognized as valid and binding by a future Congress.

There are some who say that ratification has had a fair shot at winning and that we are trying to change the rules of the game by extending the time.

Well, it is not a game. It is a matter of justice for American women.

The issue of discrimination against women is a vital American issue and the people and the legislators should have ample time to discuss it and vote on it.

The time limit of 7 years is not a part of the resolution that would be added to the Constitution.

Indeed, it was not until the 18th amendment that a time limit was included. The first 17 had none. The 19th had none.

All of this history, coupled with the Supreme Court's ruling in Dillon against Cross that Congress has a wide range of power in prescribing subsidiary details such as a reasonable time and the underscoring in Coleman against Miller impels the conclusion that this Congress does indeed have the power to extend the original 7 year period.

Mr. Chairman, other considerations will be raised in the reading of the bill. I assure you that any and all of the possible objections have been considered in great depth by the Judiciary Committee.

I assure you that the legislation we bring to the House today is not only constitutionally sound. It is also good and decent legislation.

ERA is more vitally needed and more widely supported than in 1972. Hardly a day—hardly an hour—passes without some incident of discrimination because of sex.

The ERA is needed for women—and for American men too—as the 14th amendment was needed a hundred years ago for black Americans.

Mr. RINALDO. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. Mr. Chairman, I yield myself 1 additional minute, and I yield to the gentleman from New Jersey.

Mr. RINALDO. Mr. Chairman, I would like to have a question answered that will play a key role in my decision on this measure. Furthermore, I think it is important to the extension vote that we get the question and answer on the record.

Mr. Chairman, will the gentleman assert for the record that the equal rights amendment is a measure which does not recognize the right to abortion to exist anywhere in the Constitution, including that which was held to exist by the Supreme Court in the Roe against Wade decision?

Mr. EDWARDS of California. Mr. Chairman, in answer to the gentleman, I do so assert. Roe against Wade was premised on a theory and right to privacy and not on the grounds that sex discrimination was present.

Mr. RINALDO. Mr. Chairman, if the gentleman will yield further; in other words, there is no connection between the extension of ERA and the right to abortion?

Mr. EDWARDS of California. That is correct.

Mr. RINALDO. Mr. Chairman, I thank the gentleman, and based on that assurance, I will support the extension.

Mr. BUTLER. Mr. Chairman, I yield myself 4 minutes.

Mr. Chairman, I yield to the gentleman from Illinois (Mr. CRANE), the next President of the United States.

Mr. CRANE. Mr. Chairman, I thank my distinguished colleague from Virginia for yielding.

Mr. Chairman, no one is in favor of artificially imposed inequality, and certainly reasonable people do not want to deny women either equal opportunity or equal pay for equal work. For all of that, I rise in opposition to efforts to extend the period of ratification of the equal rights amendment. Approving House Joint Resolution 638 would be a serious evasion of our collective and individual responsibilities to defend and protect the Constitution of the United States.

The very process of amending the Constitution is at stake; such a venerable document should be altered only when a strong consensus so dictates. The process is slow and deliberate by choice. Article V expresses the congressional duty of specifying the means of amending the document. Congress must decide if a time limit is necessary on the ratification period of a constitutional amendment and has done so since early in this century. Any retroactive change in the time frame because the desired result has not been achieved violates the solemn spirit with which any constitutional amendment should be approached.

Clearly, in the case of the equal rights amendment, Congress has performed its duty. In 1972, the amendment was sent to the States clearly bearing a 7 year time limit for ratification, as all such proposals since the 18th amendment have included. In light of the fact that all amendments to the Constitution have been ratified in 4 years or less, this is a fair time requirement. Only three amendments have taken more than 3 years—the 11th, the 16th, and the 22d—and five have taken less than 1 year to receive the required number of approvals by State legislatures—the 12th, 13th, 20th, 21st, and the 26th. Not only is this time limit reasonable; it is necessary to insure contemporaneity. The ratification of an amendment must reflect the will of the people from all sections of the country at relatively the same period of time.

Indeed, there is nothing contemporaneous about extending the ratification period 3 or more years. Even should such an extension be granted, I am not sure that the required number of States could be found in support of the amendment. Thirty of the 35 States that have approved the amendment did so within 1 year of its submission to the States. During the last 5½ years, only five States have been added in the approval column; in the same period, four have voted to rescind approval. Over this period, the equal rights amendment has been rejected either in committee or on the floor nearly 90 times in the legislatures of the 15 States that have never ratified. The statistics clearly support the fact that this equal rights amendment has stalled. Efforts by the supporters at this point could best be spent toward securing the necessary votes before the curtain falls on March 22, 1979, or plotting the strategy for success with a new piece of legislation.

Should this extension be granted, the question of what to do with those States that have approved it prior to this time is raised. A study by Prof. Jules B. Gerard, professor of law at Washington University, indicates that 24 of the States that have favored the proposed amendment up to this point included the time limit either directly or indirectly in their deliberations. Responding studies by the Justice Department and the Congressional Research Service present the case that the 7-year time limit is not part of the amendment itself; therefore, it is dispensable language. This does not concur with past experience. The limitation language included in past amendments has been retained; indeed, the time constraints on the 18th, 20th, and 21st amendments continue to clutter up the Constitution and will remain there forever.

A venerable document such as the Constitution should be altered only when a strong consensus so dictates. The belief that all persons deserve equal liberties boasts such a mandate; that the equal rights amendment is the necessary means to this end is not so clear. One fact not shadowed by doubt is that to extend the period of ratification would set bad precedent. Altering the ratification process because of pressure from the groups involved is a step I am wary of taking.

The end of the ratification period does not preclude further debate, and there is no obstacle to reintroduction of the same or a similar resolution. However, extending the period of approval amid questions of the constitutionality of such an action is dangerous indeed. I caution my enlightened colleagues to avoid such an act.

Mr. BUTLER. Mr. Chairman, all of us are faced with a very difficult decision; one which I believe most of us would prefer not to make. In light of the virtual certainty that the other body will not consider this measure this year and the promise of considerable litigation carrying over well into any extended period, I am puzzled why proponents have asked all of us to dive into political quicksand and rush to resolve several very difficult constitutional questions.

We should consider this resolution with the full realization that it is without precedent, and that we are dealing with the fundamental law of the land—the Constitution of the United States. Every step we take involving this process should be in complete compliance with the Constitution and free from doubt. If we err, it should be on the side of caution.

Article V of our Constitution establishes the procedures for its amendment. The process is by design a deliberate one. The obstacles to change are substantial. If 13 of the 49 State legislatures in the country decline to affirmatively ratify a proposed constitutional change, they can frustrate its most fervent proponents. In my judgment, this is as it should be. It is a careful and solemn process.

The framers purposely crafted the process this way in order to permit fundamental changes to our Constitution only after a large majority of the American people have agreed to the change at substantially the same time. It has worked: there have only been 26 amendments to the Constitution.

No amendment in our Constitution has taken more than 4 years to achieve ratification, and most have been ratified within just 1 year.

One year after its submission to the State legislatures, 30 States had ratified the equal rights amendment. Since that time, only 5 more States have ratified, but 4 have rescinded their earlier ratifications.

As the time for ratification of the equal rights amendment extends further and further beyond the time of its first submission and earliest ratifications, it is less and less certain that a substantial majority of the American people still support the proposed amendment.

It is well to remember, however, that extension of the ratification period has very little, if anything, to do with the merits of the equal rights amendment itself. The extension question just happens to have been raised with respect to this amendment because it is in trouble. The constitutional process is the issue; and, of course, that is the reason a number of the witnesses before the subcommittee who have voted in their legislatures or in this Congress for the equal rights amendment are opposed to this extension.

Any action taken by the Congress, however, will create precedents affecting ratification of future constitutional amendments. Thus, we are confronted with an important policy decision with extensive implications—far beyond the equal rights amendment.

There is considerable doubt about the authority of Congress to consider an extension of the time limitation for ratification. That fact alone should, but will not, be decisive.

Congress has the power, proponents tell us, to change the time because one Congress cannot bind a subsequent one on a procedural matter; and this time limitation is merely a matter of procedure and not substance. They rely for support on two Supreme Court cases—*Dillon* v. *Gloss*, 256 U.S. 368 (1921), and *Coleman* v. *Miller*, 307 U.S. 433 (1939).

In Dillon, the Supreme Court decided Congress had the authority under article V to fix a time for ratification as an incident to its power to determine the mode of ratification. The only requirement of Congress when it fixes a definite time is that the time limitation must afford the States a reasonable time to ratify. In Coleman, the Court added that what constitutes a reasonable limit of time for ratification is a political matter, soley in the power of Congress to determine under article V.

In short, proponents tell us that Congress has the authority to set time limitations and determine their reasonableness. What they fail to note, however, is that neither Dillon nor Coleman is on point. In Dillon, the time limitation was in the text of the amendment and could not have been changed by any subsequent Congress once set by the proposing Congress. In Coleman, the proposed amendment did not contain any time limitation. In fact, the Court looked for a time limit in both the text of the proposed amendment and in the resolution of submission; then and only then, did the Court reject petitioners' argument that the Court can and should decide what is a reasonable period for ratification.

What these cases tell me is that Congress does not possess the power to extend the time. The power of Congress ends when it enacts the resolution of approval, only to be reopened when it determines whether there has been ratification or not. To suggest that a different effect results because a Congress decided to unclutter the Constitution and place the time limitation in the proposing clause rather than in the text, misreads the case law.

All agree that Congress is prohibited from changing its designated mode of ratification or the text of a pending amendment. Subsequent Congresses are certainly bound to honor these article V prerogatives selected by a prior Congress. A time limitation is no more or less procedural than designating a mode of ratification. And when the evidence suggests, as it does here, that inclusion of a time limitation was necessary to secure a coalition of votes sufficient to propose the amendment to the States, I submit the time period is unalterable.

The constitutional amendment process is analogous to the conclusion of a contract between parties. The Congress has made an offer to the States that a change in the Constitution will be effected and a compact concluded if three-fourths of the State legislatures agree within 7 years. Any change in the terms of the offer by extension of time is a withdrawal of the earlier proposal.

Accordingly, the States have been led to believe that failure to ratify within 7 years will terminate the offer. Moreover, they have relied upon this assurance. To now alter the terms of the offer would be a breach of faith unwarranted by the circumstances.

House Joint Resolution 638 might be more appealing to me if an affirmation of the States' power to rescind prior ratifications were included in the resolution. The contractual relationship in the ratification process between the Congress and the States as envisioned by article V makes it completely inappropriate for one party to alter the terms of its part of the bargain without permitting the other party to at least reconsider its previous acceptance. Isn't it only fair that an extension of time should permit consideration of this proposed amendment by all parties, not just those who have failed to accept the unaltered offer during the first time period?

In sum, House Joint Resolution 638 in its present form is inappropriate. It is so clearly surrounded by unanswered questions and immersed in doubt that it will result in poor policy and set a bad precedent. It is an unwarranted intrusion in the constitutional amendment process, which can only be perceived by the States and the people as a breach of faith.

Moreover, it is simply unnecessary. The alternative to this resolution, which is clearly the proper approach, is resubmission. That would not violate the process. Congress will not have to take this very questionable step, and once and for all, we will learn whether the equal rights amendment is still politically and socially viable and wanted by our constituents as much in 1979 as it was in 1972.

Mr. GOLDWATER. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from California.

Mr. GOLDWATER. Mr. Chairman, I thank the gentleman for yielding.

As one Member who voted for the original equal rights amendment I rise in opposition to the legislation which would extend the time limitation for ratification of the equal rights amendment. My position on this is not based on the merits of the amendment itself, but rather on the lack of merit of the time extension legislation. I have heard it said today that those of us who oppose this legislation are demonstrating arrogance by making constitutional pronouncements, and I would answer that there is nothing more arrogant than the assumption that right and goodness resides on only one side of a debatable question and I would further suggest that John Stewart Mill was correct in his estimation of the importance of the right of private judgment. I have also heard that we should pass this time extension because it is a symbol, but I would say that we are not

dealing here with symbols. We are dealing with written law, and there are written laws and rules governing how we may enact laws. I have also heard that somehow those of us who oppose the extension are engaging in sophism for purposes of avoiding the ERA, but I would say that the issue of sophism is entirely esoteric in this case.

We will not be voting on the equal rights amendment today; we will be voting on a joint resolution, to extend the allowable time for ratification of a proposed amendment to the Constitution. And I construe that the weight of evidence indicates that what we are considering today is improper legislation, that it is unfair, and finally that it is unconstitutional.

Why is this improper legislation—if, indeed, the term "legislation" can be applied in this case? Article VI of the Constitution gives Congress only three ways to create a legal obligation—treaties, laws, and constitutional amendments. In none of these cases may Congress act alone; it must act in concurrence with another institution of government, either the States or the President. Implicitly, Congress does not have the power to create new methods of legal obligation, but that is exactly what we are trying to do. House Joint Resolution 638 will not be sent to the President for signature and it will not go the to States for ratification. This is a totally new legislative vehicle. I believe my colleague from California (Mr. WIGGINS) is correct when he states:

> What an anomalous result it would be that our system requires a law to appropriate a penny but allows Congress—unchecked—to alter the amendment process during the pendency of a proposed constitutional amendment.

Why is the extension unfair? I have heard many slogans, but not one of them mitigates the fact that we are changing the rules at the last minute. If we would be outraged at changing the rules in a football game and furthermore rigging those rules to the benefit of one side, how much more of an outrage is it when we are trying to do precisely that for something as serious and as far reaching as amending the Constitution? Even such stalwarts of the liberal press as the Washington Post and the New York Times has called this legislation unfair and urged its rejection. Both those publications have strongly endorsed the passage and ratification of ERA, but they detect something terribly wrong with the time extension.

The proponents want 3 more years to try and change the minds of the 15 States which have thus far refused to ratify; but the resolution does not allow those who have voted "yea" to change their minds and vote "nay." In other words, we are going to change the rules to allow action on the amendment, but we are only going to allow one kind of action—ratification. I have heard it said today that this extension is fair because the opponents of ERA are "liars"; that their claims are "preposterous" and that more time is needed to straighten their thinking out. Talk about arrogance. I would say, Mr. Chairman, that all reason and all scholarship does reside with one side, and perhaps—just perhaps—those legislatures which have rejected the amendment have done so with scholarship and reason.

Finally, and most importantly, the time extension imposes several serious constitutional questions.

The Supreme Court in Dillon against Gloss stated that article V of the Constitution strongly implies that "proposal and ratification were but succeeding steps in a single endeavor"; that amendments "should be considered and disposed of presently"; and that "ratification must be within some reasonable time after the proposal." Is the Congress unduly interferring with the ratification process which is strictly under the purview of the States? I say we are. We sent them an amendment and told them in the resolution that their ratification would be automatically rescinded if three-fourths of the States failed to ratify within system years. The Constitution does not provide for the Congress' participation in the ratification process nor does it provide for going back to the Congress for another vote on the issue.

This amendment is to be passed by a simple majority in the House. I say this is patently unconstitutional. It took a two-thirds majority to pass the resolution containing the equal rights amendment, but we are now going to try and amend that resolution by a simple majority. The Congress did not vote for the equal rights amendment in absence of the time limitation. It voted on the resolution which contained the amendment. How then can we constitutionally propose to amend the resolution in this way?

The Judiciary Committee has stated that there is no legal authority for the Congress to shorten the time period; nor does the Congress have the authority to change the amendment itself. If there is no legal or constitutional basis for these two actions, then where, oh where, is that authority for time extension? I would construe that the absence of authority in the first two instances, indicates absence in the third.

In closing I would like to share a quote from the play, "Man for All Seasons." I recognize that there is an enormous amount of emotion surrounding this debate and I do not minimize the import of this issue to those who support the ERA, but even in the pursuit of something you believe in totally, does the end justify the means? Please think about the principle discussed in the following:

> What would you do, Roper, cut a great road through the law to get to the devil? And when the last law was down, and the devil turned round on you—where would you hide—the laws all being flat? This country is planted thick with laws and from coast to coast—Man's laws, not God's—and if you cut them down, do you really think you could stand upright in the winds that blow then?

Mr. EDWARDS of California. Mr. Chairman, I yield 4 minutes to the distinguished chairman of the Committee on the Judiciary, the gentleman from New Jersey (Mr. RODINO).

Mr. RODINO. Mr. Chairman, no order of business can be as important to the House as its commitment to the constitutional protection of equal rights—unless perhaps it is its concern for the integrity of constitutional processes.

Because the resolution before us today directly affects both of these issues, it is a matter of paramount importance. It needs careful analysis and it requires an honest confrontation of issues.

I have given much thought to House Joint Resolution 638 because it is a matter that raises difficult questions. But the Judiciary Committee has not shied from difficult issues in the past, nor has this House.

Mr. Chairman, this resolution is the fruit of an 8 month study. It is on balance a reasonable proposal. It is a workable proposal. It merits the support of the full House.

The resolution needs to be considered in the context of House Joint Resolution 208, adopted by the 92d Congress in 1972. That resolution, submitted to the States for ratification pursuant to article V, proposed a 27th amendment to the Constitution of the United States.

In part, it stated that "equality of rights under the law shall not be denied or abridged by any State on account of sex."

House Joint Resolution 208 also included the following:

> The following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the Legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress.

The 7-year period enunciated by the resolution will expire on March 22 of next year—less than 8 months from today. As of this date, legislatures of 35 States have ratified the amendment. Thirty-eight ratifications, however, are required to satisfy the article V requirement of ratification by three-fourths of the States. In addition, legislatures in four States have adopted resolutions purporting to withdraw or rescind their previously certified ratifications. Clearly, the debate is still ongoing and viable. The Judiciary Committee believes a 3-year, 3-month extension of that debate—in light of the important constitutional principles involved—is a reasonable and workable proposal.

Initially, House Joint Resolution 638 proposed a 7-year extension of the time allowed for ratification. The committee, however, felt that such an extension—equal in time to the initial period granted in 1972—would be excessive.

The committee, however, also focused on issues that are far more significant perhaps than the period of time extended, or even perhaps than the ERA itself. At issue is the constitutional process of amendment. At stake is the meaning of article V. What this Congress does by House Joint Resolution 638 will have ramifications that will apply to all proposed amendments to the Constitution—to the role of the Congress in proposing them and to the role of the States in ratifying them.

The Subcommittee on Civil and Constitutional Rights, so ably chaired for nearly a decade now by our friend and

colleague DON EDWARDS, was not unmindful of that fact. Mr. EDWARDS, when he opened the subcommittee's hearings a year ago, made clear that the issue was not simply whether one was for or against the ERA. Long days of hearings were held, constitutional lawyers were consulted and the most eminent students of American law were placed on the record regarding the constitutional and procedural issues raised by the resolution.

Mr. Chairman, the report of the Judiciary Committee is 64 pages long. I believe it proceeds at the highest level of constitutional debate. I believe it fairly and fully presents the issues for the House. I think the House has a responsibility to address those issues. And as it does, I believe it will conclude—as the committee concluded—that the cause of equal rights surely warrants the adoption of this modest and reasonable resolution.

Mr. BUTLER. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. MCCLORY).

Mr. MCCLORY. Mr. Chairman, if the only purpose of this proposed extension of time for ratifying the ERA is to provide equal pay for equal work, then we certainly would not have to go through this ordeal. We already have the authority legislatively to require equal pay for equal work. There should not be any question about that subject. That is not the issue which we are debating here today. One problem with the proposal before us is that it is unprecedented. It imports all kinds of legal and constitutional doubts. It is going to foist all kinds of litigation on the courts and will involve those who we are trying to benefit. If this measure is enacted this whole subject of equality will be in doubt and in litigation and in limbo for perhaps years and years to come.

Mr. Chairman, I cooperated with the distinguished gentleman from California (Mr. EDWARDS) in 1972 as he handled the equal rights amendment on his side and I handled it on our side, and we succeeded in getting a near unanimous vote. I think there were about 24 votes against this proposal when we adopted it here. And I have supported ratification of ERA in the States, including the State of Illinois, and I would venture to say that the State of Illinois will ratify this amendment before the end of the year. Then, all that is needed is just two more States between now and next March 22, 1979.

What do we have? Five or six more months. They all have legislative sessions except one or two, and the opportunity for ratification is there. But what are we doing? We are wasting our strength and energy and losing our support for ERA through this very unwise and unprecedented and, probably, unconstitutional motion that we are going through here. I think it is a most unfortunate step that we are taking. We are not talking about the merits of ERA here today; we are talking about an extension of time. We are talking about binding a future Congress. We are talking about doing something inconsistent with what was done by a prior Congress. We are providing for a departure from a practice that was adopted 60 years ago. For 60 years we have provided for ratification of constitutional amendments within a 7-year period. And, as a matter of fact, no constitutional amendment that has been ratified has taken longer than 4 years, and all but two of them have been adopted in less than 2 years.

Thirty of these 35 States adopted this constitutional amendment within the first year, and it has taken until now for the next 5 to come along.

But, there is still time for the other three to come along, and that is the area to which we should be devoting our attention. I know we are going to have the subject of rescission here before us in the form of a proposed amendment. I am going to vote against rescission, I might say, because I do not think rescission should be a part of the ratification process. But, I think if we extend the time, I think rescission is implied. I think we will open the gates to rescission in all the 35 States that have already ratified.

If we adopt House Joint Resolution 638 we will be resubmitting ERA to the 50 States with the shortest time limit that has even been provided for the ratification of a constitutional amendment. I do not see how we could be more unwise. I do not see how we could put this subject more in limbo, more in jeopardy, than by supporting this extension. Consequently, it is my hope that we will vote against this proposed extension even though it has been stated that it will never be acted upon in the other body anyway.

But, regardless of that, we should stop devoting our energies on this proposal here in the Congress of the United States. We cannot ratify; we cannot provide one State's ratification in this body. It can only be done in the 50 States. If we do lose out—and on March 22, 1979, less than 38 States have ratified the equal rights amendment, then, what I say is, let us submit it again, and then submit it to State conventions just as the repeal of prohibition amendment was submitted, and get ratification through the State convention process. No amendment was adopted more speedily than that amendment.

We could use that process here. That is a reasonable alternative. But this proposed extension of time for ratification is no alternative at all. It seems to me that this is defeatism. It is a confession that we cannot get ERA ratified by the necessary 38 States, and so we are going to have to extend the period of time. During the extended period, we are apt to have more rescissions, it seems to me, than we are going to have ratifications.

In 1972, I was the chief Republican supporter of ERA in the House, I fought in committee and on the floor against all sorts of limits on equality that then-Chairman Celler and then-ranking Republican McCulloch and former Senator Sam Ervin wished to place on ERA. Although we lost in committee, the House soundly rejected the committee amendments and ERA scored a major victory.

My support for ERA continues undiminished today. When the idea of asking for an extension was first raised last year, I met with several women's organizations in my district to discuss the desirability of such a measure. In their opinion and mine, extension was not a good idea. It appeared to be bad strategy, both legally and politically.

Legally, House Joint Resolution 638 raises many unanswered and unanswerable questions. Do we have the power to amend a proposal of the 92d Congress after 35 States have ratified? If, as proponents say, one Congress cannot bind another, why do we have to act at all? If one Congress cannot bind another, why should we try to bind future Congresses? If Congress can rescind the conditions imposed on ratification, are States bound by their prior ratification? Does the extension nullify those ratifications? Or at least must an extension to be valid permit rescission? Do States generally have the power to rescind ratifications? If not, does extension by necessity create that power? Are these questions reachable by Congress or are they matters of constitutional interpretation for the Supreme Court to resolve? If Congress can act, must it be by a two-thirds vote of each House or by a simple majority? If the latter, must the President sign the resolution? Either way, if Congress can act to extend the time, must it not also have the power to reduce the time?

Well, with all these questions to be answered, the Subcommittee on Civil and Constitutional Rights called in legal scholars of their choice. As one might expect, a majority of those who testified agreed that Congress had the power. But somewhat unexpectedly, there was no agreement how we had the power and there was no agreement on the many other issues I recounted. Unfortunately, the printed hearings do not include statements by Sam Ervin and by Professor Wright.

But even if each and every one of these legal questions could be answered in favor of House Joint Resolution 638, passage of this measure would hurt—not help—ERA. I am certain that discussion of extension has already had some adverse effect. Supporters have more and more come to focus their attention on Congress even though Congress cannot furnish a single ratification. And whatever attempts there may have been for special sessions to ratify ERA, they no longer seem as necessary while there is hope for an extension.

But beyond that the basic political argument in favor of extension is invalid. Proponents say that more time is needed so the national debate on this vital issue may continue. But that is not what House Joint Resolution 638 does. It allows only States who have rejected ERA to participate in this continuing debate. A State that voted yes in 1972 is excluded from the extension. A State that voted no is invited to reconsider. Thus to the American public and to State legislators, House Joint Resolution 638 appears not to be neutral on the issue. Neutrality could be achieved if all 50 States were permitted to participate in the national debate on ERA. But an extension that treats all States equally might well be a net loss for ERA.

Such an extension may well turn out

to be a loss for ERA because it is, in effect, a resubmission of ERA with the shortest time limit ever imposed for the ratification of a constitutional amendment. And one can reasonably assume that the four States that have recently rescinded would do so again. So proponents may have to achieve a net gain of seven States and not merely three. The contest will be waged in all 50 States so that supporters could not concentrate their efforts on winning only three more ratifications. As a practical matter—and on that basis I must make my judgment, an extension on such terms would not benefit ERA.

Thus, either way, whether House Joint Resolution 638 permits rescission or does not, ERA is hurt. Rather than risk so worthy a cause on so unwise a course, it would seem politically and legally a superior strategy to abandon extension efforts immediately and try to win three more States by next March 22. Should that effort fail, then Congress could resubmit ERA once again, having written official rebuttals to opponents' specious arguments in committee reports, and perhaps designate that the mode of ratification be by State conventions instead of by the State legislatures.

I am confident that by this procedure the ERA would be part of the Constitution well before June 30, 1982. This procedure would enable State legislatures to be bypassed and allow the ratification decision to be made by elected delegates. This was the very procedure used to repeal prohibition and gain ratification of the 21st amendment, which incidentally is the only other proposed amendment that was plausibly opposed on "moral" grounds. That procedure is ideally suited for ERA. Yet, for all practical purposes, this superior alternative is foreclosed if Congress agrees to an extension. For if supporters convince Congress to grant an unprecedented extension and fail to succeed nevertheless, it is doubtful that Congress would by a two-thirds vote of both Houses give ERA a third chance.

Mr. Chairman, you do not have to be a constitutional scholar to see that House Joint Resolution 638 is a politically and strategically bad idea.

There are 35 States that have ratified the equal rights amendment—up to the present time. It is my expectation that Illinois will complete ratification in November. Then there will be needed ratification by only two additional States in order for ERA to become part of our Constitution. All but one of the 15 States that have not yet ratified the ERA amendment will have legislative sessions before the March 22, 1979, deadline. Let us devote our efforts toward ratification instead of extension.

Mr. EDWARDS of California. Mr. Chairman, I yield 3 minutes to the distinguished gentlewoman from New Jersey (Mrs. MEYNER).

Mrs. MEYNER. Mr. Chairman, I rise in support of House Joint Resolution 638. As a woman, and as a Member of this body, I am deeply committed to the passage of the equal rights amendment and to the extension of the time limit for the States' ratification.

This resolution is designed to allow the voices both for and against the equal rights amendment to be heard. It will allow this controversial debate to be fully considered by the American people and the State legislatures. I do not believe that any Member of this House can refute the fact that the equal rights amendment has been the object of uncertainties and misunderstandings. Yet, at the bottom of these arguments—clouded by fears of unisex toilets and the demise of the American family—rests a basic human rights issue. I do not find it "unfair" as the opponents of House Joint Resolution 638 do, to request that we provide the necessary time for a full and honest debate of the issue.

Profound social change is not hastily accomplished. Nor should it be. It took more than a century and a civil war to secure basic human rights for the blacks of this country. It took almost three-quarters of a century to secure women's sufferage. And, it took almost 50 years before the Congress adopted the equal rights amendment. And now, by subjecting it to an arbitrary time limit, this work may be undone.

Mr. Chairman, as we look at the time required to effectuate political and social change, I think that we should look closely at the 15 States that have not ratified the amendment. With all due respect for my colleagues from those States, I submit that we are discussing several States that have been somewhat slow to embrace social and political changes in the form of constitutional amendments. Seven of these fifteen ratified the 19th amendment since 1950. And one State has never ratified that amendment. To expect the supporters of the ERA to garner the necessary votes in those States in the remaining time, is not only unrealistic, but the fundamental unfairness issue of this debate.

Last month, we witnessed one of the largest demonstrations in recent history. Thousands of people—men and women—came to Washington to rally in support of the amendment. A recent Harris poll indicates that 57 percent of adult Americans support this extension of the time limit for ratification. I can think of few issues that face the Congress and the people that are more vital and more relevant than the inclusion of women in the Constitution.

Mr. BUTLER. Mr. Chairman, I yield 8 minutes to the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Mr. Chairman, let me say at the outset that I have been a sponsor of equal rights amendments in principle and practice since voting for it in 1971, and I genuinely believe that there is still a need for an equal rights amendment. Recently in my district I got out a press release urging men and women to attend a rally addressed by Maureen Regan and Judy Carter urging that the voters in Illinois and the legislators in Illinois approve by the three-fifths supermajority vote the ERA in Illinois.

But to me the issue of rescission, the issue of extension without rescission is far different than the equal rights amendment itself. The question of extension, particularly by a majority vote, is a new one, unprecedented, never before tried by this body.

Without question we are by our actions on this extension resolution writing on a blank page of constitutional law and in my opinion we must take care to write fairly and precisely so that the image we create will not come back to haunt us during consideration of some future constitional amendment.

What is the real issue that confronts us today? Why are so many of us concerned about a one-way extension? That is what we are talking about: a one-way extension.

Let me explain in the case of Dillon against Gloss, one of the few Supreme Court decisions interpreting article 5 of the Constitution, it was made clear that in order for a constitutional amendment to be validly adopted, there must be submission of the proposed amendment to the States followed by ratifications "sufficiently contemporaneous * * * to reflect the will of the people in all sections at relatively the same period * * *" Submission and contemporaneous approbation: Nothing more and nothing less is required for the adoption of a constitutional amendment.

But what is the history of the equal rights amendment? It was submitted to the States over 6 years ago. Thirty States within the first year ratified, and since that time five States have ratified and four States have attempted to rescind. The average time theretofore for States ratifying constitutional amendments that have been adopted was under 2 years. In other words, all of the other amendments that have been adopted were done in less than 2 years, with the exception of one which took 3 years and 6 months and another which took 3 years and 11 months.

It seems to me that it would be fundamentally unfair for us to pass a one-way extension, thereby perhaps foreclosing those, that may have ratified it in the first 7 years, the opportunity to reconsider, if they desire. To provide an extended period of years for ratification but not for reconsideration in my opinion smacks of expediency. To many Americans such an action would suggest that Congress has decided to amend the Constitution by whatever means it finds necessary and at whatever the price. Despite the nobility of the ends sought by the proponents of the equal rights amendment, these ends do not, in my opinion, justify the means which give rise to the appearance of impropriety. I am not alone in this belief, and I want to make this point. There are many, many proponents that have seen fit to editorialize about the extension, differentiating between extension and the equal rights amendment itself.

The New York Times, the Washington Post, the Washington Star, the Chicago Sun Times, the Charlotte Observer, the Baltimore Sun, the New Republic and a host of other newspapers and magazines have editorialized their opposition to the extension, at least the extension without rescission for just that reason.

Let me quote what some of these publications had to say.

The Washington Post concluded:

Congress has put time limits on recent proposed amendments for good reason: to ensure that ratification, if achieved, will reflect a national consensus on a fundamental constitutional change. If the time period for approving ERA is going to be extended at the last minute, surely states that have already ratified should be allowed to reconsider and, if they wish, rescind those votes. The pending legislation would not permit that.

The New Republic observed:

It doesn't seem quite fair that one side can change its mind but the other cannot. It also undermines the apparent purpose of the ratification machinery that two-thirds of the states approve of a new amendment simultaneously.

The New York Times stated:

The nation's founders wisely prescribed a slow and difficult process for amending the Constitution, to protect it from transient politics and policy. They left it to Congress to decide how long the states would be given to vote their approval on an amendment. Any retroactive change in this time schedule, because the set period did not produce a desired result, would plainly offend the solemn spirit of the amendment process.

Finally, the Baltimore Sun noted:

The Supreme Court has also said, and common sense dictates, that the amending process ought to be "timely" and "contemporaneous." Fourteen years is not too long a period in which to seek a consensus, assuming that all changes in public opinion during that period are allowed to register. Otherwise the Constitution would be altered (and this would be bad precedent) with one set of states from the early 1970s and another set from the middle 1980s. It would count states where public opinion shifted in one direction but not those where it shifted the other way. To so amend the Constitution, even for a cause so meritorious as ERA, is neither justified nor, given the Railsback idea, necessary.

These are opinions and editorial comments of newspapers and magazines which have supported the equal rights amendment.

Those of us on the House Committee on the Judiciary have done a great deal of homework because of the importance of the pending resolution. I had a chance to read the testimony of the constitutional scholars and I read the Supreme Court decisions in the Coleman and Dillon cases, and the memorandums of law supplied by various parties to this legislative effort. I found it persuasive that a noted constitutional scholar, Charles L. Black, sterling professor of law at Yale, stated unequivocally before the House Subcommittee on Civil and Constitutional Rights of the Committee on the Judiciary.

* * * that it would be entirely impermissible to extend the time for ratification without also extending the time for rescission.

In fact, four out of the seven constitutional scholars appearing before the House Subcommittee examining the equal rights amendment extension testified that Congress does have the power to provide a statutory right of rescission.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAILSBACK. Mr. Chairman, may I ask the gentleman from Virginia if I may have 2 additional minutes?

Mr. BUTLER. Mr. Chairman, I yield 2 additional minutes to the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Just last week, a professor of law from the University of Illinois and a co-author of a treatise on constitutional law, who appeared before Senator BAYH's Senate Subcommittee on the Constitution, during a hearing on ERA, added his support for a statutory right of rescission when he testified before that subcommittee.

Because I want to see the equal rights amendment ratified, I cannot support the extension proposal in its present form.

Mr. Chairman, the gentleman from Pennsylvania (Mr. ERTEL) and I will offer an amendment to House Joint Resolution 638. The amendment would provide that those States ratifying the equal rights amendment during the first 7-year period have a right to reconsider that action during this extension period. It would also insure that Congress, and not the General Services Administrator—and this is very important—will make the ultimate determination of the validity of the adoption of this constitutional amendment. Rescission is not an issue distinct and separate from the extension resolution which we are now considering. It is not a question which would be best deferred to some later Congress. I think we have a responsibility, a most important responsibility, to provide some direction in this matter.

Mr. Chairman, I might just mention in closing that the gentlewoman from Maryland indicated there was an opinion poll which said that the majority were against rescission. There is a very recent poll by Opinion Research, which is a respected polling company, which found that 61 percent of the people surveyed felt that if we have an extension, we ought to be permitted to go both ways and provide for States which ratified to have an opportunity to rescind.

Mr. Chairman, I urge the Members of the House to listen carefully to all of the debate. If they do, they will support the rescission amendment and then will be able to support the extension with the rescission amendment.

Mr. EDWARDS of California. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio (Mr. SEIBERLING), a valued member of the subcommittee.

Mr. SEIBERLING. Mr. Chairman, I am glad that the gentleman from Illinois (Mr. RAILSBACK) did not read some of the editorials which have tried to analogize this matter to a ball game and have argued that we should not be changing the rules in the middle of the "game" by extending the number of innings.

For this is not a game. We are dealing with fundamental human rights of at least a majority of the population of the United States; and we are acting not for years or even decades, but for as long as this Nation endures.

Therefore, let us try to focus not on what editorial writers have said, but on what is our duty as legislators dealing with an amendment to the U.S. Constitution.

Mr. Chairman, there is nothing in the original equal rights amendment, House Joint Resolution 208, which says anything about the right of rescission. If there is a right of rescission, it is going to be determined not by this Congress, but by the Congress which has to determine whether 38 States have acted. Therefore, there is no occasion for any right of rescission in House Joint Resolution 638. If there is a right of rescission, then that will be dealt with by a subsequent Congress, after 38 States have filed instruments of ratification; and nothing we can do in this Congress can preempt the decision of that Congress.

Mr. Chairman, the Supreme Court in Coleman against Miller said that such decision is a political decision to be decided by the Congress which deals with the question of whether 38 States have ratified.

Again, Mr. Chairman, there is no need, there is no occasion for the amendment of the gentleman from Illinois (Mr. RAILSBACK) because we are not going to pass upon that question. We do not need to pass upon it. We do not reach it in this House at this time, so I respectfully suggest that those who may think that if we do not express our views at this time, we deny the States the right to rescind, should realize that there is no such implication in this resolution.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Mr. Chairman, may I just respond to the gentleman very, very briefly by saying that I have read that GSA statute which appears to make the Administrator of the GSA the sole repository for the notices of ratification that come in. I am not at all certain that Congress has any right whatsoever to express itself in any way on the matter.

Mr. SEIBERLING. The Supreme Court has held that, in the final analysis, it is the Congress which decides whether there has been ratification. I suggest that we do not need to pass upon that question at this time; and certainly if we fail to support the amendment of the gentleman from Illinois, we are not, by any means, carrying with it any implication that we deny the right of States to rescind. I personally believe that the Constitution does not permit States to rescind, and there are a great many constitutional authorities who feel that way. As we have just heard, there are some who feel the other way, but we do not have to decide that question at this time, and we do not do so by adopting this resolution.

Mr. BUTLER. Mr. Chairman, I yield 6 minutes to the gentleman from New York (Mr. FISH).

Mr. FISH. I thank my good friend and colleague, the gentleman from Virginia, very much for being so generous in yielding.

Mr. Chairman, this Congress has the opportunity and duty to make a timeless decision, applying objective criteria that are divorced from and independent of the merits of the pending constitutional amendment. The passage of House Joint Resolution 638 will be then an affirmation by Congress that this proposal meets the applicable standards and criteria set forth as guidelines by

the Supreme Court and supported by historic precedent.

In determining a reasonable time for ratification, the Supreme Court has laid down certain objective guidelines which must be considered by the Congress. In so deciding, Congress should not look to the merits of the equal rights amendment. The merits are to be decided by the States.

In 1972, Congress placed a 7-year time limit on the ratification process for the proposed equal rights amendment which will be reached on March 22, 1979. In initially setting a 7-year period, Congress did not undertake to study and analyze a reasonable period for ratification. The 92d Congress chose 7 years since it had been the time period selected by Congress in most past proposed amendments in this century.

It is generally agreed by legal scholars and was not seriously questioned in deliberations before the Committee on the Judiciary that Congress possess the authority to extened the ratification period. Yet our decision has historic importance as this is the first Congress to face the issue. The question presented to this House by House Joint Resolution 638 is whether an extension of 3 years, 3 months and 9 days is reasonable so as to allow the States to continue the debate upon the appropriateness of the proposed equal rights amendment.

The Supreme Court has twice addressed itself to the standards Congress is to apply in determining the reasonableness of the ratification period. *Coleman* v. *Miller;* 307 U.S. 433 (1939); *Dillon* v. *Gloss*, 256 U.S. 368 (1921). The principle guideline to be followed by Congress is to determine whether the issue, "Is the law what it should be?" remains vital and sufficiently contemporaneous so that debate and legislative consideration should be allowed to continue, or whether the proposed amendment has become a dormant issue which can no longer respond to the needs and objectives which generated its initial proposal. That is the only question that need be before us.

The High Court in Coleman held that the reasonable time issue calls for an essentially political judgment as it involves "relevant conditions, political, social and economic * * *" These are the factors Congress must look to in deciding whether these conditions have:

> So far changed since the submission as to make the proposal no longer responsive to the conception which inspired it or whether conditions were such as to intensify the feeling of need and the appropriateness of the proposed remedial action. *Coleman* v. *Miller*, 307 U.S. at 453–454.

Measured against these objective standards, the issue is vital and contemporaneous, and there is a continuing need for a constitutional solution.

The single unifying theme to be found in the many hours of hearings before the subcommittee and the debates of the full committee is that there exists throughout the Nation, a intense, ongoing, vigorous political controversy over the proposed equal rights amendment. The testimony received demonstrates that the issue is being hotly debated in the State legislatures and that State officials are being subjected to intense lobbying from all sides. Thirty-five States have ratified, comprising 71 percent of the population. Several States have placed an equal rights amendment in their State constitution. Fifteen States have not yet ratified, while several States have sought to rescind their prior ratifications. Witnesses cited two recent national polls that demonstrate a substantial majority in favor of ERA, with the same polls showing that support has increased over the past few months. Others cited State referenda opposing ERA. Plainly, these events demonstrate that the equal rights amendment remains a vital and contemporaneous issue.

While some argue that the proposed amendment is not needed; that courts can require equality, it appears from the testimony that the judicial debate is currently articulating more sharply the need for the amendment. Witnesses cited numerous recent Supreme Court cases, including the Bakke case, to demonstrate that the Supreme Court has refused to apply the 5th and the 14th amendments to gender-based discrimination in the same manner that these amendments are applied to racial classifications. The *Vorscheimer* v. *School District of Philadelphia*, 97 S.Ct. 1671 (1977); *Frontiero* v. *Richardson*, 411 U.S. 677 (1973) decisions substantiate this claim. Thus, they argued that sexual discrimination is tolerated under law where racial discrimination is not. Rather than quelling the controversy, it appears the decisions of the Supreme Court in explicating the law have actually intensified it.

The controversy surrounding ERA extends well beyond the courts. In demonstrating continuing need for the amendment, several witnesses testified that sexual discrimination exists in substantial proportions withir. educational institutions. They also pointed to a recent decrease in the proportionate share of women's income as compared to men, despite Federal legislation aimed at achieving equal employment practices. Another witness cited over 800 gender-based classifications in the United States Code which diminish the rights and privileges of women.

The witnesses contended, therefore, that recent developments have not lessened the need for ERA. They concluded the lack of a judicial resolution of the issue and the widespread need requires more than the present piecemeal approach. They called for an amendment which would provide a fundamental national principle and coherent theory on which courts and legislatures could rely in dealing with sex discrimination.

Only recently, the Congress had to act to overturn the Supreme Court opinion in *General Electric Co.* v. *Gilbert*, 429 U.S. 125 (1976) holding that an employer's failure to cover pregnancy in a disability pension program which covered other voluntary disabilities was not illegal. That we acted so expeditiously shows that the issue of sex discrimination is very much alive within our halls.

In view of the intensity of debate and controversy as demonstrated in the testimony presented to the Judiciary Committee, Congress should ask itself whether it would have set a 7-year time limit in 1972 if it had been aware of the conditions which exist today. More importantly, if no time limit had been set in 1972, would we be able to now decide that the ERA is a dormant issue upon which debate and consideration should be cut off? Surely, we would not.

Irrespective of one's individual views on the merits of the ERA, the vigor of the debate as well as the continuing vitality of the issue requires that the Congress pass House Joint Resolution 638 without amendment.

Finally, Mr. Chairman, we must realize that the achievement of equality between the sexes is an ongoing historical movement of which the ERA is but the latest reflection. To cut off debate would be unreasonable and contrary to our historic strivings for equality. Such a broad-based movement and the need for this solution will not suddenly disappear on March 22 of next year.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, I thank the gentleman from New York for his scholarly statement and for pointing out the waste of time that would occur if we had not provided for this compromise extension to be considered by the States on adoption of the equal rights amendment.

Mr. Chairman, Adlai Stevenson once said, "There can be no gains without pains." His words might well be used to describe the history of the pursuit of equal rights in our society, equal rights for all persons regardless of sex.

The equal rights amendment has been introduced in Congress in various forms since 1923. It has survived one of the most difficult tests for a controversial and challenging idea: Its need and the recognition of that need have not changed in more than half a century.

I support the equal rights amendment and strongly believe that it is long overdue. Our Constitution is based upon the premises of civil rights and civil liberties. We cannot foster a society in which some people are more equal than others.

Persistent issues keep emerging which point out the need for an equal rights amendment—credit laws, pregnancy disability, inequities in wages and benefits, to name just a few examples. Without the equal rights amendment, these issues will continue to require specific legislative action that really should not be necessary.

Many of the court decisions in recent years on questions of equal rights and equal protection have been cases where men instead of women claimed discrimination. It is not just a matter of enforcing existing laws. Court case after court case has shown these laws to be inadequate.

The question before us today is a fairly simple one, but its simplicity should not belie its importance. Should the deadline for ratification be extended?

The 39-month extension approved by the House Judiciary Committee and be-

fore us today will allow remaining States an orderly means of considering this proposed amendment and will enable them to reach a decision after calm deliberation instead of the intense emotional pressure that would otherwise exist.

There is nothing sacrosanct about 7 years. We are all familiar with the legal arguments for the extension. The time deadline was added to the ERA resolution almost as an afterthought when a few Senators who opposed the amendment argued that a time limit should be included. Early amendments to the Constitution contained no time period for ratification. And even after a time limit was placed on ratification of the 18th amendment, the next amendment did not have one.

The Justice Department argues, I think convincingly, that by placing the time period on the proposing resolution rather than the text of the amendment, the 92d Congress effectively decided that the proposal should remain viable for at least 7 years without barring a subsequent Congress from making a more informed judgment at a later time about the reasonableness of the ratification deadline. This is certainly in line with the "contemporaneous consensus" test set forth by the U.S. Supreme Court.

In addition to the legal basis for extension, there are strong political reasons. Thirty-five States containing 72 percent of the country's population have ratified the amendment. Recent national polls show the majority of Americans support both the ERA and the extension. Special interest groups which might not normally take a stand on such an issue have come out strongly in favor of the ERA—groups such as the national AFL-CIO, the Friends Committee on National Legislation, and many labor unions.

But apart from the legal and political considerations—important as these might be—there are spiritual and moral values at stake here which we cannot in good conscience overlook or ignore.

There can be no issue which is more basically "right" than the issue of human rights. I simply cannot support the idea that we can set a time limit on equality for all people. I cannot support the idea that equal rights can be compromised. And I cannot support the idea that the fight for equal rights should end in March 1979. It is a fight that people have been waging since the founding of our country. Defeating the equal rights amendment in 1978 or 1979 does not mean it will go away. If we fail in extending the ratification period, the process will simply begin anew until we succeed in ridding our society of a dual system of "equal protection" under the law.

Mr. COHEN. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Maine.

Mr. Chairman, I would like to take this opportunity to commend the gentleman from New York for his statement and thank the gentleman for his strong support of the Committee on the Judiciary and associate myself with the gentleman's remarks.

I would also point out to the gentleman that this issue is not clear cut. I commend the gentleman for indicating in his statement that it is not without some doubt; but it has been the policy of the Committee on the Judiciary to try to resolve those issues of doubt.

Mr. Chairman, it is clear from the debate today that we are negotiating our way up a path that is not fully cut, and one that is only partially lighted. The lack of clarity in the law is compounded by the intensity of emotion generated by advocates and opponents of the matter before this Congress.

There are essentially two questions before us—one of power, one of policy.

According to the Justice Department, Congress has the power to determine a reasonable period of time for the ratification of a constitutional amendment when initially passed by Congress, and the power to determine what is reasonable when no time limit is specified—and according to the Justice Department, it has the power to extend a time period when it is not a substantive part of the amendment itself, but in the resolving clause as is the case of the equal rights amendment.

I believe Congress has the power to extend, and the critical question, the one that I and the other Members of this Congress have been struggling with, is the one of policy—of fairness, of equity—what is the appropriate course of action to follow taking into account the importance of the question, the viability of the debate, the contemporaneity of the issue, and whether events and circumstances have so changed that the amendment is no longer relevant to current events or to the conception that inspired its original passage.

But since this is a congressional question rather than a judicial one, I think we should place this issue in a larger time frame of our history as a nation.

In one of Abigail Adams' letters to her husband, John, she encouraged him to modify the British laws and customs that dictated the near total subordination of a woman's status and identity to that of the man. She asked him to remember the ladies.

Well, something happened on the way to the convention—neither Adams, nor Jefferson, nor Madison, nor Hamilton seemed to remember the ladies—they were not included in the Constitution, and women have been struggling for nearly 200 years to secure the basic rights that are guaranteed to men, ones that we accept as self-evident truths.

One of the principal arguments against the equal rights amendment and any extension is that the amendment is unnecessary—that many, if not most of the rights have been granted or are being granted by statute or judicial decision or could be achieved through an expanded interpretation of the 14th amendment. In other words, this amendment will simply clutter up the Constitution.

It is written in the Declaration of Independence that we hold these truths to be self-evident—that all men are created equal. Well, we have learned through the painful experiences of history, including a bloody civil war, that not all men were created equal in the eyes of the law, and it took the 13th and 14th amendments to clutter up the Constitution and declare that the color of one's skin was not a rational or fair determination of one's rights.

Today, we have many laws that seek to eliminate an irrational or prejudicial bias against women. There are many more that remain. I submit that the 27th amendment to the Constitution will be no more redundant for women than the 13th and 14th amendments were for ethnic or racial minorities. I maintain this is much more than a symbolic gesture, but if it were only symbolic it would be no less important. Our lives, our values, our social conscience are strongly influenced by symbols. "The flag is a bit of bunting that men have opened their veins for" because it is a symbol of those virtues and those values without which life is not worth living.

The thrust of the amendment is to allow each person to achieve the highest level of his or her potential. Nothing could be more fundamental than allowing each individual the opportunity to reach as high as his or her talent will allow.

Opportunity for achievement should not be based upon quotas or upon race or religious beliefs or upon gender—but upon merit and qualification—upon ability.

Justice Holmes once noted:

> The hell of the Old World's literature was when people were taxed beyond their powers; but there is a deeper abyss of intellectual asphyxia—when powers conscious of themselves are denied their chance.

This is at the heart of the matter. That not just for years, not just for generations, but for centuries, women have been regarded as being less than deserving of full and equal rights and responsibilities in our societies. That powers conscious of themselves have been denied their chance.

By sheer accident of birth, by an uncalculated fusion of chromosomes, a majority of the citizens in our society, regardless of physical ability, regardless of intellectual capacity, regardless of their potential for social contribution, are granted different rights, enjoy greater preferences, and suffer greater prejudices.

Let me say a word about responsibilities, for that is the corollary to rights. When I was practicing law, I handled my share of domestic cases. Nothing was more frustrating to me or struck me as being unfair than the rule that the mother was automatically entitled to an award of custody—irrespective of the facts, as to the love, the care or the devotion of the father, the closeness of his relationship to his children. He was presumed by law to be inferior in his capacity to care for his children.

That is not fair or equal treatment to the men in our society, but it is the inevitable result when we insist upon following a rule of thumb instead of a rule of reason, when we insist upon the mechanical application of rules that are rooted in the past, or sunk in the mire of prejudice.

The issue, we are told, is not the substance of the equal rights amendment,

not the merits, but the process and the procedure.

I mentioned at the outset that it is my belief that Congress has the power to consider whether or not to extend the time frame of a proposed constitutional amendment, and that the critical issue is one of policy.

And so in weighing the equity of a policy that we are given the choice of pursuing or foreclosing, I believe we must consider the centuries of discriminatory policies which over the years have denied women a separate legal existence if they were married, denied their right to own or sell property, denied them the right to vote and to the present day has denied them the right to equal participation and responsibility in our society.

I conclude that in fairness, as a matter of equity, a period of extension should be granted—to allow a continuation of the debate in a rational and informed fashion.

And for these reasons I urge my colleagues to support this bill.

Mr. DON H. CLAUSEN. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from California.

Mr. DON H. CLAUSEN. Mr. Chairman, my position on the question of equal rights under the Constitution has not changed since I first cosponsored the equal rights amendment in 1966 and supported its passage in 1972. I stand firmly behind the right to equal treatment under the laws of the land and certainly as a part of our Constitution.

I have consistently voted for measures directed at eliminating discrimination on the basis of sex, creed, or color and believe that in applying the Bill of Rights we must place heavy emphasis on the individual's right to equal opportunity.

I support the 3 years, 3 months extension of the deadline for ratification to allow for a thorough and rational debate of the issue by the people of our respective States.

Article V of the Constitution does not delineate any time period for ratification. It was not until the 18th amendment in 1917 that Congress first attached a time limit to a proposed amendment. They added a deadline then so that unratified amendments would not have to be considered by State legislatures years after they had lost immediacy and relevancy. Clearly, the Congress has the power to extend the deadline as the social, economic, and political considerations which gave rise to the amendment still prevail.

It is interesting to note that a time limit was not applied to the 19th amendment which gave women the right to vote. It took from 1848 to 1920—a period of 72 years—for women to win the right to vote. In my opinion proposals of this magnitude and significance have historically taken a great deal of time—time to allow for the fair and complete consideration of the merits of the issue setting aside the emotional aspects of it.

I find it difficult to accept the fact that the equal rights amendment has not yet been ratified and made a part of our Constitution. Our Nation rests on a principle of equal rights for all its citizens. The amendment merely emphasizes this basic freedom.

I urge my colleagues to support the extension as contained in House Joint Resolution 638.

Mr. EDWARDS of California. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Massachusetts (Mr. DRINAN), a valued member of the subcommittee.

Mr. DRINAN. Mr. Chairman, as the distinguished gentleman from New York (Mr. FISH) so well said just now, in 1972 if this House had anticipated and contemplated the events that were forthcoming in the last 6 years, it would not have put on the arbitrary 7-year limit.

We cannot conclude that there is anything sacred about the arbitrary 7-year limit. If the last eight amendments had that particular period, we should remember that many of those were technical amendments, such as the Presidential successors amendment or the amendment on Presidential electors to the District of Columbia.

The ERA is concerned with the deepest attitudes about some of the profoundest issues of human existence. We must recognize that it took from 1848 to 1920 for women to get the right to vote, and that was 72 years. It takes time to topple myths and fears. It takes a long time to allow the issues to be fairly considered on their merits, and there is no point to cutting off discussion when there is a great national debate proceeding.

Seven years is too short a period for a fair and comprehensive hearing, and it is entirely within the authority of this House to establish a more reasonable time. Does that time mean rescission?

Mr. Chairman, there is no law, there is no custom, there is no court decision that has ever allowed a rescission. James Madison wrote that a ratification is not rescindable. There is no linkage between ratification and rescission. They are entirely separate questions.

I think, therefore, Mr. Chairman, that we should have an extension of the ERA for 39 months, with no action on the right of a future Congress to decide on ratification or rescission. The need is still present. The Supreme Court has ruled in several decisions, including the Bakke decision, that the 5th and 14th amendments do not necessarily protect against discrimination on the basis of sex.

Mr. Chairman, I strongly support House Joint Resolution 638, as amended, which would extend the ratification period for the proposed equal rights amendment until June 30, 1982.

My support for this measure was not quickly nor easily won. When I first learned of the proposed extension I forced myself to consider how I would feel if the amendment involved was one, unlike the equal rights amendment, which was repugnant to me. Would I then support an extension of the ratification period?

As a member of the Judiciary Subcommittee on Civil and Constitutional Rights, which considered this legislation, I carefully examined the testimony presented by a cross-section of legal scholars last November. I concluded that the Congress indeed did have the authority to extend the ratification period for the equal rights amendment, and for any other amendment which might incur similar difficulties in the future.

The Constitution of the United States gives the Congress the power to propose amendments and to determine the mode of ratification. The Supreme Court has additionally determined that Congress has the implied power under article V to impose a time limitation on the ratification process. (*Dillon* v. *Gloss*, 256 U.S. 368 (1921) and *Coleman* v. *Miller*, 307 U.S. 433 (1939)). The only limit placed upon the Congress is that ratification must occur within a "reasonable time" after the amendment is proposed. And the Supreme Court clearly indicated that it is up to the Congress—not the courts—to determine the length of a "reasonable time" period.

The 7-year limitation for ratification was accepted by the 92d Congress on the ground that it was a "customary" time limit. Indeed, eight of the nine preceding amendments were subject to a 7-year period for ratification. Unfortunately, there was virtually no debate nor discussion as to whether or not 7 years was the appropriate period of time for this particular amendment.

Had such a debate occurred, I would like to suggest to my colleagues that the outcome might have been different. For the equal rights amendment, unlike the amendment on Presidential succession, or the limitation on Presidential terms, or the allocation of Presidential electors to the District of Columbia, is an issue which arouses strong and lingering emotions on both sides. The equal rights amendment debate, not unlike the debate over slavery or women's suffrage, is concerned with the proposal of a fundamental attitudinal change about a majority of our population. We must recall that it took from 1848 until 1920 for women to win the constitutional right to vote—a total of 72 years. And the abolition of slavery, eventually accomplished by the 13th amendment, was the subject of national debate for decades. Progress in human rights and social change has historically taken a great deal of time—time to dispel myths and fears and to allow the issues to be fairly considered on their merits.

Unfortunately, the ERA debate has been plagued by a national campaign of scare tactics and distortions. The meaning and impact of the equal rights amendment have been subject to an unprecedented degree of misunderstanding and misrepresentation. Additional time is desperately needed to counter the widespread fear and confusion concerning what the equal rights amendment seeks to accomplish and what its effects will actually be.

I have heard it argued that with the passage of recent Federal laws designed to eliminate sex discrimination the equal rights amendment is no longer necessary. Some argue that State and Federal laws still requiring reform to eliminate sex bias can be amended on a piecemeal basis. I believe such an approach would be totally insufficient and inadequate.

In a title-by-title review of the United States Code conducted by the U.S. Civil Rights Commission in April 1977, over 800 instances of sex bias in our Federal laws were found. Federal legislation in the areas of employment, credit, education, and social security have simply not eliminated the need for a national policy against sex discrimination. The most stunning example is in the area of employment where women continue to be denied equal pay and equal employment opportunity. According to the U.S. Civil Rights Commission, the 1976 median income for females was only 60 percent of the median income for males.

If we compare men and women in the same full-time occupation, we find that, according to a 1973 study, women clerical workers earned 61 percent of the salaries of men clerical workers; women managerial or administrative employees received 53 percent of their male counterparts' earnings; saleswomen earned 38 percent of what salesmen earned; and female operatives received 56 percent of male operatives' pay. The Congressional Research Service admits that the Supreme Court's treatment of gender-based discrimination has puzzled both legal scholars and the lower courts.

The equal rights amendment is still desperately needed to clarify inadequate Government regulations, to mandate the enforcement of existing laws, and to comprehensively wipe out the sex discrimination that has pervaded our legal system for the past 200 years.

I read with great satisfaction in the Washington Post a large advertisement by "Men for ERA." The sponsors were scores of respected men in various spheres of public life, including Arthur Goldberg and Bruce Jenner, John Kenneth Galbraith, and John Denver, Father Theodore Hesburgh, and Paul Newman. I am happy that men realize that the ERA stands not only for correction of the gross injustices suffered by women in our land, but for correction of some possibly smaller, but still important, injustices suffered by men.

I have heard it argued that if Congress extends the ratification period, it should also allow States which have ratified the equal rights amendment to rescind their ratification.

Article V of the Constitution speaks only in positive terms of ratification of a proposed amendment, giving the States the power to ratify a proposed amendment, but not the power to reject. The only original Framer of the Constitution who addressed the question of rescission and the intent of article V was James Madison. During the ratification debates in the State of New York, Madison stated, in a letter to Alexander Hamilton, that a State's ratification was unconditional and irrevocable:

> The Constitution requires an adoption in toto and forever. It has been so adopted by the other States. An adoption for a limited time would be as defective as an adoption of some of the articles only. In short any condition whatever must viciate the ratification.

Throughout our constitutional history, Madison's principle has been upheld and accepted. Congress has consistently adopted the view, in the cases of the 14th, 15th, and 19th amendments, that a State may not rescind.

John Harmon, an Assistant Attorney General of the Department of Justice, testified in great detail before our subcommittee on the legislative and judical history of rescission. The conclusion of the Justice Department after extensive study was unequivocal—States may not rescind a ratification.

It is vital that Congress look to the past for guidance in this area. Certainly in our ratification process it is vital that the procedure be orderly and equitable. If a State knows its ratification is unconditional and irrevocable, as it has been recognized in the past, there results a clarity and definiteness. Otherwise the chaotic situation could result where a State would turn around its position on an amendment with each new legislative session.

I have heard it argued that it is "not fair" to treat States' rejections of a proposed amendment as reversible while treating ratifications as irreversible.

In their wisdom the framers of our Constitution set up in article V many obstacles to be overcome before an amendment becomes a part of that document. The proposed amendment must be passed by both houses of Congress by a supermajority vote of two-thirds. It must then be ratified by threefourths of the State's legislatures or conventions. It has been pointed out that in the legislature system, since the proposed amendment is considered first at the committee level in most States, 140 out of 193 decisional units must approve the proposed amendment. Further, the amendment may be challenged in the courts if it is felt that the ratification was not within some reasonable time after the proposal.

Thus the cards are stacked against the ratification of an amendment. This is as it should be. But there is no reason why ERA opponents should feel that this time-honored rule is "unfair" merely because it incidentally represents a small advantage on the side of the amendment's proponents.

I have heard it argued that if the extension is to be enacted, it ought to be passed by a two-thirds majority of Congress rather than by a simple majority.

Our Constitution is explicit in describing when a "super-majority" vote is needed for any measure; when it is silent, only a simple majority is needed. Although a two-thirds vote is needed for Congress to propose an amendment, a two-thirds vote is not needed with respect to matters of detail pertaining to the mode of ratification. In its original two-thirds vote on the ERA, Congress happened to include the original 7-year time limit provision, but it could have voted on this procedural matter of detail separately, and that vote would have required only a simple majority.

I have heard it argued by people tired of this debate that we should let the original 7-year time period lapse, and be done with the matter. Obviously, this question is not going to go away. We have two choices. We can extend the original period, or we can have a renewal of the entire ERA beginning next March. We can have an extension of the present "ball game," or we can have a new "ball game." But to think that it is going to go away and that we will have settled it is like a Congressman saying, I wish that all the difficult problems we have about wiretapping and busing, energy and inflation, would go away. That is what legislators are for; that is why the people elected us.

Finally it is worth noting that the debate over the equal rights amendment is by no means dormant. It brings tens of thousands of people to Washington to demonstrate and lobby; it floods our mailbags; it continues to be the subject of front-page stories and editorials in newspapers across our country. It would hardly be appropriate to cut off debate on a subject of such urgent public conern. The Congress has the power to revise its original action and should exercise that power now by extending the ratification period until June 30, 1982.

Mr. EDWARDS of California. Mr. Chairman, I yield 4 minutes to the gentlewoman from Maryland (Ms. MIKULSKI).

Ms. MIKULSKI. Mr. Chairman, I rise in support of House Joint Resolution 638, as reported by the Committee on the Judiciary.

Although I am not a constitutional expert, I believe that when Tom Jefferson, Alexander Hamilton, and Abigail Adams helped to found America, they really wanted women to be included in the Constitution by the year 1978. For I believe our Founding Fathers and Mothers believed that fundamental equal rights belonged to everyone irrespective of their biological characteristics. That is the sum and substance of the equal rights amendment.

However, the ratification has become bogged down in State legislatures because of horse-trading; we are the "throw away" issue in each and every general assembly meeting. The debate has also been clouded by provocative and irrelevant questions. It has been attacked by the same type of coalition that fought against abolition, fought against suffrage, and fought against end to child labor. They used fear and scare tactics then and still do so now.

I think it is time that we bring an end to the efforts of those who would manipulate democracy and extend time to those who would expand democracy.

We need ERA simply because women are economically more vulnerable in the United States.

In 1977 a review of the United States Code shows 800 sex-biased laws on the books. To those who would argue that the change is going too far I would say that the change is not going far enough.

If we look at Georgia, we find that the law says a family home belongs to the husband even if the wife contributed to the financial purchase of it. In West Virginia and Maine, if a husband and wife own and operate a business, the profits belong solely to the husband.

I could go on and on and cite other sex-biased laws, but I think those examples pointedly show it is abundantly clear that the equal rights amendment is urgently needed to clarify the status

of 100 million women in the United States.

The equal rights amendment is not just a symbol. It would establish a national standard that cannot be tinkered with and would not be subject to any current fad or temporary wave of fanaticism. The equal rights amendment would make our status permanent, clear and unequivocal.

Many of my colleagues have asked me, "If that's all the equal rights amendment is, why hasn't it been ratified? Why is additional time needed?"

While the equal rights amendment is a matter of simple justice, getting justice is not always simple. Significant change does take a long time, as the gentleman from Massachusetts outlined. For women, equal rights are still revolutionary, because many of the basic structures of our society are built on women's inequality. The equal rights amendment does challenge the present economic power structure and no one gives up power voluntarily.

There are two types of amendments to the Constitution, such as those that change the political process by giving the 18-year olds the right to vote, but there are those that go to the fundamental structure of our very civilization, and those require more time. They require more time because of the enormous impact that such action will have on our personal lives and our society.

For those who raise the issue of rescission and fairness, I say to them, I think that the fairness question is this: Is it fair to exclude over 100 million women from equal protection under the Constitution of the United States of America? Is it fair that women have had to wait over 200 years to get full equality in this country? I think that it is unfair that we have had to fight horse-trading State legislators and smear tactics of the opponents. I think that it is fair for the debate to continue and thus I urge passage of the resolution as reported by the committee. Congress has the power to extend the time and I think that it is fair and responsible for Congress to pass this resolution. I want to be recognized as a full citizen in the Constitution during my lifetime; I want the equal protection for my niece who is 9 years old; and I want the inclusion for all women in this country.

Do not treat this like a term paper for some Yale law review article. Do not become so obsessed with rarefied nitpicking that you lose sight of the point, and the point is, do we base the laws in the United States of America on biological characteristics, or, in the eyes of God and the Constitution, all people are finally equal.

Mr. WIGGINS. Mr. Chairman, will the gentlewoman yield?

Ms. MIKULSKI. I yield to the gentleman from California.

Mr. WIGGINS. I thank the gentlewoman for yielding.

Mr. Chairman, I merely want to add a footnote to this debate with respect to whether women are in the Constitution. The Constitution is essentially neutral with respect to sex. Neither the word "man" nor "woman" appears in the Constitution. It is true that the word "male" appears in the 14th amendment, in a section which is no longer operative, and it is also true that the pronouns "he," "his," and "him," appear frequently, particularly with respect to the Executive branch. But this is, I suggest, a common problem of legislative draftsperson-ship.

Mr. BUTLER. Mr. Chairman, I yield 4 minutes to the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. Mr. Chairman, I thank the gentleman for yielding 4 minutes. It is a day of considerable importance in the consideration of this matter, and it seems that the process of amending the Constitution of the United States is being taken seriously by everyone. But the process of amending the Constitution is a matter of compact between the States, just as the Constitution itself is, and, therefore, the process must have the respect and the support of the States and of the people. And it seems to me that it is not the proper role of the Congress to detract from or to destroy that respect and support. Indeed, it is the responsibility of the Congress and Members of Congress to do all they can reasonably do to foster, to nurture, and to be eroded, if not exploded.

If House Joint Resolution 638 in its present form were to be passed by both Houses of the 95th Congress, we could foresee that respect, if not the support. of the people and their elected representatives in the State legislatures could be eroded, if not exploded.

There is only one fair way to extend the time for the debate of the proposition ccntained in the equal rights amendment, and that is to propose the matter in the States, again. Indeed, House Joint Resolution 638, which we are considering today, does that, but under procedures valid and which a subsequent Congress might find invalid. Indeed, a subsequent Congress might decide the ratification process has been too long and, in effect, declined to accept ratification during the proposed extended period.

Just as it is argued that this Congress may extend the time for ratifying the ERA, because we are not and cannot be bound by the procedures established by the 92d Congress, so we must also accept the fact that House Joint Resolution 638, a procedural matter, cannot be binding upon a future Congress.

Why should the Congress take a chance on this new and doubtful course when a constitutionally proper method is available for the purpose of extending the time for consideration of the principle of the equal rights amendment. House Joint Resolution 1066 would provide an additional 7 years—not 3 years plus, but 7 years—for the debate to be extended, for the principles to be considered further. It would require a two-thirds vote for such a House resolution to be adopted.

I firmly believe that the two-thirds vote is here and available in both Houses of this Congress. Rescission would not be a question under those circumstances. Ratification would be likely to be promptly achieved, I think, because one of the most important arguments against the equal rights amendment as presently proposed would be removed. That is because House Resolution 1066, and others that might be proposed like it, has all the wording the same as the currently proposed equal rights amendment except for section 2. In section 2, the position of the States in our constitutional system would be preserved. Instead of providing that the Congress alone would have the power to enforce article I of the amendment by appropriate legislation, it would provide that the Congress and the several States shall have the power to enforce this article by appropriate legislation.

But, it goes on to say that this amendment shall not be so construed as to delegate to the United States any powers otherwise reserved to the States or to the people. Surely, we can argue about whether that is the best way, and I regret that we do not have the opportunity to consider it today.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. BUTLER. Mr. Chairman, I yield 1 additional minute to the gentleman from Ohio.

Mr. KINDNESS. Can you imagine this Congress dealing with the kind of legislation that State legislatures now have within their jurisdiction; the laws relating to marriage, divorce, probate, licensing of occupations and professions, regulation of insurance? A great many matters that come under State jurisdiction at the present time could, by the presently proposed equal rights amendment if ratified, be preempted by this Congress. We do not belong in that field of legislation, and perhaps would not preempt those areas, but it has been suggested by some that if the equal rights amendment as presently proposed is ratified, we should at least have a national divorce law.

I do not believe we need to take that into the scope of the work for the Congress. The Federal court system would still be available to all of those whose rights may be infringed upon by States. I think if this Congress does not pass House Joint Resolution 638, then I think many, the majority of those who both oppose and support the present equal rights amendment, would support such a proposal as is contained in House Joint Resolution 1066. Why not now?

Mr. EDWARDS of California. Mr. Chairman, I yield 30 seconds to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. I thank the gentleman.

Mr. Chairman, I just wanted simply to respond to the statement of the gentleman from California when he disclosed that the Constitution was neutral and that it did not mention men or women specifically. Unfortunately, the spirit of the Constitution was not neutral because women were not really allowed to participate in the democratic process until 1920, when they were given the right to vote.

So, I think that argument is clearly an unfortunate one.

Mr. EDWARDS of California. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Missouri (Mr. VOLKMER), also a valued member of the subcommittee.

Mr. VOLKMER. Mr. Chairman, mem-

bers of the Committee, undoubtedly, as we know, the House has spoken indirectly on the issue that I say has bothered me the greatest about House Joint Resolution 638, the resolution before us. That is the question of majority or two-thirds vote on final passage. I still have some, what I believe to be questions, in regard to House Joint Resolution 638 that need to be addressed later on during the debate.

One of those specifically is whether or not—and I have heard other gentlemen allude to it, and I believe we need discussion on it—as to whether or not the resolution shall be binding on later Congresses during the extension period; whether or not it shall be binding on the Administrator of the General Services Administration; whether this is actually a joint resolution to be treated as a bill under section 7, article I.

I remember listening to the gentlewoman from New York (Mrs. CHISHOLM) during the debate on the rule, when she designated this resolution as a "bill." It makes a significant difference as to whether this is a bill or whether it is not a bill, because of course as we all know, as was pointed out after the adoption of the rule and the parliamentary inquiries to the Speaker, there is a question as to whether or not it is statutory and whether or not it shall be submitted to the President.

I am pleased and I do join with the proponents, a majority of the committee, that the President, as stated on page 16 of the majority part of the report, has nothing to do with the amendatory process of our Constitution. Feel very strongly about that and that it should be preserved, that the constitutional amendment process is a matter between the States and the Congress, just as the framers of the Constitution saw fit to provide.

But it concerns me that the words on page 16 say that now basically the resolution if submitted to the President would be symbolic—no more than that. And if it is only symbolic, then why does it have to go there? And if does have to go there, on the other hand, is it not a statute? And we are not actually involving the President?

Can the President veto it? And if the President can veto it, is that veto effective unless overriden by two-thirds? And if not overriden by two-thirds, is the extension valid and binding?

The other question I have, and I think it is valid, is: What is going to occur when the three-fourths of the States have ratified and if it occurs during the extension? If it occurs, as I would like to see it occur, by March 22, 1979, we have no problem; but if it occurs after that time and during the extension period, what is the proper action of the Administrator of the GSA? I would like to quote from a proponent of House Joint Resolution 638, Mrs. Ginsburg, before our subcommittee:

> First, as Professor Van Alstyne has pointed out, technically, the General Services Administration might certify and not even bring the question to the attention of Congress. 1 U.S.C. 106(b), at least if read literally, makes that possible.

Neither I, nor do I believe the proponents, wish that to occur in the event the extension were passed, but I do believe we do need to give direction in this debate on that issue.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Texas.

Mr. ECKHARDT. Mr. Chairman, does the gentleman not recall the Constitution in article 1, section 7 provides a bill must be submitted to the President?

Mr. VOLKMER. That is correct.

Mr. ECKHARDT. And then, in a separate section, anything requiring the concurrence of both bodies must be so submitted.

Mr. BUTLER. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. GREEN).

Mr. GREEN. Mr. Chairman, I rise in support of the extension of the time for ratification of the equal rights amendment as reported by the House Judiciary Committee. I believe the passage of House Joint Resolution 638, without amendments, is an absolute necessity. For the women of this country, the votes we cast today signal our belief in the concept of equality as one of the basic tenets on which this Nation was founded. It also shows our support for the passage of the equal rights amendment and our belief that we have not yet completed the task of giving full legal representation to the majority of the people in the United States.

The issue before us today is whether we will allow an arbitrary and customary deadline to obstruct attempts to rectify years of inequality for women. Since coming to the Congress last February, I have been an active supporter and cosponsor of House Joint Resolution 638, the extension resolution, because I do not believe that stopping the vote on ERA in the States is fair, justifiable or in the best interests of all Americans.

The purpose of the ratification process is to allow time for debate and consideration in the States on crucial issues. Surely no one can argue that the debate on ERA is over or that the expression of public support in favor of it has been realized.

While ratification is still three States short, nationwide polls show that support for ERA ratification is nationwide, not regional. The most recent Gallup polls reported in July of this year reflect nearly a 2-to-1 margin of support—58–31 percent in favor. Increased support for ERA by a 55–38 percentage also emerges in the Harris poll, up from a January Harris poll of 51–34 in favor of its ratification. In addition, polls in States which have not ratified the ERA continue to show that the majority of citizens in those States support ERA.

The current March 1979 deadline is not relevant to the scheduled meetings of some State legislatures because they may not have an opportunity to vote after the 1978 elections. In addition, the legislative consideration in some States, as widely reported in the press, has been fraught with the actions of a vocal minority which has succeeded in barring full legislative action by holding ERA in committees and not giving both houses of State legislatures the opportunity to vote. To those who say that it is "not fair" to extend the ERA deadline, I respond that it is not fair to bottle up the amendment and subject it to ridiculous and untrue rhetoric designed to scare off legislators from working the people's will.

As a lawyer, I have carefully reviewed the arguments against Congress taking action on this question. I am not persuaded by those who argue that Congress cannot take this step. The Justice Department and many constitutional scholars have stated that we have the authority to extend the deadline as part of Congress power over the ratification process. What we are doing today is altering a procedural matter. The 92d Congress placed a time limit for consideration of this amendment in the preamble of the texts, not in the body of the amendment itself, and in so doing decided that the amendment should be viable for at least 7 years. Future Congresses such as ours are in no way barred from deciding that the reasonable time for consideration of ERA was in fact not enough time at all. Thus, we in the 95th Congress have the power to make that judgment on the basis of the passage to date by States which have 72 percent of this country's population, the record of delay and obstruction in several others and the overwhelming display of public sentiment in favor of the ERA.

I also believe it is imperative that we pass this extension without any amendments which would allow States to rescind their previous ratification. The Judiciary Committee's version of House Joint Resolution 638 says nothing about rescission, and the full House version of the resolution should not either. The appropriate time to decide this issue is when three-fourths of the States have ratified the ERA, and not before. There are many legal and historical precedents against allowing rescission at all, and Congress itself disallowed attempted rescissions on the 14th, 15th and 19th amendments. This is not the time to determine grave constitutional questions. For those who believe that it is a question of fairness that rescission be given a chance, I remind them that House Joint Resolution 638 does not prevent future rescissions, or validate or encourage them. It properly does not deal with this issue at all.

As I have talked to my colleagues and circulated information to them about this extension resolution, I have expressed a consistent theme: ERA needs more time. I firmly believe that by passing extension those of us in favor of ratification will have given supporters in the remaining States—and, indeed people across the Nation—the help they need to achieve our common goal. With this added impetus, the desires of millions of American women—and men—can be fulfilled.

It has taken far too long for women to achieve their rightful place in the Constitution of this country. We cannot allow a pattern of years of discrimination to remain, and we should not delude ourselves that without ERA it can be erased. A piecemeal attack on separate discriminatory laws takes too much time and is

a risk we cannot afford to keep taking.

In closing, the most eloquent statement of all about what we must do here in the House today in passing House Joint Resolution 638 can be found in the words of the ERA itself:

Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex.

Mr. ECKHARDT. Mr. Chairman, I am glad to see the gentleman from Kentucky present, and I thought I had seen a gentleman from Virginia, and another Member or two that I thought possibly had not made up their minds on this subject, in the audience today.

I would like to say this, the question of whether or not the resolution should have originally been passed was indeed a political question, a political issue in which I am very ardently in favor of the submission of the constitutional amendment. The question of the manner of the extension is not a political question, it is a constitutional question. When the courts use this term, "a political question" what is really meant is that the final decision may be made by Congress. But that does not mean that this body is not as solemnly bound to determine this question as a constitutional question just as the U.S. Supreme Court would be bound. There is only one oath we take here and only one oath we have to take in order to serve this body and that is to uphold the Constitution.

On that basis I voted to seat Adam Clayton Powell, not a very popular issue at the time, and on that basis I shall vote for an extension today because I am able to justify it constitutionally, but I cannot vote for an extension of the entire period in which States are bound without opportunity to rescind to a period of 10 years.

I come to that conclusion because I think that Congress, under article V, by a two-thirds vote, provided the appropriate period of time in which States could ratify and during which time they could not rescind. I cannot convince myself that the two-thirds vote would have been obtained had the submission been for an unlimited period of time, and I do not believe it appropriate for us to conjecture what would have happened at that time if the period had been 10 years.

Mr. Chairman, the point is simply this, that under Coleman against Miller, it is clearly stated that "They"—that is, the powers here granted—"arose under article V of the Constitution, which alone conferred the power to amend and determine the manner in which the power could be exercised."

Mr. Chairman, two-thirds of this body submitted the amendment. Two-thirds of this body provided the method of ratification as being limited to 7 years.

I submit that a majority of this body may not change the method of submission, which was done pursuant to article V.

I agree that an extension of 3 years may be permissible under the same authority, Coleman against Miller, which states: "Where there has not been an initial provision of limitation of time, Congress retains authority to determine what is a reasonable time."

The CHAIRMAN. The time of the gentleman from Texas (Mr. ECKHARDT) has expired.

Mr. BUTLER. Mr. Chairman, I yield 4 additional minutes to the gentleman from Texas.

Mr. ECKHARDT. Mr. Chairman, Coleman against Miller says as follows: "If it be deemed that such question"—and that is the question of time for ratification—"is an open one when the limit has not been fixed in advance, we think that it should also be regarded as an open one for the consideration of Congress when, in the presence of certified ratifications by three-fourths of the States, the time arises for the promulgation of the adoption of the amendment."

In this case Congress did not leave the question as an open question. Congress, in submitting the amendment, closed that question and by a two-thirds vote, and as a part of its determination in connection with the submission, provided that, in effect, the States should get out of this binding situation at the end of 7 years. A State did not even have to rescind. It was free to get out of its commitment at the end of 7 years because at the end of 7 years the full time for ratification would lapse.

Therefore, Mr. Chairman, I say that if we are to constitutionally extend the time—and indeed, I think we can, and indeed, I think we should—we must respect the determination made under article V by two-thirds of this body, which we cannot say would have agreed to the submission but for the 7-year limitation.

Mr. Chairman, we must carve this resolution around that constitutional submission which occurred in 1972; and to the extent that we attempt to alter that or further extend the net to further bind beyond the 7-year period, we, in my opinion, act unconstitutionally.

Mr. WIGGINS. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from California.

Mr. WIGGINS. Mr. Chairman, I commend the gentleman from Texas (Mr. ECKHARDT) for his statement. I believe that he is exactly correct in his analysis of one of the several constitutional issues confronting this body.

I further wish to commend the gentleman for the scholarly research he did in connection with the Powell-McCormack issue, which was noted by the Supreme Court, that the Court is not permitted to speculate as to whether or not Members of this body would have voted by a two-thirds majority when that issue was not directly before them.

Again, Mr. Chairman, I commend the gentleman for his statement.

Mr. BUTLER. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Chairman, we have all thought a great deal about this proposal for extension of the time for ratification of the equal rights amendment to the Constitution.

There are many legal and constitutional niceties which have been raised in debate, some of them real and some of them primarily arguments against the merits of the ERA.

Mr. Chairman, I supported ERA in the first place, and I shall support what I consider to be a reasonable period of extension, satisfied that that extension is within the legal capacity of the Congress.

I am not happy about the emotional environment of this decision by the Congress or the divisiveness that advocacy and counteradvocacy have created. I have never considered ERA much more than a symbolic act expressing national will but requiring countless additional steps to have real meaning. Enactment of ERA will not of itself or in any automatic sense affect patterns of life or of work. For the average American woman it will bring no discernible change because most of the remaining discrimination against women is vestigial, the result of attitude conditioning or social pattern rather than legal stricture.

Why bother, then? Mr. Chairman, while the positive symbolism of passing ERA, or permitting its possible passage by extension, would not be that significant, the negative symbolism of a vote which could be interpreted as a vote against equality for women would be devastating. America leads the world in the rights practiced by our people. Women all over the world, particularly in backward areas or areas where religion accords a secondary role to women, see America as a beacon of hope with respect to their status as human beings. Their expectations will be dashed by a conscious act of the Congress which they will see as a turn of public opinion against equality for women in this country. Perhaps some women in this country will see it the same way.

I regret the extent to which the women's movement in this country has made ERA the litmus test of public attitudes toward women. If that was bad judgment—and the confusions and misinterpretations involved in this national debate lead me to believe it was—that does not justify our using even worse judgment by flashing at best an equivocal and at worst a primeval signal to the Nation's and the world's women.

Mr. EDWARDS of California. Mr. Chairman, I yield 3 minutes to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Chairman, I think it is human nature to find all sorts of excuses why we should not do something, and I think especially the nature of this body where it is so much easier to get caught up in form and not deal with substance.

Many of the speeches that I heard today I think have shown that we are still not dealing with the substance of what the equal rights amendment is really all about and why it is not just a symbolic act. The equal rights amendment is very important.

One of my frustrations in talking about the equal rights amendment as I go around the country is that I have to spend most of my time saying what it does not do. It does not make unisex toilets. We are not talking about making

men and women the same. The Congress may not be the brightest body in the world, but even we know we cannot pass legislation that is going to change people's chromosomal composition. I have people saying, "That is baloney; you women are already in the Constitution." I wish someone had told our foremothers that when over a thousand of them went to jail, when they were force-fed, and carried on a fight for years to get the right to vote. I do not know if the Supreme Court was reading the Constitution differently then than they would now, but, nevertheless, it was thought they were not in the Constitution, and they had to go through all that to get the right to vote.

I think if one talks to the Department of Justice, one will find that they think the ERA is a bit more than a symbolic act. They have compiled at this point over 800 incidents in the Federal court where there is sex discrimination, and they go from things that one might consider minor, such as if you are a Boy Scout you can fly space-available on military planes if you are in uniform, but if you are a Girl Scout, you cannot, all the way to more serious matters. Many of these even discriminate against men. We find in many instances if you are the mother of a disabled veteran, you get certain benefits, but the father does not. Why should he not get benefits? He is also providing for the family.

A lot of this legislation is outdated. A lot of these things, changes should be made. People say, "We will change them without the ERA." We will not get 800 pieces of legislation correcting sex discrimination through this body. We know that, but if the equal rights amendment passes, we will have a couple of years to do it. It will force us to focus on discrimination. That is the substance we are talking about in the Equal Rights Amendment. It is very serious.

I have heard the other side come up to me in tears saying, "Mrs. SCHROEDER, why do you want my daughter to go into combat?" I say to them, No. 1, your daughter can be drafted with or without the equal rights amendment; but, No. 2, to let that side wrap themselves in the flag and say, "That is the American way" offends me because if one looks at the history of this country, American women have always participated.

I find it incredible that with or without an equal rights amendment if this country were in trouble that the women of America would say, "I'm sorry. We don't want to go. It's just too bad. We're privileged, don't count on us."

That is not the way the women of this country have acted in prior wars. That is not the way I ever want it to be. We hope there are no more wars for our sons or daughters; but the equal rights amendment, I do not think, makes any difference whether women are in the draft or not in the draft.

Mr. Chairman, I urge that we keep focus on the substance of the ERA as we discuss it.

Mr. BUTLER. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. MOORHEAD).

Mr. MOORHEAD of California. Mr. Chairman, I rise in opposition to House Joint Resolution 638. This morning we are considering legislation which would set an important and fundamental precedent in our constitutional history. Should Congress, for the first time, extend the previously-fixed time period for the ratification of an amendment to the Constitution?

When the 92d Congress adopted the equal rights amendment in 1972, its clear intent was that the proposal be accepted or rejected by the several States in a 7-year period. Within 1 year after its submission to the States, 30 States had ratified ERA. Since that time only five additional States have ratified, while four State legislatures have acted to rescind their earlier ratifications.

What is a "reasonable time" period for ratification? Under article V, Congress is granted the power to determine the "mode of ratification" of the Constitution. Thus, Congress has the right to determine what is a reasonable time and this discretion has been recognized by the Supreme Court. *Dillon* v. *Gloss*, 256 U.S. 368 (1921); *Coleman* v. *Miller*, 307 U.S. 433 (1939). It is not a question of whether Congress can extend the period constitutionally. Clearly, Congress can do so. Rather it is a question of whether Congress ought to extend the time.

To me, then, the issue of extension is not a constitutional question. Rather, it is a question of good public policy. The process of amending our Constitution was not intended to be simple or expeditious or casual. From the beginning, it has been intended to be a deliberate, difficult process—aiming at assuring that a strong national consensus exists on the matter in question. The Supreme Court, in the Dillon case, spoke of the ratification process as being aimed at achieving a "contemporaneous consensus."

It seems to me that 7 years is a reasonable period of time within which a national consensus should reflect itself. No constitutional amendment submitted to the States with a 7-year time limitation has taken more than 4 years to achieve ratification, and most have been ratified within 1 year. To change the rules at this point undermines the possibility of attaining a true, genuine consensus on this issue. We should not change the terms of the contractual scheme which Congress offered the States 7 years ago. We should not change the means of achieving a true national consensus, simply because the ERA is particularly controversial or symbolic in some quarters.

Fairness, consistency, precedent and the desire to achieve genuine consensus—all of these factors argue against the extension of the time period. Nothing prevents ERA proponents from starting over again in the next Congress, with a new amendment and a new, uncluttered 7-year ratification period.

I urge a "no" vote on House Joint Resolution 638.

Mr. EDWARDS of California. Mr. Chairman, I yield 3 minutes to the gentlewoman from Maryland (Mrs. SPELLMAN).

Mrs. SPELLMAN. Mr. Chairman, I find it inconceivable that today we are still debating the question of equality for over one-half of the population of the United States. I also find it inconceivable that there are those in this House who question the fact that women are not yet being given equal status—we see it every day in lower salaries, we see it every day in unfair treatment in the granting of credit, we see it every day in the handling of rape cases in the courts. We see it every day in a hundred different ways.

Thank goodness, today we recognize the inequalities—for the greatest part of my lifetime we did not. Women were subjected to indignities and accepted them as their lot.

The amendment is a simple statement which says:

> Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex.

Substitute for the word "sex" the words, "race, religion, or age," and there is no State legislature that would refuse ratification to an amendment on those grounds.

Equal rights is a pressing concern for many in today's society, and with the deadline close at hand, the debate is livelier than ever. This amendment deserves the additional time extension for full consideration.

Constitutional recognition of the equal rights of all people, men and women under the law is of such importance that we should encourage it in every way. A vote for the deadline extension will insure the additional time needed for discussion in many of the State legislatures.

We cannot turn our backs to this vital legislation, causing women to continue to fight the law—line by line, regulation by regulation, to achieve equality.

Would there be any doubt in the mind of anyone present that we should take the additional time to seek ratification if we were attempting to erase discrimination based on the shade of ones skin? Of course not. I ask that we do no less to erase discrimination which is based on the shape of my skin.

Mr. BUTLER. Mr. Chairman, I yield 3 minutes to the gentlewoman from Massachusetts (Mrs. HECKLER).

Mrs. HECKLER. Mr. Chairman, it is quite obvious to everyone in this Chamber that this is not a usual legislative day. We are not going to have a vote on a humdrum legislative matter, but one of great difficulty, of high anxiety, for Members of this body.

This is really a moment for history, history in terms of the rights of women. It is a moment that millions of Americans as well as scholars of the women's movement and of the progress of women in American society will evaluate in their communities and classrooms and in the libraries across America for some years to come.

The issue before the Congress, of course, is the question of the extension of the deadline for the ratification of the equal rights amendment. I think this issue goes to the heart of the concept

that is most basic to all American society, and that is the right and the need for full discussion of all issues of national concern.

Of course, 7 years ago, when Congress considered the ERA and sent it to the States, we faced in debate a large number of issues. We expected that these issues would also be debated similarly in State legislatures across the country. However, we found that what was then believed to be a reasonable time turned out to be not time enough, merely because in many of these State legislatures there was no consideration of the issue whatsoever. Committees with few members bottled up the issue according to their parliamentary procedure and removed the opportunity for discussion.

The question today is this: Is there really a need for equal rights for women? Should the debate go on?

I ask each Member of this House to search their offices for a document that I have found helpful—a document called "Sex Bias in the United States Code," published by the U.S. Commission on Civil Rights in April 1977. It is a 220-page document, cataloging all the areas of discrimination against women on the basis of sex—discrimination not against women but discrimination on the basis of sex, most of which occurs in relationship to women.

Mr. GILMAN. Mr. Chairman, will the gentlewoman yield?

Mrs. HECKLER. I yield to the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I thank the gentlewoman for yielding.

Mr. Chairman, I want to commend the gentlewoman from Massachusetts (Mrs. HECKLER) for her leadership and devotion to this important cause. I strongly supported this cause in the New York State legislature, and I intend to support it today.

Mr. Chairman, I am rising in support of the extension of the equal rights amendment ratification deadline, in opposition to the recission clause, and in opposition to the call for a two-thirds vote on the extension. After long and careful consideration of all the issues involved, I believe that these positions are sound, and that the endorsement of an extension is bringing us a step closer to equal rights for all persons without regard to sex.

It is a sad chapter in American history that discloses that equal rights are denied to over one-half the population simply on the basis of sex. While the United States has taken a leadership role in urging all nations to respect the human rights of their citizens, there has been an abridgment of the rights of our American women. This is not an issue of simply "extending a deadline"; rather, the issue embraces basic human rights which have been too long in coming. So many misconceptions, so many distortions of the truth have made this issue cloudy, camouflaging the real issue here. What is at stake is the well-being and human dignity of all women—allowing, as if we should allow, as if this right is not inherent—women to earn as much as men, allowing them the freedom to enjoy the rights which should be theirs from birth.

Mr. Speaker, several constitutional issues are involved in this extension, and I believe that each legal argument, carefully weighed, will prove that this extension is legal. Congress has the right and the authority to set the time limitation on the ratification of amendments. In exercising this authority, the Congress is taking into account that sweeping social changes, such as those resulting from the passage of the equal rights amendment, may take years to take effect. A 7-year ratification period is not necessarily realistic, nor should it be considered binding. The equal rights amendment is timely, contemporaneous and extremely important to the quality of life for all Americans, Mandates such as this one, which affects the basic conditions under which women live, should be given time—time to dispel myths, time to drive the point home, time to enable all of the differences to be aired. Obviously, 7 years has not been enough.

With regard to rescission, I have carefully reviewed the issues at hand. The Constitution presently has a mechanism for voicing a change of opinion in reference to amendments already adopted and that vehicle is repeal. That is a proper route for those seeking rescission. As early as two centuries ago, one of our Founding Fathers, James Madison, stated that the States cannot rescind their agreements, and that a positive vote for an amendment is a trust between the State and the Federal Government which should not be broken. If, after the ratification process has taken place, any State deciding to rescind its affirmative vote on the amendment, may seek to repeal the amendment. Repeal is a legal and proper way for States to express their disapproval.

Another question which has arisen in the consideration of this proposal is the question of the number of Members who must vote on this extension proposal before it is accepted. Since this is a procedural vote, I believe that a simple majority, as opposed to a two-thirds vote, is adequate, and this contention has been supported by many members of the Judiciary Committee. A two-thirds vote is necessary only in a few instances; the ratification of treaties, the override of vetoes, and on a constitutional amendment. The extension proposal in no way should be construed as a constitutional amendment. The extension is a simple procedural act of Congress which allows the States which have not ratified the amendment already, to have more time to include this important amendment in our Constitution.

The crucial consideration in all this is the urgency with which this amendment must be viewed. Daily, women are being denied rights and earnings which are not being denied to men in equal position. For instance, women earn only 57 percent of a male's income. There are presently 800 instances in the United States Code which assign women to subordinate positions solely on the basis of their sex. Scholarships are denied to women, and women professors earn an average of $3,000 less than their male counterparts. These are but a few examples of discrimination against women; the list goes on and on.

An argument which has been voiced on many occasions in opposition to the equal rights amendment is that the passage of this amendment will have a detrimental effect on family life in America. This is blatantly false. The equal rights amendment will raise the status of women, permitting them to choose careers, to choose conditions under which they exist, and will allow them to contribute more fully to their families. Choice is crucial here. Passage of this amendment will not force judgment upon most women, or will it alter their lifestyle. What it will do is allow women a freedom which had never been theirs, to accept responsibility, to earn a full wage, and to glean the self-respect which should have been theirs all along.

How ludicrous that in this Nation we maintain our pride about equal opportunity, equal access, human rights—yes, human rights for all the rest of the world, but for half our population, there have been subserviance and subordination. Is this the legacy we want to leave our children? Is this the example that we wish to set for the rest of the world? If it is, then we cannot call upon other nations of the world to honor human dignity when we fail to do so at home.

Accordingly, I urge my colleagues to extend to our women the same rights as we have, the same rights that we share as a common heritage. It is time for equality, time for this raising of status, for the realization that all men and women are created equal and have equal potential.

Mrs. HECKLER. Mr. Chairman, I thank the gentleman from New York (Mr. GILMAN) for his kind and supportive comments.

Mr. Chairman, I go back again to a discussion of the document I mentioned and the cataloging of ills affecting our society based on Federal laws which discriminate on the basis of sex, and I cite one particular instance of discrimination that should plague the conscience of each and every Member of this House.

We spent countless hours in this House on the subject of social security and the reform of the social security system. Many of us and I was among them, who wanted to vote to roll back the social security taxes, but the House did not have the will to accomplish this, despite the exorbitant level of taxation imposed on the American people. The issue was never actually brought to a vote. Who can assert with integrity that this Congress will vote to make the social security system fair to workingwomen.

The CHAIRMAN. The time of the gentlewoman from Massachusetts (Mrs. HECKLER) has expired.

Mr. EDWARDS of California. Mr. Chairman, I yield 1 additional minute to the gentlewoman from Massachusetts.

Mrs. HECKLER. I thank the gentleman for yielding Mr. Chairman, continuing our discrimination against women in the social security system, I would stress to my colleagues that deductions are made from the weekly

wage of every workingwoman across America.

In Fall River, Mass., a special city in my district, where the garment industry is the major employer, women are paid $4.12 an hour per person. At that level the garment worker receives a deduction from her salary per week, and over a 20-year period she contributes to the social security system $10,000, but if she claims benefits based on her husband's higher income, her $10,000 is lost.

For the average American secretary, her $15,000 that she has contributed to the system is lost if she draws on her husband's pension.

Is that fair to the workingwomen of America? That is the type of economic issue that deserves full debate in America.

So, Mr. Chairman, I ask my colleagues to support this extension, not because they want to be beneficent to women but in the name of simple justice for all. That is what this democracy is about.

Mr. EDWARDS of California. Mr. Chairman, I yield 3 minutes to the gentleman from Virginia (Mr. HARRIS).

Mr. HARRIS. Mr. Chairman, the subject of extending the time period for the States to ratify the equal rights amendment to the Constitution has been difficult and complex. I believe the House Judiciary Committee, on which I serve, has acted carefully and deliberatively; we have studied legislative history, court opinions, and the views of many legal scholars, and then acted. The committee has reported a sound resolution.

I support House Joint Resolution 638, extending until June 30, 1982, the time period for ratification of the equal rights amendment.

It is important to understand that article V of the Constitution is silent on the subject of time limitations for ratification periods. During the first 125 years of our constitutional history, Congress did not provide for such limitations. In more recent years, time limits have appeared in the proposing clauses—not in the proposed constitutional amendments themselves. Legislative history shows that Congress began including time limits to avoid "cluttering up" the Constitution with language that had no bearing on the substance of the amendment itself or on the merits of the issue embodied in the amendment. By doing so, Congress did two important things:

First, Congress separated from the merits of the proposed amendment the question of time limits and the issue of what constitutes contemporaneous approval by the States; and

Second, Congress retained the authority to review the limit, should circumstances so warrant.

I believe this is an important consideration and basic to our discussion today. The issue of a constitutional amendment guaranteeing equal rights is very much alive today. It is an urgent public, social concern. Sufficient time for public debate and State legislative action should be allowed.

A constitutional amendment is not a frivolous political poker game. It is a change in the fundamental document of our Government, a very serious action. I believe the public needs an adequate time to consider making such an important change in our Constitution.

To put this in the proper historical perspective, I would like to make the point that the public debate on the constitutional amendment guaranteeing women the right to vote lasted for 72 years, from 1848 to 1920. Similarly, the 13th amendment, abolishing slavery, was publicly discussed for decades. Issues reflecting fundamental questions take time for full public debate and understanding, time to address fears, time to consider the issues on their merits.

The issue of rescission of ratifications by the States has also plagued the extension issue. This resolution is silent on the issue of rescission: it neither allows it nor prevents it. The legal scholars appearing before our committee generally agreed that the decision on rescission is a decision to be made by the Congress sitting at the time the 38th State ratifies. Any action by a Congress prior to that time would be premature and not binding. Taking such action today would be misleading. The Congress in session when the last State has ratified should make the decision on whether the 38 ratifications are in fact valid.

I have supported the equal rights amendment for a number of years. I do so because I believe that the U.S. Constitution should guarantee full and equal rights to citizens without regard to sex. I reject the notion that the equal rights amendment will alter family structure, set up numerical quotas, or impact on abortion laws. It is a fundamental policy statement that one's sex should not be a barrier to participation in our society.

In recent years we have made great strides in equality for women. Many doors are opening. Many stereotypes are falling. Guaranteeing equality is a positive step forward, not a fearful plunge. "Equal opportunity for all" should not merely be a shibboleth; it is not just a slogan on a coin; it should be a fundamental constitutional principle. For in my view, democracy will only work for all the people if all the people are part of it—and importantly, if they know they are part of it.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Illinois.

Mr. HYDE. I thank the gentleman for yielding, and I would like to ask the gentleman a question. Is it the gentleman's statement that the States do not have the power or the right to rescind a previous ratification?

Mr. HARRIS. Quite clearly they do not have it under the Constitution.

Mr. HYDE. Is that because the Constitution does not confer that power on them in article V?

Mr. HARRIS. Quite clearly.

Mr. HYDE. I would like to ask the gentleman how he justifies or explains away the 9th amendment and the 10th amendment to the Constitution, which says:

> The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.

I always thought the flow of power came from the people to the Congress and any power not specifically delegated in the Constitution is reserved to the people. Is not that what the Constitution says?

Mr. HARRIS. I think that is an interesting question. The Constitution is quite clear in article V that the States are empowered to ratify a constitutional amendment, certainly not to rescind it.

Mr. HYDE. It does not say that, though.

Mr. EDWARDS of California. Mr. Chairman, I yield 3 minutes to the gentleman from Nevada (Mr. SANTINI).

Mr. SANTINI. Mr. Chairman, the gentleman from Texas, I believe, was right in two substantial respects. First of all, the assumption that he was addressing about two, possibly three, people in the House of Representatives who had not already arrived at the point of conviction on the issue, before the House may well be correct. Second, he was right when he courageously and consistently pursued and fulfilled his long-established and identified role as a civil libertarian in this body.

It is extraordinarily difficult, with an issue of this magnitude and this emotional conduct, to ask for such courage and consistency. But he zeroed in on the very fundamental question that has been submerged and buried in the overwhelming emotional and intellectual appeal of the basic issue of the equal rights amendment. Is this process that we pursue constitutional? I believe that it is a critically important issue. I think we as a body demean or detract from our collective identity when we treat the constitutional mechanism as merely an irritating and detracting incidental barrier in the fulfillment of a justifiable cause, the rights of women of our country. It is sad to have the response that constitutional contentions are merely a technical hangup or handicap that detractors of womankind are resorting to undermine the basic cause. I suggest that such conclusions are unfair nonsense.

A substantial number of this body with whom I have conferred both publicly and privately have themselves expressed grave reservations about the device that is being employed here to achieve a desirable goal and objective. Because in the process of pursuing a goal of basic fairness the sponsor's of extension are proposing an amendment process that may haunt this body for years to come. I would offer this hypothetical illustration to the members of this committee, who are ardent and avid supporters of the extension. Suppose, for a moment we were considering on this floor this afternoon a constitutional amendment that would permit rescission only.

Assume with me, if you will, that 37 States had ratified, and in 2 months time it appeared that the 38th State was going to ratify.

The CHAIRMAN. The time of the gentleman from Nevada has expired.

Mr. EDWARDS of California. Mr. Chairman, I yield 2 additional minutes to the gentleman from Nevada.

Mr. SANTINI. Assume with me that

we are at this threshold of ratification. Opponents of ratification come in and say that we need 3 years, 3 months, for rescission. What then would be the call and response of those who have fought so long and so hard in the trenches of equality to that kind of outrageous proposal? Why, the cries of indignation would ring across the Nation. Not only would the bones of our Founding Fathers be rattling in the Chamber, they would be rattling across the Nation in outrage at this kind of constitutional highjinks.

I would submit the issue is the same in our present context. All must accept that we are exploring murky and unprobed constitutional waters. These are turbulent constitutional seas that have never been sailed before. I would urge each and every Member who has a modicum of objectivity left on this issue to consider the precedent and action we set here.

If he or she is totally satisfied in their minds that this action is consistent with the kind of constitutional precedent they want to serve this Nation in the future then by all means endorse wholeheartedly the extended proposal. But remember if this elastic amendment process can apply to ERA then it will also apply to abortion, busing, and prayer in school. But if they share with me the greatest of concerns about the device we employ here to achieve the most desirable objective, then I hope they will share with me an opposition to this extension proposal.

Mr. BUTLER. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania (Mr. MARKS).

Mr. MARKS. Mr. Chairman, I stand before this body today as the father of three young women. I stand before this body today as one along with so many others throughout the country who are determined to end discrimination that has for so many years been acknowledged as discrimination against women in this country. I suggest to all of us here that the issue is not a procedural one any longer. It is not an issue of the extension any longer, or rescission any longer.

It is the issue that has been portrayed, particularly by the women Members of this Chamber when they suggested to us that it is a matter of finally ending discrimination. This is an emotional issue. This is not one in which we can stand idly by and speak casually.

I suggest today, as Mrs. HECKLER mentioned is an important day in history, and will go down in history as a most significant, important day for this Chamber. It is one in which all of us, men and women alike, must look about us and see to it that the women of this country no longer must bear any burden due to discrimination in any form. We must send out a message today that those of us in this Chamber will no longer tolerate that discrimination.

May I ask the Members to join me in seeking this is taken care of once and for all with the opportunity we have today.

I hope to have the occasion to speak again on the amendment pertaining to rescission, but I ask my fellow Members to join those of us who are so strong in our sentiments to make this the day when we end discrimination once and for all by seeing to it that we have the extension of time to do it.

I ask all of you to join me in voting to extend the time for ratification.

Mr. EDWARDS of California. Mr. Chairman, I yield 4 minutes to the gentleman from New York (Mr. SCHEUER).

Mr. SCHEUER. Mr. Chairman, I yield briefly to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Chairman, I thank the gentleman very much for yielding.

I just wanted to congratulate the gentleman from Pennsylvania (Mr. MARKS), who preceded the gentleman from New York in the well, because I think what the gentleman from Pennsylvania was saying so very eloquently is what we are all talking about, the achievement of equality of the sexes which is an ongoing historical movement. We are dealing today with the latest reflection of it and this movement is not going to end in 1979, no matter what we do here today.

Mr. SCHEUER. I quite agree with the gentleman from New York (Mr. FISH) and I also on my own behalf wish to congratulate the gentleman from Pennsylvania who preceded me in the well.

During this year, I have had the opportunity to gain a new perspective on the need to guarantee the equal rights of women. During the hearings on population and development assistance of the Select Committee on Population, numerous witnesses suggested that development programs as well as the very vitality of societies, will be impaired unless and until the contributions, potentials and needs of women who will be affected by them are understood and addressed at every stage of planning and implementation.

In the developing world, hundreds of millions of women—indeed, the majority of the population of every country—have been almost uniformly excluded from the benefits of development. This has occurred despite the key role women have played in such essential areas as agricultural production and processing.

In the developing world, millions of women do not have access to the most basic of educational experiences; they do not have access to economic opportunities outside the home or the farm; nor do they have the right to participate—even marginally—in the political and social decisions of their society.

The main condition of discrimination around the world is not color discrimination, it is not racial discrimination, it is not age discrimination, and it is not political discrimination: It is discrimination against women. Anybody who has ever participated in an international conference on human rights knows that a pervasive problem around the world in economic and social development—indeed, in terms of simple decency and humanity—is the systematic demeaning of the status of women.

Our global population is growing at an unprecedented rate. At the present rate of population growth, the current population of 4 billion will grow to 7 billion by the end of the century and possibly level off somewhere between 12 billion or 20 billion or 22 billion is a question of monumental importance to all of us.

The key to this issue of affecting the fertility decisions of hundreds of millions of couples in the developing world is their status in the eyes of society and the perceptions women hold of themselves. If women are born and bred and conditioned themselves as merely childbearing creatures with no other possibility in life for expressing their humanity, enriching themselves and contributing to society, other than bringing children into the world, they cannot be expected to do anything else, and indeed they act out that role as their only way of expressing their humanity. But as soon as countries in the developing world give the local communities and the local women access to elementary education so they can become literate and give them opportunities in the job market, as soon as there is a reasonable minimum age for marriage, then women begin to change their perceptions of themselves and begin to look at themselves as people with independent values and independent worth apart from their child-bearing functions. They then begin to participate in society in all of the multiple ways American women have been doing for generations.

The question is why so little substantive attention and concern have been paid to the roles of women in society. Why have so few serious attempts been made to strengthen and expand the productive activities and opportunities of women so that they can reach their full potentials? Why have women's concerns been viewed as separate issues—issues that can be resolved by a token project here or there attached to a larger development project—rather than as issues that are central to the success or failure of the entire development endeavor?

The answer to these and other questions surrounding the equity of women can be found in the political, attitudinal and conceptual roadblocks that have been erected and maintained by male-defined, male-oriented and male-dominated hierarchies.

I submit to you that those same roadblocks in the developing world are also inhibiting the ratification of the Equal Rights Amendment in the United States; in fact, those same barriers are inhibiting congressional action to extend the timeframe in which the ERA can be ratified.

Last year, a number of colleagues and I had the opportunity to participate in the first meeting of an International Group of Parliamentarians Concerned with Population and Development. This group is planning a major international conference of parliamentarians from over 50 countries, scheduled for August 1979 in Sri Lanka. During a subsequent planning meeting in Tokyo, the issue of women's rights throughout the world was raised. The U.S. delegation to this conference expressed an interest in preparing a report on the status of women, to be presented to the parliamentarians attending the Sri Lanka Conference.

It was our intention to do a systematic

review of conditions in most countries of the industrialized as well as the developing world. Logically, the best place to begin this study would be in the United States.

The most obvious roadblock to improvements in the status of women in the United States is our inability to ratify the Equal Rights Amendment. As long as the rights of American women are not formalized in our hallowed Constitution—the most precious document in the world to lovers of freedom and equality everywhere, in effect, we cannot say that women do indeed have equal rights in the United States of America. To remedy the mistakes of the past—where it was possible openly to discriminate against women in, say, the job market—we must set the record straight and put our constitutional house in order in unmistakable fashion by passing the ERA. We cannot, in all honesty, criticize other nations for their unequal treatment of women and urge them to take the painful steps down the road to progress so long as our own country has not assured women constitutional equality here at home.

I hope that the U.S. delegation to the Sri Lanka Conference will not have to report that the U.S. Department of Justice has produced a 200-page list of structured, legislated and administered inequalities between men and women in the United States—where women are overwhelmingly the victims—and that this list remains in effect partly because the Equal Rights Amendment is not a part of the U.S. Constitution. The Congress now has a unique opportunity to show its support for the official recognition of the equal rights of women. If we waste this opportunity and shun our responsibility to the majority of the U.S. population, we will also, thereby, exhibit to the entire world how shallow and hollow are our own exhortations to them to move swiftly in enlarging freedom and making progress toward real equality of all women everywhere.

Mr. BUTLER. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

Mr. BUTLER. Mr. Chairman, I yield 9 minutes to the gentleman from California (Mr. WIGGINS), a member of the committee.

Mr. WIGGINS. Mr. Chairman, central to the argument advanced by those who support this resolution is that the equal rights amendment remains a vital issue and that the debate should continue. It is said that the ERA issue is alive and that the debate is proceeding with intensity. I wish to challenge that threshold and central argument. Of course, a debate is continuing, as is the usual custom after any election is over, but with respect to the ERA, all of the preelection debate has been concluded. Three-fourths of the States are necessary to ratify. One-fourth of the States can defeat ratification. In other words 38 States must agree to approve; 13 States must agree to disapprove. To date, 14 States have voted no. One additional State, Mississippi, is so clearly opposed that it has refused even to consider the amendment. Therefore, we can state with some confidence that 15 States, 2 more than is necessary to defeat the equal rights amendment, have expressed their opposition to it. And four more, those which have rescinded, can hardly be counted as ERA supporters. The necessary votes to defeat ERA have in fact already been cast. Therefore, the current debate, Mr. Chairman, is among those on the losing side of the issue.

Related to this matter of the vitality of the current debate is the requirement that for any amendment to become a part of our Constitution, it must embrace a consensus, a current consensus, of three-fourths of the States.

It is my belief that ERA does not now embrace that consensus and cannot reach that consensus within the time frame contemplated by this amendment.

The unstated reason why this resolution is on the floor is because the proponents are unconvinced that a new ERA proposal would receive a two-thirds vote of the Congress, or if it did, that it would gain ratification in those 35 States which have heretofore ratified ERA. That unstated reason, Mr. Chairman, is a tacit confession, even by its supporters, that the required consensus of three-fourths of the States does not now exist and could not be gained within the next 3 years and 3 months.

Parliamentary manipulation will not strengthen the uneasy coalition which now exists in only 31 States. In fact, it may poison the well. It may destroy the coalition entirely.

This point was made strongly by a member of the committee in his separate views, the gentleman from Illinois (Mr. MCCLORY) and the gentleman is right.

During this debate, Mr. Chairman, we have talked about rescission and we have talked about the presumed power of a subsequent Congress to rule on the question of rescission. There has been a general assumption drawn from dicta in the Coleman case that following ratification by three-fourths of the States, Congress has the power to hold post-ratification review and by a simple concurrent resolution, passed by a majority, to declare the amendment to be part of the Constitution.

Well, Mr. Chairman, I am not sure that Coleman is good law on that point. The Coleman case was described by a distinguished law professor, Professor Black, as so thin that a cat could not walk on it, and I agree. That case is, indeed, a shaky precedent. The case reviewed the history of the 14th amendment and noted that such a concurrent resolution approving ratification was passed in that Congress. But can we be sure that the court would have condoned a concurrent resolution rejecting the amendment? I think not; especially in view of the plain language of article 5 and the holding of the Dillon case that the amendment becomes part of the Constitution when ratified by the last State. Of course, a question may arise as to whether ratification, in fact, occurred, as was the case in Kansas with the child labor amendment.

For my part, such technical issues relating to ratification surely lend themselves to judicial review and are not political questions. I place the issue of rescission in that category. I do not believe rescission is a political question. The only political question decided by Coleman was that when Congress failed to establish a time for ratification, a judgment as to what is a reasonable time was political. What should be the power of Congress in the event of a stale ratification? The timeliness of a ratification where no time limit is contained in the amendment itself poses a difficult question. As I see it, there are two general options available to Congress: Congress can act after the last ratification to determine its timeliness, or alternatively, Congress can act before the last ratification to withdraw a stale amendment.

The first option, as I said, is discussed in Coleman; but I find that a very troublesome precedent.

The second option runs afoul of the conventional wisdom that Congress may not withdraw an amendment previously submitted to the States. This is scholarly opinion, and it is only that, since it has never been tried, should be challenged. If Congress were to do so, that is, the States were to withdraw an amendment, the States are not without their remedy.

They could propose their own amendment in the manner prescribed in article V of our Constitution. Moreover, the withdrawal of ratification is consistent with the contract analogy mentioned in the views of the gentleman from Virginia (Mr. BUTLER), which I find to be a good one.

In addition, any constitutional effort to withdraw would certainly trigger prompt affirmative action by States which desire to ratify but had merely been tardy in doing so.

But most important of all, Mr. Chairman, Congress would be denied the power by a simple majority to overrule three-fourths of the States. Such a procedure discussed in the Coleman case offends constitutional principles. It would be difficult to hold a future Congress to consider only the issues of timeliness. Surely the wisdom of the amendment itself would infect such congressional deliberations, as it has done so today.

Mr. Chairman, I think I have said

enough about the law. I want to appeal to the Members' sense of parliamentary regulatory procedures. I ask the Members to picture this scene, if you will:

Let us say a vote is being taken under suspension of the rules. Two-thirds is necessary, of course, for passage, and more than one-third have voted against the measure. As the clock ticks down to 1 minute remaining, the Speaker announces that the time will be extended for an additional 5 minutes, during which period only the aye votes will be counted and Members will be permitted to change their vote to aye only.

What would be the response of the Members? Pandemonium, I suggest. We simply would not tolerate it. It would offend our sense of parliamentary regularity and our sense of fairness.

Mr. Chairman, the proposal before the House today deeply offends my sense of fairness, and I hope the Members will vote against it.

Mr. EDWARDS of California. Mr. Chairman, I yield 4 minutes to the gentleman from Pennsylvania (Mr. ERTEL).

Mr. ERTEL. Mr. Chairman, I would initialy like to indicate where I stand on the equal rights amendment and on the extension. I am for both. I believe that we do need to have in this Nation a clear declaration that there shall be equal rights for all, and that includes sex.

I am also for the extension, because I believe it is fair to allow the debate on this issue to go forward and, I hope, eventually to ratification of the amendment.

But when I look at the initial amendment as proposed, I find they put in a 7-year time limit. I think it was a mistake to have done so, but that was a mistake made by a previous Congress in which I did not participate.

However, having had that particular 7-year period included in there, now comes the issue today: How can we extend the time and do it fairly to allow the debate to continue?

The Constitution requires a contemporaneous ratification by the States. It seems to me that when the Congress put in the 7-year period, they said, "This is a reasonable time, as far as we can judge, for a contemporaneous ratification."

We are now proposing to extend that time. Yet we have as a Congress made a good faith commitment to the States and to all other people in this Nation that a 7-year period would be allowed and that it was an appropriate time for contemporaneous ratification. We are now going back and changing it.

I think we can do that, but to do so we must do it fairly, with a sense of justice and a sense of fairness. It seems to me we must say to those States that have already ratified and who relied on that 7-year period that "You shall have the opportunity, through these additional three years, to say, 'No, I want to change my mind.'"

We are almost at this point saying, "This is a new ball game. This is a new amendment that is being proposed to you."

Under the law, if a State or some legislative body has acted, that implies a continuing affirmation of that action forever unless thay change their mind. If we pass a statute today, 10 years from now or 20 years from now that is still a good statute.

That continuing intent is there. But here I think, with a 7-year period, that a continuing attempt expires. If we are going to continue it and say that the continued attempt is continuous, we must give them the right to say, "No, we do not agree to continue it." And we must give them that, in fairness, so that this amendment, when it is ratified, will not be subject to controversy in the Court.

Mr. Chairman, I will address that issue during the 5-minute rule.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding.

Mr. Chairman, I rise in strong support of House Joint Resolution 638.

I have long been a supporter of the equal rights amendment, and believe that the need for its passage is as compelling today as it was in 1972. The need to establish a national standard prohibiting sex discrimination is unquestionable. One need only examine the statistics: women earn 59 percent of what men earn, although they represent 47 percent of the labor force. And 70 percent of the women in the labor force work either because they are the sole support of their families, or to bring the family income up to $10,000. But although it is clear that this measure is of vital importance, it is threatened with extinction unless we extend the time for debate.

The issue at stake is whether this Congress has the authority to provide an extension. After examining the relevant documents, I have concluded that we do indeed have this responsibility; it is our duty to allow discussion of the ERA to continue. The defeat of House Joint Resolution 638 would prematurely end consideration of this amendment; dealing a blow to the spirited debate being conducted by proponents and opponents alike. The 7-year limitation for ratification was included in the preamble because it was a customary time limit. But in retrospect, it appears as though the issue would have benefited from greater discussion at the time of consideration. The equal rights amendment is a profound human rights issue involving a fundamental change in attitude about a majority of our population. Because of the strong emotion it generates, it was perhaps naive to believe that ratification could be achieved within 7 years.

The Supreme Court has ruled on two occasions—Dillion against Gloss and Coleman against Miller—that Congress has the power to determine a reasonable length of time for ratification of a proposed constitutional amendment; reasonable being that which was determined by the issue's vitality and timeliness. Surely, the ERA meets this criteria.

Critics of the ERA contend that it is unnecessary as a vehicle for fighting sex bias, because the 14th amendment sufficiently does so. Others argue that discriminatory State and Federal laws can be amended on a piecemeal basis. However, in a study of the United States Code conducted by the Civil Rights Commission in April 1977, over 800 instances of sex bias in our Federal laws were found, including the areas of employment, credit, education, and social security. The equal rights amendment will rectify this situation through the establishment of one system of justice for all. It is imperative that debate on this issue be allowed to continue, for the question of equality for more than half our citizens is one which can be subjected to no time limit.

In conclusion, I would like to share with my colleagues a thought of Walt Whitman's:

> Of equality—as if it harmed me giving others the same chances and rights as myself—as if it were not indispensable to my own rights that others possess the same.

Mr. BUTLER. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. Mr. Chairman, I urge the defeat of House Joint Resolution 638, which would extend the time for ratifying the equal rights amendment. Seven years to ratify this amendment is long enough.

By expiration of the March 1979 deadline, State legislatures will have had 7 full years to consider the proposed equal rights amendment. For 7 years advocates of ERA will have had an opportunity to convince the members of these legislatures that the amendment should be added to the Constitution.

Seeing failure on the horizon, however, proponents of the amendment now want to extend the ratification period for at least another 3 years, 3 months and 8 days. Any extension of time would be a mistake. Again, 7 years is long enough.

ERA proponents already have had more time to gain ratification than for any other amendment added to the Constitution. In fact, the longest ever taken is less than 4 years.

Let us look for a moment at the time needed to ratify a few of these amendments. It took less than 5 months for the 18-year vote. The right to vote for women required just a year. And it took only 2 years for the first 10 amendments—the Bill of Rights—to become part of the Constitution.

On the whole, the 26 amendments took an average of only 1.2 years each to be ratified. So it seems inappropriate and unfair to devote more than a decade of our national attention and energies to efforts at adopting an amendment which is an emotional response to the legitimate goal of equal rights for women at best, capricious at worst.

Perhaps it is just too difficult for the liberal ERA supporters to realize that support for their proposal is weakening, as is support for many of today's liberal and radical causes. The antibusiness crusade of the liberals has backfired. Environmentalism at any price is no longer in vogue. Quotas disguised as civil rights are out and even the more strident antimilitary cadres are depleting. ERA appropriately fits into this same liberal graveyard.

Seven years is long enough, especially after a careful consideration of the original resolution passed by the Congress

in 1972. The 7-year time limitation for ratification by the States was done to place a meaningful limit on debate and public attention on the issue. Equally significant is the fact that the Congress and the majority of State legislatures approving the equal rights amendment specifically referred to the 7-year time frame. It would be a travesty on our system of laws to change course in midstream.

Even more appalling is the attitude of the Abzug-type ERA proponents who take the curious position, in fighting any efforts to allow legislatures to rescind during the proposed 7-year extension period, that you can change your mind if you agree with them but you should be prohibited from changing your mind if you do not. The American people see through that one-sided sham. It is this type of arrogance that has helped bring the ERA movement to its knees.

Finally, it is significant to note that public opinion has swung against the equal rights amendment. Thirty States ratified the amendment within the first year. During the next 5⅓ years, however, only five more States have joined the list. At the same time, four of the previously ratifying States withdrew their ratifications.

This means a net gain of only one State in the last 5-plus years. Meanwhile, the ERA has been defeated in committee or on the floor almost 90 times in the 15 State legislatures that have never ratified. Just recently, Illinois twice turned back ratification efforts. The tide has clearly turned.

And it has turned for good reason. Proponents who once felt that public attitudes could be changed by law are now realizing that performance is a better gage for change. Women who were once subjected to discrimination on jobs, in business or at banks are now finding that a job well done earns more respect than a law on the books. As more and more women excel in former male domains, public opinion is changing and it is this change in attitude that will do more for women today than a constitutional amendment could ever do.

So 7 years is indeed long enough for this issue to have been battered and bartered. It was a good fight and the end result may have been as good if not better. Women are making great strides on their own abilities and on their own performances and that is a greater achievement than may have been realized with the adoption of an emotional symbol in the form of the equal rights amendment.

Mr. BUTLER. Mr. Chairman, I yield the balance of my time to the gentleman from Illinois (Mr. FINDLEY).

The CHAIRMAN. The gentleman from Illinois (Mr. FINDLEY) is recognized for 1½ minutes.

Mr. FINDLEY. Mr. Chairman, I rise in support of the legislation to extend the time period during which the equal rights amendment may be ratified. I also raise a question to my colleagues on the Republican side of the aisle: I am troubled by the emphasis on rescission. I will vote for rescission, but I feel that it is a lesser issue when contrasted with the much more fundamental issue of human rights; namely, the rights of women. I hope we will not be denied the opportunity to vote for the resolution extending the time for ratification of ERA if the rescission amendment is accepted. To me, the issue of rescission is important, but much less important than the extension of time for the ratification of ERA.

I do not know when ERA will become a part of our Constitution, but I am sure that the day will come. And when that day comes, I hope that members of the party of Abraham Lincoln will be in the forefront of the accomplishment. It would certainly be true to our traditions to have this so. We can take note of the fact that only once in our history have the human rights of a greater portion of our population been at issue, and that was when the Union itself was threatened with dissolution. On that occasion, of course, the individual rights of our citizens, North and South, men and women, were threatened as never before or since.

The authority of a Republican President and a Republican Congress ended that threat to human rights, and ever since the sovereignty of the individual citizen in our political system has been unchallenged.

Republican Presidents and Republican Congresses were in control when other great human rights issues were met, when amendments were attached to the Constitution protecting the human rights of blacks and establishing women's suffrage.

As we ponder the issues of ERA, it is instructive to note that the young Lincoln, seeking his first term in the Illinois legislature, spoke up bravely for women's rights.

But now the Republican Party languishes as the minority force on Capitol Hill, and has been so relegated for over 20 years.

Is there a connection between the low estate of our party's political fortunes and the clear fact that our party no longer carries the torch for human rights as it once did? I do not know the answer, but I am troubled.

Mr. EDWARDS of California. Mr. Chairman, I yield the balance of time to the principal sponsor and author of the bill, the distinguished gentlewoman from New York (Ms. HOLTZMAN).

The CHAIRMAN. The gentlewoman from New York (Ms. HOLTZMAN) is recognized for 6½ minutes.

Ms. HOLTZMAN. Mr. Chairman, before I begin, I wish to pay my deepest respects to the gentleman from California (Mr. EDWARDS) for the fairness and ability with which he has conducted these proceedings and for his diligence and his concern. All of us have to be deeply grateful to him. I also wish to compliment my colleagues on both sides of the aisle for their concern about this issue.

Mr. Chairman, somebody remarked recently that he was offended by this proceeding.

I just want to say that there are hundreds of thousands, millions of Americans, who are offended by the fact that women still do not have equal rights under the Constitution of the United States.

Mrs. COLLINS of Illinois. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentlewoman from Illinois.

Mrs. COLLINS of Illinois. Mr. Chairman, I certainly agree with the gentlewoman, and rise in support of this resolution.

Mr. Chairman, I rise in support of House Joint Resolution 638, which would extend the time available to States to ratify the proposed equal rights amendment (ERA). On October 26, I joined with 13 other members of the Congresswomen's caucus in cosponsoring this resolution—the passage of which is essential because it will permit continuation of the debate on what I view as one of the most important human rights issues of this century.

Although our Constitution protects the rights of all our citizens in theory, history has proven time and again that this is not always the case in practice. It is now some 200 years since the Bill of Rights was signed by our forefathers and such supposed civil rights as equal pay for equal work still do not apply in practice to over 50 percent of this country's citizens. Although women constitute the majority of our population, many laws and practices exist which discriminate against them solely on the basis of sex.

It is long past time for this Nation to establish constitutional protection against sexism just as was done earlier in the century with regard to racism. The vehicle for this achievement is the equal rights amendment which will be the basis for legal equality for women. It reads:

> Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex.

It is of interest to note that the "stop ERA" proponents claim that ratification of the amendment will destroy the family. In their view, the typical family is composed of a male breadwinner who works all day leaving child rearing and housekeeping to his dependent spouse who, a full-time wife and mother. Unfortunately, this group gives no credence to Department of Commerce statistics which indicate that a mere 7 percent of America's families fit this description. The remaining 93 percent are single-parent households, families with two working parents, families with wives as breadwinners and husbands as students, and so forth.

The equal rights amendment would eliminate the use of sex as the sole factor in determining, for example, who in a divorce action would be awarded custody of a child, or who would have responsibility for family support. Thus, certain responsibilities and protections which are now enjoyed by members of one sex but not by members of the other would have to be extended to everyone.

It took from 1848 until 1920 for women to win the right to vote. It took nearly half a century to get the ERA to the floor of Congress for serious consideration. In this light, it is important to note

that while considerable lipservice is being paid to the issue of human rights, when it comes to writing it down in our Constitution, there is quite a bit of foot dragging. I look forward to the day when equality of opportunity will be a reality for all.

The question of whether to allow rescission will be presented to the House today as part of the debate on the extension. In my view, the two issues—extension and rescission—are totally separate in constitutional terms and should not be considered as if they are interconnected.

Substantial doubt exists about Congress ability to authorize rescissions without a constitutional amendment. The Department of Justice has testified that: Congress cannot give to the States a right to rescind by any means short of amending article V of the Constitution.

For nearly 200 years—from the adoption of the Constitution itself to the Senate debate on the 25th amendment in 1974—Congress has never recognized the right of States to rescind. In fact, Congress specifically disallowed attempted rescissions of the 14th, 15th, and 19th amendments.

I believe that this is not the time to decide about the validity of rescission. That decision should be made by the Congress sitting when the 38th State ratifies ERA. Indeed, any ruling by this Congress on rescission would be purely advisory and would not be binding.

I ask that my colleagues take advantage of this historic opportunity to approve additional time to continue debate on the equal rights amendment. Each of us has the responsibility to insure that human rights in this great Nation is for all a reality—rather than just an empty slogan.

Ms. HOLTZMAN. The equal rights amendment is necessary because women of the United States are still, unfortunately, subject to discrimination. They are still subject to discrimination in pay; still subject to discrimination in employment; they are still subject to discrimination throughout our society. If anybody wants to say that our present laws protect women from discrimination in employment or in other areas, they are wrong, flat wrong.

The extension becomes necessary so that the American public can deliberate in a reasoned, reasonable manner on whether or not the Constitution of the United States should fully protect women. That is an important decision. It is a decision that will not only have a profound impact on the people of the United States, on the generations to come, but on the world itself.

I submit, and I think the Congress is well aware, that that decision has now become clouded because of an attack of lies and propaganda and denunciations, and the poor equal rights amendment has had to withstand an onslaught of the kind we have not seen leveled against any single issue.

I think it is wholly consistent with the principles on which this democracy is based that the decision on equal rights be made with an understanding of the facts so that this barrage of false propaganda can be seen for what it is, and so that the decision on equal rights can be made intelligently and rationally.

I would say to my colleagues that there is nothing more consistent with our democratic processes than permitting the decision on the equal rights amendment to be made in an informed and in a rational fashion—nothing. That is exactly what we intend to do here. To those people who say there is something unfair, I would like them to show me one time that anybody was ever hurt by the truth. All we are trying to do here is to allow sufficient debate for the truth to come out.

I say to those people who talk about constitutional impediments, they have not thoroughly listened to those people who testified, the legal scholars who testified before the House Judiciary Committee. The overwhelming number of legal scholars have testified that Congress has the power to permit the extension.

To those people who say, "Well, but this issue is not free from doubt," how many issues are there in which we can have absolute certitude? This is an issue in which we can, however, take comfort from the fact that the overwhelming majority of legal scholars support the action of the House Judiciary Committee, support the action on extension, support our denial of rescission.

And then, there are some who say, "Let's separate the extension from the equal rights amendment; they are two different things." I say to you, that is the height of sophistry, because the extension and the equal rights amendment are one and the same thing. If we want the American people to make an intelligent and informed decision on ERA then we need the extension. A vote against the extension will be a vote against the equal rights amendment.

Then, the final argument: "Well, but no other constitutional amendment took more than 3 years." I would say that those people who make that argument forget history, because the only other time we had to deal in our country's past with an issue of profound human rights resulted in a Civil War. The 14th amendment was adopted because the States were told, "Unless you ratify the 14th amendment you cannot come back into the Union." That amendment was ratified at the barrel of a gun.

We are not asking for occupying troops; we are not asking for States to be thrown out of the Union; we are not asking for anybody to point a gun at anybody else. We are just asking for time and reason and debate.

I would urge this House at this time to vote for the extension and to sustain the action of the Judiciary Committee.

● Mrs. BURKE of California. Mr. Chairman, on March 22, 1972, after a century of struggle for women's rights, the Congress of the United States passed the equal rights amendment [1] and sent it to the States for ratification. This action culminated almost 50 years of attempts at passage of an equal rights amendment in the Congress, beginning with its introduction in 1923 and followed by its reintroduction every year thereafter.[2] Debate over the equal rights amendment was preceded by 50 years of struggle for women's suffrage, beginning in 1871 with ratification of the 14th amendment and ending August 26, 1920, with ratification of the 19th amendment.[3]

Within 1 week of Congress submission of the amendment, six States ratified it. By the end of the summer of 1972, 18 States had ratified the amendment.[4] To date, 35 States have ratified the amendment, leaving only 3 more States to complete the three-fourths needed to make the amendment part of the U.S. Constitution.[5]

Despite ratification, however, and as the result of lobbying by anti-ERA groups, a few States have considered rescinding ratification of the amendment. To date, only Nebraska [6] and Tennessee [7] have successfully passed rescission resolutions. Since there is pressure in other States to consider rescission, and since the amendment is close to obtaining the three-fourths vote needed for ratification, the validity of Nebraska's and Tennessee's rescission attempts is a crucial issue. Vital to a determination of that issue is the question of whether the issue itself is justiciable in the courts. It will be contended here that the States do not have power to rescind a prior ratification and that the issue is not a "political question," but a proper question for the courts.

A. ARTICLE V AMBIGUITIES

While legal precedent largely rejects any power within the States to rescind prior ratifications and declares that such controversies can and should be handled by the courts in partnership with Congress, the legal status of this assumption is still uncertain. The original source of ambiguity on this issue is article V of the Federal Constitution, which defines the constitutional amendment process:

> The Congress, whenever two thirds of the Houses shall deem it necessary, shall propose Amendments to this Constitution, or, on the Application of the Legislatures of two thirds of the several States, shall call a Convention for proposing Amendments, which, in either Case, shall be valid to all Intents and Purposes, as Part of this Constitution, when ratified by the Legislatures of three fourths of the several States, or by Conventions in three fourths thereof, as the one or the other Mode of Ratification may be proposed by the Congress.[8]

A few moments' study of article V readily exposes the ambiguity. The article itself says nothing about rescission. so interpretation of the article revolves around the meaning of the words "when ratified." There are three possible interpretations of these words.

Under the Coleman against Miller [9] theory, which is the prevailing assumption, an original vote of rejection is inconclusive, while an original vote of ratification is deemed to be final.[10] The reasoning here is that article V of the Constitution creates only the positive power

Footnotes at end of article.

to ratify. Ratification therefore exhausts the power granted to the States, while failure to ratify leaves the power intact to be exercised at any time within the ratification period set by Congress. From this view, it follows that once a ratification resolution is passed—and the constitutional power exhausted—there is no power to rescind.

A second view, expressed in Chandler against Wise,[11] the companion to Coleman, asserts that the initial decision of of State legislature is binding, even if it is a rejection. Chandler was dismissed by the Supreme Court after the opinion in Coleman was handed down, on the Coleman ground of a nonjusticiable issue. Thus, the holding of the lower court was left standing, thereby adding to the ambiguity of the Court's decision.[12]

A third view, which has received little support, is that neither ratification nor rejection may be regarded as final until three-fourths of the States have ratified and the amendment has been adopted. The argument here is that treating both ratification and rejection as final is logically consistent and that one should not be more final than the other.[13]

B. HISTORY OF THE AMENDING PROCESS

In order to determine which view should prevail, it is necessary to review the judicial and political history of the amending process. Historical precedent bolsters the argument that the courts have a role to play in interpreting article V, for each case heard by the Supreme Court has also witnessed some involvement by Congress in the amending process. Moreover, the roles played by the Court and Congress have been complementary, not hostile.

Congress action with respect to the 14th amendment is perhaps the most notable example of a purely political determination of an amendment controversy.[14] The unusual setting of the controversy was Civil War Reconstruction. At perhaps no period in U.S. history was the Government on such precarious ground. Uniting the States once again after 5 years of a divisive conflict required an abnormal amount of solidarity among the Government departments. Congress and the Supreme Court rose to the occasion.

At that time (1868), there were 37 States in the Union, so that 28 were required to ratify the 14th amendment. Upon request by Congress, Secretary of State Seward produced a list of 28 ratifying States.[15] Among them were Ohio and New Jersey, which had attempted to rescind their prior ratifications. Since Secretary Seward was undecided whether or not the ratifications were valid, he merely stated that if the previous ratifications were in force, the amendment was ratified.[16]

On the following day, Congress solved the problem by passing a resolution accepting the ratifications of New Jersey and Ohio, as well as those of South Carolina, Georgia, and North Carolina, who had initially rejected the amendment and subsequently ratified it.[17] One week later, on July 28, 1868, the Secretary of State issued a certificate proclaiming ratification and including Ohio and New Jersey among the ratifying States. At that time, however, the ratifications of Ohio and New Jersey were unnecessary, for on July 27, the 30th State ratified the amendment.

Another factor which weakened the precedential value of the controversy was the fact that Congress in effect coerced ratification by conditioning the readmission of several States on their ratification of the Civil War amendments. This and the need to reunite the Nation were probably the primary reasons Congress quickly passed the concurrent resolution proclaiming ratification of the 14th amendment. They are also arguably the reasons the Court chose to stay out of the controversy. It is unlikely that such a procedure would be upheld by the Courts today—and they would certainly review such an action by the Congress.

Following these actions by Congress, the Supreme Court handed down their decision in White against Hart.[18] In holding the new Georgia constitution to be a valid enactment despite alleged coercion by Congress, the Court addressed itself to the finality of the States ratifications of constitutional amendments:

> The result [the Georgia Constitution] was submitted to Congress as a voluntary and valid offering, and was so received and so recognized in the subsequent action of that body. The State is estopped to assail upon such an assumption [coercion by Congress]. Upon the same grounds she might deny the validity of her ratification of the constitutional amendments.[19]

Much of the same situation mooted the controversy over the 15th amendment. In that case, Ohio rejected and then ratified the amendment,[20] and New York ratified and then rescinded.[21] A resolution was introduced in Congress to proclaim the two States ratifications, but it never reached a vote.[22] However, Congress counted the two States among those that ratified.[23] By the time the certificate of ratification was issued by the Secretary of State, two additional States had ratified, making a ruling on the actions of Ohio and New York unnecessary.[24]

Other legislative attempts to set a policy concerning prior rejection and subsequent rescission attempts have received little action in Congress.[25] The inadequacy of past legislative attempts highlights the need for judicial action. Moreover, congressional action has produced no common theme which would be frustrated by judicial decision.

Some commentators have dismissed the controversies surrounding the 14th and 15th amendments as aberrations, products of the unusual temper of the times, and suggest that they may not be valid authority today.[26] However, the opinion in the Slaughter House cases,[27] handed down 2 years after adoption of the 15th amendment, recognized the turbulent times, but nonetheless recognized the amendment's validity by construing it in that case.

Furthermore, the 14th amendment has in recent times undergone challenges to its validity on the grounds of unconstitutional ratification, but the courts have consistently upheld the finality of the States ratification of that amendment.[28] Thus, following the Civil War, it was assumed by Congress and the courts that the States had no power to rescind ratification of a constitutional amendment.

Still another rescission attempt occurred with respect to the 19th amendment. Tennessee attempted to rescind its prior ratification, while West Virginia ratified following an initial rejection. Congress ignored both attempts and counted both States as ratifying in the declaration by the Secretary of State.[29]

In Leser against Garnett,[30] a suit was brought against the board of registry of Maryland to disenfranchise two women, despite adoption of the 19th amendment. In this case, counsel argued that procedural irregularities in West Virginia and Tennessee negated effective ratification by these States, thereby resulting in less than the required three-fourths vote. Despite the States violation of their own procedural laws, the Supreme Court determined that their ratifications were final and conclusive. The Court held that if ratification occurs in accordance with the Federal Constitution, a State may not deny its validity because of irregularities within its own system.[31]

Two years earlier, in 1920, the Supreme Court heard a case which involved article V questions, but did not revolve around a rescission attempt. In Hawke against Smith,[32] plaintiff sought to enjoin the secretary of state of Ohio from submitting the proposed 18th amendment to the people in a referendum as provided in the Ohio constitution. The issue here was the interpretation of the term "legislatures" in article V. The Supreme Court held the provision of the Ohio constitution invalid, thereby establishing the principle that the action of a State legislature in ratifying an amendment to the Federal Constitution is a purely Federal function under article V, transcending any limitation sought to be imposed by the people of a State through their own constitutions:

> [R]atification by a State of a constitutional amendment is not an act of legislation within the proper sense of the word. It is but the expression of the assent of the State to a proposed amendment. . . . It is true that the power to legislate in the enactment of the laws of a State is derived from the people of the State. But the power to ratify a proposed amendment to the Federal Constitution has its source in the Federal Constitution. The act of ratification by the State derives its authority from the Federal Constitution to which the State and its people have alike assented.[33]

By characterizing the amending process as a Federal function, the Court squarely provided for its own assertion of jurisdiction, since one of the major sources of Supreme Court jurisdiction is a case involving a Federal question.[34]

Nineteen years later, Coleman against Miller[35] was decided by the Supreme Court, presenting a problem similar to Leser, but with quite a different result. In Coleman, members of the Kansas Legislature sought a judgment nullifying a

Footnotes at end of article.

ratification of the child labor amendment after passage of the ratification resolution. They argued that a prior rejection of the amendment by the legislature precluded the subsequent ratification.

The case presented two issues: whether a State can ratify an amendment following rejection of it, and whether a State can ratify an amendment 13 years after it has been proposed. Although the Court ruled both questions to be political, the different treatment accorded each issue is inconsistent and confusing. The majority of the Court responded to the first issue by reviewing the congressional precedent of ratification of the 14th and 15th amendments, reaching the following conclusion:

Thus the political departments of the Government dealt with the effect both of previous rejection and of attempted withdrawal and determined that both were ineffectual in the presence of an actual ratification.[36]

The Court considered precedents which held ratification to be a final act, but ultimately did not decide that question.[37] Moreover, Coleman completely ignored the cases of the 1920's and 1930's dealing with the amending process. These cases, as noted previously [38] firmly established the Supreme Court's role in interpreting the article V amending process, but the majority made no effort to distinguish them. One observer, commenting on this significant omission, concluded:

Reference shows that Coleman v. Miller is contrary to most precedent, and supported by none, on this issue.[39]

The second issue in Coleman, concerning timeliness of ratification, was discussed according to two standards enunciated by the Court for determining the existence of a political question:

In determining whether a question falls within that category, the appropriateness under our system of government of attributing finality to the action of the political departments and also the lack of satisfactory criteria for a judicial determination are dominant considerations.[40]

The Court found the timeliness issue to be too complex:

In short, the question of a reasonable time in many cases would involve, as in this case it does involve, an appraisal of a great variety of relevant conditions, political, social and economic, which can hardly be said to be within the appropriate range of evidence receivable in a court of justice.[41]

However, in making this determination, the Court failed to override Dillon against Gloss,[42] where the Court had held 7 years to be a reasonable time for ratification, and where the question of whether ratification had occurred within a reasonable time was deemed appropriate for judicial review.[43]

Justice Black, in his concurring opinion, recognized this anomaly, though he dissented from any implication that the Court may have implicitly assumed a power of judicial review on the question:

The Court here treats the amending process of the Constitution in some respects as subject to judicial construction, in others as subject to the final authority of the Congress. There is no disapproval of the conclusion arrived at in *Dillon* v. *Gloss*, that the Constitution impliedly requires that a properly submitted amendment must die unless ratified within a "reasonable time." Nor does the Court now disapprove its prior assumption of power to make such a pronouncement. And it is not made clear that only Congress has constitutional power to determine if there is any such implication in Article V of the Constitution.[44]

Decided the same day as Coleman, Chandler against Wise [45] reached the Court on a writ of certiorari from the Court of Appeals of Kentucky. Suit was brought in Kentucky to restrain the Governor and other State officials from sending to the Secretary of State of the United States a certified copy of a resolution enacted by the State legislature purporting to ratify the proposed child labor amendment, and for a judgment invalidating the action of the General Assembly. The contention was that the proposed amendment could not be adopted since it had initially been rejected. The Kentucky court upheld this argument:

We think the conclusion is inescapable that a State can act but once, either by convention or through its Legislature, upon a proposed amendment; and, whether its vote be in the affirmative or be negative, having acted, it has exhausted its power further to consider the question without a resubmission by Congress.[46]

In reaching its conclusion, the lower court noted that article V only mentions ratification. Arguably, then, rejections were not contemplated and thus were not authorized:

Certainly, had the framers of the Constitution entertained so unique a theory, they would have adopted language more clearly expressing their intention.[47]

The Supreme Court dismissed the case, after deciding Coleman, on the Coleman argument of nonjusticiability.[48] Thus, the Court never reached the merits:

[Certiorari] dismissed upon the ground that after the Governor of Kentucky had forwarded the certification of the ratification of the amendment to the Secretary of State of the United States there was no longer a controversy susceptible of judicial determination.[49]

By dismissing Chandler, the Court left the judgments in both cases standing, that of Coleman for ratification because the Court thought it was correct, and that of Chandler against ratification because the Court lacking justiciability, could not pass on the question. Confusion on the issues presented extends beyond the opposite holdings in the two cases. In Coleman, the majority opinion, written by Chief Justice Hughes, was shared by only two members of the Court—Justices Stone and Reed. The concurring opinion written by Mr. Justice Black and joined by Justices Douglas, Frankfurter, and Roberts indicated that the entire amending process should be regarded as a political question:

No . . . division between the political and judicial branches of the government is made by Article V which grants power over the amending of the Constitution to Congress alone. Undivided control of that process has been given by the Article exclusively and completely to Congress. The process itself is "political" in its entirety, from submission until an amendment becomes part of the Constitution, and is not subject to judicial guidance, control or interference at any point.[50]

This reasoning was not shared by the majority which, by refusing to overrule prior Court decisions in this sphere, implicitly approved the exercise of jurisdiction. Together with the dissenters, Justices McReynolds and Butler, the decision favoring some kind of Court jurisdiction totals 5–4. Thus, the confusion engendered by the Court's seeming departure from prevailing precedent is aggravated by the reasoning of the Court.

C. THE QUESTION OF JUSTICIABILITY

Since most of the confusion on this matter stems from the Coleman Court's finding of a nonjusticiable controversy, it becomes necessary to inquire into the validity of this holding in light of prior Supreme Court cases and, most particularly, with respect to the Court's opinion in 1962 in Baker against Carr,[51] the leading case on the political question doctrine. A review of these cases demonstrates that with the sole exception of Coleman, the Court has viewed article V issues as justiciable in the past and suggests that it would continue to do so in light of Baker against Carr.

Hollingsworth against Virginia,[52] which dealt with the validity of the adoption of the 11th amendment,[53] was the first case constructing the amending process to reach the Supreme Court. The most significant aspect of the case with regard to the justiciability question was the absence of argument on the point. In passing upon an unrelated procedural problem,[54] the Court was silent on the question of justiciability, apparently assuming it.

Nevertheless, consideration of the case in the context of the times and the circumstances in which the assumption was made indicates that greater weight must be given to the viability of the Court's determination. Since the case involved the first instance of amendment of the new Constitution,[55] the justiciability issue was ripe for adjudication. Furthermore, various members of the Court had been influential forces in the drafting of the Constitution.[56] The fact that these individuals had implicitly assumed the justiciability of the question is of significance in the argument that the amending process should be open to judicial review.[57]

The next case in which the issue of justiciability of article V questions appeared was Luther against Borden,[58] where the discussion occurred in dictum. In that case, Chief Justice Taney described questions concerning the validity of an amendment as nonjusticiable.

The political department has always determined whether the proposed constitution or amendment was ratified or not by the people of the State, and the judicial power has followed its decision.[59]

The context of this litigation, however, weakens the contention that the Court based its holding squarely on the merits of the issue. The question arose in a setting of armed conflict between rival factions disputing the validity of a new state constitution. In its opinion, the Court approved the argument that fundamentally divisive controversies of such a nature preclude the orderly and meaningful functioning of judicial authority:

Judicial power presupposes an established

Footnotes at end of article.

government capable of enacting laws and enforcing their execution, and of appointing judges to expand and administer them. The acceptance of the judicial office is a recognition of the authority of the government from which it is derived. And if the authority of that government is annulled and overthrown, the power of the courts and other officers is annulled with it.[60]

As can be seen, the propriety of the finding of nonjusticiability in this case lay in the unique factual circumstances rather than in the merits of the dispute.

Similar considerations supported the Court's dictum in White against Hart [61] that the validity of the Civil war amendments was a political question. The case, as noted earlier,[62] concerned a dispute over a contractual obligation, resolution of which turned on whether the Georgia Constitution of 1968 was illegally coerced by Congress. Although the Civil War was over, Reconstruction problems probably justified removal of the issue from the judicial arena. The problems inherent in the task of reuniting a war-torn and divided people under a single effective national government required a solidarity of purpose throughout the Government departments.[63]

It is also arguable that the Court's decision in White against Hart implied that the Court could hear challenges regarding ratification of amendments. The Court assumed that the Georgia Constitution was submitted voluntarily to Congress. Therefore, Congress could accept it and it could not be rescinded,[64] just as Congress could accept ratifications and deny withdrawals. However, if the State's action was forced by Congress, submission of the Constitution would be invalid, for "Congress has no power to supersede the National Constitution." [65] It is arguable, then, that if Congress exceeded its authority in accepting an invalid constitution or ratification, its action could be challenged in the courts.

Between 1868 and 1920, though no cases reached the Supreme Court, the State courts were faced with analogous problems involving amendments to their state constitutions.[66] The view that emerged was that all steps of the State constitutional amendment process are justiciable.[67]

In 1920, the Supreme Court faced squarely a number of issues involving article V and adoption of the 18th and 19th amendments. Hawke against Smith [68] involved the validity of State constitutional provisions which attempted to bind State legislatures to the dictates of popular referenda on the ratification process. The Court held this to be an impermissible restriction on the power of a State legislature under article V.[69]

The National Prohibition Cases [70] involved the issues of whether the content of the prohibition amendment was constitutional, as well as the interpretation of the phrase "two-thirds of both House" contained in article V. The Court held that the substantive content of the 18th amendment was valid and that "two-thirds of both Houses" means two-thirds of the Members present and voting and not two-thirds of the Members, both present and absent.

In 1921 in Dillon against Gloss,[71] the Court held that Congress, acting under article V, could impose a reasonable limitation on the time allotted for ratification by the States and that 7 years was a reasonable period.[72] The Court did not, however, indicate what might be an unreasonable period. In Lester against Garnett,[73] the Court held the content of the 19th amendment constitutional.

Although the Court did not discuss the issue of justiciability in any of these cases, the fact that it considered so many facets of the article V amending process severely weakens the Borden argument that all article V questions are nonjusticiable. It is arguable that the reluctance of the Court to consider the issue was deliberate, for the matter was put before the Court in the National Prohibition Cases by the Solicitor General, who specifically alleged nonjusticiability on the basis of Borden and cases following it.[74] The Court did note at another point that proper notification by a state served on the Secretary of State [75] would be conclusive on the courts in controversies relating to the validity of the State's action.[76]

The prevailing absence of comment on the issue continued in United States against Sprague,[77] where the Court overruled an attack on congressional power under article V to choose whether ratification should be by convention or State legislature,[78] but it decided little else. Again the court treated the matter as justiciable, but did not address the issue directly.

Eight years later, controversy over the proposed child labor amendment resulted in the companion cases of Coleman against Miller and Chandler against Wise, discussed earlier,[79] in which the Court in Coleman held that both the effect of a prior State rejection of a proposed amendment and the interval of time available for a State to ratify were political questions.

The Court premised its holding concerning subsequent rejection on the precedents of congressional action with regard to the Civil War amendments and also on the absence of any specific constitutional or statutory mandate for judicial intervention in the article V amending process.[80] The underlying reasoning for these contentions has been ably refuted by Professor Orfield:

> With respect to the first, it seems an unusual approach for the body recognized as having the power to review acts of Congress to adopt and rely on an Act of Congress as precedent, particularly since the Act of Congress was passed in a period of unrest and since the court had had no opportunity to pass on its validity. With respect to the second reason, it should be observed that there were no stronger constitutional or statutory basis for the decisions rendered in previous cases arising concerning the amending process.[81]

While these cases concerning the amending process largely skirted or ignored the issue of justiciability, the landmark case of Baker against Carr [82] squarely faced the political question doctrine and established six criteria relating to determination of a political question:

> Prominent on the surface of any case held to involve a political question is found a textually demonstrable constitutional commitment of the issue to a coordinate political department; or a lack of judicially discoverable and manageable standards for resolving it; or the impossibility of deciding without an initial policy determination of a kind clearly for nonjudicial discretion; or the impossibility of a court's undertaking independent resolution without expressing lack of the respect due coordinate branches of government; or an unusual need for unquestioning adherence to a political decision already made; or the potentiality of embarrassment from multifarious pronouncements by various departments on one question.[83]

To discover whether questions pertaining to the ratification process would be considered political questions, it is necessary to test them against these criteria. If at least one of the criteria applies to a given case, the case would be dismissed for nonjusticiability.[84]

The initial test is whether there is "a textually demonstrable constitutional commitment of the issue to a coordinate political department." Under this test, determining whether the validity of rescission attempts is a political question requires an inquiry to determine whether Congress alone is given power to control the ratification process. But this, in itself, requires interpretation of the Constitution, according to the majority in Baker against Carr:

> Deciding whether a matter has in any measure been committed by the Constitution to another branch of government, or whether the action of that branch exceeds whatever authority has been committed, is itself a delicate exercise in constitutional interpretation, and is a responsibility of this Court as ultimate interpreter of the Constitution.[85]

Hence, as "ultimate interpreter of the Constitution," the Court arguably must decide the constitutionality of a State's action regarding ratification, even if the decision merely affirms an action taken by Congress, since the question involves interpretation of the Constitution. "The effect of rejection is very much the sort of question which the Court habitually decides, since it arises out of an interpretation of the Constitution." [86]

The second criterion, "lack of judicially discoverable and manageable standards," equally presents no obstacle, since the standard in the instant case is the Constitution itself. Determining whether State rescission or ratification conforms to the Constitution requires only that the Court consider historical precedent and interpret the Constitution, both of which the Court does constantly. Even the question of timeliness of ratification presents no problem, as the Court demonstrated in Dillon against Gloss.[87]

Furthermore, the vital policy consideration here—the need for finality in litigation as opposed to the need for the most contemporaneous expression of the people's will—is not necessarily confined to the congressional province. That issue is not really severable from the constitutional questions under article V, Powell against McCormack [88] demonstrates.

In that case, the Court was confronted with the suggestion that, in deciding whether Congressman Adam Clayton

Powell could be excluded from the House, it was granting itself the power to interfere with the internal business of Congress. The Court disagreed, responding in the following manner:

[A] determination of petitioner Powell's right to sit would require no more than interpretation of the Constitution. Such a determination falls within the traditional role accorded courts to interpret the law, and does not involve a "lack of the respect due [a] coordinate [branch] of government," nor does it involve an "initial policy determination of a kind clearly for nonjudicial discretion" (citation omitted). Our system of government requires that federal courts on occasion interpret the Constitution in a manner at variance with the construction given the document by another branch. The alleged conflict that such adjudication may cause cannot justify the court's avoiding their constitutional responsibility (citation omitted).[89]

The Court's policy determination in a rescission case would revolve around interpreting whether the Constitution dictates finality or contemporaneity as the more important consideration, as well as whether contemporaneity is actually demonstrated in a given case of rescission.

Powell against McCormack also establishes that the Courts may construe the constitutional limits of congressional authority in an area assumed to be under congressional control without "expressing a lack of respect due coordinate branches of government," the third criterion of Baker against Carr. In light of the strong congressional interest in and control over the qualifications of Members, it is arguable that if the Court has jurisdiction in a case like Powell, it should certainly have jurisdiction over the amending process. In this sense, it is difficult to see how interpreting the validity of a State's rescission attempt would show disrespect to Congress.

A case in point in Hoellen against Annunzio,[90] where it was argued that determining whether the franking privilege had been misused by a Member of Congress was a political question. The Court held that no political question was involved in their interpretation of the statute regulating the privilege:

The mere fact that this statute purports to regulate the conduct of Members of Congress does not, without more, take it outside the bounds of proper judicial scrutiny. For this court to construe this statute no more involves a lack of respect due the Congress *** than the construction of a statute not involving the conduct of Congressmen.[91]

Finally, it is evident that there is no need for "adherence to a political decision already made," since the political decision to rescind is the question at issue here. According to the majority in Baker against Carr,

The courts cannot reject as "no law suit" a bona fide controversy as to whether some action denominated "political" exceeds constitutional authority.[92]

Moreover, there is no "potential of embarassment from multifarious pronouncements by various departments on one question," because a finding of the Supreme Court on the issue would preclude action by the Congress. Indeed, in light of the absence of strong congressional response on article V issues in the past, it is possible that the Congress would welcome pronouncements by the Court.

A judicial decision interpreting the power of the States to rescind or the power of Congress to accept that rescission is a necessary result of judicial interpretation of the Constitution. The possibility that other branches of the Government might disagree with the Court's decision should not deter the Court from acting.

By setting forth workable criteria for the political question doctrine, Baker has effectively overruled Coleman. The Court now has an opportunity to return to the line of precedent for which Coleman is a deviation. This line of precedent permits the Court to decide without hesitation the validity of ratification of constitutional amendments.

IV. THE VALIDITY OF RESCISSION ATTEMPTS

Once the question of justicability has been settled in favor of judicial review of article V issues, the substantive question of the validity of rescission attempts remains to be settled. For a number of reasons, attempts to rescind ratification of a constitutional amendment should be held invalid.

In the first place, the ratification process itself is a Federal function, which means that a State's power to act in this sphere is limited. This view is the accepted view, as a number of cases have demonstrated. In Dodge against Woolsey,[93] the Court discussed the supremacy of the Constitution with regard to article V:

It is supreme over the people of the United States, aggregately and in their separate sovereignties, because they have excluded themselves from any direct or immediate agency in making amendments to it, and have directed that amendments should be made representatively for them, by the Congress of the United States, when two-thirds of both Houses shall propose them; or where the legislatures of two thirds of the several states shall call a convention for proposing amendments. . . .[94]

Hawke against Smith[95] firmly established that the act of ratification, although performed by individual States, is a Federal function.[96] Two years later, Leser against Garnett[97] specifically followed Hawke on this point:

[T]he function of a state legislature in ratifying a proposed amendment to the Federal Constitution, like the function of Congress in proposing the amendment, is a federal function derived from the Federal Constitution; and it transcends any limitations sought to be imposed by the people of a state.[98]

In 1931, United States against Sprague[99] settled the points that Congress had full discretion in choosing the mode of ratification, by State legislatures or by conventions, and that the 10th amendment[100] was no barrier to Federal control of the ratification process.[101] More recently, in Trombetta against State of Florida,[102] a district court relied on the combined holdings of Hawke and Leser and held void an attempt by Florida to withhold consideration of Federal constitutional amendments until a majority of its legislature's members had been elected subsequent to submission of the amendment. The court reasoned that action of the kind contemplated would be unconstitutional State interference with a Federal function. One observer noted that State decisions have agreed with this estimate of the article V amending process as Federal in nature:

The State decisions also hold that where the legislature proposes an amendment to the State constitution it is not legislating. The provisions of the State constitution and the rules of the legislature as to the passage of statutes, bills, and other forms of legislation are not controlling in the adoption of an amendment. The legislature in ratifying is exercising a ministerial or constituent function; the ratifying process is equivalent to a roll call of the States. The courts have asserted that the legislature acts as a Federal agent and exclusively under the Federal Constitution.[103]

A second reason for holding State attempts to rescind a prior ratification invalid is that article V speaks only of ratification, not of rescission, and therefore ratification should be viewed as binding. Judge John Jameson phrased the argument in this manner:

The language of the Constitution is, that amendments proposed by Congress, in the mode prescribed, "shall be valid to all intents and purposes, as part of this Constitution, *when ratified by the legislatures of three-fourths of the several states. . . .*" By this language is conferred upon the States, by the national Constitution, a special power; it is not a power belonging to them originally by virtue of rights reserved or otherwise. When exercised, as contemplated by the Constitution, by ratifying, it ceases to be a power, and any attempt to exercise it again must be nullity. But, until so exercised, the power undoubtedly, for a reasonable time at least, remains. . . . When ratified all power is expended. Until ratified the right to ratify remains.[104] (Emphasis in original.)

Making ratification binding also recognized the need for finality in the law and the amending process. A persuasive argument concerning this need has been advanced by one observer in speaking of ratification of the equal rights amendment:

At the end of the seven-year ratification period, the Congress which decides which states have effectively ratified the Equal Rights Amendment will not be the same one which proposed it. It can be argued that the proposing Congress acted under the dominant assumption that ratification, but not rejection, is final. However, while this view of efficacy will not be legally binding on the Congress presented with the question of which state ratifications to honor, citizen lobbyists, state legislators and even members of Congress have relied on the continuing validity of this consistent legislative precedent. A change in procedure by Congress during the ratification period would leave both opponents and proponents of the Equal Rights Amendment in confusion. If such a change should come when the ratification period has ended, it could severely prejudice the legitimate expectations of whichever side ultimately loses.

The courts may well have a role to play in protecting the reliance interests of the citizenry and the states and ensuring that their efforts at orderly change are not disrupted by unexpected action on the part of Congress in reversing a longstanding precedent concerning the proper procedures for ratification. The courts can bring to this precedent the necessary finality to make it a reliable guide to present and future actions concerning constitutional amendment.[105] (Footnotes omitted.)

Footnotes at end of article.

Moreover, the purpose of the Framers in devising article V was surely to provide for orderly change to meet the exigencies of the times. Indeed, James Madison touched on this purpose in a brief discussion of the article V amending process:

> That useful alterations will be suggested by experience could not but be foreseen. It was requisite, therefore, that a mode for introducing them should be provided. The mode preferred by the convention seems to be stamped with every mark of propriety. It guards equally against that extreme facility, which would render the Constitution too mutable; and that extreme difficulty which might perpetuate its discovered faults.[106]

In light of this statement, it is anomalous that a strictly construed political question doctrine could be the means to promote the disorder resulting from a reversal of precedent. This would, indeed, violate the Supreme Court's own stated purpose for the application of the doctrine, that "a tool for maintenance of governmental order will not be so applied as to promote only disorder." [107]

Furthermore, during drafting of article, V, concern was expressed that Congress not have absolute power in proposing amendments.[108] To balance the interests, the States were also given a role in the process.[109] Hence, there seems no reason to conclude that the framers intended to give exclusive control of the process to Congress. Madison expressed the point in this way:

> It [the amending process], moreover, equally enables the general and the State governments to originate the amendment of errors, as they may be pointed out by the experience on one side, or on the other.[110]

Since ratification is a Federal function, and no historical reasons appear for excluding the Court from its traditional role of interpreting the Constitution, it should be able to determine whether a State has complied with the requirements of the article V amending process, whether this requires interpretation of article V or of congressional precedent.

An alternate view of the weight to be given ratification, which has received little support, proposes that neither ratification nor rejection may be regarded as final until the matter is foreclosed, either by ratification of three-fourths of the States or by a time limit set by Congress.[111]

Though this solution might be logical, it is not necessarily just. Indeed, it would instill such uncertainty into the process that it would be extremely difficult to know when the process had been completed. For example, suppose 38 States have submitted resolutions of ratification, but at the time the 38th State ratifies, one of the other ratifying States has pending a resolution of rescission. Can the amendment be said to be ratified? Alternatively, suppose a ratifying State is in the middle of a rescission debate at the time the 38th State ratifies. Is a State which is considering rescission to be characterized as ratifying? The prospects for confusion and delay are great.

A second argument advanced by proponents of this minority view is that a more accurate picture of public opinion at the final date of ratification is obtained thereby.[112] In this writer's view, this argument is entirely specious, particularly when considered in light of Nebraska's attempted rescission of its ratification of the equal rights amendment in 1973. Aside from the fact that it is exceedingly difficult to determine what "public opinion" is, it can just as easily be argued that Nebraska's rescission was the result of pressure from a vocal minority and not the view of the majority. This view is bolstered by the perception that the amendment was debated in Congress for years before passage, that passage occurred by overwhelming majorities,[113] and that opponents of the amendment had ample time to prepare their case during Nebraska's original debate on the amendment. For those who still argue hasty ratification, this writer would point out that rescission, occurring 1 year after ratification, was even hastier.

Hence, to prevent a constitutional "free-for-all" in the ratification process, it is necessary to declare, as does judicial and congressional precedent, that ratification is a final act. One observer has argued persuasively regarding the arbitrariness of a system allowing rescission:

> [T]he price of uncertainty and instability would be too high to pay. State legislatures, such as Nebraska's, could change their minds in every legislative session or every time there is a change in legislative personnel. Proper consideration of the amendment the first time would defeat most desires to rescind, and if the mood of the country really has changed drastically, ratification in the remaining needed states will certainly be defeated. It is always possible to hypothesize that a state ratifying within the first year may have genuinely reconsidered and changed its mind by the time the amendment is finally passed, especially if passage comes in the sixth year. But simulataneous ratification is not possible and if we are to maintain order in the system, seven years, the period within which Congress has deemed it reasonable to amass the required votes, must be seen as sufficiently contemporaneous.[114]

Withdrawal of ratifications disrupts the amending process in the same manner as a withdrawal of consideration of the amendment from the States by Congress. The process of amending the Federal Constitution is a serious undertaking and should be handled in an orderly manner. There must be finality of judgment or the law becomes impotent. The best way to insure this finality is to allow the courts a role in interpreting the dictates of article V.

FOOTNOTES

[114] Note, "Equal Rights Amendment: Will States Be Allowed to Change Their Minds?" 49 Notre Dame Lawyer 657, 662 (Feb. 1974).●

● Mr. ROSENTHAL. Mr. Chairman, I rise in support of House Joint Resolution 638, which extends for 39 months the time in which States may consider the equal rights amendment.

The question before the House is not whether equal rights can be advanced by ERA but whether an adjustment in the time granted to the States for consideration of the amendment is constitutional and appropriate. Therefore, I would like to limit my remarks to this particular point.

The Constitution makes no mention of time limits for State consideration of a proposed amendment; in fact, the first 17 amendments had no deadlines at all. However, the Supreme Court, in Dillon against Gloss—1921—and Coleman against Miller—1939—held that the Congress had the power and the right to determine a reasonable length of time for ratification of a proposed amendment. The Court expressly noted that the period of time so established must be reasonable, and that "reasonable" is to be determined by the issue's vitality and timeliness.

Beginning in 1917, the Congress has included in all proposed amendments a time limitation of 7 years. This provision became the customary way of insuring that proposals which had lost their vitality were not deliberated upon endlessly by States. However, the choice of seven as the number of years was arbitrary and not based on any considered judgments concerning variations in the time period during which amendments of varying importance and effect retain vitality.

Today it is clear that ERA is an extraordinarily significant amendment that will remain vital to the legal, economic, social, and political well-being of more than half this Nation's inhabitants for many years to come. The amendment is necessary to clarify inadequate and contradictory judicial decisions on sex discrimination. The Supreme Court has recently ruled that the 5th and the 14th amendments do not necessarily protect against discrimination on the basis of sex. In addition, the Civil Rights Commission study of the United States Code last year found 800 instances in which the law permits sex discrimination.

Moreover, 35 States, containing 71 percent of the Nation's population, have already ratified the amendment. Thus, while it may not be customary, it is eminently reasonable that this amendment be given more than 7 years for State ratification.

Acceptance of equal rights for both sexes is part of the evolution of freedom in America. As always, a step toward greater personal freedom is of concern to some, but I believe the men and women of this country deserve this freedom and the opportunity to achieve independence and self-reliance.●

● Mr. LEGGETT. Mr. Chairman, I firmly believe that this House has an obligation to extend the deadline for ratification of the equal rights amendment on the merits of the issue alone. The equal rights amendment is necessary to provide a legal and moral foundation to eradicate sex discrimination in this country. Those who support this goal, must unite behind this proposal to extend the deadline for ratification.

While many of my colleagues will be casting their vote this afternoon based on their support or opposition to the equal rights amendment itself, the debate on the House floor has focused on points of Constitutional law and procedural precedents. This is as it should be because the Congress is already clearly on the record as favoring the adoption of this constitutional amendment. I believe that a thorough analysis of Supreme Court decisions, a close reading of the Constitution, and a proper understanding of the procedural rules of this legislative body all support extending the ratification period for this amendment for 3 years and 3 months as recommended by the House Judiciary Committee.

As I have listened to the debate today, it is clear that there are four central constitutional questions which the House should consider when deciding whether or not to extend the deadline for the ratification of this amendment. All four points have been the subject of considerable controversy and debate in this chamber today. These questions deal with the authority of the Congress to extend ratification time limits for any proposed amendment, whether or not a simple majority or a two-thirds majority is required to authorize such an extension, whether the President must approve the action of the Congress, and whether or

not an extension of the time limit must be accompanied by provisions to allow States which have already ratified the amendment to rescind their prior action.

As I review the opinions of the many constitutional lawyers that have commented on this issue, it is clear to me that authority to extend the time provided for ratification of this amendment rests with the Congress. Article V of the Constitution assures us of this fact, and any who doubt this point should read the case of Dillon versus Gloss. In this decision, the Supreme Court recognized that incident to its power under article V to propose amendments to the Constitution, Congress has both the power and the duty to assure that an amendment has been ratified "within some reasonable time after the proposal." The Court held that the Congress could set any time period it chooses so long as the time period selected allows for a reasonably contemporaneous "expression of the approbation of the people" in the required three-fourths of the several States. Obviously, the Congress may if it wishes to do so, set a time period longer than 7 or even 14 years, so long as the time period established is "reasonable" and meets the "contemporaneous" test.

Congress addressed this time limit question for the first time in 1917, with Senator Ashurst's explanation that "10, 12, 14, 16, 18, or even 20 years" would be reasonable so long as some limit were imposed. Indeed, no one now suggests that Congress could not have submitted the ERA to the States with a 10-year, 3-month, limit on March 22, 1972; the sole question is whether Congress is constitutionally disabled from achieving that result in two steps rather than one—whether the 1972 choice of a 7-year period must govern even if Congress concludes in 1978 that a period of 10 or perhaps 14 years could be more reasonable in light of "public interests and changing conditions," to quote Dillon versus Gloss once again. Clearly, nothing stands in the way of the Congress accomplishing this purpose in two steps and the constitutional authority to do so cannot be questioned. The matter is committed to Congress as a political question; but, even if it were not, the existence of the authority at issue is clear beyond reasonable doubt.

The question of whether a simple majority of each House is sufficient to accomplish the extension is one to which the only correct answer is a definite "Yes."

The power of the Congress to extend the time for ratification is simply a facet of its power to establish a "mode of ratification" for an amendment proposed under article V. The vote to alter the mode of ratification must obviously be the same as that required to propose the mode of ratification in the first place. In neither step—initial proposal nor subsequent modification—does article V specify anything beyond a simple majority. The article, in contrast, does point out specific instances where a supermajority is needed. That clearly is not the case here.

Throughout the Constitution, the established pattern is that all decisions are to be resolved by simple majorities unless a larger vote is expressly required. It would be an unwise decision for the Congress to create an exception to this general rule this afternoon. Past congressional practice is also consistent with the view that a simple majority suffices on matters relevant to the mode of ratification. Both logic and history, then, clearly state that a majority is sufficient.

In considering the proposition whether the extension may be accomplished without presentation to the President for his veto or approval, the answer is clearly "Yes." The text of article V provides no role for the President in the amendment process. The President is simply not a proper actor in this process and any attempt to provide for his participation cannot be supported as consistent with the Constitution.

Having discussed three of the more commonly raised questions regarding this isssue, I want to address the fourth and most controversial question before us today. How will an extension of time affect the power of States to rescind prior ratifications?

The answer to this question is much more than just a personal interpretation of the Constitution. Power to rescind ratification of an amendment cannot be found in the Constitution. Further, allowing rescission would be contrary to both historic and legal interpretations. James Madison, I believe, should have the final word on this issue when he maintained that a State's ratification was "unconditional and irrevocable."

Furthermore, Mr. Speaker, the Congress should consider what would happen if this legislative body were to allow States to rescind ratification of amendments. If the States were allowed to change their position of each amendment with each new legislative sesssion in the respective State capitols, chaos would surely result. A constitutional system of government cannot survive if rescission is allowed.

Mr. Chairman, most constitutional experts agree that making a decision of the rescission issue today would not only be premature and misleading, but would not be even binding on future Congresses. The validity of rescissions by States can only be reviewed by the Congress sitting at the time the equal rights amendment is ratified by the 38th State.

As my colleagues well know, the Congress considered the rescission issue when the 14th amendment was passed; the Congress rejected the right of States to rescind ratification and the Supreme Court upheld that action. Congress has reaffirmed time and time again the proposition that rescissions by States are not valid and that only the Congress, not the States, has the prerogative to determine if a State's action to ratify an amendment is sound.

Mr. Chairman, in my opinion legal equality remains a timely and moral issue. Surely, the contemporaneous nature of this issue from the standpoint of continuing public interest cannot be in doubt. Not only is the issue still hotly debated in the daily press, but a substantial majority of Americans have taken a firm stand on this issue. Happily, all polls agree that a majority of Americans support the passage of the equal rights amendment. In fact, a majority of the public even in States that have not yet ratified the equal rights amendment support its adoption. Surely, we cannot prevent the adoption of a concept so widely endorsed by failing to extend the deadline for ratification in this instance. Should the equal rights amendment not be ratified by 38 States by March 22, 1979, it will be the first time in our history that a proposed constitutional amendment has failed not for lack of interest or because of obsolescence, but because of an unreasonable and arbitrary deadline of 7 years.

Extending the deadline for ratification of the equal rights amendment is constitutional, in conformity with past precedents, and is clearly the will of the American people. Extension of the deadline is clearly necessary if the equal rights amendment is to receive the attention it deserves from the State legislatures. The equal rights amendment continues to be necessary to provide a moral and legal foundation to eradicate sex discrimination in this country. For these reasons, I urge my colleagues to support House Joint Resolution 638 this afternoon as I will.●

● Mr. KASTENMEIER. Mr. Chairman, I strongly support the resolution before us today, to extend until June 30, 1982, the period for ratifying the equal rights amendment.

As an ardent advocate of civil rights and civil liberties, I simply do not believe that we should foster a society where some people are more equal than others. It is hypocrisy of the highest order for us to demand adherence to human rights by countries around the world when here, in our own country, more than half of our population is denied the full rights of citizenship.

Failure to provide the extension called for in this resolution will send a signal not only to nations around the world, but to the vast majority of our own citizens who support this amendment and whose will has been thwarted.

Those States which have ratified the equal rights amendment hold 72 percent of this country's population. Even in the States which have not ratified the amendment, the majority of the electorate has shown clear support for the ERA.

It is not the people who have denied the amendment the vote of three-fourths of the States needed for ratification. It is a handful of political figures in the unratified States who have used highly questionable tactics to cut off, bottle up in committee or stall debate in order to deny the vote.

These politicians have resorted to such tactics as changing Members' committee assignments, changing rules of procedure, using distortion and misinformation as argument to deny the vote needed for ratification.

The people deserve more time to show these public officials that such tactics cannot win in the end.

I fully believe that this extension is constitutional. The courts have consist-

ently held that it is up to the Congress to determine the details of the amendment process. There is nothing in the Constitution to deny such an extension.

The Justice Department argues, I believe convincingly, that by placing the time period in the proposing resolution rather than in the text of the amendment, the 92d Congress effectively decided that the proposal should remain viable for at least 7 years without barring a subsequent Congress from making a more informed judgment at a later time as to the reasonableness of the time period for ratification of the ERA.

I maintain, as do most constitutional experts, that the 95th Congress has the authority to ascertain whether the equal rights amendment is still viable and that this Congress, upon that determination, can extend the period during which the States may consider ratification of the amendment. I also maintain that there can be no doubt that the equal rights amendment is still an important and viable issue politically, socially, and economically.

The rescission amendment which is being proposed, however, should be defeated. Precedent clearly holds that States do not have the right to rescind their ratification. That view goes all the way back to James Madison, one of the original Framers of our Constitution.

In 1778, in a letter to Alexander Hamilton, Madison stated that:

> The Constitution requires an adoption in toto and forever. It has been so adopted by the other States. An adoption for a limited time would be as defective as an adoption of some of the articles only. In short, any condition whatever must vitiate the ratification.

Congresses throughout history have ignored rescission. During the ratification process of the 14th amendment, Ohio and New Jersey reversed their prior ratification. These States were included in the list of those who had ratified the 14th amendment.

The 15th amendment, in a similar manner, was ratified by the requisite number of States which was contingent on those States that had tried to rescind.

The Secretary of State, to whom ratification resolutions were sent for certification, refused to recognize the States that proposed to repudiate their prior ratification of the 16th, 18th, and 19th amendments.

Both historical precedent and scholarly comment indicate that once a State has ratified, its power to act with regard to a constitutional amendment is ended.

Amending the Constitution is not something to be taken lightly. We have done it only 26 times in our 200-year history and then, only when there is a need to establish a broad principle not yet contained in the Constitution. The principle that women and men are equal before the law is not now expressed in the Constitution.

Mr. Chairman, half the human race cannot move forward leaving the other half behind. I hope that one day we will look back on this debate and wonder why what was so obviously of paramount importance took so long to accomplish.●

● Mr. FRENZEL. Mr. Chairman, as a supporter of the ERA, I am anxious that this Chamber act to extend the time limit for ratification by the remaining States. I support the original 7-year extension, but am willing to go along with the 3-year, 3-month extension as reported by the Judiciary Committee.

Because I believe strongly that the ERA is badly needed to fill in the gaps in our State and Federal statutes which prevent equality in many legal matters for women, I think this body would make a mistake if it did not grant this extension. The latest poll in my home State of Minnesota shows that 72 percent of the people support the ERA. I believe we should not ignore the feelings of the majority of our population.

I do not want to impose an arbitrary time limit on equality. An extension may not be the best to pass the ERA, but it now looks like the only way.

There are charges that by extending the time period we are "changing the rules of the game," but social changes take time, especially one that has been so misunderstood. Eighteen of our original constitutional amendments were ratified without provision for time limits, and most constitutional experts agree that Congress does have the authority to set or not to set deadlines as it deems necessary.

Mr. Chairman, I also opposed the moves to change the rule granted for the extension to provide for a two-thirds vote rather than the simple majority specified by the Rules Committee. We are not voting on the ERA itself, which would require a two-thirds vote. We are voting on whether or not to change the language in the preamble of the amendment to grant a time extension for ratification of the ERA, which is separate from the ERA text itself and should not require a two-thirds vote.

On the question of rescission, I can see good arguments from constitutional experts on both sides of the issue. However, I believe that rescissions should not be allowed. In any case, I do not believe that the rescission question should be attached at this time on this piece of legislation. The question most properly belongs to the interpretation of the federal courts, rather than to the Congress.

Whether or not we all believe in the merits of the ERA, I think that nearly all of us can agree that the ERA has been interpreted in ways which have absolutely no relationship to its true intent. I therefore believe that this important, current and vital question deserves a longer time limit in which some of these misunderstandings can be discussed and subsequently cleared up. I hope my colleagues will join me in support of the ERA extension without amendment at a simple majority vote.●

● Mr. WOLFF. Mr. Chairman, this is a sad day for Congress, and a sad day for the Nation. At this late date, not merely 6 years from the proposal of the ERA by Congress, but 191 years after the adopting of the Constitution, this Nation still has not accepted the principle of equality and dignity for all its citizens under the law. It is a sad day when the Congress must consider a measure such as this: extending the time, which it originally thought sufficient, allowable for State legislatures to endorse equal rights.

We are truly exploring uncharted constitutional waters in discussing this matter, but from time to time we come across a beacon in the form of a Supreme Court ruling.

In 1921, the High Court acknowledged Congress right to set time limits on amendment ratification as one of the "subsidiary matters of detail" in the amendment process. This ruling endorsed a broad interpretation of the implied powers of the Congress in the amendment process under article V's granting of control over the "mode of ratification." The Dillon versus Gloss decision further grants authority to Congress to decide if a State's ratification has been obtained within a "reasonable time" of the Nations ratification. What is significant is that the "reasonable time" determination can only take place after the necessary three-fourths of the States have ratified. Therefore, only a future Congress can decide if a State has considered an amendment within the guidelines of fairness and constitutionality.

We must also recognize the history of the time limit. The first 17 amendments were considered without any time limit on ratification at all, as was the 19th. The sole purpose of a deadline, apparently, is to prevent unratified amendments from floating in legal limbo, able to be acted upon though socially obsolete. Yet this possibility has been virtually eliminated with the granting to Congress of the power to determine "reasonable time."

In other words, the time limit not only has no constitutional foundation, but it has now become itself obsolete.

It is known that many of my colleagues are considering a measure which, in my opinion, would undermine the amendment process and contradict every applicable precedent in law. This is the attaching of the ability to rescind to any extension authorization Congress might approve. I urge a careful consideration on the part of my colleagues of the implication of such a so-called compromise and would like to cite a few relevant historical precedents.

Rescission goes against congressional precedent, court determinations, and the intent of the father of the Constitution. It goes against the seriousness of the amendment process.

Congressional precedent is clear and straightforward on this point. When two States tried to rescind ratification of the 14th amendment and when my own State of New York attempted to retract approval of the 15th amendment, Congress, with full realization of the importance of its actions, firmly denied that States had the right to rescind and placed the three States on the rolls of the ratified. These are the only two occasions where States attempted to rescind ratification, and twice the unconstitutionality of the attempt was asserted by Congress.

Concurring in that sentiment, in the only statement regarding rescission credited to one of the Framers of the Constitution, is James Madison. In a

letter to Alexander Hamilton replying to Hamilton's inquiry as to whether New York could place a condition on its ratification of the Constitution, Madison stated that:

> A reservation of a right to withdraw if amendments be not decided on . . . is a conditional ratification. Any condition must vi(t)iate the ratification.

He went on to say that "the Constitution requires adoption in toto and forever." It is clear that Madison's reasoning, aimed at article VII, the ratification procedure of the Constitution itself, should also apply to the amendment process.

But despite all that, in the final analysis this is not a legal question—that portion of the issue is for the courts to decide. Rather, our consideration of this matter tests the seriousness with which we respect the most fundamental concepts of American philosophical orientation: equal opportunity and universal respect for human dignity.

If we continue to designate one-half of our species second-class citizens because of their hormonal design, it makes one wonder about America's oft-expressed pride in liberty, freedom, and dignity. Will not America's place in history be reduced from an original and noble example of free democracy to a hollow, cynical joke of hypocrisy and double-standard? Make no mistake, colleagues, this is the magnitude of the questions faced in our consideration of the ERA, and to trivialize them would be to diminish the credibility of our claims to enlightenment in the international context.

The United States has, through its history, given preference under the law to the white over the black, the wealthy over the poor, and the male over the female. Each of these segments of discrimination—racist, materialist, and sexist—is being gradually erased from the theory, if not always the practice, of society.

We are presented, in the form of the equal rights amendment, with an opportunity to take a major step toward, for the first time, eliminating one of these discriminations. We cannot cut off its chances now.

But that is the danger we are presented with. Although 70 percent of the States and, according to recent polls, a clear majority of Americans, favor the ERA, it is about to expire unratified. Therefore, I favor the proposed extension, which is entirely within congressional prerogative.

Opponents of the ERA will respond that the proponents have already had the time to present "their" case; the 7 years originally allowed. They "lost," some say, and now they want to "change the rules of the game." Some have equated the situation with the ending of a football game, where the losing team demands an extra quarter of play so they can catch up.

Well, all I can say is that the question of equal rights is not a game. To treat it as such, or to take the attitude that the rules are more important than the philosophy, is to elevate form over substance. Such an attitude is to the detriment of a fair consideration of the question, and it demeans its importance.

It is in the interests of both proponents and opponents that a clear picture of the effects the ERA will have on all our lives be an object of universal awareness. You only need turn to a television debate on your local station and see spokespersons on both sides of the issue exchanging insults and charges of distortion while avoiding a substantive discussion of the issue, to see how the national debate has been poisoned by overemotionalism and irrationality.

The fact is, many Americans have been confused by emotional distortions, and a clear picture has yet to emerge. The ERA has the floor of national debate. Let us not table it, but rather keep it on the floor, so that a more constructive level of discussion between opponents and proponents can begin, to the benefit of us all.●

● Mr. CONYERS. Mr. Chairman, I come to the issue of equal right for women without any dramatic conversion or extended study. I have supported this proposition ever since I first understood it. What I am convinced about, however, is that it is an urgent matter, one we have to deal with now.

Make no mistake, we are dealing with a fundamental human right, and no amount of rationalizing about technical difficulties, no amount of quibbling about constitutional niceties will change that simple fact. The Equal Rights Amendment embodies fundamental human rights: the right of women to equal pay as men when they are employed in similar circumstances; the right of women to full and equal protection under the law; the right of women not to be discriminated against, in their jobs, as heads of households, and after retirement. There really is no good reason in the world why women now, on the average, earn 20 percent less than men for equal work, as the President's Council of Economic Advisors has estimated. Or that they should have any diminished standing before a court simply because they happen to be women.

The struggle behind ratification of the equal right amendment represents the latest stage in the historic struggle for equality in this country. It is part of the struggle that involved black Americans and members of other minority communities in the great and revitalizing movement to make this society more inclusive, more participant, and more representative.

So I urge my colleagues, most of whom happen to be gentleman, to recognize that the time has come to make it possible for the ratification of ERA. It really is not going to hurt much. It really will be best for all of us. Let us take firmly into our hands the responsibility of deciding that this constitutional amendment will become law one day, so that we can enter upon a new age in which the U.S. Constitution for the first time will recognize the existence of women. I am absolutely convinced that an affirmative vote cast today will be to our collective credit for all time.●

● Mr. ANDERSON of California. Mr. Chairman, I rise to support the resolution to extend the deadline for ratification of the equal rights amendment.

There is nothing sacred about ratification being accomplished within a period of 7 years. Amending our Constitution, when considered in its totality, is often a long process involving much more than a period of ratification by the States. Every new idea starts with a minority of one. Substantial time is often necessary for a good idea to come to fruition, for the people and Governments to become aware of a problem, and to achieve a broad consensus on the solution. Formal ratification by the States is only the last step in the process.

The long period of consensus-building is especially characteristic of questions of human rights. Of the 16 amendments adopted since the Bill of Rights, only 6 involved much controversy; of those 6, only 3 deal clearly with human rights. The other 10 amendments were generally noncontroversial, and State ratification was speedy. However, from Jefferson's proposal to abolish slavery in the Declaration of Independence to the adoption of the 13th amendment took 89 years. The 19th amendment, recognizing the right of women to vote, was first introduced in Congress 70 years before it was ratified.

So, too, with the equal rights amendment, first introduced in 1923. In 1950 and again in 1953, an equal rights amendment was passed by the Senate. Thus, we did not simply wake up one morning in 1971 to find both sex discrimination and the ERA newly on our doorstep. The problem of sex discrimination will not go away by defeating the ERA, or by frustrating it by adhering to an artificial deadline. Nor will defeating the ERA make sex discrimination right. We would be merely requiring some future Congress to start the amendment process anew, and forcing 35 States to duplicate the exercise of ratification.

There are perhaps as many as 300 laws in the United States Code which the Civil Rights Division of the Justice Department has identified as invidiously discriminatory on the basis of sex. One example is the discrepancies in the treatment by social security of nonworking wives versus nonworking husbands. Another example is the ineligibility for aid to dependent children allowance if the mother, rather than the father, loses a job; this especially hurts our society as a disincentive to family cohesion.

The problem of rescission is separate from extension and is most properly left to the Congress which sits when three-fourths of the States have completed the ratification process. I am especially impressed with the analysis by the gentleman from Massachusetts (Mr. DRINAN) of the Judiciary Committee, who, though he strongly supports the ERA extension, considered the question of rescission as if the amendment were repugnant to him. He concluded that he would still have to vote against rescission. I, therefore, believe it would be wisest for the Congress now to remain silent on the subject.

Much of the discussion on the extension has revolved around the legality of Congress action and the means of ex-

tension. But, I am convinced that we have the legal right to extend the deadline, and the moral responsibility to do so. If we are to continue to make social progress in this country, we can do no less today than vote for this resolution. If we are to continue to exert our leadership for securing human rights elsewhere in the world, we can do no less today than give our fullest support to the ERA.●

● Mr. FRASER. Mr. Chairman, today the House voted on a matter of great importance, whether or not to extend the ratification deadline for the equal rights amendment until June 30, 1982.

I supported the extension, opposed a rescission amendment, and approved the decision of the Rules Committee that a majority vote was appropriate.

Extending the deadline for ratification does set a precedent. And for that reason, many have questioned the legality and appropriateness of the extension. However, a close examination of the facts resolves the question of legality.

The time limit is not in the amendment itself, but in the preamble. It is a matter of detail, and within the powers of Congress to change. This is the opinion of the Justice Department, and of many constitutional scholars who have also studied the somewhat sparse judicial history.

I opposed the rescission amendment because this Congress cannot dictate the actions of future Congresses. The Constitution clearly provides that the Congress sitting at the end of the ratification period makes the decision to accept or reject rescissions.

Is it appropriate for Congress to extend the ratification deadline? Yes, I think so. We are setting a precedent, to be sure. Yet we are setting a precedent on a profound and urgent matter—equality of men and women under the law.

I have worked for and will continue to work for equal treatment of the sexes. I am also the husband of a strong and good woman who both shares my convictions and strengthens them. And we have tried to pass these convictions on to our children, so that they may choose their roles based not on their genders—but on their principles and their talents.

Why did it take so long for Congress to pass the ERA? Certainly one reason was that the House and Senate of the United States have been predominantly male.

Women worked for suffrage and won it; they worked for passage of the ERA and won it. Women Members of the House have done much of the work that resulted in floor consideration of House Joint Resolution 638. The women of the United States will continue to work to convince legislators in all States of the truth that a majority of Americans now accept. The ERA will do simply what it says it will do—treat men and women equally under the law.●

● Mr. MOORE. Mr. Chairman, today's actions to extend the ratification period by some 3 years and 3 months present to me several extremely important constitutional procedure questions totally separate and distinct from the substantive ERA issue. I favor the equal rights amendment and if the extension provided in House Joint Resolution 638 is not approved by the Senate, I will be an early and ardent sponsor of a new ERA in the next Congress. My concern today is that we do not inflict damage that will jeopardize the strength and stability of the Constitution and the amendment process.

House Joint Resolution 638 is a procedural instrument that serves as a vehicle to extend an earlier designated ratification deadline on an important issue of the day. It does not question or detract in any way from the merits of the equal rights amendment. Foremost among all considerations today must be its procedural and nonissue purpose. Once recognition is given to these considerations, there are four aspects of the design of House Joint Resolution 638 and the method of its consideration by Congress that have caused many including myself to disagree with the measure as drawn by the House Judiciary Committee. Others who support the equal rights amendment, including the American Bar Association, have gone on record in opposition to House Joint Resolution 638 due to constitutional precedent considerations.

First, never before has the time limitation for the ratification of a proposed constitutional amendment been extended. I have researched the issue of the 7-year time period and I have found that the 1st through 17th amendments and the 19th amendment had no ratification limit. The 18th and 20th through 26th all did with the exception of the 25th. I do not know why the 25th did not have one, but I have been informed that evidently since the 20th amendment, the Congress has consistently, with the exception of the 25th amendment, provided for a 7-year time period in the constitutional amendment resolution. The reason for the 7-year period is that it is the period determined by the Congress to be "a reasonable" time period for ratification.

No other constitutional amendment has ever taken anywhere near as long as 7 years, the average being 1.2 years and the longest being 3 years 11½ months. The Congress in interpreting the decision of the U.S. Supreme Court of *Dillon* v. *Gloss*, 256 U.S. 368 (1921), indicated that "ratification must be within some reasonable time after the proposal." The question of what was a reasonable time was left up to Congress and Congress has selected a 7-year time period in all recent amendments except one. There has never been a specified ratification period longer than 7 years.

It appears to me that we are in grave danger of destroying a reasonable time period test by extending the ratification time period for ERA and thereby adversely affecting the amendment process in the future as a proposed constitutional amendment could essentially have forever to be ratified. I am convinced that such uncertainty is not intended in article V of the Constitution which prescribed the amendment process.

Second, there is the problem of whether or not a State can rescind its ratification, as three have done already on ERA. Several others have made serious attempts at rescinding their ratification. The extension bill allows additional time to ratify but does not recognize the right to rescind. This is certainly unjust and makes little sense as if the whole purpose in a ratification period is to give a State time to take action to ratify, it would seem logical that it would also give the State time to rescind its ratification at any time up to the point that 38 States have ratified it.

Third, 24 of the States that ratified the ERA did so conditioning their action on the March 22, 1979, deadline. In other words, if it is not ratified by that date, all 24 so-conditioned ratifications will be invalid. This extension bill overlooks the clear wording and intent of these States.

Fourth and lastly, article V requires a two-thirds vote of each House of Congress to initiate an amendment resolution which includes the 7-year time limit, so it would seem logical and proper that it would take a two-thirds vote to extend the time limit of such a resolution. This bill requires only a majority vote which is yet another mistake.

These are four very serious problems which will have a profound impact upon our Constitution and I feel set very dangerous precedents. Any one of these questions is serious. All four together make it so serious as to not jeopardize the amendment process to the Constitution for this one amendment. The decision we will make in voting for or against the extension is a historic one and may well be very detrimental. The decision to start over again, and again pass a constitutional amendment resolution for ERA, would likewise be historic, but not detrimental. I would support its reintroduction and vote for it.

The drafters of the Constitution intended the amendment process be rigorous. James Madison in Federalist Paper No. 43 explained that the ratification procedure decided upon for amending the Constitution was intended to prevent it from being amended too early yet not be too extremely difficult to amend. I submit that up to this point we have not jeopardized that amendment process and we run grave risk of doing so by the extension. Therefore I again conclude that this is a procedural matter of the process of amending the Constitution and not a substantive matter of whether you support or oppose the merits of the equal rights amendment itself.

My concerns are shared by the majority of my constituents as 73 percent of those responding to my May 1978 questionnaire opposed the extension.

With rejections of the procedural vote to mandate a two-thirds vote in order for approval to be given to House Joint Resolution 638 and the Railsback amendment to allow rescission, I found constructive and constitutionally sound refinements to House Joint Resolution 638 denied. In view of this denial of properly drawn constitutional protec-

tions, I voted against House Joint Resolution 638.●

● Mr. TREEN. Mr. Chairman, the equal rights amendment, which provides that "equality of rights under the law shall not be denied or abridged by the United States or any State on account of sex" was proposed by Congress in 1972. The congressional resolution provided that the amendment would become part of the Constitution when ratified by the necessary number of States within 7 years.

The 7-year period for ratification expires on March 22, 1979. Approval of 38 States is required; thus far 35 States have passed resolutions of ratification; and of these 35, 4 have passed rescissions, the validity of which is questioned.

House Joint Resolution 638, being considered by the House of Representatives today, would amend the original proposal by enlarging the 7-year period by an additional 3 years, 3 months and 8 days—extending the time for ratification to June 30, 1982.

The extension presents some very serious legal and constitutional questions, as well as some policy issues.

As an attorney and a strong believer in strict adherence to the Constitution, I am concerned, at the moment, with the legal and constitutional questions which envelop the proposed time extension.

An important issue is whether or not the proposed extension requires a majority vote by the House and Senate or a two-thirds vote. The Constitution clearly provides that a two-thirds vote is needed in order for the Congress to propose a constitutional amendment. The proposal adopted in 1972, which included a 7-year limitation for ratification, was approved, of course, by a two-thirds vote.

May a subsequent Congress make a change in the original proposal by a simple majority, or must any such change require a two-thirds vote?

There is serious legal question as to whether a subsequent Congress may extend the time for a proposed constitutional amendment at all. There are no legislative precedents because Congress has never attempted to enlarge the time limit for a constitutional amendment. Nor does there appear to be any judicial precedents which would shed light on this question. Moreover, there is no agreement that the issue is one for resolution by the courts or by the Congress itself.

It is clear that Congress may impose a time limit for ratification, and the 7-year period has been customarily used for most of the amendments since the 18th amendment. The Supreme Court in Dillon against Gloss (1920) upheld the power of Congress to impose a 7-year time limit.

Today, the House by a vote of 230 to 183 refused to even permit debate of an amendment to the resolution offered by Congressman QUILLEN of Tennessee which would require a two-thirds vote for approval of the resolution. I am dismayed that a majority of the House would not even consider debating what is obviously a very legitimate issue.

It is my judgment that any change in the proposal made by the 92d Congress in 1972 can only be valid, if indeed a change is valid at all, if it is approved by a two-thirds majority of both the House and the Senate.

A second major question surrounds the issue of whether or not States which have heretofore ratified the amendment should be permitted to rescind during the extension. Congressman RAILSBACK of Illinois proposed that if the Congress extends the time for ratification, it should, in fairness, permit any State that ratified on the basis of a 7-year ratification period to rescind that ratification. His amendment did not address the question of whether or not the four States that have passed rescissions may validly do so. He leaves that question for future determination.

The proponents of extending the time for ratification argue that there is no sanctity to the idea of limiting the ratification process to a 7-year period. I would agree with that. A 5-year or 10-year, or perhaps even a 15-year period, could all have been defended as reasonable at the time the proposal was made. But the fact of the matter is that a time limit was adopted at the time the proposal was made, and the record is clear that it was not done without some thought. Regardless, the time period was an explicit expression by the Congress of one of the terms upon which ratification was founded. And, as noted above, the Supreme Court in Dillon against Gloss has specifically held that Congress

What should our position be with respect to the Railsback amendment to permit rescissions during the extension period?

There are some that argue that Congress does not have the power to permit rescission, and precedents are cited, particularly with reference to the 14th and 15th amendments.

But the question presented by the Railsback amendment is different. Clearly the Congress is not compelled to permit an extension of time. If Congress has the power to extend the time, and lawfully exercises that power, may it add the condition that States which have previously ratified may now rescind? Second, if it may do so, should it do so as a matter of policy?

There are no clear precedents, so we are each left to our own notions as to: First, the applicability of general principles of law, second, basic fairness or equity, three, possible legal entanglements, and fourth, the effect of our decision as a possible precedent. Let me discuss each of these.

First. It is a general principle of law that if an offer is made by one party to another party—in this case the Congress offering to the States the opportunity of amending the Constitution if 38 of them will approve within 7 years—it must be accepted on the offeror's terms. If accepted on those terms, the offeror may not change the terms and still hold the acceptor contractually bound. This is particularly true when there are multiple offerees/acceptors.

Second. It offends my sense of equity and basic fairness to tell the 35 accepting States that the time is being extended for the 15 nonaccepting States to reconsider their failures to accept and, in some instances, their outright rejections, and, at the same time, to bar the 35 accepting States from reconsidering their acceptance during the extension period.

Third. Extension of the ratification period without permitting rescission raises some serious legal questions which could result in a long period of uncertainty with respect to whether or not the amendment had been lawfully ratified. It would seem to me that this uncertainty should be avoided. Prof. Jules B. Gerard, professor of law of Washington University, in St. Louis, Mo., calls attention to the fact that many of the States which ratified the proposed amendment made reference to the 7-year time limitation in their acts of ratification. Thus, he argues that the ratification in 20 of the States "will be incontestably invalid." There is no legal precedent to support Gerard's opinion, but the logic of his view is difficult to refute. The acceptance of a proposal in terms which specifically makes reference to those terms makes it terribly difficult to argue that one of those terms or conditions was inconsequential or irrelevant.

Fourth. I am also concerned about the precedent which might be established by the adoption of the extension proposal. At the very least, it would introduce the element of uncertainty with respect to any future constitutional amendment in which Congress establishes a time limitation. The States have an interest in a fairly contemporaneous decision by their sister States. If the States may not depend upon the application of a time limit, I can imagine circumstances in which that might act as a disincentive to the ratification of a constitutional amendment.

Further, with respect to the ERA amendment itself, what is to prevent a second extension of time if the necessary number of States have not ratified by June 30, 1982?

I take note of the fact that the American Bar Association, by a vote of 153 to 135 of its policymaking house of delegates, rejected an effort to enlist the ABA in lobbying efforts in favor of the extension. It was reported that this vote reflected the concern by many lawyers of the constitutionality and appropriateness of extending the ERA deadline. My source is an Associated Press story out of New York reported in the Washington Star on Wednesday, August 9, 1978.

For the foregoing reasons I voted for the Railsback amendment. Unfortunately, that failed by a vote of 196 to 227. It is interesting to note that according to a public opinion poll conducted very recently by the Associated Press-NBC, the majority of Americans oppose extending the time for approval of ERA, although a majority favor the amendment itself.

Because this House refused to approve the Railsback amendment, and refused even to debate the Quillen amendment involving the issue of whether a two-thirds majority or a simple majority is required to change the time period for acceptance, I have no choice but to be true to my views of the U.S. Constitution,

which I have sworn to uphold, and vote against House Joint Resolution 638.

On the issue of equal rights for women, I wish to make my position clear. I firmly believe that persons must be treated equally by the law, without respect to gender. Indeed, there are laws on the books now which spell out this protection, and I support those laws. Furthermore, the Supreme Court has said that sexual discrimination violates the equal protection clause of the 14th amendment.

I do not believe that philosophical commitment to sexual equality obligates one to reject every distinction based on gender. For example, I do not believe that women should be subjected to involuntary conscription into the military services. I also do not believe that Congress should be required to send women into combat on the same basis as men. It is my judgment that the equal rights amendment as presently drawn would provide a legal basis for any man required to particiapte in combat to complain that he is being discriminated against on the basis of his sex, inasmuch as his chances of being chosen for combat are mathematically increased as a result of the exclusion of women.

To a somewhat lesser extent, I am concerned about the effect of ERA on the historical rights of States to lawfully enact statutes which establish differing obligations and responsibilities on husband and wife and mother and father. Although such laws should be viewed as constitutionally permissible based upon the marital or parental relationship, I am fearful that they would be struck down by this or a future Supreme Court adopting the view that ERA permits no distinctions if they are in any way rooted in the biological difference between man and woman.

I will support a constitutional amendment, although I do not believe one to be necessary in order to protect the rights of women, which would incorporate the language of the present ERA but which would also provide against the two contingencies I have described.●

● Mr. McHUGH. Mr. Chairman, I rise most reluctantly to oppose this joint resolution. I say "most reluctantly" because I believe strongly in the equal rights amendment. Its declaration that in our country there must be no discrimination based on sex is absolutely fundamental. It is a proposition of such basic equity that it should be part of our Constitution. Accordingly, it is and always has been my fervent hope that the ERA will be ratified by the required 38 States.

The question before us today, however, does not relate to the ERA's merits, as worthy as they are. The issue today relates to the orderly process established by Congress for the States to consider ERA, and whether that process should be changed at the 11th hour. This issue, which also involves questions of fundamental fairness, is important in itself and must be considered on its own merits.

When Congress passed the ERA in 1972, it expressly provided that the States would have 7 years to debate the issue and act upon it. The Congress could have chosen 10 years, or 14, or set no time limit at all. In hindsight, and as an ERA supporter, I wish that Congress had chosen a longer period. Consistent with its practice in the last 60 years, however, Congress did establish a 7-year limitation, and the debate in the States proceeded with full knowledge on that basis. In establishing this 7-year limit, Congress made it an integral part of the process by which the issue would be considered. In a very real sense, it was part of the compact Congress made with the people, pro and con, who would ultimately decide whether the Constitution should be amended. Thus, it is not a minor or "technical" point to be set aside because we who support the ERA have not yet been successful. For us to alter the compact at this point would be a breach of faith with those who have relied on the terms Congress itself established.

I believe that our colleague, Mr. BROOKS of Texas, reflected my concerns very well in his dissenting views to the Judiciary Committee report:

> The integrity and regularity of our processes must not be overlooked in this debate. It is that integrity and regularity which has distinguished our constitutional processes and set them apart. It is that integrity and regularity which forms the base for all our social and legislative intercourse.
>
> This proposal, if followed, will inject into the process of ratifying constitutional amendments an element of uncertainty and confusion which has no place there. The value of certainty in our major constitutional process cannot have so soon been lost on us. It provides the stability which permits us to have bloodless changes of leadership in times of crisis and high emotion. It provides the stability which allows us to contemplate impeaching the highest elected official in our land. It provides the stability for the citizens of our country to know that our system for amending the Constitution is rooted in concepts of fundamental fairness and is not one to be tinkered with no matter how worthy the cause.

The cause in this case is worthy, and many of ERA's proponents fear that without an extension of time this basic equal rights provision will never be written into our Constitution. I do not agree. If the time expires, there is nothing to prevent Congress from passing the ERA again and sending it out to the States for ratification. If the ERA is an important and necessary amendment, as I believe it is, it will gain the support of the people and be ratified by their elected State representatives.

In my judgment, the end can be achieved without compromising the means.

It is also important, of course, to consider the precedent we are setting. If the orderly process of amendment can be distorted in this case, it can be done in others. For example, suppose that Congress should adopt an amendment prohibiting abortions. And suppose further that the proponents had failed to obtain ratification in the required 38 States and had but 7 months remaining to do so. If the proponents then came to Congress asking for an extension of time, and Congress were favorably disposed to the right to life amendment, would those who oppose that amendment think it fair for Congress to grant such an extension? I think not.

Finally, Mr. Chairman, there is the question of rescission, that is, should Congress permit States that have ratified the ERA to rescind their ratification? I do not think so. Once again, I base my view on the need for an orderly process in amending our Constitution. To allow rescission would be to introduce uncertainty and confusion into the amendment process. It would erode the stability which is required, regardless of the particular amendment at issue.

In considering these important questions, Mr. Chairman, I hope that this House will look beyond the passions of the moment. Our decisions will have long-term implications for the amendment process, and when it is the Constitution we are amending, the integrity of that process is vital.●

● Mr. STOKES. Mr. Chairman, I rise in support of House Joint Resolution 638 which extends the period of time in which States may ratify the proposed equal rights amendment to the Constitution by 39 months.

First of all, I would like to address the issue of women's rights. For too long, the women of this country have been denied equal rights under the law. Statistics support this statement. For instance: A female head-of-household earns less than two-thirds of what a male head-of-household earns, and the gap is widening. In 1972, the 402,025 women-owned businesses represented only 4.6 percent of all large and small U. S. firms. Men in college receive more financial aid and higher grants than women. Women college professors earn on the average, $3,000 per year less than men college professors. Women represent only 2 percent of the total secondary school principals, although they comprise 63 percent of the public school teachers. Women earn 59 percent of what men earn and the percentage continues to decline.

These are just a few of the discrepancies that exist between men and women in this country. In view of the fact that women represent 47 percent of the labor force and the percentage continues to increase, and, in view of the fact that 70 percent of the women in the labor force work because they are the sole support of their families or to bring the family income up to $10,000, I submit that sex discrimination must be brought to a halt. ERA is designed to do just that.

Second, I would like to address the constitutional issues surrounding the extension. Opponents of ERA have been using the deadline as a weapon, shifting the dialog from the merits of the ERA to the time limit itself.

Mr. Chairman, there can be no time limit on equality. And I am satisfied that extending the ratification period for the ERA is both within the congressional authority and appropriate. The Supreme Court, ruled on two occasions that Congress has the power to extend the time limit for ratification of a proposed constitutional amendment. In its rulings the Court held that a reasonable length of time is determined by the issue's vitality and timeliness. I believe ERA meets

these standards. A similar position has been adopted by the Justice Department which has written that under the Constitution, Congress is empowered to determine the period of ratification and can change, by resolution, any previously established ratification period.

Additionally, an advisory opinion by the constitutional law experts at the Library of Congress states that the 7-year limit for ratification was established as part of an underlying procedural resolution, not as part of the substantive language of the amendment itself. Thus, it can be changed if Congress decides that the time limit does not meet the reasonable standards which case law on the subject has established.

Mr. Chairman, it took from 1848 until 1920 for women to win the right to vote. It took nearly 50 years to get the ERA before the Congress for serious consideration. I personally do not feel that the extension is unreasonable in view of the profound consequences the issue may have on this country.

With respect to allowing a State to rescind their ratification, I believe the legal and historical precedents are against allowing rescission. Congress disallowed rescission in connection with the 14th, 15th, and 19th amendments. Additionally, constitutional scholars maintain that the appropriate time to resolve questions relating to a State's rescission of an amendment is at the point at which the requisite number of States have ratified the amendment.

Mr. Chairman, the equal rights amendment is long overdue. Lengthening the ratification period for the ERA is a giant step in the struggle for equal rights for American women. ERA represents a constitutional statement for the fair treatment of women under the law and is a necessary tool for women to gain full legal recognition.

Mr. Chairman, I urge my colleagues to support House Joint Resolution 638. Failure to pass the ERA will mean that this Nation has gone on record in opposition to full equality for all its citizens.●

The CHAIRMAN. All time having expired, under the rule, the Clerk will read the joint resolution.

The Clerk read as follows:

H.J. RES. 638

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled. That notwithstanding any provision of House Joint Resolution 208 of the Ninety-second Congress, second session, to the contrary, the article of amendment proposed to the States in such joint resolution shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within fourteen years from the date of the submission by the Congress to the States of such proposed article of amendment not later than June 30, 1982.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: On the first page, beginning in line 8, strike out "within" and all that follows through line 1, page 2, and insert in lieu thereof "not later than June 30, 1982.".

The committee amendment was agreed to.

AMENDMENT OFFERED BY MR. RAILSBACK

Mr. RAILSBACK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RAILSBACK: On page 2, line 2, strike the period and insert the following: ": *Provided, however,* That any legislature which shall have ratified the article of amendment within the first seven years of this period may, by the same vote and procedure required for ratification, rescind that action at any time after this resolution becomes effective and prior to adoption of the amendment. The Administrator of the General Services Administration shall certify to Congress all resolutions of ratification or rescission of this amendment as received from the several States for final determination by the Congress as to whether the amendment shall have been adopted."

Mr. RAILSBACK. Mr. Chairman, the amendment which I am offering jointly with my colleague, the gentleman from Pennsylvania (Mr. ERTEL), has two very, I believe, clear objectives.

First, it would provide that those States ratifying the equal rights amendment during the first 7-year period would have the right to reconsider that action during any extension period. It does not seek to address the question of validating or invalidating any rescissions that have already occurred. I want to make that point.

Second, and in my opinion equally important, it would assure that Congress and not the General Services Administrator will make the ultimate determination of the validity of the adoption of this constitutional amendment.

In addition to insuring fundamental fairness in the amending process, the limited right of rescission which I propose has the ancillary benefit, and I think maybe this is most important of all, of guaranteeing that ratification of the equal rights amendment when it does occur—and I hope that it does occur—will manifest the contemporaneous approval of the States, an implicit requirement of article 5, according to the Supreme Court's opinion in Dillon against Gloss.

Since submission to the States 6 years ago, 35 States have seen fit to ratify, 30 within the first year, and since that time 5 more States, I think the last one in January of 1977, and then, maybe equally importantly, 4 States have attempted to rescind.

What really bothers me is the Congress in its constitutional amendment which was submitted established that there would be a 7-year period for ratification. Ratification by the requisite three-quarters of the States has not occurred.

I do not believe that we should have a one-way extension without providing opportunities for those 35 States that may have ratified within the 7-year period without giving them an opportunity to reconsider.

I cannot believe that anybody can argue that we really have had contemporaneous approval, as required by the Dillon case.

Again, in my opinion, this amendment would insure that this Congress, not the General Services Administrator, will make the ultimate determination of validity of this constitutional amendment.

The state of the law is very unclear, but there are strong indications that under title I, United States Code, section 106(b), that the Administrator of the General Services Administration could simply certify the adoption of this constitutional amendment without submitting the many difficult, controversial, and unresolved questions of constitutional law to this body.

What is even more significant, I believe, is that his certification has the force of law and it is binding on the courts under the Leser case.

This delegation of authority to the General Services Administrator should be clarified and the constitutional powers of the Congress reasserted. The amendment which the gentleman from Pennsylvania (Mr. ERTEL) and I are introducing will attempt to do just that.

There are those who have suggested that the amendment we propose is unconstitutional, but they have apparently failed to take note of a number of facts to the contrary. First of all, they have apparently chosen to ignore the fact that four out of seven constitutional scholars appearing before the House Subcommittee on Civil and Constitutional Rights of the Committee on the Judiciary testified that Congress has the power to provide a statutory right of rescission and that just last week a co-author of a treatise on constitutional law added his support for a statutory right of rescission when he testified before the Senate Subcommittee on the Constitution.

Second, they are apparently unaware of the fact that the Supreme Court in Coleman against Miller clearly stated that Congress can determine the effect of a State's withdrawal of its ratification.

Third, and finally, those suggesting that this limited right of rescission is unconstitutional failed to mention that in 1971 and again in 1973 the other body, the U.S. Senate, unanimously passed a measure relating to constitutional conventions which included a right of rescission even broader than that which we are proposing today, without one objection being raised that such a provision was unconstitutional.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. RAILSBACK was allowed to proceed for 3 additional minutes.)

Mr. TUCKER. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I am just about through and then I will be happy to yield to the gentleman from Arkansas (Mr. TUCKER).

Mr. Chairman, the amendment at the desk does not present issues separate and distinct from the extension resolution which we are now considering. It is not a question which would be best deferred to some later Congress.

Let me just say about that, as earnestly as I can, it is my opinion those that would argue that this could best be left to a later Congress are overlooking the

very sad fact of life that maybe that General Services Administrator can simply pronounce, and that pronouncement will constitute a binding determination of ratification and adoption without the Congress, without subsequent Congresses ever having had the opportunity to speak to the issue.

Now I will yield to the gentleman from Arkansas (Mr. TUCKER).

Mr. TUCKER. Mr. Chairman, I appreciate the remarks made by the gentleman from Illinois (Mr. RAILBACK). I am concerned in this debate about the degree of stability and orderliness which we bring to the entire process of amending the constitution and that prompts me to inquire because of several points the gentleman has raised, why does the gentleman's amendment not deal with those rescissions which have already taken place?

Mr. RAILSBACK. I will be happy to try to answer that.

My feeling is that we should not at this time attempt to validate those four rescissions that have already occurred. That should be determined by the Congress making the final determination. As a matter of fact, I would have voted with the majority in respect to the adoption of the 14th amendment that we ought not recognize rescission by the State of Ohio and the State of New Jersey, being then within what I think was a contemporaneous time period.

The reason why my amendment is prospective is we are dealing with an extension period, we are extending time for ratification, it seems to me, in the light of history of the amendments that we certainly ought to give power to those States that may wish to reconsider.

Mr. TUCKER. Mr. Chairman, if I may inquire further, the gentleman has not given consideration in his amendment to those rescissions which have taken place. Yet, we attempt through this amendment to authorize States to engage in the rescission process in the future in the hope that that will lead to a national consensus, or, at least, a more favorable national contemporaneous consensus than we have; is that correct?

Mr. RAILSBACK. Yes, that is right.

Mr. TUCKER. What happens if between now and the expiration of the time of the resolution before us a State such as my own, Arkansas, which has not yet allowed this resolution to even come out of committee so that the legislature could consider it, what happens if my State next year approves it and the following year rescinds it, and another State next year rescinds it and the following year approves it? Does that clarify in any way the existence of the national contemporaneous consensus, or would we be better off if we all had to live with our responsibility with our decisions?

The CHAIRMAN. The time of the gentleman from Illinois (Mr. RAILSBACK) has expired.

(On request of Mr. TUCKER and by unanimous consent, Mr. RAILSBACK was allowed to proceed for 2 additional minutes.)

Mr. RAILSBACK. Mr. Chairman, may I just say to the gentleman that I think he has raised a very legitimate question. We have dealt with that question.

I will tell the gentleman how I feel about it. In our amendment we direct the General Services Administrator to forward all notices of ratification to the Congress and also notices of rescission. That would include notices of rescission that had been filed with the General Services Administrator right now, and there are, I think, either three or four.

My feeling is that in this amendment, by giving back to the Congress the clear-cut right to make the final determination, the Congress which sits at that time will be able to take into account the past rescissions or future rescissions. However, my feeling is and my and Mr. ERTEL's amendment is addressed simply to giving those 35 States which may have once ratified the amendment, out of a sense of fairness, a chance to reconsider.

What I am saying is that we address the matter expressly by taking it from the General Services Administrator and giving it back to Congress. I think Congress would have and should have the right to determine past or future rescissions.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, I think the question also ascribes to the State legislature a certain sense of irrationality by acting one way one year and another way in the next year. I do not think we give that presumption any credence under the law. We presume that the State legislatures are just like us, that they act rationally, and that they will not flip-flop every year.

I think that is another consideration and that perhaps the example is just not appropriate at this time.

Mr. RAILSBACK. Mr. Chairman, if I can just say so, I agree with the gentleman's comment. It is very unlikely, in my opinion, that a State, within a 3.3-year-time frame, would be apt to ratify and then rescind.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, did I understand the gentleman from Illinois (Mr. RAILSBACK) has made remarks to the effect that four of the seven constitutional scholars who appeared before the committee took the position that we could constitutionally provide for rescissions?

The CHAIRMAN. The time of the gentleman from Illinois (Mr. RAILSBACK) has expired.

(On request of Mr. FISH and by unanimous consent, Mr. RAILSBACK was allowed to proceed for 1 additional minute.)

Mr. RAILSBACK. Yes. The answer is that four of seven expressly stated that it could be done.

Mr. FISH. Constitutionally?

Mr. RAILSBACK. Yes, constitutionally. Lawrence Tribe did not favor it as a policy matter, nor did one of the others. Erwin Griswold favored it, and Charles Black was unequivocal. Charles Black said that it is impermissible to do it without having rescission.

Mr. FISH. I agree with the gentleman; they did say it could be constitutionally done.

Mr. RAILSBACK. Yes.

Mr. FISH. But four out of seven opposed the idea of coupling rescission with this amendment; is that correct?

Mr. RAILSBACK. As I recall, Professor Ginzberg was not able to address the constitutionality. Lawrence Tribe did.

Mr. FISH. I know that Lawrence Tribe did, but as we all know, four out of seven opposed the idea of rescission.

Mr. RAILSBACK. Lawrence Tribe, the professor from Harvard, made a most persuasive argument initially in the House hearings that it would be fundamentally fair, certainly, to let States retract, but he would have the Congress make that ultimate policy decision.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. RAILSBACK) has expired.

(On request of Mr. ERTEL and by unanimous consent, Mr. RAILSBACK was allowed to proceed for 2 additional minutes.)

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, I know the gentleman from Illinois (Mr. RAILSBACK) addressed this issue; but I think he might have passed over it rather quickly in his presentation.

However, it is not true that the person who makes the decision at this point with this amendment and with this resolution is the General Services Administrator, the decision as to whether or not rescissions are valid and whether or not ratifications are valid? That person is a political appointee of the United States, whom we have no control over, and he makes the final decision as to whether or not the amendment has been ratified; is that not correct?

Mr. RAILSBACK. That is correct.

Let me recite what the General Services Administrator testified to over in the Senate. He did not say that he would refer it to Congress for a final resolution. He said that was one of his options. What the General Services Administrator did was set forth three or four additional options, one of which was he could simply bang the gavel and say that we have received three-fourths of the notices of ratification and that is it, without regard to the notices of rescission. I think that is very dangerous. I think we ought to reclaim that power.

Mr. ERTEL. If the gentleman will yield again on the same point, is his determination under the existing case law reviewable in the courts at all? I cite the gentleman the case of Leser against Garnett decided by the Supreme Court, which says: "and being certified to by his proclamation, is conclusive upon the courts."

Does that mean if he honors a rescission, that is conclusive; if he fails to honor, that is conclusive; and there is no appeal to the courts? Is that the way the gentleman interprets it?

Mr. RAILSBACK. That is exactly the holding in the Leser case, and that is what is giving so many of us cause for concern. We are not sure Congress can ever express itself.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Ms. HOLTZMAN, and by unanimous consent, Mr. RAILSBACK was allowed to proceed for 4 additional minutes.)

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentlewoman from New York.

Ms. HOLTZMAN. I thank the gentleman for yielding.

I think the gentleman has raised a point that has troubled some people, and I would like to clarify it. I think the gentleman is well aware that when the 14th amendment was ratified. what happened was that the Secretary of State made a list of all of the States that had ratified, including a list of the States that had rescinded, and wrote Congress a rather lengthy letter setting forth the facts.

Mr. RAILSBACK. Yes. Might I just say that he did that gratuitously and voluntarily, without any statutory requirement at all. He had the good judgment to do that.

Ms. HOLTZMAN. Will the gentleman yield further?

Mr. RAILSBACK. I yield to the gentlewoman.

Ms. HOLTZMAN. And he wrote a letter to the Congress, and the Congress then made a determination by concurrent vote both in the House and Senate that the 14th amendment was ratified, rejecting the rescission.

Mr. RAILSBACK. Yes. Congress made that determination. But what really bothers me is that that Secretary of State had the good judgment to submit it to Congress. He did it voluntarily and gratuitously, and I am very much worried about what this General Services Administrator would do in the absence of some direction.

Ms. HOLTZMAN. Will the gentleman yield again?

Mr. RAILSBACK. Yes.

Ms. HOLTZMAN. The gentleman is aware, of course, that the statute under which the Secretary of State operated when the 14th amendment was adopted was a statute that was first put into effect in 1818 and has remained continuously in effect—up to the present time—exactly the same, with exactly the same words except for the fact that the powers granted to the Secretary of State are now granted to the General Services Administrator?

Mr. RAILSBACK. I believe the gentlewoman is right, but if she had a chance to redraft that statute after reading it, would she not want to make it much clearer than it is?

Ms. HOLTZMAN. I would just ask the gentleman, in view of the fact that the Secretary of State on the Fourteenth Amendment operated under exactly the same statute that the General Services Administrator is acting under, in view of the fact that the Congress gave powers to the General Services Administrator, Congress saying, "We do not mean in any way to change the way in which this statute is to be interpreted," in view of all this is it not clear that the GSA Administration must report any controverted ratifications to Congress before validating them?

Mr. RAILSBACK. In my opinion, the gentlewoman's conclusion there is not correct. I think all that I ask is let the Members of the House read that General Services Administration statute. I hope one of our Members gets up and reads it. It is a very short thing that does not even make it clear exactly when there is going to be a pronouncement.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. I thank the gentleman for yielding.

I will read the statute. This is title I, section 106b:

> Whenever official notice is received at the General Services Administration that any amendment proposed to the Constitution of the United States has been adopted, according to the provisions of the Constitution, the Administrator of General Services shall forthwith cause the amendment to be published, with his certificate, specifying the States by which the same may have been adopted, and that the same has become valid, to all intents and purposes, as a part of the Constitution of the United States. Added Oct. 31, 1951, c. 655, § 2(b), 65 Stat. 710.

Mr. RAILSBACK. That is the only direction at all, without any reference to Congress. So what many of us are worried about, and the reason for that second part of our amendment which we think is most important, is to make it very clear that we want Congress to have an ultimate say, particularly in light of where there may be rescissions there may be some very difficult unanswered questions.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Virginia.

Mr. BUTLER. Mr. Chairman, apropos of that, I am sure the gentleman is aware that the GSA representatives testified in the Senate Committee on the Judiciary that this statute gave them four options; once 38 States ratified, only one of these options was in reference to the Congress for determination. Basically, it gave a unilateral right to decide whether ratification was valid. If they needed assistance, they could consult the Department of Justice.

Also, the gentleman is aware that Professor Van Alstyne in his testimony before us also commented on this.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. RAILSBACK) has expired.

(At the request of Mr. BUTLER, and by unanimous consent, Mr. RAILSBACK was allowed to proceed for 1 additional minute.)

Mr. BUTLER. Mr. Chairman, if the gentleman will yield further, Professor Van Alstyne said:

> It is technically within the unilateral authority of the Administrator of General Services to make the decision to report or not to the Congress.

Mr. RAILSBACK. That is what bothers many of us. We do not think Congress even has the power to act unless the GSA Administrator gratuitously gives it to us.

Mr. BUTLER. Mr. Chairman, if the gentleman will yield further, apropos of the 14th amendment, I feel compelled to tell people, the only reason that they knew—this is the testimony of Professor Black—they knew the day before the proposal that Georgia had already ratified and they were voting on a moot question; so to talk about the precedent of the 14th amendment is to ignore the fact that the people knew that the rescission did not have to be considered in making their determination as to ratification.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words.

Mr. FISH. Mr. Chairman, will the gentleman yield just briefly?

Mr. SEIBERLING. I am glad to yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, I think something should be said before any time elapses from the last discussion had on the second half of the pending amendment having to do with the General Services Administration. What we have before us in House Joint Resolution 638 cannot change the basic law. We are not amending 1 U.S.C. 106. At best we are supplying by this amendment a specific exception to do this for this particular ERA and limiting it to the period of extension. We are not changing the basic thrust of 1 U.S.C. 106, as Members might infer from the debate.

Mr. SEIBERLING. Mr. Chairman, it always amazes me how my fellow lawyers can take something that is simple and make it complicated.

The amendment that has been offered by the gentleman from Illinois has two sentences in it. The first sentence is the one that the gentleman really has been pushing; namely, the provision that would expressly confirm the right of the States to rescind. The second sentence provides that the matter shall be referred to the Congress for decision.

Now, if the gentleman is concerned as to whether the GSA on its own can decide whether 38 States have ratified, then all the gentleman has to do is strike out the first sentence and leave in the second sentence of the amendment. But that is not really the thrust of the amendment. This debate about GSA is all a smokescreen.

The Supreme Court has said that Congress is the final authority for deciding whether States have ratified the Constitution after approval of an amendment by three-fourths of the States. If Congress decides that 38 States have not ratified who do you think is going to win in the argument between the Congress and the Administrator of GSA? He is merely directed in the statute to perform a ministerial function, to record whether 38 States have filed instruments of ratification.

The important point that I think we all need to remember is that, no matter what this particular Congress says about

whether States have the right to rescind, we are not the final arbiter of that question.

The original resolution did not say anything about whether the States had a right to rescind. There is no reason why the resolution for extension of time has to say anything about that question. If the States have the right to rescind, they can rescind; and if they do not, they cannot rescind. Whatever this Congrss says will have no bearing on the outcome.

It is for the Congress that sits when 38 States have filed valid instruments of ratification to decide that question, and we in this Congress cannot preempt them from making that decision.

So, Mr. Chairman, this amendment is unnecessary because this resolution, even if it is unamended, will not preempt that question. Furthermore, it will not have any effect on whether or not the Congress has the final say-so, which it has under Supreme Court decisions.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Texas.

Mr. ECKHARDT. Mr. Chairman, does the gentleman believe that a simple majority of Congress, upon the ratification of the 38 States during the total 10 years involved, can alter the determination of the Congress in 1972 that, of course, submitted the constitutional amendment in accordance with article V and which qualified the submission with an agreement within 7 years? Does the gentleman believe the majority can in any way alter what was done under article V in 1972?

Mr. SEIBERLING. Mr. Chairman, I think the answer to that is the answer that judges usually give as to hypothetical situations: Namely, that case will have to be decided at the time if it comes up in the light of all the relevant circumstances.

I think it is perfectly clear that it is the Congress that will decide whether or not 38 States have filed valid instruments of ratification. As to whether the ratification has been timely, that is another question.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield further?

Mr. SEIBERLING. I yield to the gentleman from Texas.

Mr. ECKHARDT. Mr. Chairman, that is the question I am asking the gentleman. Does the gentleman from Ohio (Mr. SEIBERLING) believe that this joint resolution would authorize the Congress or any Congress at the time of the ratification by the 38 States to in any manner alter the determination of the Congress in 1972 in submitting the amendment on a two-thirds vote, with respect to the limitation of time?

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(On request of Mr. ECKHARDT, and by unanimous consent, Mr. SEIBERLING was allowed to proceed for 2 additional minutes.)

Mr. SEIBERLING. Mr. Chairman, I can only answer that question by saying that if this Congress does not extend the time beyond the 7 years and if after the 7 years expired, but not before, 38 States should have filed instruments of ratification, I would think that that Congress would have a serious dilemma in terms of the comity that ought to exist within the Union. But that is not the issue that is presented to us by this resolution, and, therefore, I do not see the relevance of it to this question.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I will be glad to yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, would the gentleman tell me how he interprets this section, section 106b, amendments to the Constitution, which states:

"* * * the Administrator of General Services shall forthwith cause the amendment to be published, with his certificate, specifying the States by which the same may have been adopted, and that the same has become valid * * *?

If the gentleman says that the Congress has the right to determine validity, then why did we give that right back to the General Services Administrator?

Mr. SEIBERLING. For the simple reason that the Congress, if it decided that the amendment had not become valid, would preempt any action by the General Services Administrator. That is the simple answer.

Mr. ERTEL. Mr. Chairman, will the gentleman yield further?

Mr. SEIBERLING. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, if that is true, once it has become valid and signed by the General Services Administrator, we can then appeal an amendment which has become valid by a concurrent resolution of the Congress?

Mr. SEIBERLING. Mr. Chairman, I do not construe that statute as saying that the Administrator has the authority to make that final decision. He merely records whether or not there has been a filing of instruments of ratification by three-fourths of the States. Whether that constitutes a valid ratification is a matter that the Congress sitting at that time, and only the Congress, can decide.

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentlewoman from New York.

Ms. HOLTZMAN. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I would like to point out that the gentleman from Pennsylvania (Mr. ERTEL) read only the latter part of the statute to which he was referring.

Mr. SEIBERLING. I was going to point that out myself.

Ms. HOLTZMAN. Mr. Chairman, the first part of the statute says this:

When ever official notice is received at the General Services Administration that any amendment proposed to the Constitution of the United States has been adopted, according to the provisions of the Constitution * * *

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

(On request of Ms. HOLTZMAN, and by unanimous consent, Mr. SEIBERLING was allowed to proceed for 1 additional minute.)

Ms. HOLTZMAN. Mr. Chairman, if the gentleman will yield further, I think if the 14th amendment is any precedent, then it is perfectly clear that this matter will be submitted to the Congress for decision, and indeed, under the very language of section 106, unless an amendment to the Constitution has been adopted in accordance with the provisions of the Constitution, the GSA Administrator has absolutely no power.

Mr. SEIBERLING. The gentlewoman is exactly right. That statute merely directs him to perform the ministerial function of certifying whether or not the necessary number of instruments of ratification have been filed.

Ms. HOLTZMAN. Mr. Chairman, will the gentleman yield further?

Mr. SEIBERLING. I yield to the gentlewoman from New York.

Ms. HOLTZMAN. Mr. Chairman, I think this debate has been important on the discussion of this issue, but with regard to the GSA Administrator, I believe it is an absolute smokescreen. The real issue is whether the Congress, in violation of all its precedents and of all its history, is going to allow this issue.

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from California.

Mr. EDWARDS of California. Mr. Chairman, I would just like to emphasize what the gentlewoman from New York (Ms. HOLTZMAN) has said. This issue is a smokescreen. This is a very bad amendment, it has no validity to it, and I think it ought to be totally ignored.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. SEIBERLING) has expired.

Mr. EDWARDS of California. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I am really amazed that there are several fundamental misconceptions about the amendment offered by the gentleman from Illinois (Mr. RAILSBACK) that have been accepted so readily by too many Members of this body.

Let me just make several points. This bill does not forbid State legislatures from passing resolutions of rescission. State legislatures are going to do that, like they have in the past, on perhaps this constitutional amendment and on future constitutional amendments. This resolution that we have before us today has nothing to do with whether or not they are going to pass them.

This legislation before us today does not legitimatize rescissions passed by any States. And I assure the Members that the amendments offered by the gentleman from Illinois (Mr. RAILSBACK) does not legitimatize rescissions passed by the States. The gentleman from Illinois does not make that claim. It has no effect on them whatsoever. The gentleman from Illinois (Mr. RAILSBACK) recognizes that, I am sure.

Regardless of anything we have heard

or read, this amendment will not make effective these rescissions.

Ratification is provided for an article V of the U.S. Constitution—ratification of constitutional amendments. Any rescission amendment would modify the ratification process. And it is very clear that any law changing the ratification process in article V would have to be by constitutional amendment. It cannot be by statute.

Not one witness before the Committee on the Judiciary said any differently than what I just said to the Members. I have heard to the contrary, but I will accept any statement from any witness where they said that that could possibly be the law.

This is not to say that rescissions, as they are presently enacted by State legislatures from time to time, have no possible effect whatsoever. They do have some effect. When it is time—we have talked a lot about this—for Congress to decide if ratification is valid—and I assure the Members that Congress will always make that decision when there are controversial constitutional amendments such as ERA—then pursuant to the law as established in Coleman versus Miller, the Supreme Court case, the fact of any rescission, together with all other relevant facts, political, legal, and historical, will be taken into account by a future Congress when it makes a decision as to whether or not the amendment is validly ratified.

The last and perhaps the most important point I would like to make is this: We could win this resolution much easier, I am sure, if the amendment offered by the gentleman from Illinois (Mr. RAILSBACK) were accepted or won. There is no doubt about that. It would make it more attractive to a number of people who have doubts today. However, I must point out that the sponsors of this resolution would consider it a defeat, a total defeat. With the Railsback amendment added, there is no bill.

You might ask me why, when I have just told you that it does not authorize or make effective State rescission—because it does not—then why am I making such a fuss about it, why are we all making such a fuss about it? The answer is that the constitutionally established process in use in this country for the last 200 years for amending our Constitution would be sorely damaged. And that is more important than anything else to us. That is what the Railsback amendment would do. The message would immediately go out to 50 State legislatures. Here is what the message would say: Congress says that ratification can be conditional. It is not a serious matter. You can just pass ratifications lightly because next year you can rescind, which you cannot do now.

It would make every statehouse in the Nation a battleground at every session, and we do not desire that; not just for the ratification of ERA or anything else. That is why the Railsback amendment cannot be accepted, not only for the ERA amendment, but for every constitutional amendment in the future that we are passing down to our children and grandchildren.

Mr. Chairman, I urge a no vote on the Railsback proposition.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. LEVITAS and by unanimous consent, Mr. EDWARDS of California was allowed to proceed for 2 additional minutes.)

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, on that last point, because that is the question I was going to ask the gentleman, is there not a distinction between this situation and other situations both before and after, because in this situation as compared to others, there is an unprecedented request to the Congress that an additional period for ratification be provided, and the Railsback proposal would apply only where an extension of time is requested, not where no extension is sought or exists.

Mr. EDWARDS of California. It would still have to be done by constitutional amendment. Congress has no power by statute to modify the ratification process.

Mr. LEVITAS. But if you believe that Congress has no power to provide for recission, then in other words it would be a nullity for Congress to attempt to do so. Then, why is it so mischievous? The worst case is that a court would hold this to be an ineffective attempt at the exercise of this power. Nothing would be lost. Without the Railsback amendment we will never know whether Congress has this power. There must be something else involved, or else the gentleman in the well, whom I respect so greatly, would not be so concerned about this if this amendment is a nullity. What is the big question? What is the unstated concern that is so great?

Mr. EDWARDS of California. It is not a nullity, as I explained. It would cause dissension and anarchy in every statehouse in the country because they listen to what we say.

Mr. McCLORY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think that the gentleman from California has really laid it out when he has referred to the fact that every State will be a battleground if the subject of rescission is brought into this debate. And yet, the subject of rescission is brought into this debate, because as the gentleman from Ohio, (Mr. SEIBERLING) has set it forth clearly when he said that whether the Railsback amendment is adopted or not, the subject of rescission is going to be before the States.

So, it seems to me that what we are doing with this extension resolution is to open the door for a debate throughout the 50 States on the subject of ratification and the subject of rescission or rejection. The gentleman from California (Mr. EDWARDS) said, in effect, "We don't want them (the States) to have the opportunity to reject. We only want them to have the opportunity to ratify."

Well, it is true that article V only talks about ratification, and I think it appropriately does so. So, the cases hold that we can have ratification after rejection. In proposed legislation for the conduct of a constitutional convention if a sufficient number of States compel us to have a national convention for amendment of the Constitution, it is provided in that proposal that has already passed the Senate in 1973 that we should put in the law and provide the opportunity for rescission.

So, this is a very live subject which we have here today before us. If we want to provide fairness, which is inherent in the issue here, are we going to be fair in connection with this extension? It seems to me that fairness might dictate that we should provide an opportunity to take action one way or the other during this time of resubmission of the equal rights amendment. However, I fear we will be departing dangerously from the intent of article V—the amendatory article of the Constitution—if we are to condone rescission—once an act of ratification has taken place.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, I would just like to say I am not sure the gentleman correctly understood the point I was making. My point is that we do not need to provide for the right of rescission in this resolution because that right either exists or does not exist, independently of anything that we do on this resolution.

Mr. McCLORY. Right. I am not disagreeing with the gentleman at all, and I think especially that with respect to those States that have attempted rescission, their attempt up to the present time is invalid. But during this proposed extension of time I think we can say—under a doctrine of fairness—that their rescissions might be held to be valid and effective.

Mr. COHEN. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Maine.

Mr. COHEN. As I understand the gentleman's comment, it is that while he is opposed to an extension of the period for the ERA, he is clearly opposed to any provision for rescission.

Mr. McCLORY. I am opposed to writing it into the amendment, right, but I do not want to say that the right to rescind is not present during this proposed extended period of time, and I think that is one of the dangers that exist in this extension. I think we are opening the door to rescission, for all kinds of litigation and all kinds of questions we should not be presenting to the courts or to future Congresses or to the American people. We should not be opening up these 50-State battlegrounds that have been referred to and that have already been delineated during the course of this debate.

Ms. HOLTZMAN. Mr. Chairman, I move to strike the last word and I rise in opposition to the amendment.

Mr. Chairman, I strongly oppose the amendment that would permit recissions. I do so for a number of reasons.

In the first place, I think that we need to understand that we have never in our country's history, starting from the very

day that the Constitution was ratified, recognized a right to rescind or validate any recissions. If we adopt the Railsback amendment we will be thumbing our nose at 200 years of our country's constitutional history.

Secondly, we will be thumbing our nose at the Constitution. There are many authorities that state that rescission is not a power that can be exercised constitutionally by States. The Justice Department has reiterated this position. We have all received a letter to that effect. We would be thumbing our nose at the Constitution to adopt this amendment.

Finally, we would be thumbing our nose at some very important policy considerations that lie behind the refusal of our country in its past history to recognize those recissions. Some of those policy considerations have been enumerated, but we need to understand them clearly.

If we allow recission now, we will be allowing it for all time. Just like the original 7-year period that was adopted to the 18th amendment. That 7-year period was accepted mindlessly at that time and it has been followed mindlessly with one exception ever since.

What does that mean? It means on every single constitutional amendment we will have there will be a question whether to ratify, and after it has been ratified whether to rescind; and whether after it has been rescinded it should be ratified, and whether after it has been ratified it should be rescinded.

We are opening up our constitutional procedures to absolute chaos. I think that would be a grave mistake. The fact that no one in our past history has recognized the right to rescind suggests that our predecessors thought it would be a grave mistake too.

The second thing we will be doing, if we permit rescissions, is to allow the State legislators to adopt amendments to the Constitution too lightly. Legislators should not be able to say: "I am up for election this year. Here we have an amendment doing away, for example, with the fifth amendment to the Constitution and I can vote for it, and it will be good for my election, and some other year our State legislature or some other State legislature will bail me out."

We should not permit our constitutional processes to be lightly used—ever. I think that would be the result.

Finally, this amendment is not timely. It does not bind another Congress actions with regard to rescissions. It is purely advisory. In fact it is purely illusory.

What I am saying to you is, if you adopt the Railsback amendment you will be doing something that not only is not binding, and you will be doing something that not only is just advisory, but you will be standing precedents on their head. You will be doing something that has serious constitutional questions attached to it. You will be doing something that has a bad policy implication for the future and will create grave problems for our constitutional process.

I urge the Members to consider that this is an issue that goes beyond the equal rights amendment, this affects our constitutional amendment process. So I urge you to defeat the Railsback amendment.

Mr. VOLKMER. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, at this time I do not want to discuss basically the question of the properness of the Railsback amendment. I basically agree with the gentlewoman on that, but, on the other hand, let us take extension as it presently is without the Railsback amendment, to use the gentlewoman's own words, really, it is not binding on a later Congress, and is it not basically advisory to a later Congress?

Ms. HOLTZMAN. No, I do not agree. I think there is substantial authority that says once you send a constitutional amendment to the States, you cannot withdraw it.

Mr. VOLKMER. I agree with that.

Ms. HOLTZMAN. But I also would like to say that the argument that this is a one-way street is absolutely fallacious. It is not a one-way street in the unratified States; they can vote to ratify or not to ratify. It is not a one-way street; it is a two-way street. What the Railsback amendment does would make it a 100-way street with everybody running around in all different directions.

Mr. SEIBERLING. Mr. Chairman, will the gentlewoman yield?

Ms. HOLTZMAN. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, I think the gentlewoman from New York (Ms. HOLTZMAN) has made an extremely persuasive argument.

The CHAIRMAN. The time of the gentlewoman has expired.

(On request of Mr. SEIBERLING, and by unanimous consent, Ms. HOLTZMAN was allowed to proceed for 1 additional minute.)

Mr. SEIBERLING. I repeat, I believe the gentlewoman from New York (Ms. HOLTZMAN) has made an extremely persuasive argument as to why the rescission portion is a very bad constitutional doctrine. I believe the weight of the authority is totally on her side. But I think that even if it is bad, and even if subsequent Congresses choose to ignore rescission, this amendment is an invitation to all of the parties involved to start the process all over again in every State and that it will cause turmoil and uproar for really the next 3 years if the States have the right to rescission, then nothing in this resolution prohibits them from exercising that right. It seems to me we should not extend an invitation to all of them to start down that path because to do it would mean we certainly are making a mockery of the amending process.

Ms. HOLTZMAN. I thank the gentleman from Ohio (Mr. SEIBERLING) for his remarks.

The Railsback amendment is an invitation to chaos.

I yield back the balance of my time.

Mr. EDWARDS of California. Mr. Chairman, as chairman of the Subcommittee on Civil and Constitutional Rights of the Committee on the Judiciary, I share a definite respect for the right of free speech, and I have no wish at any time to cut debate or to limit it. However, Mr. Chairman, I wonder if we could have some sort of happy agreement on how much longer we will debate this particular amendment? I might add that the 5 minutes allotted to each speaker are running into 10 and 12 minutes, and we would like to finish this and get on with the budget resolution.

The CHAIRMAN. The Chair will state that insofar as the extension of the 5 minutes to 10 or 12 minutes is concerned, that is up to the Members and they can stop it if they wish to do so.

Mr. WIGGINS. Mr. Chairman, I move to strike the requisite number of words.

Mr. EDWARDS of California. Mr. Chairman, would the gentleman yield for a unanimous-consent request?

Mr. WIGGINS. I yield to the gentleman from California.

Mr. EDWARDS of California. Mr. Chairman, I would inquire of the Members whether there would be a disagreement on another hour of debate? If not, I would ask unanimous consent that we do so.

The CHAIRMAN. The Chair would inquire, is it the request of the gentleman from California (Mr. EDWARDS) that all debate on this amendment and all amendments thereto cease in 1 hour?

Mr. EDWARDS of California. Let us make it 5 o'clock.

Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto close at 5 o'clock.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. BUTLER. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The gentleman from California (Mr. WIGGINS) is recognized for 5 minutes.

Mr. WIGGINS. Mr. Chairman, a few moments ago my distinguished subcommittee chairman, the gentleman from California (Mr. EDWARDS) said that the constitutional submission to the States could not be altered save by a constitutional amendment.

Well, then, what in the world is this all about? What is this resolution all about except to alter the terms of a constitutional amendment previously submitted to the States?

Rather than doing it by two-thirds, which I believe is clearly indicated, we propose to do it by a simple majority. Mr. EDWARDS' arguments demonstrates the impropriety of the vote by which this measure may be approved.

Mr. Chairman, rescission goes to two issues: Power and propriety.

Let us not take long in discussing propriety. My goodness, what could be fairer than to give States an opportunity to vote either yes or no? What could be fairer than that?

The opponents of rescission say, "But that will invite the States to vote no."

If this resolution is adopted, surely we are going to invite those 15 States to vote aye. Why not send an equal message: "Yes or no, up or down, take your choice."

Let the people establish a consensus, not lock 35 States in artificially. That is precisely, of course, what the opponents of rescission hope to do.

No, Mr. Chairman, it should not take us long to decide the issue of propriety. Propriety mandates that we authorize and encourage rescissions if that be the will of the people.

But what of power? It has been suggested here that Congress lacks the power. Basically, according to the argument Congress has no constitutional power to authorize or consider a rescission, because article V speaks only in terms of ratification, and rescission is not ratification. Professor Black calls that a trivial argument, and Professor Emerson agrees with him. I think I would be less kind. That argument is without substance.

Of course, constitutional powers are stated affirmatively. But that is not to say that Congress may not act negatively. We have the power to regulate commerce, but who would say that it would be beyond the constitutional power of Congress to deregulate? That is not a sensible argument.

The second argument proceeds from a letter written by Madison to Mr. Hamilton on the occasion of the debate surrounding the ratification of the Constitution itself, and more particularly, the debate in the State of New York.

Hamilton wrote Madison a letter, and he asked him whether or not New York could attach an express condition to their ratification. Madison replied, in substance, "I have but a moment to consider the issue, but it seems to me no."

Mr. Chairman, I agree with him. Of course, States may not attach conditions to their ratification.

That simple expression in a letter from Madison has been elevated, exalted to a claimed principle that the right to vote "no" is a condition.

That is foolishness. There is no constitutional prohibition against a rescission.

Mr. Chairman, I suppose, in the final analysis, that the States can do what they please. The question is whether we count their vote.

I do not believe for one moment that a future Congress, by adopting a concurrent resolution by a simple majority, could overturn a decision of three-fourths of the States. If Coleman stands for that, it is not good law. It is inconsistent with constitutional principles.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Texas.

Mr. ECKHARDT. Mr. Chairman, as I read the amendment, the amendment only provides that those States which had agreed during the 7 years may rescind. If we took no action, they would automatically have rescinded because the time would run out.

If there is authority to extend the time, there is certainly authority to extend the time without permitting those States to be held to their ratification without the opportunity to rescind during the extended period.

The CHAIRMAN. The time of the gentleman from California (Mr. WIGGINS) has expired.

(On request of Mr. VOLKMER and by unanimous consent, Mr. WIGGINS was allowed to proceed for 2 additional minutes.)

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Missouri.

Mr. VOLKMER. Does the gentleman agree with me that the joint resolution as presented, if passed with a majority vote, and not to be signed by the President, has no binding effect on a later Congress?

Mr. WIGGINS. No, it would have no effect at all after January. Strangely, the operative effect is to take place after March of next year.

Mr. VOLKMER. After March, and it is purely advisory in nature; is that correct?

Mr. WIGGINS. Advisory, indeed. Any State that purports to ratify on the authority of this resolution will do so at its own peril.

Mr. VOLKMER. I thank the gentleman very much.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. I thank the gentleman for yielding. The gentleman is a noted attorney, and I know he is returning to the practice of law. But I am concerned about some procedural aspects of this.

Let us assume for a moment that 37 of the States ratified, and 4 have rescinded, and there is no declaration by this Congress as to rescission, and this is down the road in the extension period. Does a lawsuit lie, and could an injunction be gotten against the General Services Administrator to enjoin his proclamation that the 38 states would have in fact ratified and could that be appealed all the way to the Supreme Court, and could that in fact delay and tie up this constitutional amendment for a substantial period of time with litigation in the courts, and we would not know where we stood?

Mr. WIGGINS. Of course, it could. Coleman against Miller discussed the issue of standing and found that the legislators of the Legislature of Kansas had standing to sue and did in fact, seeking an injunction preventing a proclamation of that State's purported ratification to the Congress. So there is no question of standing. The issue rather is the political question doctrine as applicable to rescissions, and I do not think the political question doctrine applies to rescission.

Mr. ERTEL. My final question is, Does not the amendment offered by the gentleman from Illinois (Mr. RAILSBACK) and myself clarify this since the General Services Administrator merely sends it over here to the Congress and we make the decision, and we cannot be enjoined, and we will have definiteness when this amendment is finally agreed to?

Mr. WIGGINS. The gentleman is absolutely right. Whenever we think about rescission, the last sentence of the amendment is imperative.

Mr. ERTEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment. I have already made my statement that I am a supporter of the equal rights amendment, and I am a supporter of the extension. But rather than spend a great deal of time, I have heard this amendment discussed, chewed up, and misinterpreted here on the floor, and I would like to go through it to make sure that we know exactly what this amendment provides.

I would like the author or the coauthor of this amendment to clarify or correct anything I say about the amendment and what it purports to do. I would like to take the first sentence of the amendment:

Provided, however, That any legislature which shall have ratified the article of amendment within the first seven years of this period may, by the same vote and procedure required for ratification, rescind that action at any time after this resolution becomes effective and prior to adoption of the amendment.

It is my interpretation of that that by implication it invalidates any rescissions which would have been passed prior to the expiration of the initial 7-year period; is that correct?

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Illinois.

Mr. RAILSBACK. I thank the gentleman for yielding.

It would be my answer that it does not expressly invalidate nor does it expressly validate. What it is meant to do is deal with the extension period specially prospectively. It is not meant to set any kind of a precedent at all in regards to future constitutional amendments.

The issue of extension is brand new. We are talking about tinkering with the legislative process. the constitutional process. We have never before had an extension. I want to make that point.

Mr. ERTEL. What the gentleman is saying is that it does nothing to the rescissions which have already been passed.

Mr. RAILSBECK. Yes, if I can tell the gentleman how I feel personally about it, if I were asked to vote on validating one of those previous rescissions that occurred within the initial 7-year ratification period, I would vote not to recognize those rescissions. What I am saying here is it is a matter of fairness. Where we are going to have a prospective extension, at least let us let all of the States participate so that we have contemporaneous approval.

Mr. ERTEL. I thank the gentleman.

Mr. BUTLER. Mr. Chairman, will the gentleman yield on that point?

Mr. ERTEL. If I may for just a moment finish with the gentleman from Illinois. I will be glad to yield to the gentleman from Virginia. I have some more questions I want to clarify so everybody understands the amendments and perhaps the definition and terminology. During the 3-year extension period does the amendment mean that if a State rescinds or attempts to rescind, that that is valid, or does it mean that this is merely a procedure by which they have

to abide so that the Congress in the final determination will determine whether that rescission in valid or invalid?

Mr. RAILSBACK. Yes; if the gentleman will yield further, that is the intent and the gentleman is correct.

Mr. ERTEL. In other words, this does not validate future rescissions, but sets up a procedure which should be followed, have definiteness in form, and then it comes back to the Congress in 1982, or some earlier period of time.

Mr. RAILSBACK. I may disagree on that. I think that what the gentleman is saying is that it is the direction of this Congress provided by us by way of this amendment to a future Congress that at the time we granted an unprecedented extension, the first time we have had an extension, and by a majority vote, which also troubles me some, that we are providing an opportunity for States that may have ratified; namely, the 38 States that ratified, we are giving them a chance to rescind.

In that case, if I were a sitting Member of Congress when it came to final determination, I would vote to ratify those States that came within the extension period.

Mr. ERTEL. It is a directive, is it not?

Mr. RAILSBACK. It is more a directive, more a procedure, not much different than the unprecedented extension. It is not meant to set any kind of precedent that says from now on we are going to have recessions. It does not do that. It deals with the extension period only.

Mr. ERTEL. There is one thing definite in the amendment, that is the final decision is made by the Congress whether the amendment is adopted, that it gives to a future Congress the absolute authority to certify and to indicate whether that amendment has been adopted; is that correct?

Mr. RAILSBACK. The gentleman is correct and that is accurate and important with the first part of the amendment.

Mr. ERTEL. Does that not overrule the statutory section, "Amendments to the Constitution," section 106–B, which says "that the General Services Administrator, specifying the States by which the same may have been adopted, and that the same has become valid."

Does that not overrule it?

Mr. RAILSBACK. Yes, it does, with respect to the extension period.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. ERTEL) has expired.

(By unanimous consent, Mr. ERTEL was allowed to proceed for 2 additional minutes.)

Mr. ERTEL. Mr. Chairman, I yield to the gentleman from Illinois.

Mr. RAILSBACK. The answer is "Yes," during this extension period. We are dealing with an extension period.

Mr. ERTEL. Mr. Chairman, one final question. This amendment requires the Administrator of the General Services Administration to certify to Congress each and every time he gets a ratification or rescission from the States.

Assuming for the record we had 38 ratifications and 4 rescissions, would the Congress then make a determination whether the rescissions were valid at the time they get the 38 ratifications?

Mr. RAILSBACK. Yes, if they got 39 and 4 and so on. This could come up periodically for review whenever somebody had this ratification for the Congress.

Mr. ERTEL. And that means you could go forward with the amendment?

Mr. RAILSBACK. Yes.

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Chairman. I am not certain this colloquy clarifies the question on the rescission aspect of this amendment.

The question I would ask is in respect to including the phrase, "granting the right to rescind" during the extended period of time. Is that meant to assure the States that would take rescinding action a reasonable assurance would exist that their action would be affirmed or should be affirmed by a future Congress?

Mr. ERTEL. I do not believe we can legally bind a future Congress. Therefore, we are trying to give them the direction in which to go, with the reasonable assurance that this Congress in the future would abide by previous Congresses; but we cannot absolutely do that, because we cannot bind them to a final determination by the Congress at the time.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Mr. Chairman, I think the gentleman is correct. By the same token, I do not believe we can bind a future Congress with an extension that it may decide to repeal, and that is what we are talking about.

Mr. ERTEL. Mr. Chairman, I would agree with the gentleman.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. ERTEL) has again expired.

(At the request of Mr. GARY A. MYERS, and by unanimous consent, Mr. ERTEL was allowed to proceed for 1 additional minute.)

Mr. GARY A. MYERS. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman.

Mr. GARY A. MYERS. Mr. Chairman, since there is a considerable doubt on what the effect of this whole process will be, whether it is binding in any resolution on a future Congress, whether during extension, ratification, or rescission, is it not quite possible that some of these questions will find themselves in the courts and that by providing the express intent of this Congress in the passage of an extended period, that a court could use that as a basis for deciding for or against States action during the period of time?

Mr. ERTEL. I do not agree with the gentleman. The courts cannot do what they want. They act based on the law and they are supposed to interpret the law; but this amendment says Congress will have the final determination, and that means no review in the court and that we will finally determine the amendment process.

Just as the courts have said previously, the General Services Administrator is the final determiner, and there is no appeal. So too will this amendment make the Congress.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. ERTEL) has expired.

(On request of Mr. GARY A. MYERS, and by unanimous consent, Mr. ERTEL was allowed to proceed for 1 additional minute.)

Mr. GARY A. MYERS. Mr. Chairman, if the gentleman will yield further, with respect to our action specifically stating that rescission is a right of the State, would that not be considered as final congressional action?

Mr. ERTEL. It could be if we said that. We have not said that.

Mr. GARY A. MYERS. That could be considered and would in fact be a condition of this extension with this amendment?

Mr. ERTEL. Yes, but we have not done that.

Mr. Chairman, if I may reclaim my time, all this amendment does is it sets up a procedure by which the States get some sort of certainty, and, second, it returns to the Congress the final determination. We are not leaving it up to the Supreme Court and we are not leaving it up to a political appointee, the General Services Administrator, to make our decisions for us.

Mr. Chairman, I think this amendment should be agreed to, and this should once and for all clarify the process. I think those who are supporters of the equal rights amendment should support this amendment, because otherwise they could wind up in the court system, and we would never know whether we have an equal rights amendment or not, even if we get 38 States to ratify it.

Mr. FISH. Mr. Chairman, I move to strike the requisite number of words.

Mr. COHEN. Mr. Chairman, will the gentleman yield?

Mr. FISH. I am happy to yield to the gentleman from Maine.

Mr. COHEN. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, there has been a great deal of discussion here on the dichotomy between power and policy, and I think the majority of this House recognizes that Congress does indeed have the power to extend the time period for ratification. The question now becomes one of policy as far as the question of extension and rescission is concerned.

Several Members have stated that four out of seven professors testified that Congress has the constitutional power to grant to the States the right to rescind. They fail to mention that four out of those seven are opposed to Congress adopting a policy of allowing rescission.

I would like to indicate for the RECORD, for example, that Professor Tribe of Harvard has specifically asked the record to show he does not want to be cited as being in favor of rescission or as being prorescission.

Professor Emerson had this to say:

When Congress comes to determine whether the requisite number of States have

ratified, the issue of rescission will be presented. The matter will be decided on the basis of the situation as it then exists. That decision need not, indeed cannot, be made at this time. * * * Congressional action at this time is superfluous.

Professor Ginsburg said as follows:

As I see it, the rescission issue is not ripe for disposition at this time. It would be premature for this Congress to address the question of rescission.

Professor Van Alstyne has said this:

May I * * * urge, as a professional matter, that Congress do nothing to intimate to the States that they generally possess a power to rescind. I think that profoundly ill-advised constitutional policy * * * No State ought to consider an amendment to the Constitution under the misimpression from this body that it may do it with some sort of celerity or spontaneity. * * * I would hope that you, as responsible Members of Congress, would vigorously oppose it.

Mr. Chairman, I thank the gentleman for yielding.

Mr. FISH. Mr. Chairman, I thank the gentleman from Maine (Mr. COHEN).

Mr. Chairman, the Congress is urged by this amendment to couple rescission with extension. I maintain that these are totally distinct and separate issues, that it would be improper and misleading for us to join them, and that it would be a major break with our past.

There is a profound difference. With respect to extension, we are breaking new ground. The Supreme Court has laid out objective guidelines for Congress to consider in determining a reasonable time for ratification, but admittedly we have no precedent precisely on point.

In the case of rescission, however, there are 190 years of legal and historical precedent, and this is precisely the distinction the proponents of the amendment fail to see. Today we are being asked to reverse this settled rule and, still worse, to do it selectively.

What are the precedents? The 40th Congress, by a simple majority vote, disallowed rescissions with regard to the 14th amendment.

Acting on that precedent, secretaries of state counted ratifications and disallowed rescissions when promulgating the ratification of the 15th, 16th, 18th, and 19th amendments.

Years later, the Supreme Court in Coleman against Miller had the occasion to recount the history surrounding the action taken by the 40th Congress and noted with approval their action respecting congressional nonrecognition of rescission. In that opinion, the Court said:

We think that in accordance with this historic precedent the question of the efficacy of ratification by State legislatures, in the light of previous rejection or attempted withdrawal, should be regarded as a political question pertaining to the political departments, with the ultimate authority in the Congress in the exercise of its control over the promulgation of the adoption of the amendment. (At 450.)

This is the most specific language we have on this point.

"The question of the efficacy of ratification," the court tells us, belongs "with the ultimate authority in the Congress" And at what point? "In the exercise of its control over the promulgation of the adoption of the amendment."

In other words, the appropriate time to deal with the efficacy of ratifications, the States' previous rejections or attempted withdrawals, is not before us in 1978.

It is a question the Congress considers at the time the ratification by the necessary three-fourths of the States occurs. Whatever Congress that is, it is not this one. Any decision with regard to rescission made prior to that time is premature, not binding and constitutes a serious break with precedent.

This Congress should know what it is being asked to do. We are being asked to couple with extension an invitation to rescind that reverses 190 years of constitutional practice. We are being asked to do so only for this proposed amendment and only during its period of extension.

The CHAIRMAN. The time of the gentleman from New York (Mr. FISH) has expired.

(By unanimous consent, Mr. FISH was allowed to proceed for 2 additional minutes.)

Mr. FISH. Mr. Chairman, while this amendment appears as some reasonable political compromise, that is precisely its vice. Congress is being asked to announce for itself that it has the power to pick and choose which rescissions, and thus which ratifications, are valid.

It would be far wiser to act under orderly procedures, if we wish to consider departing from such settled precedent. The proper course would be to embrace some neutral principles of rescission of which we can be proud. That cannot be accomplished under House Joint Resolution 638.

Mr. DRINAN. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Massachusetts.

Mr. DRINAN. I thank the gentleman for yielding, and I want to associate myself with the gentleman's remarks and commend him for it. It is one of the finest presentations here this afternoon, and I do hope that this view will prevail in this body. I thank the gentleman for his statement.

Mr. FISH. Mr. Chairman, I really appreciate that statement coming from one of the foremost scholars in the House in the field of law.

Mr. Chairman, as the hour of the day grows late, it may well be time to inject a less serious note in the deliberations. My good friend, the gentleman from California, the speaker, a minute or so ago alluded to the so-called Madison principle and tried to minimize its importance. I am willing to accept that if the gentleman is willing to accept the Seward-Fish principle. The 14th amendment ratification was promulgated by Secretary of State Seward, and we have heard much about that. We do not hear quite as much about Secretary of State Hamilton Fish, who was the one who, likewise, did not allow rescission in the case of the 15th amendment but promulgated the ratification. I think on that great precedent it can hardly be expected that I would accept rescission today.

Mr. VOLKMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I believe that this amendment brings out in clear detail one of the major imperfections in the joint resolution before us. I first would like to say that I agree with the gentlewoman from New York, and with the others, who have said that in their opinion that rescission, this amendment, would have no binding effect, that it would be advisory in nature. I agree with that. However, I believe it was brought out also in this debate, and I must agree also with the other statement, and that is the position of Mr. Harmon from the Department of Justice, who said that, even though we can do this by majority vote, it is not binding on a later Congress. And I agree with that. If you do it this way, it is not binding. And if it is not, then what can a later Congress do under this resolution, even without this amendment? Can a later Congress then say, 3 years from now, that there was no contemporaneous ratification by the States, when the last State ratified in 1981 along with the proposing 92d Congress in 1972? The proposal before us will do that. Does that not do violence and serious injury to our whole constitutional amendment process? I say it does. We have always had in the last 200 years constitutional amendment proposals made by Congress to the States that once made cannot be withdrawn. And I believe that is clear.

Nor can the time be reduced by Congress. Once Congress has submitted it, then that is the end of Congress as far as reducing or withdrawing or as far as saying anything about it. Yet, under this resolution a later Congress would be able to say, even without a rescission during the extended time, that there has not been contemporaneous ratification. That does injustice; that does violence to the decision of the Supreme Court in the case of Dillon vs. Gloss.

In that case, the Supreme Court said that an amendment to our Constitution takes place at the time that the 38th State, or the State which constitutes three-fourths of the total, the last State, actually ratifies it; not when the Administrator of GSA says it has been done. The Administrator of GSA does not make any amendment a part of our Constitution. When the last State ratifies it, the Supreme Court has held, is the time. That case arose under the 18th amendment. A man was actually arrested for a violation that occurred between the time of the last State ratification and the secretary of state, at that time, promulgating that it had been ratified. The Supreme Court said that it takes place at the time of the last State ratification, so the GSA Administrator does not decide when an amendment to our Constitution takes place.

Therefore, I say that we have a very serious imperfection in the proposal before us. The last imperfection is that if it is by majority vote, and if it is to be submitted to the President, then too what we are doing violates other constitutional traditions of this country, to article V and the framers of the Constitution, who said that the Executive would have no power in the mandatory process of the Constitution. It is a matter between the States and the Congress;

the Executive has no power to exercise in the process.

Mr. HYDE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I listened very carefully to the debate this afternoon from a great number of extremely knowledgeable people about the U.S. Constitution and its amendatory processes, but it seems to me that four professors, or seven professors, or the opinion of the Supreme Court in Dillon against Gloss or Coleman against Miller, nor any action by this House or by previous secretaries of state, can repeal the 9th and 10th amendments of the Constitution.

Now, may I remind my colleagues that the ninth amendment—which is still a part of this great document that we profess such reverence for—says that the enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people. Now, we have in the fifth article of this Constitution language expressly conferring upon Congress the power of specifying the mode of ratification, but there is nothing at all about rescission. So, the Constitution is silent about rescission.

Now, the 10th article says—and it is still a part of the Constitution—that the powers not delegated to the United States by this Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people. So, I submit to the Members that the power of rescission, not being forbidden in the Constitution, the Constitution being silent about rescission and only mentioning a mode of ratification, that by that fact the power of rescission resides in the people under the 9th amendment and the 10th amendment—that is, to the States. And any effort to repeal these two clauses strikes me as aberrational, to say the least.

I might point out that the Justice Department is not exactly the most reliable source of information, not exactly the Rock of Gibraltar on the question of whether or not a recission can be made, because Mr. Harmon, who is the Deputy Attorney General, has testified before the distinguished subcommittee headed by the gentleman from California, and did say, as to recissions:

> . . . That Congress cannot give to the States a right to rescind by any means short of amending Article V of the Constitution.

Of course the States already have it under the residual reserved powers of the 9th and 10th amendments. So he is right there, but not in the way he meant it. He goes on to say:

> Article V gives to the States the power to ratify a proposed amendment, but not the power to reject.

It is, in my humble opinion, a basic misconception of constitutional law. Authority flows not from the Constitution to the States but in reverse. It flows to the Federal Government from the States and powers not specifically specified nor prohibited are reserved to the people. I know that principle of law has been ignored all these long years but it is still there and we have not amended it out of the Constitution.

But at any rate Mr. Harmon on pages 6 and 7 of the printed testimony says that, no, the States cannot rescind, but then on page 38 he says:

> The fact that a State has rescinded its ratification may be a factor for the Congress to look at when it determines what the will of the people is, because the obligation remains that Congress has to satisfy itself that the amendment has received the reasonably contemporaneous approval of three-fourths of the people. And that is an obligation and a heavy obligation.

And may I say in a more calm atmosphere, not under the pressure of the ERA deadlines, the other body across the Rotunda has passed a bill in 1972 called the Federal Constitutional Convention Procedures Act. The chief sponsors of it are some of the strongest supporters of ERA over there. That bill passed virtually unanimously, by a vote of 87 to 1, I believe, and in that bill they provided for ratification and recission, the philosophy being that full and deliberate and comprehensive debate should occur, and the only time when ratification occurs is when 38 States at the same time have ratified. So if recission is a viable constitutional concept, and the other body has so enshrined it, then, it ought to be an acceptable concept in this body.

Mr. ANDERSON of Illinois. Mr. Chairman, will the gentleman yield?

Mr. HYDE. It would be an honor to yield to the gentleman from Illinois (Mr. ANDERSON).

Mr. ANDERSON of Illinois. I thank the gentleman for yielding.

I have enjoyed tremendously his very scholarly constitutional argument based on the 9th and 10th amendments in which, if I understood him, he said this.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. HYDE) has expired.

(On request of Mr. ANDERSON of Illinois, and by unanimous consent, Mr. HYDE was allowed to proceed for 1 additional minute.)

Mr. ANDERSON of Illinois. Mr. Chairman, will the gentleman yield further?

Mr. HYDE. I do so, indeed, if I have enough time to answer the gentleman's scholarly question.

Mr. ANDERSON of Illinois, Mr. Chairman, the gentleman's argument is under the 9th and 10th amendments that this power resides in the people. Why then do we as a Congress even presume to entertain an amendment as suggested by the gentleman from Illinois (Mr. RAILSBACK) which, as he explained a few minutes ago, as I was sitting here, directs the States that they have this power to go ahead within this 3-month period to rescind amendments previously made? If the gentleman's arguments make any sense at all, this would be a useless action.

Mr. HYDE. The gentleman is masterful in restating the question. I believe the Railsback amendment would be unnecessary, but under the Bakke decision, where we are not sure what that decision means concerning racial discrimination, it may be well to spell out for the courts what we previously assumed the law to be but that would not repeal the 9th and 10th amendments, and nothing we do here will do so.

Mr. ANDERSON of Illinois. I was not under the impression we had that much luxury of time this afternoon that we could spend all the time we have taken here this afternoon to pass an amendment which the gentleman believes to be unnecessary.

Mr. ECKHARDT. Mr. Chairman, I rise in favor of the amendment and I move to strike the last word.

Mr. Chairman, the first question we should address ourselves to is whether or not the Railsback amendment is permissible under the Constitution.

I think there is absolutely no doubt that is so. I think that question is finally determined in Dillon against Gloss. There it is stated:

> First, proposal and ratification are not treated as unrelated acts, but as succeeding steps in a single endeavor, the natural inference being that they are not to be widely separated in time.

It further provides that—

> As a rule the Constitution speaks in general terms, leaving Congress to deal with subsidiary matters of detail as the public interests and changing conditions may require.

The court, pursuing that line of reasoning, held that a seven year limitation for ratification for an amendment was within the authority of Congress as an implied power under article 5.

Of course, the 1972 Congress exercising their constitutional amending authority under article 5, and by a two-thirds vote, voted that that equal rights amendment should be submitted and that the equal rights amendment should be ratified in no longer period of time than 7 years.

Now, do we have the authority, at the present time, to further extend the period in which ratification may be had? I think we do. But I do not think we have authority by a simple majority rule at the present time to bind the States to a longer period than 7 years in which they are held as ratifying States without the opportunity to rescind. I do believe we can extend the period for ratification for another 3 years but not the period in which they are bound to 10 years.

I think it is absolutely clear that if Congress had the authority to limit in 1972 the period for ratification, it also has the authority now to grant to States, which were told in effect that because rescission will be automatic after 7 years, that those States may rescind in the extended period of approximately 3 years. As a matter of fact, in Dillon versus Gloss it is said:

> An examination of Article 5 discloses that it is intended to invest Congress with a wide range of power in proposing amendments. Passing a provision long since expired, it subjects this power to only two restrictions: one, that the proposal shall have the approval of two-thirds of both houses, and the other excluding any amendment which will deprive any state, without its consent, of its equal suffrage in the Senate.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, the gentleman from Texas (Mr. ECKHARDT) raises a question in his last comments that I find very intriguing.

Is the gentleman's position that, in the absence of extension of the 3-year period, the effect of the expiration of 7 years would result in an across-the-board rescission of ratifications previously adopted by the several States, and if the process were to continue, it would have to begin ab initio requiring 38 States in the beginning?

Mr. ECKHARDT. Yes, if no action were taken by Congress before the termination of the 7-year period, all States would be, in effect, treated as if they had rescinded in the event that the amendment were again submitted under the article V process. And if the amendment, which is now proposed, should be adopted without the amendment of the gentleman from Illinois (Mr. RAILSBACK) the result would be that the decision of the Congress in 1972 in which the submission was made would, in effect, have been altered. The very basis upon which we submit this matter to the States rests on that 1972 amendment. And Dillon against Gloss says that proposals and ratifications are not treated as unrelated acts. We may not, in my opinion, extend the net permitted in that amendment from 7 years to 10 years. This amendment by the gentleman from Illinois (Mr. RAILSBACK) simply prevents that unwarranted extension. It does not permit rescission during the additional 3 years for States which come in during those 3 years. It is silent on that, just as the original amendment was.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. ECKHARDT was allowed to proceed for 2 additional minutes.)

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from California.

Mr. PANETTA. Is there anything in the Supreme Court decision in Dillon against Gloss that specifically says that rescission was a power that the States would have?

Mr. ECKHARDT. No, Dillon against Gloss clearly says that the 7-year limitation is constitutionally permissible.

But it also said that Congress has a wide range of powers to implement the submission, which it ordinarily may exercise as incidental to other authorities it exercises.

Mr. EDWARDS of California. Mr. Chairman, I wonder whether this is the time when we could arrive at an amicable agreement as to termination of this debate, with everybody having ample opportunity to speak.

Mr. Chairman. I ask unanimous consent that all debate on this amendment and all amendments thereto end in one-half hour.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. BAUMAN. Reserving the right to object, Mr. Chairman, I really believe that with respect to this constitutional amendment, an objection should be made in behalf of the first amendment.

Therefore, Mr. Chairman, I do object.

The CHAIRMAN. Objection is heard.

Mr. EDWARDS of California. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto end in 45 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. LEVITAS. Reserving the right to object, Mr. Chairman, I do so because I note a number of Members standing; and realizing that we are talking about a constitutional process which is so fundamental, I think it would be inappropriate to invoke cloture on something this important.

Therefore, Mr. Chairman, I do object.

The CHAIRMAN. Objection is heard.

Mr. EDWARDS of California. Mr. Chairman, I would like to point out that when I asked for unanimous consent, that was by agreement. I point out to the gentleman from Georgia (Mr. LEVITAS) that there was never any intention of invoking cloture.

The CHAIRMAN. Objection has been heard.

Mr. BUTLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will speak very briefly.

I rise in support of the Railsback amendment.

I would like to say to the Members that I live in terror of incurring the wrath of the gentlewoman from Texas, who spoke so eloquently this morning about those of us who would presume to discuss the Constitution in this hallowed body. Therefore, I am not going to engage the Members in an extended constitutional discussion.

I just want to utter two brief sentences on this subject. Basically, we have to assume, for purposes of this debate, that Congress has control of this aspect of the process. Otherwise, there is no way by which we can consider extending the time for ratification.

Beyond that, Mr. Chairman, there is something basically unfair about extending the time for ratification without including the option to reconsider earlier ratifications of this amendment. Therefore, I think this is a fair-play amendment and nothing more than that. All of the constitutional arguments we may offer cannot cloud that single, basic question. Are we going to treat fairly these States which have considered this amendment earlier, or are we not?

Mr. Chairman, I think the Railsback amendment is a fair-play amendment; and I urge support for it.

Mrs. BURKE of California. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the Railsback amendment.

Mr. Chairman, I must comment that it appears that we are trying to do here indirectly what we cannot do directly.

The gentleman from Illinois (Mr. RAILSBACK has emphasized that he assumes that those States which have already ratified cannot now rescind, and that he does not attempt to change that state of the law.

Mr. Chairman, even though the last gentleman spoke as though there would be power in those States which have already ratified to now rescind, the gentleman from Illinois (Mr. RAILSBACK) has made it very clear that he assumes that they cannot rescind even if we adopt this amendment.

Mr. Chairman, in addressing this whole question of fairness, some people seem to have a problem with the idea that once a State has ratified, then it should also have the right to rescind, and that by extending a time limit, suddenly a State should have a right to rescind.

Either there is a doctrine that is provided for in the Constitution that you can rescind, or there is not, and we cannot sit here and make a constitutional doctrine that does not exist. There is nothing unusual that you may very well have the power to do an affirmative act but that you cannot then undo that act. We confirm appointments all the time, and the next day it does not mean we cannot unconfirm them. We have to then have a different procedure.

This whole ratification process was described very well by one of our learned jurists in 1887, Judge Jameson, who uses these words. He says that the language of the Constitution created a special power.

> . . . It is not a power belonging to them originally by virtue of rights reserved or otherwise. When exercised, as contemplated by the Constitution, by ratifying, it ceases to be a power, and any attempt to exercise it again must be nullity. But, until so exercised, the power undoubtedly, for a reasonable time at least, remains . . .

Here we have a power to ratify. We know that the courts have said that you can reject and you can then exercise that power, but there is no power that gives you a right, once you have ratified, that you can then rescind. It has never been recognized.

What I would certainly hope that we would do is have some consistency. If we accept the idea that we cannot do that directly, how can we then go in the backdoor and create a power to rescind it even if we extend a ratification period? How can we create a new power that was not created under article V of the Constitution?

I would also like to address this whole policy question. Anyone who has ever served in a State legislature realizes the confusion that can be created by an annual vote. If you have a power to rescind every year, you are going to have absolute chaos because you are going to have every single legislature in this country reconsidering the equal rights amendment every year. We will never have a final outcome. Look at the future. Once you adopt this doctrine of recision, it is something that will probably be accepted in the future. It will probably be recognized, and we will then just as a matter of policy create so much difficulty for future amendments that we attempt to ratify. It will almost be impossible to ratify another amendment unless it is one that is totally uncontroversial. Hopefully, we would not be considering adding amendments unless they would have some substance and that would be in areas that certainly reasonable people may differ.

I oppose this amendment.

Mr. EVANS of Delaware. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the Constitution of the United States has been described as the "most perfect document ever struck by mankind." I share that belief for in the almost 200 years of its existence, it has been amended only 26 times and survived momentous change in our country. It is the foundation of our Nation and its laws.

The framers of the Constitution wisely realized the sound value of the Constitution. They foresaw that many pressures would be exerted on it to change it and add to it as a result of changing times and changing attitudes. However, they also wisely realized that tinkering with it without full debate and careful scrutiny could undermine its permanence and inviolability. It is a sacred document. The amendatory process, which the framers developed, was therefore necessarily cumbersome, requiring a two-thirds majority in both the House and Senate and ratification by three-quarters of the States. What we are contemplating here today is not whether the equal rights amendment is a good idea or not but whether we should be changing the way that the constitutional amendatory process works to change the most basic law of our land.

I support passage of the equal rights amendment and hope sincerely that three more States will ratify it before March 22, 1979, so that it will become part of our Constitution. I was proud to see the State which I represent in the Congress become the second State in the Union to ratify the ERA amendment back in 1971. Delaware tried to be the first just as it was the First State to adopt our Constitution back in 1787 but unfortunately it was beaten out of that honor. I wish it had not. For it is vitally important for everyone in our country to have equal rights.

However, the fairness of the situation as well as the integrity of the amendatory process would be violated if we adopt an extension to the time for ratification of the ERA without also including in that extension Mr. RAILSBACK's and Mr. ERTEL's amendment to allow States to rescind prior to ratification of the ERA amendment. Such a provision would insure that there is a contemporaneous reflection of the will of the American people. I urge my colleagues to vote for the rescission amendment and if adopted, for the extension itself.

If the rescission amendment fails, then fairness requires me to oppose extension of the period for consideration of the amendment. We cannot deal lightly with the basic laws of our land. They are too sacred. By approving an extension without rescission, we are turning the will of our constitutional framers on its head and adopting a dangerous precedent. We owe a special obligation to future generations to follow the fair approach of allowing rescission.

Mr. Chairman, one of the most esteemed Members of the U.S. Senate, Sam Ervin, stated "What is good for the constitutional goose is good for the constitutional gander." I agree with that statement and urge my colleagues to adopt the Railsback-Ertel amendment which offers fundamental fairness to all people.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Delaware. I yield to the gentleman from Illinois.

Mr. RAILSBACK. Mr. Chairman, let me say, I think the gentleman has made a fine statement.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Delaware. I yield to the gentleman from Texas.

Mr. ECKHARDT. Mr. Chairman, I want to associate myself with the gentleman's extremely fine statement on the subject.

Mr. LEVITAS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, first of all, I would like to commend the gentleman from California for the fair manner in which the gentleman has presented this important issue to the House; also, I commend those persons who have spoken in support of or in opposition to the bill and to the amendment now pending, because I think the importance of this issue and the importance of this debate go far beyond the few hours that we have been spending on this subject.

Mr. Chairman, I would like to reflect and express some views, which based on my conversations with other Members of this body, I think, are not just confined to me. I approach this issue and this decision on this amendment and on the bill itself with a more troubled and disturbed conscience than on any other single matter that I have dealt with as a Member of this body. That is for a variety of reasons.

First of all, with respect to the equal rights amendment, I for one think it is totally outrageous that in the latter part of the 20th century we still are arguing about whether the Constitution of the United States should say that men and women should be considered equal under the law. That we should still have that argument as a matter of national debate and not have resolved it years ago is, I think, a sad commentary.

I remember well when I served as a member of our State legislature the day when we first voted on ratification of the equal rights amendment. I was proud to have voted for that ratification, and I remember the sense of concern I felt when it was not ratified by our State legislature, because I think it is just fundamental human rights.

I do not believe that ERA will bring all the benefits its proponents have claimed. Nor do I believe that ERA will bring all the dire consequences which its opponents predict. It is mainly a symbolic statement, but it is a very important statement and symbols are important.

But I am also very concerned and troubled about the entire process of adopting constitutional amendments. This is a very delicate and vital mainspring of our system of government. It should not be lightly tampered with.

If we do not respect the process by which our Constitution is amended in some way, then we will find that the precedents that we set today will come back to haunt us tomorrow.

There are many people who are strong advocates of the equal rights amendment and strong advocates of this extension resolution who, if the issue were different, if it were not the equal rights amendment but an amendment about the so-called "right-to-life" amendment, an amendment on school busing, or an amendment on prayer in schools, would perhaps feel that the constitutional issues were different. They may hear of these decisions again.

But I say to them that whatever action we take today is going to be the precedent for the future, and it will be one we will have to live with. There is a maxim in the law that "hard cases make bad law," and I am troubled by that.

I am also fundamentally aware of the fact that we are talking about an amendment that means much to many people, many people I know, many people I love as it is important to me. But in the process of achieving that end should our means be of questionable wisdom and fairness.

Where rules are set for procedures to make important decisions we should be careful before we change those rules and if we decide to change them we should try to act fairly and realize that our reasons must be weighty.

Given these two pulls upon conscience and upon one's respect for our Constitution, I have come to the conclusion in my own mind that we should do one of two things. If there are those of us who are concerned that we are doing violence to the process of amending the Constitution and setting a precedent that will haunt us, then perhaps the thing to do is to vote against the Railsback amendment and against this extension without regard to the merits of the ERA.

On the other hand, there are many of us who feel so strongly that the equal rights amendment needs the opportunity to be ratified that perhaps the thing to do is to vote for the Railsback amendment and then vote for the equal rights extension.

But, Mr. Chairman, I think the votes we cast today, in either direction, has to come down to one of those two courses, which I am wrestling with in my own mind.

Mr. DUNCAN of Oregon. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Oregon.

Mr. DUNCAN of Oregon. Mr. Chairman, the gentleman is expressing my views, my doubts, my apprehensions, and my hopes more fluently and more eloquently than I could myself. I associate myself with the gentleman's remarks.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. LEVITAS) has expired.

Mrs. HECKLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, it is with a sense of the seriousness of the questions before us that I rise in opposition to the Railsback amendment.

Two of the three reasons which I would offer for voting against the Railsback amendment would be applicable to any

constitutional amendment, and I think the first question that we should face in looking at the subject before us is this: How would we judge the issue on the basis of any other subject matter?

How would we apply our thinking to another issue with which we might agree or with which we might disagree?

I would suggest, first of all, that it is inappropriate for this Congress to take a stand on the issue of rescission. The Railsback amendment proposes the authorization or the expressed authority to States to rescind their action during the extension of the equal rights amendment.

This flies totally in the face of constitutional authority.

In the correspondence between Hamilton and Madison, during adoption of the Constitution, the Madison principle was expressed which holds that article V of the Constitution provides the States with the right of assent, or ratification, the right of positive approval of amendments, and makes their approval total and forever binding.

Madison simply and emphatically wrote:

> The Constitution requires an adoption in toto and forever. In short any condition whatever must vitiate the ratification.

An examination of the history of ratification shows the uniform application and general acceptance of this position—that ratification must be unconditional.

That is the principle which has been followed by all Congresses. And in consideration of the 14th and 15th amendments, the issue of the acceptance of rescission was rejected by the application of an extension of the Madison principle. And in fact it was so clearly acknowledged that Congress did not have the right to reorganize rescission, that in 1924 a Member of Congress sponsored an amendment which would have allowed for the right of rescission. That amendment did not gain sufficient support in the House or the Senate to be considered. Thus constitutional history shows that a States right to rescind has never been accepted by the Congress.

I say it is inappropriate for us to expressly authorize that right of rescission now.

Second, the amendment itself, the deadline extension which is before us, is neutral on the question. It allows the States to vote affirmatively or negatively. It does not deny them the right to vote negatively. Therefore, an express authority to vote negatively is unnecessary. I would say further that it is premature. Above all things, the right of rescission should not be considered by any Congress until the 38th State has ratified, and it is at that point that the Congress, sitting at that time, knowing the circumstances and the facts, should make the decision as to whether or not rescissions were or were not effective.

So I say, in terms of constitutional practice, based on past history, that the right to rescind should not be approved because it is inappropriately placed in this legislation, that it is premature for this Congress and in fact possibly illegal and unconstitutional. And I would say for this amendment it is particularly unfair. One of the reasons why 7 years was not long enough was because the debate has not centered on the merits of the equal rights question. If we allow rescission, we further deflect the attention of the country and the legislatures from the question of equal rights for men and women and we place it in another parliamentary conundrum which the legislatures across the country would be involved in discussing. Again we set back the true consideration of the issue of equal rights for women.

Mr. Chairman, for all of these reasons I urge a "no" vote on the Railsback amendment.

Mr. EDWARDS of California. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto conclude at 5:15 p.m.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. EDWARDS of California. Mr. Chairman, I withdraw my unanimous-consent request.

Mr. SANTINI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, at this point in the course of the committee's debate I would like to invite the distinguished chairman of the subcommittee, who has in the course of his congressional career perhaps established a hallmark of concern for human rights long before it was adopted as an identification with the White House. I do so in the context of specific concerns, some of which I shared with the gentleman before, some of which I have not, that persuade me that, in balance, we are perhaps foisting here a cruel hoax of expectation upon the millions who have endeavored so mightily for so long to achieve in this Nation a basic status of fairness.

Mr. Chairman, in your—and you have had considerable experience both with the subcommittee testimony you have considered and your own personal research—in the course of that conduct is it your opinion that this House would have the legal authority or power to have cut short the extension time from, say, 7 to 4 years if they had made that decision?

Mr. EDWARDS of California. If the gentleman will yield, no, I believe not. I believe by far the weight of opinion is that we would not have the legal authority to do that.

Mr. SANTINI. And why would we not have had that legal authority?

Mr. EDWARDS of California. Well, it is just that you cannot withdraw it once it has been established. That is the weight of authority, and I have not looked into it. Perhaps it is a social contract.

Mr. SANTINI. Social contract is a concept that has not interjected itself into the deliberations, but what is the legal basis for saying that this body would not have the power or legal authority for shortening the period? Let me go to a second question, Mr. Chairman.

Is it your considered opinion that this body would have the authority at the end of the proposed 3 years, 3 months, to enact a further 3-year, 3-month extension for the purposes of ratification?

Mr. EDWARDS of California. I would not want to make an observation on that without further study. If there was a bill on it, I think we would have to look at it very carefully. I am not at all sure that I would want to be absolutely emphatic on that one way or the other.

Mr. SANTINI. Well, Mr. Chairman, let me pursue a third question. What do you understand to be the precise legal nature of House Joint Resolution 638?

Mr. EDWARDS of California. It is appropriate pursuant to article V of the Constitution, wherein Congress is authorized to provide the mode of ratification. This is what the cases hold, and this is what our committee found.

Mr. SANTINI. Mr. Chairman, does not article V of the Constitution require a two-thirds vote?

Mr. EDWARDS of California. Not for the mode of ratification. There are many instances to fortify my view and the view of the House Judiciary Committee on that issue. When an amendment has been ratified by three-quarters of the States, in many instances wherever there is controversy it has come back to the Congress for ratification by a majority vote. Senator Ervin's bill and other legislation that provides for machinery for constitutional conventions to provide amendments to the Constitution are also voted in the House and Senate by a majority vote. That is pursuant to article V, which provides that Congress provides for the mode of ratification.

Mr. SANTINI. Then you classify this as having the legal effect under the authority of article V of being immediately effective upon passage by the House and the Senate?

The CHAIRMAN. The time of the gentleman from Nevada has expired.

Mr. SANTINI. Mr. Chairman, I ask unanimous consent to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Nevada?

Ms. HOLTZMAN. Mr. Chairman, reserving the right to object, and I have no objection to any additional time, but I just wonder when the debate is going to end on this, if ever.

Mr. EDWARDS of California. Mr. Chairman, if the gentlewoman will yield, as soon as the gentleman from Nevada and I are finished, I think it is appropriate that I should ask unanimous consent for a particular time.

Ms. HOLTZMAN. I thank the gentleman, and I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Nevada?

There was no objection.

Mr. EDWARDS of California. In answer to the gentleman's question, no, article V of the Constitution does not require the President's signature on this legislation.

Mr. SANTINI. Is, Mr. Chairman, contemporaneous consent a constitutional mandate?

Mr. EDWARDS of California. That is a decision of the Supreme Court.

Mr. SANTINI. Is the opinion of the gentleman from California as well that it is a constitutional mandate, contemporary consensus?

Mr. EDWARDS of California. I would say it is the law, the present law.

Mr. SANTINI. That being true, is rescission as proposed in the pending amendment in any way contributing to the establishment of or reinforcing the necessity of contemporaneous consensus?

Mr. EDWARDS of California. It would be one of the elements that future Congress would consider when it would make that decision. The Court held that the timeliness of the particular constitutional amendment and other elements having to do with the constitutional amendment would be considered by the Congress, and that would be one of them.

Mr. SANTINI. And rescission would be a factor?

Mr. EDWARDS of California. Rescission would be a factor, yes.

Mr. SANTINI. To that extent then, Mr. Chairman, would that not be a meritorious reason for supporting the rescission proposal?

Mr. EDWARDS of California. No. That is the present law. The rescission proposal, as has been very interestingly pointed out today by its proponents, does not do anything except to muddy up the waters. Already, as I said in my remarks, the State legislatures can pass resolutions of rescission or not. They are going to in the future. They would be considered by future Congresses.

Mr. SANTINI. Reclaiming whatever time is left, Mr. Chairman, I disagree respectfully with that decision.

Mr. EDWARDS of California. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto be completed at 5:15, which is 20 minutes from now.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Ms. OAKAR. Reserving the right to object, Mr. Chairman, I would just ask my esteemed colleague if the spirit of that action is meant to include only those Members who have spoken? Some Members have spoken three and four and five times, and I do not think frankly it is just fair. I would hope that was the spirit and obviously I would agree to it, but if it is not, then I would unfortunately have to object.

The CHAIRMAN. Objection is heard.

Mr. EDWARDS of California. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto conclude at 5:30.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The Chair recognizes the gentleman from Arkansas (Mr. TUCKER).

Mr. TUCKER. Mr. Chairman, these votes today will measure our devotion and commitment to assuring standards of stability and orderliness in interpreting the Constitution of the United States.

It is the Constitution we are debating, and debate on this amendment reaches far beyond the subject matter of this resolution.

If this Congress gives in to the temptation to breach those standards, of stability and orderliness, on this issue, that temptation will rise again and again in the future.

This amendment specifically authorizes a legislature which has previously ratified to rescind. That is a major constitutional change. Perhaps recission is an implied power of a State already; but once we recognize this as a specific power for the States we will have taken a major, and I would suggest, a very inadvisable step.

Furthermore the amendment does not answer such questions as these.

If Arkansas authorizes this amendment next year and then attempts to rescind it, it will be of no effect because the amendment does not provide for recissions in the extension period by those States which did not approve before the extension period.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FISH. Mr. Chairman, I ask unanimous consent that I may yield my time to the gentleman from Arkansas (Mr. TUCKER).

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. ASHBROOK. I object.

The CHAIRMAN. Objection is heard.

Mr. ASHBROOK. If the gentleman wants to be recognized and yield on his own time, I will not object.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Chairman, I yield to the gentleman from Arkansas (Mr. TUCKER).

Mr. TUCKER. Mr. Chairman, I thank the gentleman for yielding.

Second, Mr. Chairman, let us assume that Colorado, which has previously approved this amendment, attempts to rescind before expiration of the original 7 years. That rescission apparently would not be recognized under this amendment. And what would happen in this event: three States approve it within the next few months following expiration of the original time limit, thus achieving a three-fourths majority. According to the amendment being offered here, there is an affirmative right to rescind granted to all of the States ratifying in the original 7 years to ". . . rescind that action at any time . . . prior to adoption of the amendment." By that grant does the Congress preclude "adoption" until the extension expires? Does Congress lose the power to approve the ratification once the three-fourths majority is reached because of that right of States to rescind in the future, as specifically provided in the amendment?

Mr. Chairman, I strongly support the equal rights amendment. It is right, it is the future—and it is a future that is past due.

How can anyone look at their wife, their mother, their daughter, the women they know and respect and work with and say that it is all right for those women not to have all the rights guaranteed to men under the 14th amendment?

I want my children to grow up with a constitution in this country that assures that. And I hope my State will act soon, before March 22, 1979, to ratify.

But I cannot support an extension for the same reasons I approve this amendment. The process we have is difficult and fragile enough.

Let us not issue an invitation, with this amendment, to a constitutional chaos which could later be distorted for the worst regional or political reasons.

Process, where our Constitution is concerned, is more than a formality. It is, and has been proved over and over again to be, the heart and substance of our freedoms and our country.

Mr. FISH. Mr. Chairman, the gentleman has accurately stated the intent of the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Chairman, the basic issue that faces the House is whether we are going to extend the period for ratification of the equal rights amendment. This is difficult in and of itself politically and constitutionally. The tendency when we face a difficult issue like this is to try to find an easy alternative, some kind of an out that makes it all very simple. But, Mr. Chairman, there is no easy way out of this basic issue itself because there is a difference between the question of extension and the question of rescission. Extension involves little or no constitutional precedent but rescission involves 200 years of precedent that clearly states that article V of the Constitution does not permit rescission in the ratification process.

This was made clear by the framers of the Constitution, by the Constitution itself in article V, by the history of the 14th, the 15th, and the 19th amendments, when the Nation refused to except rescission by a few States, and by the courts that have recognized that once an amendment has been ratified, the power to act ceases to exist.

If you question an extension of the ERA, then go ahead and question it based on its own merits up or down, but do not buy a vote for extension at the very high price of permitting rescission. Let us not ignore history or legal precedent, let us not create constitutional chaos; let us support the basic process of ratification that has served the Nation so well for 200 years.

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. ECKHARDT).

Mr. ECKHARDT. Mr. Chairman, I ask unanimous consent that I may be permitted to yield my time to the gentlewoman from Ohio (Ms. OAKAR).

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. ASHBROOK. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Chair recognizes the gentleman from Texas (Mr. ECKHARDT).

Mr. ECKHARDT. Mr. Chairman, I yield to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Chairman, I move to strike the last word:

There are times when we must call things what they are.

This amendment, however eloquent the debate, would essentially obstruct the passage of the equal rights amendment. It is subtle politically and would give Members a way out. It may not be the intention of all, but it is the intention of some individuals to obstruct the bill before us. So that truly once again the issue must be: Why have more time to extend simple justice to all Americans regardless of sex? Clearly, it is the most fundamental of human rights issues. Clearly international attention is turned to our own country today.

What is really involved here is our attitude toward justice and our attitude toward life.

I have been amazed that some groups would discuss such a lofty issue on the basis of toilets, lifestyles, or group appeal unisex. This amendment does not single out one woman in particular, but all women.

What we are really dealing with, in general, is our treatment of American women. The ERA can be embraced by the entire rainbow of American women as mirrored by our own women's congressional caucus.

Single women, married women with children, grandmothers, white and black, Republican and Democrat who represent a wide variety of opinions on a wide variety of issues. Unfortunately, there are those who have chosen to distort the facts.

I have spoken to certain Members who need to hear me address a very sensitive issue. The relationship of abortion to the equal rights amendment. I have been one of two women to speak against medicaid funds as they relate to being used for abortions. My stand is clear—I say to the Members of the House who have the same attitudes toward life that I do. Do not be fooled by those people who equate the two issues—they are separate. As a matter of fact, I believe that if you respect the life of the unborn the ERA amendment is an extension of that philosophy. We must be concerned about the quality of life for the women in this country.

We must be concerned with the fact that between 1973 and 1975, the unemployment rate for women heads of households increased by 50 percent, while the jobless rate for wives doubled.

We must be concerned that the average woman over 65 lives on $1,300 a year while the average male over 65 lives on $3,000 in part due to inequitable pension plans.

We must be concerned that when women seek to collect unemployment insurance they are faced with a complex conglomeration of Federal laws and individual State statutes governing their eligibility that men do not face.

We must be concerned that women were not allowed to vote until 1920, 140 years after our first American election.

We pride ourselves in being leaders of human rights, on having a democratic free society based on justice and liberty. We have today the opportunity to put the spirit of our American beliefs into action—by passing this bill without the destructive rescission amendment. I know this is a tough political issue for some in a political year. But I say to you, be courageous and just, and you will be rewarded. Vote against this amendment and for justice in this country.

The CHAIRMAN. The Chair recognizes the gentleman from Idaho (Mr. SYMMS).

Mr. SYMMS. Mr. Chairman, I rise in support of the Railsback amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Washington (Mr. McCORMACK).

Mr. McCORMACK. Mr. Chairman, I have not been close to this debate and I would like to direct my comments to the other Members of the House, who, as I, have not been deeply involved, either in committee or in public.

I have two thoughts. First, I oppose the amendment primarily because I think any State legislature considering ratification in the past has done so in the context of the fact that certain other States have already ratified. This must, of course, be true in the future.

Ratification is somewhat like signing a compact or a treaty. One does not put his name on such a paper and then, soon after other parties have signed it, take his name off. One can hardly expect this Nation to maintain order in such matters if a State can ratify, and then rescind its ratification after other States have signed.

In short, Mr. Chairman, in ratifying any amendment, a State does so somewhat on its reliance that other States have already ratified. I think that principle of action in reliance would apply to any future proposed amendment to the Constitution.

Mr. Chairman, rescission should not be allowed to any proposed amendment, and we should not be seeking to establish a precedent.

My second point is similar to the one expressed by the gentlewoman from California (Mrs. BURKE). If we were to accept the Railsback amendment and to allow rescission, we would be condemning each legislature of the 35 ratifying States to chaos.

The CHAIRMAN. The time of the gentleman from Washington (Mr. McCORMACK) has expired.

The Chair recognizes the gentlewoman from Texas (Miss JORDAN).

Miss JORDAN. Mr. Chairman, I ask unanimous consent to yield my time to the gentleman from Washington (Mr. McCORMACK).

The CHAIRMAN. Is there objection to the request of the gentlewoman from Texas?

Mr. ASHBROOK. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Chair recognizes the gentlewoman from Texas (Miss JORDAN).

Miss JORDAN. I thank the Chair for recognizing me.

Mr. Chairman, I rise in opposition to the Railsback amendment and yield to the gentleman from Washington (Mr. McCORMACK).

Mr. McCORMACK. Mr. Chairman, I thank the gentlewoman from Texas (Miss JORDAN) for yielding.

As I was saying, if we were to accept the Railsback amendment and allow rescission, we would be condemning the legislatures of the 35 ratifying States to chaos when they convene next spring. We would be creating a three-ring circus in every one of these State legislative bodies that have so much important work to do. We do not have the moral right to do that much damage to our State governments. I think we should avoid that situation.

Mr. Chairman, I voted for ERA here on this floor in 1972. The concept of an extension originally seemed to me not to be orderly. However, the issue of equality for women is so overwhelming that it sweeps away such inconsequential ideas. Equality for women in this country—now—is so fundamental that it overrides all of the technical arguments.

Mr. Chairman, we should vote against the Railsback amendment and vote for extension.

The CHAIRMAN. The Chair recognizes the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Chairman, this debate has taken me back to my law school days. Somehow, I wish we had this as a final examination question rather than a vote because it is very complicated.

I oppose the Railsback amendment. I made that decision while listening on the floor today.

Mr. Chairman, I would like to ask the gentlewoman from New York (Ms. HOLTZMAN) two basic questions because I think there is a fundamental question raised by the gentleman from Illinois (Mr. RAILSBACK).

No. 1, does Congress have unequivocally the final right to determine whether the amendment has been accepted and is contemporaneous? No. 2, what is the process by which the Congress will utilize that discretion in the event that, hypothetically there would be 38 ratifications and a large number of rescissions at the end of the 3-year extension? What would happen in the case of a scenario like that?

Ms. HOLTZMAN. If the gentleman will yield, Mr. Chairman, I would like to say that I have consulted the manager of the bill, and the response is that Congress does have the final say with respect to the issue of whether 38 States have ratified. In other words, Congress does have the right to review any rescissions that may have taken place and determine their effect.

Of course, the Supreme Court may have the ultimate decision; but between the Congress and the General Services Administrator there is no question in my mind that the Congress would have that right. I think the precedent set by the 14th amendment would apply here, and the General Services Administrator would be bound by it.

The CHAIRMAN. The Chair recognizes the gentlewoman from New York (Ms. HOLTZMAN).

Ms. HOLTZMAN. I would like to further respond. The process by which Congress would make that decision is the ordinary process. It is not going to be an easy decision, depending upon the factual situation at that time. But there is no question in my mind that the General Services Administrator would advise Congress of the situation when the

38 States ratify, as to the number of ratifications and the other materials that have been received in connection with the process of ratification.

Mr. GLICKMAN. Mr. Chairman, if the gentlewoman would yield, what we are doing now is laying the legislative history groundwork for a situation that could result in 3 years where we have a controversial situation where we have rescissions and ratifications, and where this Congress would in fact make that final decision.

Ms. HOLTZMAN. That is right. I read the law as requiring the General Services Administrator to come to Congress in the event there are rescissions, in the event the matter of ratification is not clear.

Mr. GLICKMAN. I thank the gentlewoman.

The CHAIRMAN. The time of the gentlewoman has expired.

The Chair recognizes the gentleman from Pennsylvania (Mr. MARKS).

Mr. MARKS. Mr. Chairman, I oppose rescission. To permit rescission, in my opinion, is to condone discrimination, for rescission can only come about once the citizens of a State have voted to eliminate discrimination. If discrimination was wrong at the time they voted against it, then it continues to be wrong. I strongly urge a vote against this amendment.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. MARKS) has expired.

The Chair recognizes the gentleman from Pennsylvania (Mr. ERTEL).

Mr. ERTEL. Mr. Chairman, I ask unanimous consent to yield my time to the gentleman from Illinois (Mr. RAILSBACK).

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

Mr. ASHBROOK. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. ERTEL. Mr. Chairman, I yield to the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. I thank the gentleman for yielding.

Let me make, once again, very clear, what the General Services Administration representatives testified to as far as their purpose about 1 or 2 weeks ago before the Senate. The General Services Administration representatives testified in the Senate Committee on the Judiciary hearings last week that the existing statute gave them four options. Once the 38 States ratified ERA, only one of those options was referral to Congress for determination of the validity of the States ratifications. As I recall, the General Services Administrator even said that one option would be to ask the Department of Justice for its ruling. The Department of Justice has indicated that it does not believe that the rescissions are valid and that they are unconstitutional. I would suggest very strongly that if we want to be very clear about the power of the Congress to determine the ultimate validity of such adoption and ratification, we had better spell that out, and that is what our amendment does.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. ERTEL) has expired.

The Chair recognizes the gentleman from North Carolina (Mr. MARTIN).

Mr. MARTIN. Mr. Chairman, I rise in support of the fair play amendment offered by the gentleman from Illinois (Mr. RAILSBACK).

Mr. Chairman, I now yield to the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. I thank the gentleman for yielding.

Let me repeat something that I said earlier that I think may be very meaningful to those Members who may still be undecided. It is not a question of the gentleman from Pennsylvania (Mr. ERTEL) or the gentleman from Texas (Mr. ECKHARDT) or myself that what we are doing is really the fair thing to do. There are many ERA proponents who have stated unequivocally and very clearly that either they favor no extension at all because of the fairness doctrine or in the event of an extension, there should also be rescission.

The Washington Post summarizes it perhaps better than I can:

> Congress has put time limits on recent proposed amendments for good reason, to ensure that ratification, if achieved, will reflect a national consensus on a fundamental constitutional change. If the time period is approved, ERA is going to be extended at the last minute. Surely states that have already ratified should be allowed to reconsider and, if they wish, and rescind those votes.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. MARTIN) has expired.

The Chair recognizes the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Mr. Chairman, in addition to the Washington Post, the New York Times subscribes to a similar view; the Baltimore Sun said exactly the same thing. The Chicago Sun Times also dealt with the issue of fairness.

Also, what really bothers me is the law that we may be tinkering with; that is, under the Dillon against Gloss case, unless you add the right to rescind and for contemporaneous approbation or approval, you really do not have a valid ratification.

I ask, in light of the fact we have 30 States' ratification after the first year, 4 States after the first year, 5 States trying to rescind, how do we have contemporaneous approval if now we have ratification without giving those 35 States also a chance to reconsider?

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. GARCIA).

Mr. GARCIA. Mr. Chairman, I rise in opposition to the Railsback amendment, and in favor of the extension of the ratification time for the equal rights amendment.

I would like to address a short comment to what the Railsback amendment, giving States the right to rescind their ratification, would mean to State legislatures across this land. I am a former member of a State legislature. And I am a former leader in that legislature—in New York State. I know from 13 years experience what it is like to be harassed by a vocal minority into year after year of fruitless consideration and attention to issues that have no chance of passage. I know firsthand what it is like to run the gauntlet of angry partisans day after day, distracting legislators from the serious business of responsible government. The Railsback amendment would not lead to rescission in many States; I can almost guarantee that. But what it will lead to is an exhausting and useless struggle against a law that is simple, that is clear, that is just. My colleagues in New York, and yours in the other 49 States should not be exposed to that. There are many compelling constitutional and legal reasons for voting against the Railsback amendment. But this is certainly not a minor consideration that I hope you will take into account today.

Mr. Chairman, I stand here today, not only for myself and for my two teenage sons, both of whom will derive the benefits of the action we will take today, but to bear witness for my sister, Amy Cortese. Amy is a minister, and she is, without question one of the greatest spiritual leaders I have known. Her awareness, her sensitivity and her ability to communicate God's love are unequaled. And, my colleagues, those are qualities that have no gender. Her capacities, and her spirituality were not determined by her sex. She is the first female prison chaplain to be hired by the State of New York, and she has brought her great skills to serve those who have needed her most. She has been first, but it is what we do here today that will assure that she will never be the "only."

Another first for Amy was that on the day the New York Senate debated the State equal rights amendment, she became the first woman to deliver the benediction in that body. And what she said that day should guide our deliberations today:

> Dear Lord, we do not want to walk taller
> Dear Lord, nor do we want to walk in front of
> All we want, dear Lord, is to walk alongside.

I ask each of you to take that simple message with you as you think about your vote. Women just want to walk alongside.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Illinois (Mr. RAILSBACK).

At the urging of the gentleman from Virginia (Mr. BUTLER), the Subcommittee on Civil and Constitutional Rights asked the constitutional scholars who testified before the subcommittee last fall to discuss the merits of the States rights to rescind their prior ratifications or proposed constitutional amendments.

The views expressed by the scholars were certainly surprising, particularly to strong proponents of extension.

Prof. Laurence Tribe, a strong proponent of the equal rights amendment and extension, made it clear that while he did not particularly like the idea of

rescission, authorizing a State the right to rescind could well be the quid pro quo for Congress power to alter the time for ratification.

Prof. Charles Black noted that it would be entirely impermissible to extend the time for ratification without also extending the time for rescission.

Prof. William Van Alstyne testified that Congress did not even have to speak to the issue because States already possessed the right as a result of article V.

In sum, it is fair to say that a majority of the scholars, including the ones who submitted their testimony in writing which do not appear in the printed record of the hearings, acknowledge a State's right to rescind.

At the heart of this issue is the question of whether a State having once acted in the affirmative is prohibited from further action. Coleman tells us that a State which has previously rejected a proposed constitutional amendment may act again and again. The Court has not told us, however, what rights a State has when it has ratified and subsequently seeks to rescind. In dicta, Coleman suggests that this may well be a question for the Congress to decide.

Congress has never spoken directly on the issue, either. Proponents tell us that the Congress rejection of the rescissions by Ohio and New Jersey constitute a clear precedent on this matter. Anyone who has studied the circumstances surrounding the adoption of the 14th amendment was aware that two additional States were prepared to ratify the amendment. Moreover, there was very little discussion of the rescission question by the House.

Since the equal rights amendment calls for fair and equal treatment by the Government with respect to men and women, the process which insures that this amendment will become a part of the Constitution must likewise be fair and afford equal treatment to all involved. To extend a time period for consideration of the proposed amendment, which is, in effect, a reconsideration on the part of the Congress, without permitting the States the same opportunity to reconsider their earlier ratifications, is patently unfair.

We have the opportunity to insure this extension will be fair for all. I urge support of the Railsback-Ertel amendment.

Mr. Chairman, moreover, we should vote "yea" on this amendment because first, without the Railsback-Ertel rescission amendment, States would be permitted to switch from no to yes—but forbidden to switch from yes to no. That is not fair; second, without the Railsback-Ertel rescission amendment, the debate can continue in only 15 States—but 35 States would be excluded from the ERA debate. That is not fair; third, without the Railsback-Ertel rescission amendment, the situation would be like reconsideration of a House vote where Members would be permitted to change from no to yes, but all "yes" votes would be permanently locked in and could not change. That is not fair.

The CHAIRMAN. The Chair recognizes the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Chairman, it is hard for me to understand how people who call themselves supporters of extension can support a very explicit move that would bring about rescission in many places. There have been fascinating legal arguments on both sides, but I tend to come out quite firmly against the amendment, because among other things, something that really has not been discussed is the question of what does the rescission process amount to in most States? I wish we would ask ourselves that question. It amounts to a process in which the odds are stacked quite firmly against the opponents of rescission. Why? Well, I listened on the way to work for about 10 minutes to Liberty Lobby, for example. Most of us have it in our district, the Liberty Lobby Radio Show. They are, of course, against extension. They are for rescission and they will continue to be in the States.

The forces for rescission and against ERA will always have more media access, will always have much more money than the ERA proponents, and that is exactly the road we are going down when we make a statement against rescission. I think that is a good argument.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois (Mr. McCLORY).

Mr. McCLORY. Mr. Chairman, I think what we should recall is that we are dealing with the entire amendatory process. We are taking unprecedented action with respect to the proposed extension time and with respect to the subject of rescission. There is no authority in article V of the Constitution for rescission. There is only authority for ratification. I think we should leave the Constitution the way it is and not try to change specifically what it says there.

I am not going to support the Railsback amendment; although, I also want to indicate that I am not going to support the extension of time. I think they are both contrary to the intent of the amendatory process and I think they are both unwise steps. I think they both should be rejected.

The CHAIRMAN. The Chair recognizes the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Chairman, I have listened to this debate all afternoon. My parents spent a small fortune sending me to Harvard Law School, and there is a great temptation to leap up and give citations from cases and do my old law school revue number. I've done the research and feel precedent clearly comes down on the side of coming out strongly against this amendment.

I find the amendment really very mischievous. I must say, after listening to this whole debate, that I get the same feeling in my stomach as the one I experienced as a history student when I found, after reading their statements and their ideas, that my heroes, the great forefathers who founded this Nation and who put together the Constitution really intended it to be a private club for white male landowners. Here we are 200 years later trying to get equal rights for women included in the Constitution. I must say that my historic heroes moved down a couple of notches when I was exposed to their opinions on women.

I must say I am dismayed today to see this amendment on the floor, because if this is adopted, we are going to change the whole Constitution ratification and rescissional process just because women are wanting in. To see those already protected by the Constitution explain how States should be allowed to undo their mistake of letting women in the Constitution angers me.

Mr. Chairman, I think in all fairness this amendment should be defeated and the extension should be granted.

The CHAIRMAN. The Chair recognizes the gentleman from Virginia (Mr. BUTLER).

Mr. BUTLER. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Illinois (Mr. RAILSBACK).

Mr. Chairman, some of the constitutional scholars who have addressed this issue believe that rescissions of prior ratifications of constitutional amendments are not permitted because article V speaks only of ratification and never mentions rescission. In addition, I am told they allege that the Congress has already considered the validity of rescissions when it determined that the two States which rescinded their ratifications of the 14th amendment were invalid.

We all know that proponents are basing their support for the authority to extend the time limit on the powers of article V. Of course, article V does not speak of extending ratification periods, but where is the power to extend implied? Article V as a matter of fact, makes it quite clear that Congress' role in proposing amendments and designating the mode of ratification is a single endeavor which can be exercised once and once only.

Thus, proponents are able to overlook provisions articulated in article V and continue to search for implied article V powers. In my view, a State's power to rescind is just as implied in article V as Congress power to extend.

With respect to the merits of the 14th amendment, as a precedent on rescission, I suggest Members read page 72 of the subcommittee hearings. Professor Black accurately recreated the circumstances under which the House allegedly invalidated two rescinded ratifications and declared the amendment ratified. He correctly notes that the House was aware when it voted that the requisite number of States had ratified without counting Ohio and New Jersey's rescissions.

There is a recent and much more relevant precedent concerning the view of the Congress about the validity of rescis-

sions. In 1971, the Senate took up and passed S. 215, the Federal Constitutional Convention Procedures Act. The bill was designed to provide guidelines for the portion of article V which permits two-thirds of the States by conventions to propose constitutional amendments. The bill was intended to establish the machinery for this alternative method of proposing amendments.

The Senate Judiciary Committee report provides interesting insight into the thinking of the Senate on many of the issues we are addressing today. For example, the bill provided that both applications for convention and referred amendments would remain timely for 7 years only. The committee report noted that a much longer time would not satisfy the desire for a consensus of the States. Section 13 of the bill provided that States may rescind by the same procedure as that used for ratification. The Senate specifically and emphatically enclosed a State's right to rescind a prior ratification. With these two provisions, the bill passed the Senate by a vote of 84 to 0. In 1973, the bill again passed the Senate by a voice vote.

What this tells me is that our colleagues in the other body, especially the lawyers on the Judiciary Committee, studied the question of rescission and have agreed that, at least with respect to amendments proposed by convention, that rescissions of prior ratifications by States are permissible. I suggest that we concur with the unanimous opinion of the Senate.

I urge adoption of the amendment.

In case it is not perfectly clear to all Members what the political strategy involved in this unprecedented tampering with the constitutional process is, I would be happy to elaborate. The purpose of extension is to insure that the 35 States which have ratified this proposed amendment during the initial time period will be prohibited from reconsidering their ratifications. At the same time, more time will be extended to the proponents of the equal rights amendment in order to attain the additional three States necessary for ratification.

Proponents tell us that the time period for ratification of the equal rights amendment should be extended because the debate on the merits of the amendment is still ongoing and viable. If that is true, then proponents should abide by the constitutional processes as outlined in article V and reintroduce this amendment in the 96th Congress for resubmission to the States. If the amendment is still politically, socially, and economically viable it will stand the muster of ratification by three-fourths of the States in either the State legislatures or in special conventions.

However, proponents fear that if the amendment is reintroduced, it may not receive the necessary two-thirds vote of both Houses of Congress or be able to attain the 35 ratifications which it now has mustered.

By extending the time period and prohibiting rescissions the 35 States are safe, and all efforts can be concentrated on those errant 15 States. Such a scheme is analogous to asking this House to reconsider a vote and only permit those who voted "incorrectly" to vote on the reconsideration. Of course, this House would never stand for such unfair procedure. We should not endorse the same scheme for the ratification process.

The only fair way to award more time to States which have not yet ratified this amendment is to permit all States the opportunity to reconsider the ERA. Locking in States which ratified 6 years ago cuts off the extended debate in 35 States which proponents say is so desperately needed to refute the bias about ERA. Debate includes both sides and all States should have the opportunity to participate.

I urge adoption of the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. EDWARDS) to close debate.

Mr. EDWARDS of California. Mr. Chairman, I remind my colleagues that this is the cutting edge. This is the great decision to be made.

We have had a wonderful debate. This is a fair proposition that we are offering, but it will be damaged severely, really totally, by this amendment.

Mr. Chairman, I ask for a no vote on the Railsback amendment.

Mr. HANSEN. Mr. Chairman, the Constitution of this great Nation is the most powerful weapon against tyranny ever devised, its authors opposed oppression in all forms. Separation of powers, the Bill of Rights, 10th amendment guarantees, and the amending process requirements were all included to protect against ostentatious power grabbing by any would-be tyrannical forces. Today this Constitution is being tried for its viability by deliberate congressional efforts to skirt constitutional guidelines and intents, under the disguise of fairness.

The equal rights amendment had a good first inning by posing as a cure-all for women, but 7 long years of debate have revealed a supposed panacea to be a Pandora's box, resulting in divisional strife typifying anything but the attitude of good will and concensus that would pervade when amending the Constitution. The ERA now stands doomed by the rules its proponents offered as fair and equitable for adoption, yet faced with impending defeat, these same proponents now feel that the importance of its passage supersedes the necessity to adhere to fair and constitutional guidelines.

It is amazing that while the ERA supporters are appealing to our sense of fairness and right they refuse to consider the fairness of reconsideration by States who wish to rescind their vote of ratification is not a settled issue. If the power to allow recission is delegated to Congress, then to wait until after a State has rescinded, to declare that rescission is not allowed constitutes an ex post facto law. Congress still cannot bar a recission for there is nothing in the Constitution which denies the States the power to reconsider and rescind since with the 10th amendment guarantee of States rights there would have to be a constitutionally stated absolute prohibiting rescission. ERA'ers may look for it, they may desire it, but it is not there.

The Heritage Foundation gives an excellent overview of the rescission question:

> The constitutionality of rescissions has never been decided definitely. In Coleman v. Miller (1939), the Supreme Court ruled that Congress could decide whether to accept rescissions. Opponents of rescissions contend that Article V of the Constitution gives states the power only to ratify but not to rescind that ratification. That is, ratification, once given, is final and unchangeable. By way of comparison, the Constitution gives the power to make laws only (article I, section 3, clause 18), not to repeal them. Yet, no one has ever questioned the authority of Congress to repeal laws. The power to repeal laws has always been considered power implicit in the power to make law. Indeed, if all laws became immutable at birth, it could hardly be said that the United States has a democratic system of government. The point seems even more important in matters concerning the Constitution, which by practice and precedence has always been regarded as a document to be changed only with the greatest care and circumspection. Whether it is constitutional ratification or making of laws the power to create inherently possesses the power to destroy.

Finally, the Supreme Court, in Dillon against Gloss, ruled that a constitutional amendment is ratified on the day that the last State of the required three-fourths majority approves it, not when the Secretary of State proclaims that ratification has been completed. In 1920, the States reported their ratification to the Secretary of State, who announced when the ratification process had been completed. Today the head of the General Services Administration has this task. Thus, if Congress chooses to ignore the problem of rescissions a political and constitutional crisis could erupt when—and if—the ERA receives three more State approvals. According to the court, the ratification would then be complete. Yet, more States may have taken back their approvals by that time.

There is no logical reason or constitutional provision to justify not allowing rescission, those who oppose this privilege hope to accomplish their objectives by delaying any decisions until the whole issue is exacerbated by three more ratifications, thus allowing exigency to supplant logic and fairness.

Article V of the Constitution must not be contorted to justify congressional tampering with amendment proposals after they are already presented to the States. The Founding Fathers would roll over in their graves if they knew we intended to interpret article V in a manner to permit the amending process to go as follows: with a two-thirds vote of Congress, we could offer proposals to the States for ratification, gain nearly all the ratifications necessary, then allow a congressional majority and the President to change the terms, and finally proceed to conclude the ratification disallowing any reconsideration by the States which adopted the previous proposal.

The proponents of extension argue that the heightened awareness now prevalent justifies more time for consideration. The States necessary to pass the amendment have rejected it within the past 7 months. In effect, the proponents argue that extended time for debate

should be granted to States which have acted within the past 7 months, but not to those who have been unable to act for a substantial part of the last 7 years. If the increased awareness about the amendment were the result of a heightened need for the amendment, it certainly is not indicated by the current trend, a trend which shows diminishing ratifications with increasing rescissions.

The past 7 years has shown an attitudinal change in all branches of Government. The Equal Employment Opportunity Act of 1972 protects against salary discrimination. The Federal Equal Credit Opportunity Act of 1975 prohibits discrimination in granting consumer credit. The Higher Education Act of 1972, the Nurse Training Act and the Comprehensive Health Manpower Act of 1971, the Higher Education Act including title IX and the Equal Educational Opportunities Act which extended title VII of the Civil Rights Act which were both passed in 1972, the Comprehensive Employment and Training Act of 1973, and a similar array of State statutes accomplish the precise objectives supposed to have been the intent of the ERA. Moreover, these laws will not require a surreptititous abuse of constitutional powers and privileges as we see in the ERA extension proposal.

The judiciary has consistently held that the Constitution as amended adequately protects the rights of women. Teed against Reed, Frontiero against Richardson, Taylor against Louisiana, Weinberger against Wiesenfeld, Stanton against Stanton, Craig against Boren, Califano against Goldfarb, Owens against Brown, all uphold that the rights to be extended to women through the ERA, do in fact, already exist.

More than ever ERA has come to mean exceptionally redundant and ambiguous. If its proponents are concerned with an imperfect constitution, this amendment will do more to extend that imperfection than to improve it. As legislators, one of the first things we become painfully aware of is, "The principle of unforeseen consequences." There are enough difficulties arising out of clear and solid legislation, properly enacted, that we need not promote the passage of ambiguous statutes through constitutionally questionable means.

I have seen a number of badges and stickers which say, "The ERA Won't Just Go Away" and I think we had better heed that warning. If passed without fairness and proper observance of constitutional rules, rules interpreted with an intent to insure democratic fairness of choice, some day we will be haunted by that message, that ERA just will not go away. The petty and irrelevant arguments we now hear may seem a bit more biting when we have to live with what we have done. People will become bitterly aware of the tactics used in the passage of this bill. It will permeate in the public a distrust and ill confidence that could haunt every future attempt at amending the Constitution. The amendment process was designed to be accomplished with a "contemporanious concensus" of both Congress and the necessary States. If we determine that the Congress has the power at any time to reconsider or change the provisions, but the States only have the option to approve, and then to remain silent hostages regardless of what changes are made, then we may as well title the 27th amendment the last amendment.

Chief Justice John Marshall in what is historically known as the most famous decision ever handed down by the Supreme Court, recognized the faultiness of passing legislation which abuses the same principles we hope to achieve. In Prof. William Van Alstyne's analysis of Marbury against Madison we read:

Marshall initially responds to this question, which, of course, is the issue which has made the case of historic importance, by posing his own rhetorical question, "whether an act repugnant of the Constitution can become law of the land." That it cannot is clear, he says, from the following considerations.

The people in an exercise of their "original rights" established the government pursuant to a written Constitution which defines and limits the powers of the legislature. A "legislative act contrary to the Constitution is not law," therefore, as it is contrary to the original and Supreme will which organized the legislature itself.

The fundamental principle of constitutional government is that no end is ever more important than the observance of fair and proper means of achievement. Extension without rescission will not in itself create justice for women or society, but does an injustice to the whole concept of constitutional law.

Why attempt to achieve equality and fairness through a process that denies that fairness? Why add one's wishes to the Constitution by subverting its principles? What strength is added to the women's cause if in adding the amendment to the Constitution they prove that the document can be contorted to mean whatever someone would like it to mean for the expedience of meeting personal objectives. If there is a need for the ERA to be part of the Constitution, there is a constitutionally acceptable way of doing it with fairness. Trying any other way to pass an amendment is about as practical as deciding to sell the horse to buy a buggy.

I have pioneered legislation called the Hostage Relief Act which was introduced on October 28, 1977, to allow acceptance of rescissions by States who have already approved ERA such as in Idaho, Nebraska, Tennessee, Kentucky.

Since then key members of the Judiciary Committee in response to pressure for extension of time for ERA consideration have come to support the premise of my amendment particularly when provisions of a contract are changed, such as extension would entail, which should provide for reaffirmation or declination by the principal parties.

The Railsback amendment before us is a modified application of my Hostage Relief Act which I strongly support and which should be passed as the fair play amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. RAILSBACK).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. RAILSBACK. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 196, noes 227, not voting 9, as follows:

[Roll No. 704]

NOT VOTING—9

Caputo	Lloyd, Tenn.	Sisk
Daniel, Dan	Risenhoover	Teague
Le Fante	Shipley	Young, Alaska

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, with Mr. Le Fante against.

Mrs. Lloyd of Tennessee for, with Mr. Shipley against.

Mr. DENT changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. VOLKMER

Mr. VOLKMER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VOLKMER: On page 2, following line 2, insert the following new section:

"SEC. 2. The Administrator of the General Services Administration shall certify to each member of the Senate and the House of Representatives all resolutions of ratification of this amendment as received from the several States for final determination by the Congress as to whether the amendment shall have been adopted."

Mr. VOLKMER. Mr. Chairman and members of the committee, I offer this amendment solely for the purpose of establishing in the record the provisions of the amendment. Later on, after I have a colloquy with the chairman of the subcommittee, the gentleman from California, (Mr. EDWARDS), on this I plan to ask unanimous consent to withdraw the amendment.

At this time I would like to ask the gentleman from California (Mr. EDWARDS) whether the gentleman has had time to examine the amendment?

Mr. EDWARDS of California. Mr. Chairman, if the gentleman will yield, I have examined the gentleman's amendment, yes.

Mr. VOLKMER. The provisions of the amendment which would provide that the administrator of the General Services Administration would in the future certify ratifications from the States themselves to Members of the House and Senate, is that the provision that will be followed with or without the amendment?

Mr. EDWARDS of California. That is correct. The amendment is actually unnecessary because the law would permit and would allow it on any controversial amendment, any amendment about which there is any controversy the matter would have to be submitted to the Congress for a vote by the GSA Administrator.

Mr. VOLKMER. So that the General Services Administrator then would not make the final determination on the issue?

Mr. EDWARDS of California. That is correct.

Mr. VOLKMER. Mr. Chairman, I ask unanimous consent that I may be permitted to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

Mr. BUTLER. Mr. Chairman, reserving the right to object, if I may have the attention of the gentleman from California (Mr. EDWARDS) is it the view of the gentleman from California that the proposed amendment, which the gentleman has asked to have withdrawn, that the proposed amendment is a restatement of the existing law and therefore is unnecessary?

Mr. EDWARDS of California. Mr. Chairman, if the gentleman will yield, not exactly, it is more what actually happens where there is a controversial amendment. Where amendments are so simple that there is no question about their ratification, then the General Services Administrator would just publish it in the Federal Register.

Mr. BUTLER. Further reserving the right to object, Mr. Chairman, would it be fair to state that the equal rights amendment is a controversial amendment within the meaning of the explanation the gentleman has just given?

Mr. EDWARDS of California. Yes, that is correct.

Mr. BUTLER. Further reserving the right to object, would it be the understanding of the gentleman from California (Mr. EDWARDS) that it is now the responsibility of the Administrator of the General Services Administration to take each resolution that is received by the Administrator and forward it immediately to the Congress for its consideration? Is that the gentleman's understanding?

Mr. EDWARDS of California. No, that is not my understanding.

Mr. BUTLER. Is that not what this amendment does?

Mr. VOLKMER. If the gentleman will yield, Mr. Chairman, I would say that even though the amendment would make such a provision, it is my understanding from talking to the gentleman from California (Mr. EDWARDS) and the gentlewoman from New York (Ms. HOLTZMAN) that when the 38 States had ratified, at that time the Administrator of GSA would notify the Congress by sending a list of the States that had ratified, along with a list of the States than had rescinded. Then that particular Congress would be requested to take action by the Administrator of the GSA as to whether or not there had been contemporaneous ratification by the States.

Mr. BUTLER. Further reserving the right to object, it is the gentleman's understanding, then, that we have no right, as a Congress, at this point to know what the Administrator of the General Services Administration is thinking about the resolutions that have come to him?

Mr. VOLKMER. If the gentleman will yield further, as I understand it, the Administrator of GSA is merely a ministerial person. He receives the ratification certificates from the States and files them. He also receives rescission certificates and files those, and anybody can get copies of them.

Mr. BUTLER. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

Mr. RHODES. Reserving the right to object, Mr. Chairman, I would like to ask the gentleman from Missouri (Mr. VOLKMER), who offered the amendment, a question.

I am at a loss to understand what the gentleman had in mind. As far as I can tell, this amendment would require the GSA Administrator to certify to the Members of the Congress whether or not a State had properly ratified. However, the second part of the amendment seems to indicate that then the Congress, by some means, can finally determine whether the ratification was, in fact, proper.

If the gentleman really intends for the Congress to have final determination, should not the Administrator certify the matter to the Speaker of the House?

Mr. VOLKMER. If the gentleman will yield, Mr. Chairman, I am sure that if past procedures are followed by the Administrator of the GSA, he will certify to either the Clerk of the House

or the Speaker and also either to the majority leader or to the clerk of the Senate as to the ratifications then received.

Mr. RHODES. Mr. Chairman, I do not intend to object because I think the amendment is meaningless anyway.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

● Mr. VOLKMER. Mr. Chairman, what I have brought out with this colloquy between myself and the gentleman from California (Mr. EDWARDS) is simply this: the proponents admit that this resolution, House Joint Resolution 638, is not binding upon a later Congress and not a final positive action. Proponents admit that they will permit a later Congress to determine whether the ratification occurring within the extended period under this resolution was contemporaneous.

The constitutional amendment procedure under article V requires an orderly process to be followed by the Congress in proposing a constitutional amendment and the State legislature or State convention in ratifying it. In order for the procedure to be orderly, there must be binding, final and positive action by both the Congresss and the States in their respective parts.

The actions we take today are not binding and final. Admittedly, there is no finality of action and there is disruption of the process.

The 92d Congress proposed the equal rights amendment, House Joint Resolution 208. That Congress made a determination that 7 years was a reasonable time in which the States were to act and provided a period of contemporaneous ratification. This period could not be reduced or withdrawn by any later Congress and if three-fourths of the States ratify within that period, the amendment will become a part of the Constitution without any further action of a later Congress. In fact, no later Congress can make a decision in regard to the reasonableness of the time period in that amendment even if there were States that had rescinded ratification because article V does not permit rescission. Rescission is not permitted because, not only does there have to be a final positive action by Congress, but there also has to be a final positive action by the State, either by the legislature or convention in order to effect an orderly process. The States' ratification is a final and positive action and it cannot be withdrawn or conditioned but it is binding on the State as much as a proposal with the limitation is binding on the Congress.

This Congress, in extending the time period, is making a determination that a period longer than 7 years is reasonable and ratification within the extended period along with those ratifications that occurred immediately after the proposal by Congress in 1972 are contemporaneous and within a reasonable time. That should and must be a final positive action by this Congress which cannot be withdrawn, reduced, or conditioned in any way by any later Congress. It cannot be subjected to any Congress' later determination as to whether or not reasonable time had actually expired or contemporaneous ratification had occurred. However, the proponents now say that the Administrator of the GSA is to send the certificate of ratification to the Congress when the 38th State has ratified in order for that Congress to make the final determination. Therefore, this joint resolution is not binding on a later Congress; does not provide for a final positive action by this Congress, and is unconstitutional. It is only by a two-thirds vote on final passage that this Congress can bind a future Congress under article V as to the reasonable time period and contemporaneous ratification occurring within the extended period.

The case of Coleman against Miller addresses itself to a constitutional amendment proposal which was submitted by Congress in 1924 with no time limitation. That proposal was for the child labor constitutional amendment and since it did not have a limitation there had been no determination by the proposing Congress as to what was a reasonable time or when contemporaneous ratification had to occur. Such was the case also of the 14th and 15th amendments as well as the 19th amendment. Therefore, since there had been no prior determination of what was a reasonable time period, or, when contemporaneous ratification had to be effected by the States, a later Congress had the power to make that determination. However, where a proposing Congress makes a determination as to what is a reasonable time and if sufficient three-fourths of the States ratify within that time period, a later Congress does not have the power to determine that contemporaneous ratification has not occurred.

By the statements of the proponents in debate today, the proponents are now saying that even though this Congress is making a determination that a period to June 30, 1982, is a reasonable time and that ratification, if accomplished, is contemporaneous with others that occurred within the original time period, that is, however, conditioned upon Congress thereafter having the power to make a decision to the contrary and therefore this resolution is not a final and positive act and disrupts the constitutional amendment procedure.

The final argument in conclusion for a two-thirds requirement, is that upon reading CONGRESSIONAL RECORDS on the debate on the 7-year limitation in the present proposed amendment and the prior House and Senate debate in 1970 and 1971 leads one ultimately to the conclusion that it is very possible that House Joint Resolution 208 would not have passed the Senate by two-thirds majority without the 7-year limitation. No one will ever know this for sure but it was unable to make it without any limitation in 1970 and one of the last actions in the Senate in that year was a proposed substitute by Senator Bayh of Indiana incorporating a 7-year limitation.

Because what we are doing is not binding, is not a final action and is not part of the orderly constitutional process, I cannot support the resolution. House Joint Resolution 638, in my view, is unconstitutional and I therefore urge its defeat.●

Mr. LAFALCE. Reserving the right to object, Mr. Chairman, could the chairman of the subcommittee answer a question or two.

One of the issues that I am concerned about is clarifying whether or not the Congress or the Administrator of the GSA has the power to determine what actions of a State constitute ratification.

It is the gentleman's understanding, I believe, that it is the Congress which has that power and that the Administrator simply fulfills a ministerial function; is that correct?

Mr. EDWARDS of California. If the gentleman will yield, Mr. Chairman, that is exactly correct and has been supported historically by congressional conduct over the years.

Mr. LAFALCE. Further reserving the right to object, Mr. Chairman, while I strongly favor ERA, but oppose the extension on the grounds of possible unconstitutionality, probable mischieviousness, bad precedent, and blatant unfairness, I also believe that the supermajority requirements that seven States have are also unfair and inequitable. Further, I believe it is within the power of Congress and within the responsibility of Congress to articulate what actions of a State do, in fact, constitute ratification for purposes of our Federal Constitution. It is my judgment—and I have introduced a joint resolution—that a simple majority action of a State legislature constitutes ratification and that, therefore, the State of Illinois has already ratified, and Congress has only to so adjudge it, and that the Arkansas Legislature could, with a simple majority, ratify it. Further, the Georgia Legislature could meet and with a simple majority ratify. I am wondering whether and when we might be able to bring that question to the floor.

Mr. EDWARDS of California. That legislation is pending in the House Committee on the Judiciary and I am sure will be examined very carefully by the House Committee on the Judiciary and if found meritorious can be brought to the floor.

Mr. LAFALCE. I thank the gentleman. I hope they will, and soon.

Mr. Chairman, I would now like to explain my position more fully. I support the equal rights amendment to the U.S. Constitution. I voted for ratification of the ERA when I served in the New York State Legislature. I believe it should become part of the basic law of the land.

Yet, today, I shall vote against extending the time limit for ratification of the ERA. I take this stand for a number of reasons which I have outlined in some detail in a letter to my constituents and

in a weekly column which I prepared for publication in various local newspapers in my congressional district. Following these remarks I will submit copies of these documents, along with editorials on this subject from various publications and organizations, in hopes that my decision today will be seen in its true and proper context.

Before submitting the documents, however, I feel I should make my views known on two other issues relating to this matter.

First, prior to the final vote we were presented with a proposed amendment to permit States to rescind ratification votes. I joined the majority of our colleagues in voting against that amendment, and I am pleased that it failed, for passage of it could have created constitutional and political chaos. States might, in the future, move into and out of the "ratified" column on an amendment solely because of issues extraneous to the constitutional amendment in question, in hopes that a changed stance on the amendment might affect other matters pending between that State and the Federal Government.

Second, I would like to remind my colleagues once again of a proposal I made earlier this month to provide that any majority vote by a State's legislature, notwithstanding any State requirement for more than a majority's approval, would constitute ratification of an amendment to the U.S. Constitution submitted to the States by the Congress. I firmly believe that the question of what constitutes ratification of an amendment to the National Constitution is appropriately one that Congress can answer, and I think it is time we did just that.

Without further ado, Mr. Chairman, I submit the materials I mentioned earlier and request that they be printed in the RECORD with these remarks.

Thank you for contacting me to express your support for extension of the ratification period for the Equal Rights Amendment.

First, I strongly support the ERA. As a member of the New York State Senate in 1972 I voted for its ratification as part of our Federal Constitution. I also voted in 1974 to send it to the electorate of the State of New York to amend the New York State Constitution.

I fervently hope that the ERA will be ratified by the requisite number of states prior to March 22, 1979. If it should not be ratified by that date, I believe it would be a great setback for the cause of women's rights, and would simply impede the inevitable progress that women must and will make in their fight for equality.

Further, should the ERA regrettably not be ratified, I would be among the first to start the process over by supporting a new equal rights amendment.

However, as strongly as I feel on that, I cannot adopt the principle that the end justifies the means. That principle has always been abhorrent to me. Therefore, as much as I desire the "end" of making the ERA part of our Constitution, I cannot do that by a means that I would consider inherently unfair. It seems to me that procedural fairness requires that we abide by the seven year period that was initially established.

To be sure, the Congress that existed in 1972 did not have to establish a seven year period; but it did! And both proponents and opponents of the ERA had the exact same period of time to marshal all of their arguments and all of their forces for and against its ratification. I spoke and speak for it. I voted for it. But I do not believe that simply because we are nearing the end of that period that we can then extend the period and consider ourselves "fair" to all in the process.

Let me present an analogy. Suppose Congress has adopted an amendment prohibiting abortion except when necessary to preserve the life of the mother. Such an amendment is strongly supported by the members of the Right to Life organizations. Suppose those individuals mustered the support of 35 states and had but eight months remaining in which to ratify, and it didn't look as if they were going to make it. Further suppose that they then came to Congress, which was favorably disposed toward the right to life amendment, and asked for an extension of the period of time. Further suppose that you are amongst the group that for over six years had vigorously fought in all the states against the right to life amendment. Would you then think it fair for Congress to extend the period of time for ratification? I think not.

In closing, I'd like to draw your attention to the enclosed editorials from the League of Women Voters, the New York Times, and the New Republic, which argue for a redoubling of the effort to secure final ratification within the present time limit. This would make the extension debate moot. Most important, it would make the ERA part of the law of our land. I agree completely with these editorials. I think we can do it; I know we should try.

Best regards,

Sincerely,

JOHN J. LAFALCE,
Member of Congress.

[From the New York Times, July 4, 1978]

THE RIGHT WAY TO FIGHT FOR E.R.A.

The pressure on Congress to extend the deadline for ratification of the Equal Rights Amendment will reach a crescendo next weekend as marchers and lobbyists descend on Washington. They see their just cause as a tantalizing three states short of the 38 needed for adoption and seek a reprieve from almost certain defeat in their seven-year struggle for women's rights. But the means by which they prevail should not be subordinated even to a noble end. To alter the amendment procedures with the extension they demand would, we think, cause even greater damage than a further delay in the ratification of the E.R.A.

The very process of amending the Constitution is at stake. If the E.R.A. were given a second seven-year term for ratification by the states it would be a clear case of manipulating the process in an effort to achieve a desired result. It would be particularly damaging if such an extension were decreed by a simple majority vote, as its sponsors hope, instead of the two-thirds majority constitutionally required for amendments. If the two-thirds vote were in fact to be found, the amendment process could be started all over again, albeit for a new round of struggle, state by state.

The nation's founders wisely prescribed a slow and difficult process for amending the Constitution, to protect it from transient politics and policy. They left it to Congress to decide how long the states would be given to vote their approval on an amendment. Any retroactive change in this time schedule, because the set period did not produce a desired result, would plainly offend the solemn spirit of the amendment process.

Moreover, once the rules are bent, all forces can play the same game. The next time around, on an amendment to forbid abortion, for instance, these same marchers would deeply resent a similar maneuver. The way to judge the wisdom of a procedure is to imagine your worst enemy having the benefit of it.

Besides questions of fair play, there are also some important questions of tactics. An extension might not in fact serve the cause of those who seek it. Four of the 35 states that have already approved E.R.A. have since voted to rescind the endorsement. The validity of such rescission has not been established. If the deadline were extended, no one knows how the courts would treat past rescissions and future ones.

Other amendments have been the object of even longer and more grueling battles. It took women nearly 75 years to gain the constitutional right to vote. Amendments to abolish slavery, to guarantee due process and to extend the vote to black men could be passed only after a bloody Civil War. The E.R.A., like other just constitutional causes of the past, will eventually be adopted. If the current version lapses next March, another should soon take its place, with another, perhaps even longer but duly considered deadline for state action.

As the battle continues, let us hope it will be better fought than in recent years. The tactics against the E.R.A. in some state legislatures have been deplorable, but they could have been more ably countered. The propaganda of some opponents of the amendment has also been shabby, frightening some people into believing that the constitutional equality of the sexes would end their separation in public restrooms, or reduce widows' Social Security benefits, or force women to work outside the home or to leave their young children with caretakers. These scare stories are easier to concoct than to refute, but they, too, can be more ably countered.

Finally, there has been a more subtle problem afflicting the sponsors of the E.R.A. Although more than half the population still favors its passage, public support has declined. In part, this may be due to a feeling of reduced urgency; 16 states have adopted their own versions of the amendment, and court decisions as well as legislation have asserted some of the same rights. But the decline in support may also reflect a growing impression that the E.R.A. is some kind of elite measure designed mainly to improve the lives of highly educated women who want full-time jobs outside the home. In this view, it seems to have little to offer to poor women in routine jobs or women who intend to devote themselves fully to children and home.

We recall the ticket seller in an Albany train station who said in 1976 that she had voted against New York's referendum on a state E.R.A. Asked why, she pointed to the restrooms in the station, saying, "I didn't know what the E.R.A. meant, but I thought it was a women's libber type thing. . . . You'll probably think I'm stupid, but I'm not a women's libber at all. Except for equal pay, of course. I'm all for that.

And so, of course, is the E.R.A. But somehow that message was lost. Until the way to reassert it is found, we fear the amendment, too, will remain lost.

[From ERA Campaign Committee, League of Women Voters of the United States]

WHY NOT EXTENSION?

Pressure has been building for the League to mount a national effort in favor of the ERA time limit extension. In part this is because there is a sense of discouragement after recent losses; in part it comes from increased lobbying on the part of other groups. We still believe that the position we took in October is the correct one: the League is going to concentrate its activities on getting ERA ratified by March 22, 1979.

We believe that it is possible to ratify by March 22, 1979. At the same time, we recognize there are other options open to us if, later, ratification by the deadline no longer seems possible.

Our position on extension has been based on organizational, political and constitu-

tional considerations. The campaign we set up last summer is in full force; for us to announce we are rearranging our energies to lobby for extension would be tantamount to admitting we think we can't ratify by March of 1979. The deadline has brought us money and workers which we never were able to mobilize to such a degree in the past when the deadline was far in the future. With Leagues all over the nation committing themselves to the campaign we believe we can win.

Our political reservations about extensions are still valid. Sources in Congress continue to believe it is questionable whether there are enough votes in Judiciary to bring the measure to the floor of the House. Similar problems exist in the Senate Committee and chances are that it could not survive cloture and filibuster in the Senate. A negative vote or a narrow pass would make it look as though ERA had lost national support. In addition, extension presumes that state legislatures in unratified states will be more inclined to ratify in the future, which is somewhat doubtful.

Passage of extension would bring up serious constitutional questions about the amending process itself. Because the League is a multi-issue organization, we hesitate to advocate something which would impact on future constitutional amendments in ways that are not foreseeable. Of great concern to us is the possibility that the validity of recission would again be subject to reinterpretation. Although final judgment about recission has to be made by Congress when the full complement of ratification has been achieved, an amendment has to reflect the "roughly contemporaneous" opinion of the country's citizens. Proponents of recission would have as much stronger argument that this didn't exist toward the end of an additional seven years, and they would also have more time to rescind.

For all these reasons we believe that at this time we should devote our full energies to ratification within the original deadline, and keep our options open about what to do should that effort fail. Right now, the League will continue to devote its efforts toward ratification so that the whole question of extension will become moot.

[From the New Republic, July 29, 1978]

ERA: START FROM SCRATCH

This has become the summer of the ERA. The Equal Rights Amendment was originally scheduled by Congress to be ratified or rejected by the states after a seven year period ending on a cool day now eight months away: March 22 1979. But still three states short of the 38 needed for ratification and running out of time, the ERA was brought back to the capital in the July heat for a new lease on life. On July 9, a crowd in white sweated under the DC sun and posed a grand question: can there be a time limit on justice, the cause of equal human rights? Others in ordinary dress, both for and against the ERA, have been asking a more prosaic question: is extension of the ratification deadline for the ERA a fair or advisable procedural innovation? Sitting bleached under the TV lights in the committee room last week, opponents and proponents of the extension got their first answers from the House Judiciary Committee. Yes, there is a time limit—until June 30, 1982; but yes, the extension is fair and advisable for three and a quarter years. Proponents clapped at the results. We support the ERA, but we doubt this is the way to achieve it.

The long day of debate dealt with the constitutional procedure of extension, not the substance of ERA. Citing Supreme Court precedents and the testimony of constitutional scholars, the committee members generally agreed that Congress has the power to enact an extension of a ratification time limit that Congress itself has imposed. Here the consensus stopped. Committee members disagreed on the policy of exercising that power. Among those who supported an extension, there were three points of controversy. First, the length of the extension. How many years satisfies the vague standard that three-fourths of the states approve an amendment "contemporaneously"? Second, the issue of rescission. If states that have ratified an amendment wish to change their minds, is this merely fair play or a dangerous constitutional innovation? Third, the question of method. Must an extension be approved by the two-thirds majority required to start the amendment process, or only by a simple majority?

These procedural problems make us doubt the wisdom of extension. The controversy over procedure is not likely to be resolved easily, and it shouldn't be. It is a constitutional controversy and involves, like the ERA debate, principles we like to think are fundamentally important. But neither the constitution nor the ERA need be sacrificed to the other. If the extension passes, it may mean bad press for the ERA and a bad precedent for the constitutional process of amending. An extension could be the arbitrary time limit that ends up killing the ERA; if it fails to be ratified, even with a three-year extension—which can't be ruled out—the amendment will be dead.

Even if the ERA is ratified after an extension, its symbolic power may be diminished by general sentiment that the ratification procedure smacked of foul play, especially if rescissions are not allowed. To tamper with the constitutional amendment procedure now makes it more susceptible to tampering later, when the purpose may not appeal to liberals who want to fiddle now.

Instead of extending the ERA, why not start from scratch if its deadline expires without three more ratifications? A conservative House Judiciary Committee has passed an extension and is hopeful that it will pass a full House, even with a two-thirds majority, if the Rules Committee calls for it. This makes it hard to believe that a new ERA, unencumbered by constitutional problems, wouldn't be approved. Ratification would be a bigger project with a fresh start, but there would be more time and fewer public relations problems. Polls show that most people support the ERA on its merits. A new beginning would shift the debate back to those merits. If the ERA is an important and necessary amendment, and we feel it is, an examination of what it really means should give it the full and informed support it may now lack.

WEEKLY COLUMN: NEWS FROM CONGRESSMAN JOHN J. LAFALCE, NEW YORK

ERA, FAIRNESS, AND THE CONSTITUTION

Three-fourths of all the states must ratify any constitutional amendment following its approval by Congress. Congress passed the Equal Rights Amendment on March 22, 1972, and stipulated that the states would have seven years in which to ratify it. This seven year stipulation complied with the constitution principle that amendments to the Constitution be approved "at relatively the same period," and to "sufficiently contemporaneous" to reflect the will of the people.

The effort to enact the ERA has now raised a number of serious constitutional, legal, and policy issues which I want to address. The overall controversy centers around the merits of the ERA, whether Congress is able to and should extend the seven year period contained in the original ERA approval, and whether a state may effectively reverse a prior vote on ratification.

It is now proposed by some ERA backers that Congress extend the original seven year period for another seven years, and that when counting the number of ratifying states, ignore state legislatures that have rescinded prior ratification. This effort grows out of the fear that the additional three states (or six, if rescissions are effective) needed for ratification may not be found in the next year and a half.

As a member of the New York State Senate, on May 19, 1972, I voted in favor of ratifying the ERA to the U.S. Constitution, and on April 24, 1974, as a New York State Assemblyman, I voted in favor of adding the Equal Rights Amendment to the New York State Constitution by voting to send it to the people for referendum. Thus, I have supported the ERA.

In spite of this, I am deeply troubled that some of the other advocates of ERA are so blinded by their zeal that they are promoting a concept of the ratification process which is fundamentally unsound, unfair and potentially dangerous.

Whether the time period for ratification should be extended raises serious legal and equity questions, as does the corollary concept of counting toward ratification the votes of states which have rescinded their ratification.

The legal answers are not clear cut. Neither theory has ever been decisively used to ratify or block an amendment. Now is not the time to so taint an amendment to our Constitution nor, in my judgment, should there ever be such a time.

A Constitutional amendment needs and deserved undiluted respect; and I fear the rancor, dispute, and distrust, not to mention legal tremors which would surely follow if our procedures are not unquestionably fair and legitimate. An extension of the ratification period cannot be logically premised on a claim that seven years is inherently too short a time for ratification. The first ten amendments were ratified within 27 months, and no ratified amendment has yet taken more than four years. For the past 50 years, every potential amendment submitted to the states has had a seven year ratification limit.

When passing ERA, each state in essence said it wants the amendment if another 37 states also agree to it within the seven year period. We will be deceiving the states if we now change the rules. Even if not absolutely prohibited legally, it seems unfair to change the rules at this point in the process. Had ERA forces asked for a longer time period at the outset, it might have been granted by Congress But not now!

The frustration of believing in a cause deeply, and coming so close, is real and compelling, but we will have to live in the future with any contortions of the course of the current ERA struggle. If instead of ERA, we faced an amendment on some new type of tax or the restructuring of the nation's educational system, our focus might change. How would backers of ERA feel if they faced a decision which would be based on the same theories relied on for extending it? They would feed cheated and deceived, and would legitimately yell foul.

If the nation wants ERA, the Constitutional hurdles can be overcome, but if it does not, those in favor would do a great disservice to our Constitutional system by obtaining its passage by dubious means.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri (Mr. VOLKMER)?

There was no objection.

Mr. GARY A. MYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take a few moments here to state that I would have voted to extend this period, had the two-thirds vote prevailed as well as the Railsback amendment.

I think the most important responsibility we have today is our responsibility of providing and protecting a proper amending process for the Constitution. I believe much of what we are doing here on this measure before us could set precedences which, if fully concluded, will be used as tests on future Constitution amendments. General debate was limited to a number of Members. Some Members during that time attempted to persuade the House to vote on the basis of some political issues other than the more proper constitutional questions.

One of the political reasons put forth by some I am concerned about that may be very easy and tempting for some to embrace today was that political judgment which accuses and criticizes some States to allow some small legislative committees to tie up this issue and prevent it from being brought to the floor of their legislative bodies. Before we rush to embrace that as a reason to extend the ERA deadline, I think we ought to recognize that this very subcommittee of the Congress that is bringing this proposed extension to us had to trip over and climb over several proposals to amend the Constitution, most notably the request for a human life amendment, which were pending long before this particular action was necessary. If the question is whether the human life amendment is relative or not, we ought to look at how the House has voted each time the issue has come before us on appropriations issues and the statements made by Members during those debates. There have been a number of us who have asked that this committee and subcommittee not bottle that amendment up in the committee, and I would hope that Members of those committees would take it upon themselves to give the House the right to vote on that human life amendment the same sense that they have criticized with righteous indignation some States for allowing this issue to be bottled up in some committees of State legislatures.

I do not endorse a committee in either the House of Representatives, the other body, or in State legislatures in preventing issues which have national and respectively State importance and interest from being brought to the floor of the legislative bodies. I take this opportunity to send a message to this committee and subcommittee that I believe that in all fairness with regard to their criticisms of the State legislatures and their committees for bottling important issues in committees, these individuals and committees who are responsible for the handling of proposed constitutional amendments owe it to this House to make a commitment to bring a human life amendment to the floor and allow us to have a vote on it. To do anything less subjects them even more to the tests of their own words of criticism of their counterparts in those States which practice control by denying whole legislative bodies opportunities to vote on important issues.

Mr. SKUBITZ. Mr. Chairman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the gentleman from Kansas.

Mr. SKUBITZ. I thank the gentleman for yielding.

I want to commend the gentleman on his statement, and I associate myself with his remarks.

● Mr. SARASIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the legislation before us to allow States additional time in which to ratify the equal rights amendment. I have long supported the equal rights amendment and the principles of equality embodied in the measure. It is true that we have come a long way in providing equal status to women in employment, housing, credit, educational opportunities, and domestic relations. However, the hit or miss approach of selected legislation to assure fair treatment of the majority of our population has not neccessarily guaranteed women the rights to which they are entitled, because of inadequate enforcement, less than uniform application of laws, or oversights in drafting of bills.

Ratification of the equal rights amendment will insure the force of legal, moral, and symbolic sanction in the eradication of sex discrimination and provide a necessary impetus to the development of future legislation which will hopefully, supply the means to ending discrimination on the basis of sex in our lifetime.

We are faced with many troublesome constitutional questions in bringing this legislation to the floor for consideration. The Constitution does not directly address the problem of time limits imposed by Congress when passing constitutional amendments. Certain precedents have been established with regard to time limits both in the body of amendments and, as with the ERA, limits included in the proposing language. Though we are breaking new ground in returning to alter the time limit imposed by an earlier Congress, most constitutional experts agree that, since the 7-year limit was included only in the resolving clause of the amendment, it has no bearing on the substance of the amendment and is not related to the issue which States have been asked to consider.

Clearly, we have the authority, historically supported by action on the part of the courts and the Congress, to allow additional time for consideration of the ERA. It has been sufficiently established that Congress can, indeed should, examine the question of timeliness and appropriateness of the amendment and determine whether the issue is still contemporaneous. If it is, we have the responsibility to extend the time limit. I think the vigorous political controversy that surrounds this issue is sound evidence that the issue remains very much alive even after nearly 7 years of debate throughout our country. Recent Harris polls reveal that a majority of the American public still supports the ERA and the ERA extension, offering further testimony that this is an issue which the public does not want to see die because of a time limit which, has no constitutional foundation.

While the question of allowing States to rescind their ratification of a constitutional amendment is perhaps more difficult, especially in light of our actions on extension, we do have historical precedents with which to adequately decide the merits of such a proposal. Congress has never recognized a rescission as being valid, and the courts have consistently agreed with congressional actions. In recent weeks, many have looked to Madison for clarification on rescission and his statement that the Constitution requires adoption in toto and forever is most persuasive. Judicial precedents support this statement, and Coleman against Miller offers us the most concise ruling on rescission:

> From the foregoing and from historical precedents, it is also true that where a State has once ratified an amendment, it has no power thereafter to withdraw such ratification. To hold otherwise would make article V of the federal constitution read that the amendment should be valid "when ratified by three-fourths of the States, each adhering to its vote until three-fourths of all the legislatures shall have voted to ratify."

Nor is this the time for decisions as to the validity of rescission. It would be most inappropriate for this Congress to rule on rescission since no future Congress would be bound by our actions and would have the historical prerogative to rule on the question when they determine if the requisite number of States have ratified.

I would hope that the 95th Congress will be able to go on record as reaffirming the right to equal treatment under the law for women by passing the extension resolution and rejecting the amendment which would allow for rescission. We will, I am sure, continue to make progress in assuring equality for women, but I hope that we will begin today to demonstrate our continued commitment by allowing the strength of our convictions to be reffected in the strength of our support for this vital and necessary legislation.●

Mr. BUCHANAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will not take the 5 minutes, but I want to share with the Members one thing that explains the basis for my urging the extension of this ratification period, notwithstanding the fact that I supported the amendment of my colleague, the gentleman from Illinois (Mr. RAILSBACK), which was defeated.

Last Sunday afternoon I was waiting to board an aircraft in Birmingham, Ala., and just before I got on the flight, one of my constituents introduced me to a tall, young black American, and he said she was one of the ranking tennis players in the United States in her 14-year-old class. She, through no fault of her own, had missed her flight and had to stand by and board that flight to

make a big tennis tournament in Lincoln, Nebr. I wished her well, boarded the aircraft, sat down in my seat. Then I did what any one of you would have done. I stood up, got off the aircraft, and stood by the counter and said to my friend in private, "If she has no other seat, she shall have mine."

Why did I do that? For me it was a slight inconvenience to miss a dinner flight and take the Earlybird the next morning, but for her it was now or never for her big tournament. This is now or never for many women in the United States.

If those of us who are proponents of equal rights for women are defeated this day, we shall continue our fight, and we shall win it sooner or later. But for one out of eight women in the work force who are heads of households—70 percent of the women in the work force who are heads of households or married to husbands who earn less than $7,000 a year—and for many young women like my own two daughters, 14 and 21, it is now or never for equal rights.

Mr. Chairman, I urge the adoption of this resolution.

The CHAIRMAN. Are there any further amendments?

Mr. RYAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I yield to the gentleman from Oklahoma (Mr. JONES).

● Mr. JONES of Oklahoma. Mr. Chairman, I rise to oppose extension of the March 1979 deadline for ratification of the equal rights amendment. This extension is not necessary in my judgment and to extend this deadline will only create more confusion and legal questions. I also feel that serious constitutional questions are involved concerning any extension whatsoever.

My opposition to this extension legislation represents my decision on this particular procedural issue. It does not represent my views on the substantive subject of nondiscrimination on the basis of sex. My record against sex discrimination is clear. I have strongly opposed such discrimination as evidenced by my work for equal pay for equal work, for equal access to credit, for prohibiting sex discrimination in pension rights, for maternity insurance benefits in the workplace, and for many other issues of a similar nature.

A 7-year time period was set for ratification of the ERA. Such a time period has been sufficient for the ratification of other amendments to the Constitution. I firmly believe that the March 1979 deadline gives the remaining 15 States ample time to decide on ratification.

Fairness indicates that if time to ratify is extended, then time to rescind should also be extended. This is only fair in the same sense that nondiscrimination is justified on the basis of fairness. However, many more legal questions arise by this rescission extension. I can foresee that if this extension is granted that all we will be doing is generating scores of court tests. In the final analysis, any rescission will have to be determined by the Congress anyway.

Therefore, I will vote against any extension. The rules of the game for ratifying the equal rights amendment were set. The rules were fair. If the 7-year period does not resolve the issue, then it probably means that further clarification of an amendment is needed and Congress can take whatever action is necessary at that time. To change the rules now would be neither fair nor prudent.●

Mr. RYAN. Mr. Chairman, I may be one of the few Members on this floor that has not committed himself either way on this amendment even now.

There is one question left, which I believe needs to be considered by every single Member of this body, because this action on this question is not resolved by itself for now and no other time. This action taken in extending this ERA by three years sets a precedent, I believe, for at least many decades to come in the process of amending the Constitution. When any question is as tight as this one is, always it is a good idea for me, anyway, to review the polarity and look at it from exactly the opposite point of view.

Now, those who are in favor of extending this amendment, I have asked those people the question, "What would you do, would you support say those who are in favor of antiabortion, those who are in favor of putting an abortion amendment in the Constitution for all time, and who would come in here after 7 years and say, 'We didn't make it and may we have a 3-year extension?' Would you then support their right to the same kind of additional extension?"

I kind of doubt it. The answer I have gotten so far has been a nonanswer which consists of, "Well, we will meet that question when we come to it."

I cannot do it, because I am a Member of this House now and not later. My job is to represent as a Member of the board of directors the people who come after me, as well as now.

The question I have not yet resolved in my own mind, and I guess I will have to pretty soon, is because particular action must be taken, the question here is one of the immediacy of the moment.

There is a great deal of emotion here; but those who argue without concern for the future on action taken now will sooner or later be asked to reconsider what they did before. I do not want to be in that position.

Mr. Chairman, I yield to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Chairman, I thank the gentleman for yielding.

I can only say within the future, if such an amendment would come, I would certainly support the right of those who ask for that amendment to bring it to the floor for a vote.

Mr. RYAN. In fact, the gentlewoman is saying there is no hard rule to be given for the length of time to ratify an amendment to the Constitution.

Mrs. FENWICK. That is absolutely right. There is no length of time and any Member has a right to bring it to the floor as to whether or not that time should be extended.

Mr. RYAN. Mr. Chairman, I yield to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Chairman, I thank the gentleman for yielding.

I would just like to repeat something that I said about 10 minutes earlier; that is, as one who has spoken on the floor against abortion, I feel very strongly that the issues are two separate issues. They deserve to be treated separately.

Frankly, there has been too much equating of the equal rights amendment with the abortion issue. I think some people have distorted the issue, not perhaps intentionally. It is a separate issue. You deserve to act separately on this issue; evaluate objectively what the equal rights amendment is all about, period.

Mr. RYAN. Mr. Chairman, whatever is fair for one is fair for another, I would think.

Mr. McCLORY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, in a few moments we are going to be voting on an issue here which is unprecedented in the history of Congress. I think we should remind ourselves that the debate on the subject of equal rights without regard to the subject of sex took place on the floor of this House in 1971 and 1972.

That is not the issue tonight. The issue tonight is whether or not we shall take this unprecedented action of extending for 3 years and 3 months the time within which States may ratify. I would like to suggest that there is implicit in that period of time the right to rescind or to take some other action which may be more damaging to the cause of equal rights than that which would take place if we took no action here or if indeed we defeated this joint resolution.

It is my hope that the proposal to extend the time will be defeated. It is my hope that those who are lending their energies toward this action here today urging adoption of this resolution of extension will devote their time, instead, toward getting ratification in the 15 States which have not yet ratified. There is ample time between now and next March 22 with only three additional States needed to complete ratification.

Mr. Chairman, I think we are going to do more harm than good to the subject of equal rights by passing this measure here today. I hope the Members will vote to reject House Joint Resolution 638.

Mr. DUNCAN of Oregon, Mr. Chairman, I move to strike the last word.

Mr. Chairman, I just want to say one thing very briefly, and I will only take a minute.

I share the doubts that have been expressed very seriously by the gentleman from California and the gentleman from Illinois, but there is one unanswerable question that I have—and no one has yet been able to solve this for me—and that is whether a no vote on the next issue is grounds for divorce in the State of Oregon.

Mr. Chairman, there have been many difficult votes—the right to work, situs picketing, and others. This one, however, is unique. It is unique because it involves many difficult, undecided or fuzzily-decided constitutional principles, some so tinged with rancor and bitterness of the Civil War as to be of little help. There is no clearly marked constitutional path for us to follow.

Yet, each of us is sworn to support and defend the Constitution. I consider that to be the issue that faces us, and I consider that to be of far greater importance than the substance of the resolution. On close constitutional issues arising in the ordinary course of business, a vote either way can, arguably, satisfy the obligation of our oath. But here, what unsatisfactory precedents we find, indicate that these questions of ratification, recision and what is a reasonably contemporaneous period for expression of opinion are ours, and ours alone to decide. The Supreme Court has said that they are political decisions with which they will not interfere.

Accordingly, we cannot with any degree of certainty, look to the courts for a constitutional decision. We must make that determination. The determination we make on this issue of equal rights for women will bind us as we approach other proposals for constitutional amendments in the future. The sword we fashion today will have two edges. Today it is raised for a just cause. Tomorrow it may be raised for a cause which today's proponents oppose. It may be an anti-abortion provision, a provision to require prayers in the schools, the repeal of part or all of the Bill of Rights, or even, as the late Senator Dirksen wanted, to make the marigold the national flower.

We are not simply passing a statute. We are proposing to amend the basic organic law of the Nation that has served us so well for over 200 years. It has served us well because it has been adaptable to changing circumstances. Who could imagine that a few people, over 200 years ago, could write a few rules that would serve us so well in the 20th century. The 6th and 14th amendments do not speak in terms of limited gender. They say "all persons" are entitled to equal protection of the law. It is true that it has not always been constitutionally so interpreted with respect to women. It is also true that the trend is definitely in that direction today. It is also true that the 14th amendment for years sustained "separate but equal" schools, but Brown against Board of Education changed that. Whether the ERA passes or not, equal rights for women is already a constitutional right.

But even if what I say is not so, in my judgment it is better that the ERA go down to rise again tomorrow than that the basic structure of the Constitution be so altered and impaired. A particular substantive measure can be raised again. But the constitutional structure once impaired will never be made whole again.

I have, I believe, lived my life on the principle of equality and justice for all. I have espoused these principles in the courtroom, on the political platform, and I hope and believe in my day-to-day life.

But the supreme law of the land is defined in article VI of the Constitution as:

> This constitution, and the laws of the United States which shall be made in pursuance thereof; and all treaties made, or which shall be made, under the authority of the United States.

This resolution will not become a law of the United States because it will not be submitted to the President for his approval. It is not a treaty because no foreign power is involved. It must thus be an amendment to the Constitution, which requires, under the fifth amendment, a two-thirds vote of both Houses. I therefore supported the efforts to require its passage by a two-thirds vote, a requirement I deem necessary to comply with the Constitution.

My reading of the cases and the history of the amendatory process leads me to the conclusion that before an amendment is added it must reflect a reasonably contemporaneous expression by three-fourths of the States of their approval. Where a period of time elapses, and particularly where States that have once voted "No" but later have voted "Yes" are counted as ratifying, it seems to me to be absolutely essential to achieve that contemporaneous expression of approval, that the Congress address the question of the rights of a State to rescind its previous ratification. I, therefore, supported the Railsback amendment.

Both of these efforts to conform this resolution to the Constitution having failed, supporting as I do the objectives of the resolution, and being painfully aware of intense pressures emanating not only from the electorate but from my own family—both male and female—and from my office staff—again of both sexes—the effort required not to conform is immense. I know that there will be little agreement with what I do, but I hope that there will be a modicum of understanding of the motivations therefor.

The CHAIRMAN. Are there further amendments?

If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. PIKE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the joint resolution (H.J. Res. 638) extending the deadline for the ratification of the equal rights amendment, pursuant to House Resolution 1295, he reported the joint resolution back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. M'CLORY

Mr. McCLORY. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the joint resolution?

Mr. McCLORY. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

> Mr. McCLORY moves to recommit the joint resolution (H.J. Res. 638) to the Committee on the Judiciary.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the joint resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BUTLER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 233, nays 189, not voting 10, as follows:

[Roll No. 705]

NOT VOTING—10

Caputo	Long, Md.	Teague
Daniel, Dan	Risenhoover	Young, Alaska
Le Fante	Shipley	
Lloyd, Tenn.	Sisk	

The clerk announced the following pairs:

On this vote:

Mr. Le Fante for, with Mr. Teague against.

Mr. Shipley for, with Mrs. Lloyd of Tennessee against.

Until further notice:

Mr. Risenhoover with Mr. Caputo.

Mr. Sisk with Mr. Dan Daniel.

Mr. Long of Maryland with Mr. Young of Alaska.

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the joint resolution (H.J. Res. 638) just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 11209, INTERNATIONAL MARITIME SATELLITE TELECOMMUNICATIONS ACT

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 11209) to provide for the establishment, ownership, operation, and governmental oversight and regulation of international maritime satellite telecommunications services, with Senate amendments thereto, disagree to the Senate amendments, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from New York? The Chair hears none, and appoints the following conferees: Messrs. STAGGERS, MURPHY of New York, VAN DEERLIN, BIAGGI, and CARNEY, Ms. MIKULSKI, and Messrs. WIRTH, RUPPE, BROYHILL, and FREY.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO HAVE UNTIL 6 P.M., FRIDAY, AUGUST 25, 1978, TO FILE REPORTS ON H.R. 12603, H.R. 12959, H.R. 11658, H.R. 11861, H.R. 13372, H.R. 13745 and H.R. 13392

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may have until 6 o'clock p.m., Friday, August 25, 1978, to file its reports on the following bills:

H.R. 12603, Great Lakes Pilotage Act.

H.R. 12959, to amend the definition of the term "qualified vessel" under a Capital Construction Fund.

H.R. 11658, to amend title XI of the Merchant Marine Act, 1936, to permit the guarantee of obligations for financing Great Lakes vessels in an amount not exceeding 87½ per centum of the actual or depreciated actual cost of each vessel.

H.R. 11861, to establish a Navy-Maritime Advisory Board.

H.R. 13372, Duck Stamp Act amendments.

H.R. 13745, New Sikes Act Reauthorization for Conservation Programs on Military Reservations.

H.R. 13392, amending the Anadromous Fish Conservation Act to include fish in Lake Champlain that ascend streams to spawn.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 12927, DEPARTMENT OF DEFENSE MILITARY CONSTRUCTION APPROPRIATIONS, 1979

Mr. McKAY. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 12927) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Utah?

There was no objection.

CONFERENCE REPORT

(H. Rept. No. 95-1495)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12927) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate numbered 1, 10, 11, 12, 13, 14, 19, and 22, and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$711,509,000"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$760,145,000"; and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows; In lieu of the sum proposed by said amendment insert "$483,264,000"; and the Senate agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows: In lien of the sum proposed by said amendment insert "$60,560,000"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amend-

ment insert "$35,335,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 3, 5, 7, 8, 9, 15, 17, 20, and 21.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12927) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

ITEMS OF GENERAL INTEREST

Prefinancing of NATO infrastructure projects

The conferees agree with the House that only limited use of prefinancing of NATO infrastructure projects should be made. The House report states: ". . . the United States and the NATO allies must operate on a 'fair-share' basis which does not impose an undue or unfair burden on any individual member." Consistent with this view, the conferees agree that funding in future years for prefinanced NATO infrastructure projects will be subject to the following specifications: (1) The NATO allies must agree in advance of submission of such projects to the Congress that they are eligible for NATO funding to assure recoupment of prefinanced funds; (2) the NATO allies must agree to a repayment schedule which specifies in which NATO funding slice the amount of funds are to be repaid to the United States, and (3) the submission of projects for prefinancing must be based on military urgency which is defined in pertinent DOD directives in terms of specific criteria.

Panama Canal

The conferees agree that funding for military construction in the Panama Canal Zone should be the subject of review by the House and the Senate, but that limited prior approval reprogramming of emergency construction required for the realignment of military installations consistent with the responsibility of the United States to defend the Canal and provide for the security of U.S. personnel may be necessary before a budget amendment or supplemental could be acted on by the Congress. In such event, the requirement and emergency nature of such construction must be certified by the President of the United States before submission to the Committees on Appropriations of the House and Senate.

Competition for A&E contracts

The conferees agree with the House that a pilot test program using price as a factor in selecting A&E firms to design military facilities should be conducted. The conferees, however, feel that an adequate test could be conducted by a single service rather than by the Army, Navy, Air Force, and Defense Agencies. The conferees direct that the Army conduct this test and have set aside $5,000,000 for this purpose in Army planning and design funds.

Reprogramming criteria

The conferees concur with the Senate language on reprogramming criteria with the following exceptions: (1) The Services are to submit reprogramming requests at a 25% level instead of a 20% level recommended by the Senate, and (2) notification reprogramming for emergency construction or projects increasing in cost below the lesser of 20% or $1,000,000 is not required.

Reduction by authorization to the 5 percent contingency

The authorization conference reduced a series of Army and Navy projects based on the belief that a 5% contingency was sufficient for all types of projects. Because the Appropriations Committees also took a general reduction in the request, this reduction is not considered additive to the appropriation reduction but should be distributed by the Services consistent with authorization action.

Contingent appropriations

The conferees agree with the Senate proposal that funds provided for projects where a base realignment study is under way are contingent upon certification by the Secretary of Defense that the effort remains valid in light of final realignment decisions. These projects are so identified in the Senate report.

Other matters addressed by only one committee

The reports of the House and the Senate contain items addressed by only one committee. Unless otherwise indicated in this report, those items should be considered to be approved by the committee of conference.

PLANNING AND DESIGN

Amendment No. 1

Deletes title proposed by the House.

MILITARY CONSTRUCTION—ARMY

Amendment No. 2

Appropriates $711,509,000 instead of $628,644,000 as proposed by the House and $712,053,000 as proposed by the Senate. The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Planning and Design	+$64,400,000
Fort Carson, Colorado: Direct Support Maintenance Facility	+900,000
Fort Hood, Texas: Barracks Modernization	+7,115,000
Fort Lewis, Washington: Surgical and Obstetrical Suite Addition and Alteration	+3,307,000
Electrical Distribution System	+1,776,000
Fort Meade, Maryland: Composite Dental Facility	+1,600,000
Fort Richardson, Alaska: Engine Exhaust System	+1,974,000
Fort Bliss, Texas: Dental Clinic	+1,905,000
Fort Eustis, Virginia: Pier Utilities	+740,000
Fort Jackson, South Carolina: Energy Monitoring and Control System	+3,300,000
Sodium Lights	+234,000
Fort Knox, Kentucky: Aircraft Control Tower	+702,000
Anniston Army Depot, Alabama: Metal Finishing Facility	+7,836,000
Red River Army Depot, Texas: Quality Assurance Laboratory	+813,000
Germany, Various Locations: POMCUS Storage & Maintenance Facilities, Various	+36,922,000
General Reduction, Army	+8,900,000
Fort Bragg, North Carolina: Tactical Equipment Shop and Facilities	—386,000
Fort Campbell, Kentucky: Boiler Conversion Gas to Gas/Oil	—2,699,000
Fort Riley, Kansas: Fuel Conversion	—1,886,000
Fort Sill, Oklahoma: Fuel Conversion	—2,225,000
Fort McNair, Washington, D.C.: New Boiler	—133,000
Korea, Various: Milk Plant, K–16	—1,000,000
Germany, Various Locations: Airfield Facilities, Ansbach	—1,599,000
Aircraft Maintenance Hangars, Coleman Barracks, Mannheim	—11,981,000
Aircraft Maintenance Hangar, Buedingen	—2,864,000
Basic Load Site, Hanau	—1,204,000
Total Force Ammunition Storage, Various	—17,781,000
Ammunition Upload Facilities, Various	—13,269,000
POL Pollution Control, Various	—35,000
Pave Roads and Holding Areas, ASP 1, Vilseck	—1,622,000
Pave Roads and Holding Areas, ASP 2, Hohenfels	—875,000
Total	+82,865,000

Fort Meade, Maryland, Dental Facility

The conferees agree to appropriations in the amount of $1,600,000 for the dental clinic portion of the composite dental facility at Fort Meade, Maryland. The committee of conference directs the Army and Navy to study the feasibility that a joint facility could be constructed for the training and research portion of the proposed composite facility.

Prepositioning of Material Configured in Unit Sets (POMCUS)

The conferees agree with the concept of POMCUS in order to enhance NATO readiness. The difference between the House and the Senate concerns only who should pay for NATO operational facilities, such as POM CUS, rather than whether or not there is a requirement for specific facilities. The conferees agree to provide the Army with $36,922,000 for the construction of POMCUS facilities in Europe instead of the $56,922,000 provided by the Senate and to permit the use of $20,000,000 from recoupments or new budget authority provided above the President's request in the Defense Agencies NATO infrastructure appropriation to fund the additional portion of the POMCUS construction.

Amendment No. 3

Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree to provide $64,400,000 for planning and design, as originally proposed by the House in a separate title, instead of $67,400,000 as proposed by the Senate.

The complete text of the amendment is as follows: "1983: *Provided*, That of this amount, not to exceed $64,400,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are neces-

sary for such purposes and notifies the Committees on Appropriations for both Houses of Congress of his determination and the reasons therefor".

MILITARY CONSTRUCTION, NAVY

Amendment No. 4

Appropriates $760,145,000 instead of $683,695,000 as proposed by the House and $806,124,000 as proposed by the Senate. The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Planning and Design	+$46,300,000
Naval Academy, Annapolis, Maryland: Physical Education Center	+500,000
Commandant, Naval District Washington, D.C.: Administrative Office (NARDAC)	+1,350,000
Administrative Office (CHESDIV)	+585,000
Naval Submarine Base, New London, Connecticut: Industrial Support Facility	+4,700,000
Naval Station, San Diego, California: Machine Shop	+6,000,000
Naval Station, Adak, Alaska: Radar Air Traffic Control Facility	+1,000,000
Bachelor Enlisted Quarters Modernization	+760,000
Drainage Ditch	+240,000
Polaris Missile Facility Atlantic, Charleston, South Carolina: Missile Magazines	+6,500,000
Naval Supply Center, Oakland, California: Dust Removal	+200,000
Naval Air Test Center, Patuxent River, Maryland: Runway Upgrade	+3,100,000
Naval Supply Center, San Diego, California: POL Pipeline	+4,100,000
General Reduction, Navy	+8,200,000
Marine Corps Base, Camp Lejeune, North Carolina: Physical Fitness Center	—530,000
Naval Fuel Annex, Casco Bay, Maine: Oil Spill Prevention	—1,150,000
Naval Air Rework Facility, Jacksonville Florida: Energy Monitoring and Control System	—35,000
Naval Weapons Station, Yorktown, Virginia: Community Center	—2,800,000
Naval Station, Keflavik, Iceland: Approach Lighting	—220,000
Naval Station, Rota, Spain: Small Craft Berthing Repairs	—2,350,000
Total	+76,450,000

Data automation facilities

The conferees agree to an appropriation of $1,350,000 for the Naval Regional Data Automation Center to be located at the Washington Navy Yard in Washington, D.C. The committee of conference, however, recommends that the $2,200,000 requested for the Naval Data Automation Command headquarters be deferred and that the Navy should locate this command at an alternate location outside the National Capital Region.

Shore intermediate maintenance facilities

The conferees agree to proceed with construction of shore intermediate maintenance facilities at Naval Submarine Base, New London, Connecticut and Naval Station, San Diego, California. The conferees defer the large new shore intermediate maintenance facilities at Naval Station, Mayport, Florida and Naval Station, Pearl Harbor, Hawaii. The committee of conference notes the need for improved intermediate maintenance of Navy ships but wants the Navy to review further all of the elements associated with proceeding with the extensive facilities proposed at Mayport and Pearl Harbor.

Adak, Alaska, projects

The conferees agree to an appropriation of the full amount requested for projects at Adak, Alaska.

The conferees agree with the House that the Department and the Services should make use of military personnel to do construction at remote locations where substantial training benefits can be derived or where significant cost savings can be achieved.

Amendment No. 5

Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree to provide $46,300,000 for planning and design, as originally proposed by the House in a separate title, instead of $49,300,000 as proposed by the Senate.

The complete text of the amendment is as follows: "1983: *Provided*, That of this amount, not to exceed $46,300,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor".

MILITARY CONSTRUCTION, AIR FORCE

Amendment No. 6

Appropriates $483,264,000 instead of $461,703,000 as proposed by the House and $519,984,000 as proposed by the Senate. The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Planning and design	+$52,000,000
Robins Air Force Base, Ga.: Control contaminated water	+2,500,000
Eglin Air Force Base, Fla.: Arm-disarm pad	+815,000
Bachelor enlisted quarters	+865,000
Keesler Air Force Base, Miss.: Logistical storage and maintenance facility	+7,015,000
Access roads	+600,000
Energy monitoring and control system	+820,000
Dover Air Force Base, Del.: Aircraft corrosion control facility	+7,310,000
Malmstrom Air Force Base, Mont.: Education center	+1,200,000
Shaw Air Force Base, S.C.: Electronic countermeasure facility	+584,000
Precision measuring equipment facility	+706,000
U.S. Air Force Academy, Colo.: Library addition	+4,000,000
Decimomannu Air Base, Sardinia, Italy: Air combat maneuvering instrumentation facility	+986,000
General reduction, Air Force	+8,200,000
Wright-Patterson Air Force Base, Ohio: Air Force Museum	—2,330,000
Various locations, AFSC: Joint surveillance system	—620,000
Rhein-Main Air Base, Germany: Freight terminal	—6,550,000
Kadena Air Base, Japan: Squadron flight operations facility	—582,000
Base supply and equipment facility	—882,000
Ramstein Air Base, Germany: Hardened avionics maintenance facility	—4,000,000
Various locations, USAFE: Airfield protective shelters	—27,669,000
Minimum essential aircraft operational facilities	—7,587,000
Semihardened logistics facilities	—6,000,000
Semihardened munitions storage facilities	—8,820,000
Passive defense improvements	—1,000,000
Total	+21,561,000

Wurtsmith AFB, Michigan, Access Roads

The conferees agree with the Senate position which permits $750,000 in existing funds to be used for access roads at Wurtsmith Air Force Base, Michigan.

Rhein-Main Air Base, Germany, Open Mess

The conferees agree with the House position that the proposed officers open mess at Rhein-Main Air Base be constructed as a consolidated officer-noncommissioned-enlisted open mess of the same size proposed for the officers open mess and utilizing common kitchen and administrative facilities.

Amendment No. 7

Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree to provide $52,000,000 for planning and design, as originally proposed by the House in a separate title, instead of $55,000,000 as proposed by the Senate.

The complete text of the amendment is as follows: "1983: *Provided*, That of this amount, not to exceed $52,000,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor".

MILITARY CONSTRUCTION, DEFENSE AGENCIES

Amendment No. 8

Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which reads as follows: In lieu of the sum proposed by said amendment, insert $194,880,000. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Planning and Design	+$9,400,000
(DNA) Armed Forces Radiobiology Research Institute, Bethesda, Maryland: Animal Research Facility	+300,000
General Reduction, Defense Agencies	+1,900,000
Total	+11,600,000

NATO Infrastructure Program

The conferees concur with the authorization action to transfer funding for the infrastructure program from the Army to the Defense Agencies appropriation. The conferees agree with the House proposal to fund the infrastructure program at $90,000,000 in new budget authority. This is consistent with the House view that increased funding by the NATO allies through the infrastructure program should be made.

The conferees also agree that the additional $20,000,000 in new budget authority as recommended by the House, or the planned recoupment of $20,000,000 as proposed in the budget of prefinanced funds from NATO, may be used to offset the reduction in Army POMCUS construction funding which was reduced by a comparable amount by the conferees.

Amendment No. 9

Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree to provide $9,400,000 for planning and design, as originally proposed by the House in a separate title, instead of $11,400,000 as proposed by the Senate.

The complete text of the amendment is as follows: "designate: *Provided further*, That of the amount appropriated, not to exceed $9,400,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor".

MILITARY CONSTRUCTION, ARMY NATIONAL GUARD

Amendment No. 10

Appropriates $52,200,000 as proposed by the Senate instead of $43,500,000 as proposed by the House. The conferees have agreed to the following additions to the amounts and line items as proposed by the House:

Anchorage, Alaska:	
Combined Support Maintenance Shop alteration	+$120,000
Forsyth, Georgia:	
Brigade logistical facility	+122,000
Kaunakakai, Hawaii:	
Organization maintenance shop	+115,000
Springfield, Kentucky:	
60-person armory	+453,000
Oakgrove, Louisiana:	
60-person armory	+408,000
Vidalia, Louisiana:	
60-person armory	+404,000
Reidsville, North Carolina:	
200-person armory	+479,000
Greenville, Tennessee:	
60-person armory	+451,000
Planning and design	+2,900,000
General reduction	+3,248,000

MILITARY CONSTRUCTION, AIR NATIONAL GUARD

Amendment No. 11

Appropriates $44,750,000, as proposed by the Senate, instead of $35,800,000 proposed by the House. The conferees agreed on the following adjustments to the amounts and line items approved by the House:

Hulman Field, Indiana:	
Arm/dearm pads	+$440,000
Selfridge ANGB, Michigan:	
Avionics/weapons release facility	+550,000
Rosecrans Memorial Airport, Missouri: Aerial Port training facility	+550,000
Hancock Field, New York:	
Fuel systems maintenance dock	+580,000
Avionics/weapons release shop	+1,030,000
McGhee-Tyson Airport, Tennessee:	
Maintenance control facility	+330,000
Planning and design	+3,400,000
General reduction	+2,070,000

MILITARY CONSTRUCTION, ARMY RESERVE

Amendment No. 12

Appropriates a total of $37,100,000, as proposed by the Senate, in lieu of $26,900,000 proposed by the House. The following adjustments are applicable to levels approved by the House:

Upland, California: Expand to to 200-person center with shop	+$920,000
Miami, Florida: Expand to 400-person center w/shop, maintenance support	+1,270,000
Omaha, Nebraska:	
600-person Reserve Center w/ organizational maintenance shop	+1,942,000
Planning and design	+5,500,000
General reduction	+568,000

MILITARY CONSTRUCTION, NAVAL RESERVE

Amendment No. 13

Appropriates $21,850,000 as proposed by the Senate. The conferees agreed to the following adjustments to the $16,600,000 program recommended by the House:

Naval Air Station, Dallas, Texas: Bachelor Enlisted Quarters	+$2,600,000
Planning and design	+1,500,000
General reduction	+1,150,000

MILITARY CONSTRUCTION, AIR FORCE RESERVE

Amendment No. 14

Appropriates $13,000,000, as proposed by the Senate, in lieu of $8,900,000 as proposed by the House. The conferees agreed that the following adjustments were applicable to levels allowed by the House:

Richards-Gebaur AFB, Missouri: Short field takeoff/ landing zone	+$590,000
Carswell AFB, Texas:	
Electronic countermeasures pod shop	+310,000
Planning and design	+1,300,000
General reduction	+1,900,000

FAMILY HOUSING, DEFENSE

Amendment No. 15

Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which reads as follows: In lieu of the sum proposed by said amendment, insert $1,679,865,000. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Planning and Design	+$750,000
Defense Attache Housing	+500,000
Furnishings Budget	+6,500,000
Leasing Budget	+3,500,000
Improvements to Family Housing	−5,000,000
Maintenance Budget	−15,000,000
Total	−8,750,000

Amendment No. 16

Provides $60,560,000 for construction, Army, instead of $62,310,000 as proposed by the House and $58,695,000 as proposed by the Senate. The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Planning and Design	+$250,000
Improvements to Family Housing	−2,000,000
Total	−1,750,000

Amendment No. 17

Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment which reads as follows: In lieu of the sum proposed by said amendment, insert $33,446,000. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree to provide $33,446,000 for construction, Navy and Marine Corps, instead of $34,696,000 as proposed by the House and $43,451,000 as proposed by the Senate. The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Planning and Design	+$250,000
Improvements to Family Housing	−1,500,000
Total	−1,250,000

Naval Submarine Support Base, Kings Bay, Georgia, family housing

The conferees agree to construction of 250 family housing units at Naval Submarine Support Base, Kings Bay, Georgia. The total estimated cost for these units, $11,505,000, is to come from funds that are available in previous year family housing new construction appropriations. The conferees desire that the housing mix should consist of 18 units for officers, 20 for noncommissioned officers, and 212 for enlisted personnel in grades E–6 and below.

The conferees also direct the Navy to carefully study the use of solar energy for the new family housing units at Kings Bay. Use of solar energy for these units should be based on sound economic feasibility, including the costs of maintenance as well as the per unit capital costs.

Amendment No. 18

Provides $35,335,000 for construction, Air Force, instead of $36,585,000 as proposed by the House and $33,935,000 as proposed by the Senate. The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Planning and Design	+$250,000
Improvements to Family Housing	−1,500,000
Total	−1,250,000

Amendment No. 19

Provides $3,024,000 for construction, Defense Agencies, as proposed by the Senate instead of $2,524,000 as proposed by the House. The conferees have agreed to the addition of $500,000 to the amount proposed by the House for attache housing.

Amendment No. 20

Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which reads as follows: In lieu of the sum proposed by said amendment, insert: $1,399,400,000.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have agreed to the following additions and deletions to the amounts and line items as proposed by the House:

Furnishings Budget	+$6,500,000
Leasing Budget	+3,500,000
Maintenance Budget	−15,000,000
Total	−5,000,000

Amendment No. 21

Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which adds language establishing a floor for maintenance of real property facilities.

HOMEOWNERS ASSISTANCE FUND, DEFENSE

Amendment No. 22

Appropriates $1,500,000 as proposed by the Senate.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1979 recommended by the committee of conference, with comparisons to the fiscal year 1978 amount, the 1979 budget estimates, and the House and Senate bills for 1979, follows:

New budget (obligational) authority, fiscal year 1978	$2,977,720,000
Budget estimates of new (obligational) authority, fiscal year 1979	4,253,000,000
House bill, fiscal year 1979	3,844,887,000
Senate bill, fiscal year 1979	3,964,746,000
Conference agreement	3,880,863,000
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1978	+903,143,000
Budget estimates of new (obligational) authority, fiscal year 1979	−372,137,000
House bill, fiscal year 1979	+35,976,000
Senate bill, fiscal year 1979	−83,883,000

PERMISSION TO FILE CONFERENCE REPORT ON S. 2701, WATER RESOURCES PLANNING ACT, FISCAL YEAR 1979

Mr. MEEDS. Mr. Speaker, I ask unanimous consent that the conferees may have until midnight tonight to file a conference report on the Senate bill S. 2701, Water Resources Planning Act, fiscal year 1979.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

CONFERENCE REPORT (H. REPT. No. 95–1494)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2701) to amend the Water Resources Planning Act (79 Stat. 244, as amended), having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

"That (a) section 401(a) of the Water Resources Planning Act of 1965 (79 Stat. 244, as amended) is hereby amended by deleting the words: 'Not to exceed $6,000,000 for fiscal year 1978' and inserting in lieu thereof: 'The sum of $2,886,000 for fiscal year 1979.

"(b) Section 401(b) of the Water Resources Planning Act (79 Stat. 244, as amended) is further amended by deleting the words: 'not to exceed $2,000,000 for fiscal year 1978' and inserting in lieu thereof: 'the sum of $2,668,000 for fiscal year 1979'.

"(c) Section 401(c) of the Water Resources Planning Act (79 Stat. 244, as amended) is amended by deleting the words: 'Not to exceed the sum of $3,905,000 for fiscal year 1978 for preparation of assessments, and for directing and coordinating the preparation of such river basin plans as the Council determines are necessary and desirable in carrying out the policy of this Act: *Provided*' and inserting in lieu thereof: 'The sum of $3,179,900 for fiscal year 1979 for preparation of assessments, and for directing and coordinating the preparation of such river basin plans as the Council determines are necessary and desirable in carrying out the policy of this Act: *Provided*, That $828,900 shall be available under this subsection for preparation of the Columbia River Estuary Special Study: *Provided further*, That $308,000 shall be available under this subsection for preparation of the New England Port and Harbor Study and $135,000 shall be available for completion of the Hudson River Basin level B Study: *Provided further*, That $150,000 shall be available under this subsection for completion of Case Studies of the Application of Cost Sharing Policy Options for Flood Plain Management in the Connecticut River Basin: *Provided further*'.

"(d) Section 301(a) of the Water Resources Planning Act (79 Stat. 244, as amended) is amended by deleting the words: 'for fiscal years 1977 and 1978, $5,000,000 in such year' and inserting in lieu thereof: '$3,000,000 for fiscal year 1979".

"(e) Appropriations authorized by this Act for salary, pay, retirement, or other benefits for Federal employees may be increased by such additional or supplemental amounts as may be necessary for increases authorized by law'.

And the House agree to the same.

LLOYD MEEDS,
MORRIS K. UDALL,
BRUCE F. VENTO,
MANUEL LUJAN, Jr.,
Managers on the Part of the House.

MIKE GRAVEL,
JENNINGS RANDOLPH,
EDMUND S. MUSKIE,
PETE V. DOMENICI,
ROBERT T. STAFFORD,
Managers on the Part of the Senate.

JOINT STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill S. 2701 to amend the Water Resources Planning Act (79 Stat. 244, as amended), submit this joint statement in explanation of the effect of the language agreed upon by the managers and recommended in the accompanying conference report.

The amendment of the House to the bill of the Senate consisted of striking all after the enacting clause and substituting in lieu thereof new text which differed from the Senate bill in four significant particulars. With respect to the first significant difference, the committee of conference accepted the Senate language for subsection 1(b), except the amount authorized to be appropriated for administration of the Water Resources Council and coordination of non-Title II activities and the appraisal program was reduced from $3,328,000 in the Senate bill to $2,668,000. This action has the effect of retaining the Water Resources Council as an administrative entity; whereas, the House amendment would have abolished the Council and transferred its functions to the Secretary of the Interior.

The managers on the part of both House and Senate certainly do not intend, by inclusion of language to continue the Council, to approve the past actions of the Water Resources Council. The one-year extension of this authorization will allow the next authorization of the Water Resources Council to be addressed in the context of the establishment of a national water policy as the House and Senate consider the President's proposed water policy. This intensive review will be undertaken next year and will coincide with the expiration of the authorization contained in S. 2701.

With respect to the second and third significant differences, the committee of conference accepted the House text of subsection 1(c) which authorizes $3,179,900 to be appropriated for level B and special studies as compared to $2,871,900 in the Senate bill. This action reconciles two differences in the differing texts by accepting an amount of $308,000 included in the House amendment for the New England Port and Harbor Study which was omitted from the Senate bill and accepting an amount of $459,000 included in the Senate bill for the Great Lakes water and energy study which was omitted from the House bill.

The last significant difference is resolved by the conferees by accepting the text of the House amendment with respect to subsection 1(d) of the bill thereby retaining the amount of $3,000,000 in lieu of the amount of $5,000,000 contained in the Senate bill. In accepting this amount, the conferees take note of the fact that both the House and Senate in passing the Public Works Appropriations bill have limited this activity to the $3,000,000 level, and acceptance of the larger sum would be essentially meaningless.

LLOYD MEEDS,
MORRIS K. UDALL,
BRUCE F. VENTO,
MANUEL LUJAN, Jr.,
Managers on the Part of the House.

OLIN E. TEAGUE VETERANS' CENTER

Mr. ROBERTS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 11579) to designate the Veterans' Administration center located at 1901 South First Street, Temple, Tex., as the "Olin E. Teague Veterans' Center," with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert:

"TITLE I—NAMING OF THE TEMPLE, TEXAS, VETERANS' ADMINISTRATION CENTER FOR OLIN E. TEAGUE

"SEC. 101. The Veterans' Administration center located at 1901 South First Street, Temple, Texas, shall hereafter be known and designated as the "Olin E. Teague Veterans' Center". Any reference to such center in any law, regulation, document, map, record, or other paper of the United States shall be deemed to be a reference to the Olin E. Teague Veterans' Center.

"SEC. 102. The provisions of this title shall take effect on January 4, 1979.

"TITLE II—NAMING OF CERTAIN VETERANS' ADMINISTRATION HOSPITALS

"SEC. 201. The Veterans' Administration hospital in Tampa, Florida, shall hereafter be known and designated as the 'James A. Haley Veterans' Hospital'. Any reference to such hospital in any law, regulation, document, map, record, or other paper of the United States shall be deemed to be a reference to the James A. Haley Veterans' Hospital.

"SEC. 202. The Veterans' Administration hospital in Bedford, Masachusetts, shall hereafter be known and designated as the 'Edith Nourse Rogers Memorial Veterans' Hospital.' Any reference to such hospital in any law, regulation, document, map, record, or other paper of the United States shall be deemed to be a reference to the Edith Nourse Rogers Memorial Veterans' Hospital.

"SEC. 203. The Veterans' Administration hospital in Columbia, South Carolina, shall hereafter be known and designed as the 'Wm. Jennings Bryan Dorn Veterans' Hospital'. Any reference to such hospital in any law, regulation, document, or other paper of the United States shall be deemed to be a reference to the Wm. Jennings Bryan Dorn Veterans' Hospital.

"SEC. 204. The provisions of this title shall be effective on the date of enactment of this Act."

Amend the ttile so as to read: "An Act to designate the Veterans' Administration center located at 1901 South First, Street, Temple, Texas, as the 'Olin E. Teague Veterans' Center'; and for other purposes.".

Mr. ROBERTS (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the Senate amendments be dispensed with and that they be printed in the RECORD. I will be happy to explain them.

The SPEAKER. Is there objection to the second request of the gentleman from Texas?

Mr. HAMMERSCHMIDT. Mr. Speaker, reserving the right to object, and I will not object, I do so for the purpose of yielding to the distinguished gentleman from Texas (Mr. ROBERTS), the chairman of the Committee on Veterans' Affairs, so that he might explain the Senate amendments.

Mr. ROBERTS. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Texas.

Mr. ROBERTS. Mr. Speaker, on August 7, 1978, the House unanimously passed and sent to the other body, H.R. 11579, a bill to designate the Veterans' Administration Center at Temple, Tex., as the "Olin E. Teague Veterans' Center."

On June 20, 1977, the House unanimously passed H.R. 1678, a bill to name the Veterans' Administration hospital at Tampa, Fla., the "James A. Haley Veterans' Hospital." On the same date, the House also passed H.R. 7643, a bill to name the Veterans' Administration Hospital at Bedford, Mass., the "Edith Nourse Rogers Memorial Veterans' Hospital."

Last Friday, August 11, the other body passed H.R. 11579 with two amendments. One amendment would incorporate the provisions of H.R. 1678, naming the hospital at Tampa, for the Honorable James A. Haley. The other amendment would incorporate the provisions of the other House-passed bill, H.R. 7643, naming the VA hospital at Bedford, Mass., as the "Edith Nourse Rogers Memorial Veterans' Hospital." In addition, the other body amended the bill to include a provision naming the VA hospital at Columbia, S.C., after the former chairman of the Committee on Veterans' Affairs, the Honorable William Jennings Bryan Dorn, of Greenwood, S.C.

Mr. Speaker, the entire South Carolina congressional delegation has sponsored legislation to name the hospital in Columbia after Mr. Dorn. The veterans organizations support the proposed legislation, and I am personally pleased that the bill as amended by the other body, has recognized the great work of our former chairman in behalf of veterans and their dependents. For his great work the Veterans of Foreign Wars, at its national convention in Minneapolis, Minn., adopted a resolution that the hospital in Columbia bear Mr. Dorn's name.

William Jennings Bryan Dorn was born in Greenwood County, S.C., on April 14, 1916. He was elected to the South Carolina House of Representatives at age 22 and to the South Carolina Senate at the age of 24, becoming the youngest State senator in the history of that great State.

Although exempt from the draft as a public official, following the bombing of Pearl Harbor, he resigned his seat in the State senate and volunteered for military service. He served for 3½ years in the Army Air Corps and was one of seven brothers in service during that wartime period.

Upon his return to civilian life, Mr. Dorn was elected to the U.S. House of Representatives in 1946 where he served for 26 years on the Committees on Veterans' Affairs and Public Works and Transportation. Mr. Dorn was a member of the Committee on Veterans' Affairs for 23 years, serving as its chairman during the 93d Congress before retiring from the House.

As a member of the committee, Mr. Dorn sponsored, or cosponsored every major legislative proposal adopted by the Congress pertaining to veterans' programs. As chairman of the Subcommittee on Compensation and Pension, he was instrumental in the enactment of major compensation, DIC and pension reform measures. He labored to bring about outstanding education and training programs for veterans who served during the Korean conflict and the Vietnam era. His sensitivity to the needs of the disadvantaged helped lead to the enactment of a special program for educationally disadvantaged veterans.

Mr. Dorn provided strong leadership in helping establish the very excellent medical program for veterans we have today. A new replacement hospital is now being constructed in Columbia and Bryan Dorn, more than any other single individual, is responsible for this great new facility. He helped bring about a second veterans hospital located in Charleston. He was instrumental in helping establish the new medical school at the University of South Carolina, and his State now has two outstanding medical schools and a medical complex in Columbia that ranks among the best in the country. Veterans and nonveterans alike will benefit from Mr. Dorn's efforts in their behalf.

Mr. Speaker, I concur in the Senate amendments to H.R. 11579, and urge the adoption of the bill.

Mr. HAMMERSCHMIDT. Mr. Speaker, further reserving the right to object, I would like to express my full support for these amendments to H.R. 11579. As the chairman indicated, the House earlier passed and sent to the other body bills which would name hospitals after James Haley and Edith Nourse Rogers. My views in favor of those bills were expressed at that time, and have not changed. With respect to Hon. Bryan Dorn, I would like to associate myself with the remarks of the chairman. I knew William Jennings Bryan Dorn as a colleague in the House and on the Veterans' Affairs Committee, and was privileged to work closely with him when he was chairman of the committee. He has had a distinguished career as a public servant, as a member of our Armed Forces during a period of war, and in particular as a Member of Congress with a special dedication to the well-being of our Nation's veterans.

As such, Mr. Speaker, I strongly urge H.R. 11579 be adopted by the House, as amended.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas that the Senate amendments be considered as read and printed in the RECORD?

There was no objection.

The SPEAKER. Is there objection to the first request of the gentleman from Texas (Mr. ROBERTS)?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROBERTS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of the legislation just under consideration the Senate amendments to H.R. 11579.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

SECOND CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1979

Mr. GIAIMO. Mr. Speaker, pursuant to section 305(a), title II of Public Law 93-344, the Congressional Budget Act of

1974, and the order of the House of August 10, 1978, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the concurrent resolution (H. Con. Res. 683), revising the congressional budget for the U.S. Government for the fiscal year 1979.

GENERAL LEAVE

Mr. GIAIMO. Mr. Speaking, pending that motion, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks, and include extraneous matter, during consideration of House Concurrent Resolution 683.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from Connecticut (Mr. GIAIMO).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the concurrent resolution (H. Con. Res. 683) revising the congressional budget for the U.S. Government for the fiscal year 1979, with Mr. NATCHER in the chair.

The Clerk read the title of the concurrent resolution.

The CHAIRMAN. Without objection, the first reading of the concurrent resolution will be dispensed with.

Mr. BAUMAN. Reserving the right to object, Mr. Chairman, I do so only to ask the gentleman from Connecticut (Mr. GIAIMO) what the schedule will be for the remainder of the evening.

Mr. GIAIMO. If the gentleman will yield, Mr. Chairman, it is my intention to proceed with general debate. As the gentleman knows, we have 10 hours of general debate. I hope we will not have to use all of the 10 hours. It is our intention to proceed with general debate, and then, hopefully, to conclude general debate this evening.

I have a committee amendment which I would then offer and then would immediately move that the committee rise so that we can debate the amendment tomorrow and act on it.

Mr. BAUMAN. Mr. Chairman, I thank the gentleman from Connecticut, and I withdraw my reservation of objection.

The CHAIRMAN. Without objection, the first reading of the concurrent resolution will be dispensed with.

There was no objection.

The CHAIRMAN. Pursuant to section 305(a), title III, Public Law 93-344, of the Congressional Budget Act of 1974, the gentleman from Connecticut (Mr. GIAIMO) will be recognized for 5 hours, and the gentleman from Ohio (Mr. LATTA) will be recognized for 5 hours.

The Chair recognizes the gentleman from Connecticut (Mr. GIAIMO).

Mr. GIAIMO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of House Concurrent Resolution 683, the second budget resolution for fiscal year 1979.

I am pleased to say that the resolution, while accommodating full funding for the total range of authorized Federal programs provided in the first budget resolution, calls for substantially reduced spending and a dramatically lower deficit from what most of us expected when we convened at the beginning of the year.

The President's January budget proposals, you will recall, projected fiscal year 1979 spending of more than $500 billion and a deficit of over $60 billion. We reduced those levels significantly in the first, or target, budget resolution adopted in May. The latest analyses of agency needs and spend-out rates, coupled with restrained and disciplined congressional action on appropriation bills, now show that we can make substantial further reductions.

I intend to offer a committee amendment adjusting the resolution as reported by the Budget Committee to reflect House actions since it was reported, including passage of the Revenue Act of 1978. When so adjusted, the resolution will set a spending ceiling that is nearly $10 billion below the President's January proposals. It will project a deficit that is more than $20 billion lower, representing a slash in the deficit of more than 33 percent.

The deficit figure—despite nationwide inflation that has pushed up the costs of all Government programs and despite new Federal initiatives in such areas as urban programs, education, energy and veterans affairs—is the lowest of any deficit in the last 5 fiscal years.

I believe this represents remarkable progress in the space of a single year by a Congress too often accused of fiscal irresponsibility. Adoption of this resolution will demonstrate that we can manage the taxpayers' dollars with prudence and discipline, and it will move us solidly along the road toward a balanced budget in the 1980's.

I also believe that adoption of the resolution, with its substantially reduced outlays and deficit, is the best anti-inflation contribution that Congress can make to the Nation at this time. I believe it is in harmony with the mood and desires of the American people and consistent with the broad priorities of the great majority of Members of Congress.

I urge its adoption so that we can set in place the revenue floor and spending ceilings which are key parts of our system of budget control.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. GIAIMO. I yield to the gentleman from Oregon.

Mr. AuCOIN. I thank the gentleman for yielding.

Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Twenty-one Members are present, not a quorum.

The Chair announces that pursuant to rule XXIII, clause 2, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The committee will resume its business.

The gentleman from Connecticut (Mr. GIAIMO) is again recognized.

Mr. GIAIMO. Mr. Chairman, the second budget resolution for fiscal year 1979, when adjusted by the committee amendment, will set the following budget aggregates:

Budget authority: $561.2 billion, $7.7 billion below the first budget resolution.

Outlays: $490.5 billion, $8.3 billion below the first resolution.

Revenues: $450 billion, $2.1 billion above the first resolution.

Deficit: $40.5 billion, $10.4 billion below the first resolution.

The lower outlays result from a combination of factors including, as I have indicated, spending reestimates and congressional actions.

Updated outlay estimates based on the latest information from the executive branch now show expected savings of $5.5 billion for fiscal year 1979. That means that the full range of Federal programs authorized by the Congress and provided for in the first budget resolution can be carried out with no cutback in services at a cost that is $5.5 billion lower than estimated earlier this year.

At the same time, congressional action accounts for a reduction from the first budget resolution of $5 billion in budget authority and $2.5 billion in outlays. Much of this reduction is due to the across-the-board and other cuts in a number of House-passed and one Senate-passed appropriation bills. These cuts together total $1.9 billion in budget authority and $1.4 billion in outlays.

The revenue level is $2.1 billion above the target set in the first budget resolution due primarily to the smaller size of the tax bill adopted by the House last week and a lower revenue loss than assumed in the first budget resolution.

While no one can predict with certainty the ultimate size and shape of the tax bill after action by the other body and in conference, the committee amendment adjusts revenues to conform with the Revenue Act of 1978 as passed by the House.

The size of the Revenue Act of 1978 is $10.1 billion for fiscal 1979, compared to the first budget resolution level of $14 billion, which included a recommendation for partial rollback of social security payroll tax increases. Although there is no recommendation in the ways and means tax bill for a social security tax cut, I believe this is an issue that we should carefully consider next year.

I believe the fiscal policy in the second budget resolution is realistic and appropriate in light of today's economic conditions and those we expect in the coming fiscal year.

We have made considerable progress since recovery from the recession which began in the spring of 1975. Continued economic growth has reduced the unemployment rate from about 9 to 6.2 percent in July of this year.

But while unemployment has declined, the rate of inflation has accelerated, and the inflationary pressures remain powerful.

The Consumer Price Index jumped from 5.8 percent in 1976 to 6.5 percent last year. If the reduction in the rate of inflation for food continues, we expect a 6.9 percent annual rate of increase this year compared to last for the overall index.

The difficult challenge we face is to design a balanced fiscal policy that will sustain economic recovery and yet not create new inflationary pressures.

That is the balance the second budget resolution for fiscal year 1979 seeks to achieve. The budget committee believes that a tax reduction of the moderate proportions adopted by the House is essential to keep the recovery moving. We also believe that restraint in spending and a reduced deficit are essential to keep inflation in check. Our projections show that the fiscal policies in the resolution will enable us to reduce both the rate of inflation and unemployment next year, while promoting a reasonable 4 percent rate of growth.

The unemployment rate is expected to fall from the 5.9 percent we expect this calendar year to 5.7 percent in 1979. The inflation rate, meanwhile, is expected to decline from 6.9 to 6.7 percent. While neither reduction would be dramatic in scale, the downward direction is crucial. It is imperative that we cut both rates.

Another mix of spending and revenues could send one index or the other on an upward path. Major spending reductions would stall our steady progress in reducing unemployment. On the other hand, too much stimulus, either in spending or in the size of the tax cut, would push up the inflation rate, which to countless Americans is already intolerably high.

Furthermore, even if we wanted to risk runaway inflation by an all-out assault on unemployment through the stimulus of Federal spending, there is a serious question whether the overall jobless rate would fall as much as we would like. Economists increasingly agree that our most serious unemployment problems are structural in nature. They do not necessarily lend themselves to solution through broad fiscal stimulus, but rather to more carefully targeted programs aimed directly at those groups in which unemployment remains persistently and stubbornly high, and we have provided for these.

While outlays and the deficit in the resolution are substantially down, I want to emphasize that important Federal programs and services are in no way compromised.

The committee recommends continued support for jobs and employment training programs, including maintenance of 725,000 public service jobs. It also increases the President's request by $150 million to keep the summer youth program at the 1978 level.

The resolution recommends substantial funding for major urban initiatives including $1 billion for labor-intensive "soft" public works, $1 billion to continue the accelerated public works program, and $1 billion for supplementary fiscal assistance to States and localities.

The resolution provides $1.4 billion in outlays for new veterans' initiatives in pension, compensation, and readjustment programs.

It provides for a 25-percent increase over the estimated 1978 appropriation level for education programs, and provides for a $1.4 billion middle-income student assistance program.

It recommends $4.6 billion in additional funding for highway programs over amounts now available.

It provides an allowance of $750 million above what the House already has provided for energy programs, primarily to cover GNMA energy conservation loans for low- and middle-income families and for other energy programs.

Mr. Chairman, the congressional budget process is still a new and difficult discipline. The first budget resolution for fiscal year 1979 was adopted in the House by a margin of just four votes. The conference report was approved by a margin of only three. Nearly every affirmative vote in both instances was from the majority side of the aisle.

I would hope that more minority Members would support this second resolution.

Its lower outlay ceiling and substantially reduced deficit answer many of the stated objections of the minority to past resolutions.

We are recommending a tight budget. It should be borne in mind that the second budget resolution, under normal circumstances, is less of a policy resolution than the target resolution in the spring. Unless there are dramatic changes in economic conditions or compelling reasons to alter policy choices, the second resolution traditionally makes adjustments and reflects actions taken by the Congress since adoption of the target resolution.

This resolution fully reflects the actions taken by the House in cutting appropriation bills. We should, therefore, exercise great care, I believe, in considering any amendments that would make additional across-the-board cuts beyond those we have already adopted.

I would ask also that as we consider amendments we bear in mind that this is not a line item resolution. If we should adopt line item amendments, let us not delude ourselves that we are adopting the line items. Instead, we may well be engaging in meaningless gestures by accommodating, in the spending totals, programs that have no chance of approval by the legislative committees of the House. As I have said before, budget resolutions should not be vehicles for the "sending of political messages." The message that I believe we should be sending the American people in this or any budget resolution is that Congress can act not only with concern and compassion, but also with prudence and discipline in meeting the needs of the Nation and in managing the taxpayers' dollars.

Finally, I want to take this opportunity to pay tribute to four members of the Budget Committee who will be retiring from the House at the end of this Congress—OMAR BURLESON, of Texas; BOB LEGGETT, of California; OTIS PIKE, of New York; and DON FRASER, of Minnesota. All four have rendered diligent and valuable service to the Budget Committee and to the House. All of them have demonstrated their dedication to the budget process. We will miss them and their important contributions to our work.

I want to express my appreciation also to all of the members of the Budget Committee for their hard work and their cooperation during this budget year. In particular, I want to thank the ranking minority leader of the committee (Mr. LATTA) for his support, despite our often differing views, in working to achieve the goals of the Budget Act.

Mr. Chairman, I urge support of the resolution.

Mr. LATTA. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, at the outset I would like to echo what our chairman of the committee has said about our retirees on the Committee on the Budget. They have rendered outstanding service not only to this Congress but to the Nation and I am certain that every member of the Committee on the Budget and the Members of this Congress are going to miss them.

Mr. Chairman, I too want to thank the members of our staff for the diligent work they have done during the period of time that we have been deliberating.

I also wish to say, Mr. Chairman, that it is always a great pleasure to work with the chairman of the committee, the gentleman from Connecticut (Mr. GIAIMO) and all of the members of the committee in toto. We do have our disagreements but we disagree agreeably.

Mr. Chairman, I have served on the Budget Committee since its beginning, and during this time I have voted against every budget resolution both in committee and on the House floor because in every instance, spending and the resulting deficit were far too high. I intend to vote against this resolution as well for the very same reasons. I regret to say that the Congressional Budget Act has not proven, in my humble judgment, to be the restraint on spending which most of us had envisioned.

The record reveals that in the 5 fiscal years in which we have been subject to the Budget Act, we have increased Federal spending 82 percent and have seen the five biggest deficits in peacetime history. By the end of fiscal year 1979, we will have spent $260 billion more than we took in, just since 1974. We have in this same timespan nearly doubled the size of the Federal budget and have managed to add $356 billion to the public debt. This is not what I would call fiscal restraint.

In short, the Budget Act has not changed nor controlled the big spending habits of this Congress. We have, however, added another layer to the bureaucracy and left the impression that Congress was really doing something to control spending.

I am convinced that we can do a better job and that job can be done by placing a cap or a ceiling on total spending before we begin our work. Only in this way can we accomplish what we really want to accomplish; namely, to cut back on the growth of Federal spending.

What is particularly saddening to me is that for the past 24 years we have been systematically spending the country into bankruptcy. All you have to do is to take a look at the record. Next year we are going to have to go to $842 billion worth of public debt and that will not even get us through calendar year 1979.

We can hold the line, as I said earlier, on spending, only by ascertaining at the outset how much income we are going to have, then by agreeing not to spend any more than this amount. In effect, we are putting a cap on Federal spending before deciding how much money should go to each and every program.

Indeed, tomorrow the gentlelady from Maryland (Mrs. HOLT) will offer an amendment which does exactly this. It is the same amendment I first offered in the Budget Committee where it attracted bipartisan support. This amendment would first set a total spending ceiling; after adoption, it be in order to consider spending for individual programs. In the end, the sum of these individual programs could not exceed, that spending ceiling. Moreover this amendment provides for taxing and spending policies far more attractive than those recommended by the Budget Committee. While Mrs. HOLT will describe her amendment in more detail tomorrow, let me point out some of the things that make it a considerable improvement over the resolution now before us:

First, spending would be $10.5 billion less than the committee calls for, and budget authority in our amendment is $22.5 billion below the Budget Committee.

Second, the deficit would be $35 billion, or almost $9 billion under the committee's level. Finally, our amendment has a larger tax cut, one which—unlike the committee's recommendation—would actually reduce peoples' taxes next year. The following table spells these differences out in more detail:

FISCAL YEAR 1979 BUDGET

[Dollar amounts in billions]

Budget category	Republican amendment	Budget committee recommendation	
Revenues	$445.0	$446.8	Committee $1.8 higher.
Budget authority.	539.0	561.5	Committee $22.5 higher.
Outlays	480.0	490.5	Committee $10.5 higher.
Deficit	35.0	43.7	Committee $8.7 higher.
Public debt	833.3	842.0	Committee $8.1 higher.
Tax cuts	20.0	15.6	Republicans $4.4 higher.

If anyone is unaware of the condition of the American economy today, I would urge him to read the financial page of any good newspaper. We have double-digit inflation which exceeds that of all our major trading partners. The American dollar reaches new lows against the major foreign currencies almost on a daily basis. New capital investment and productive capacity lag far behind the rate needed to create new jobs and to keep this country competitive in world markets. Productivity has actually declined, while interest rates reach steadily upward.

Mr. Chairman, we did not get in this condition overnight. The factors which have succeeded in undermining our economy have been at work for many years, until today we have managed to at least strangle or partially strangle the goose that lays the golden egg.

For example, Mr. Chairman, since 1955 we have seen spending in this Congress increase by 592 percent, from an outlay figure of $70.9 billion to $490.5 billion. In just the last 20 years, we have seen an increase of 433 percent, from $92.1 billion to $490.5 billion.

In the last 10 years we have seen an increase of 166 percent, from $184.5 billion to $490.5 billion.

In the last 5 years, we have seen an increase of 82 percent; in the last 4 years, 50 percent; in the last 3 years, a 34-percent increase; and in the last 2 years, a 22-percent increase, from $401.9 billion to $490.5 billion.

Budget authority, which commits the Government to spending in future years, has been growing at the rate of 10.6 percent over the past 3 years.

Yes, Mr. Chairman, even in this budget resolution we see an increase of 9.7 percent, from $447 billion to $490.5 billion.

During the comparable period to which I have alluded, we have seen the national debt go from $222 billion to the projected figure I mentioned earlier of $842 billion in fiscal year 1979.

Mr. Chairman, these are startling figures, when we consider the fact that it took the first 173 years of our country's existence before we reached our first $100 billion budget, but it took Congress only 9 more years to reach $200 billion; 4 more years to reach $300 billion; and only 2 additional years to reach the $400 billion mark.

Since 1955 Federal spending has grown $422 billion, or almost 600 percent.

Mr. Chairman, we have had deficits in every one of these 24 years except 3. The interest needed to pay this debt has grown from below $5 billion per year to $48 billion, almost a tenfold increase; and the interest on the national debt is now the Government's fourth largest item in its budget and is costing more per day than all of our imported oil.

Let us look at it in another way. The Federal interest payments cost the taxpayers 8 cents per person per day in 1955. Today it is costing every American 58 cents per day.

How does this affect the man on the street? Prices have risen 150 percent during this period of time, with no end in sight. Government regulation of business has grown so rapidly that virtually every aspect of even the smallest concern is affected by the 15,000 new regulations which now flow out of Washington every year.

Mr. Chairman, these are the real reasons we are in such big trouble economically today. These policies based on more and more spending have been taking their toll. The Government has consistently encouraged consumption at the expense of thrift and savings. High taxes and higher and higher inflation have so eroded savings and investments that many retired people are now crying for mercy, when a few years ago they believed they were adequately prepared for retirement. Worse yet, we have been living off our children's credit cards and our children's children's credit cards and increasing the bill without giving the slightest thought as to how they will manage to pay in their day the current cost of Government plus the interest on the debt which grows larger every day.

What people once had to work and save for, many of today's generation demand as their birthright. The Government has given so freely of other people's hard-earned money that a whole recipient class has grown up to believe that there really is such a thing as the free lunch. The 95th Congress, like the 11 which preceded it, has made the free enterprise system a dirty word and consigned work and risk-taking to the dead-letter file. It has penalized success through the tax code and bestowed more and more benefits on those who choose not to work.

Let me expand on this last observation. The big spending liberals are constantly telling us our tax system is unfair, that it favors the wealthy at the expense of the poor. We heard these arguments just last week during debate on the tax bill. Well, this is just not the case. Instead, our tax system has become heavily weighted against the middle- and upper-middle income taxpayer. As the table below illustrates, the half of the American people earning above the median income—in 1976 that was anybody earning $9,561 or more—paid over 93 percent of all Federal taxes.

PERCENT OF TOTAL TAXES PAID BY HIGH- AND LOW-INCOME TAXPAYERS, 1971 AND 1976

Adjusted gross income class	Income level		Percent of tax paid		Average tax	
	1971	1976	1971	1976	1971	1976
Highest 10 percent	$18,034 or more	$24,971 or more	46.5	49.9	$5,324	$8,378
Highest 25 percent	$12,125 or more	$17,292 or more	70.0	72.3	3,208	4,857
Highest 50 percent	$7,292 or more	$9,561 or more	91.1	93.3	2,086	3,133
Lowest 50 percent	$7,291 or less	$9,560 or less	8.9	6.7	205	224
Lowest 25 percent	$3,291 or less	$4,372 or less	.7	.6	34	39
Lowest 10 percent	$1,270 or less	$1,707 or less	(1)	(1)	2	3

[1] Less than 0.1 percent.

Source: Tax Foundation computations based on Internal Revenue Service, Statistics of Income.

This percentage has increased in recent years because every tax bill since 1969 has given most of the cuts to the lowest income groups while ignoring the middle class. This is what I mean by tax policies which discourage savings, risk-taking, hard work, and success. If people wonder why we have such a shortage of capital investment these days, I would suggest he look at the tax laws for a big part of the answer.

We are in economic trouble but not for the reasons that the President of the United States chooses to tell us. It is not OPEC; it is not high-priced beef or pork; it is not the lawyers or the high-priced doctors that have pushed the country to the edge of an economic precipice. It is the ever growing spending of the Congress of the United States. We cannot point downtown and blame the President, whether he is Democrat or Republican, because that President, whoever he may be, cannot spend one red cent that is not first appropriated by this Congress. So the buck stops here, and I hope that before this resolution is adopted we will have another look at it. We can reduce the figures that have been alluded to by the Chairman because, frankly, I feel these are too high. When we are calling for a $44 billion deficit, I think that is much too high, and it can and must be reduced.

Mr. Chairman, I reserve the remainder of my time.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from Florida, (Mr. LEHMAN).

Mr. LEHMAN. Mr. Chairman, I rise in support of the second concurrent resolution on the fiscal year 1979 budget, but I would first like to take a moment to mention that it has been a privilege to serve on the Budget Committee with my distinguished and able chairman, BOB GIAIMO, and the other members who are leaving the House or are due to rotate off the committee this year. It's not always easy to sit on this committee. Attempts to exercise fiscal restraint, or to reorder priorities within the limits of our budgetary resources, generate strong feelings and heavy pressures. But it is much harder to be the symbol of restraint and responsibility, to represent the committee in pointing out the sometimes unfortunate budget effects of otherwise attractive legislation, to play the storm cloud at the picnic.

I believe BOB GIAIMO has done a superior job as our chairman, and in difficult times. First, our economy is at a place where we need continued economic stimulus to be sure that our recovery does not falter, but, at the same time, we must be sure that our fiscal policies do not worsen the already worrisome inflation situation. Moreover, we must continue to provide assistance to those groups, particularly the minority unemployed, who seem to have been left behind by the recovery. Second, the budget process is beyond the point where we can ask for support merely because it is new and has potential. Budgets must begin to stand on their own, and I believe this budget is an important milestone largely due to the hard work of our chairman, and the staff under his leadership.

The House, too, deserves some credit for this resolution. While I might quarrel with some specific actions, the trend has been toward prudence and restraint, and most spending and revenue measures have been well within the targets set in the first resolution.

Whatever the necessity of running deficits in periods of recovery or slack economic activity, many of the constituents I have talked to over the months of this recovery, businessmen, retired people, homemakers, or workers, have expressed concern over the size of the deficit and public debt, and over the Nation's financial future. This resolution, then, with a deficit figure much lower than most of us could have dreamed of just a few months ago, will be reassuring to such people, and show them that the House is headed in the right direction.

The deficit in this resolution, $43.7 billion, is nearly $5 billion below the latest administration estimate. It is $7 billion below the figure in the first budget resolution, and nearly $17 billion below the President's January request. And, with the amendment to be offered by the committee, to make the resolution conform to House actions since it was reported, we may well find that the deficit for fiscal year 1979 ends up below $40 billion. This would be a reduction of more than $20 billion, or one-third, below the Presidents' request, and our lowest deficit since 1974.

Mr. Chairman, this is a good budget, but we still have much to do in future years, especially if budgets, as anticipated, continue to grow more restrictive and priority decisions grow even harder. I hope my colleagues will join me in supporting this resolution and proving that we can, as the buttons say, hold the line.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. LEHMAN. I yield to the gentleman from Connecticut.

Mr. GIAIMO. Mr. Chairman, I would like to get the record straight here. Could I have the attention of the gentleman from Ohio, please?

We talk about high deficits and the free-spending Congress. I would like to suggest during the last 5 years of the Budget Committee's existence, we are coming in now with a deficit that is going to be in the low 40's, or even below, somewhat below the 40's. With a little luck, it could be.

I would like to point out that last year's deficit, which was estimated to be about $61 billion will come in somewhere in the neighborhood now with reestimates of about $51 billion.

I would like to point out that this year is the first real Carter budget. Last year's budget deficit, which was estimated at $61 billion, and which will undoubtedly come in somewhere in the neighborhood of $51 billion was the first year of President Carter's administration, but it was basically the President Ford budget, with some changes made by the new President, as you know happens in the transition period; but if we look back, this year's budgets are the former administration; and what were the budgets of the former administration, the deficits? 1978, $51 billion; 1977, $45 billion.

The CHAIRMAN. The time of the gentleman from Florida (Mr. LEHMAN) has expired.

Mr. GIAIMO. Mr. Chairman, I yield 5 additional minutes to the gentleman from Florida.

Mr. Chairman, will the gentleman yield?

Mr. LEHMAN. I yield to the gentleman from Connecticut.

Mr. GIAIMO. Mr. Chairman, in 1976, $66 billion; 1975, $45 billion.

Now, let me say that it is not quite correct to blame Congress for these huge deficits. The fact is that the administration sends up each year substantial budget requests. In some instances, Congress adds to them. In other instances, Congress deducts from them; but the administration carries an equal, if not greater burden, in the amount of expenditures made by the Federal Government.

I think that it is not quite accurate to say it is the free-spending Congress that brings this about. I would say that in most instances it is the administration which starts the request and asks for these huge expenditures of money. It is Congress which I think has exercised some restraint and discipline.

I must say that I think the new administration is to be commended in that we are really beginning to get the deficits down and that we are also getting unemployment down and that we are trying to reduce deficits with a view to having a balanced or a near-balanced budget in the early 1980's.

I do not want to get into a Republican versus Democratic situation here. I think we both have lots of time for that; but I do not want to let pass the charge that we have a free or a wild-spending Congress here. I think we are trying and I think that over the last few years we have made efforts to get a better situation here.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. LEHMAN. I yield to the gentleman from Ohio.

Mr. LATTA. Mr. Chairman, let me say to my friend, the gentleman from Connecticut (Mr. GIAIMO), that I am sure he does not dispute the fact that they cannot spend any money downtown that we do not first appropriate. The gentleman does not dispute that, does he?

Mr. GIAIMO. No, I do not dispute that.

Mr. Chairman, if the gentleman from Florida (Mr. LEHMAN) will yield further, I also know that they make some pretty handsome requests downtown from year to year in many areas, and I would say that the large deficits that I have become accustomed to in the Congress came about in the years under the last administration and not under the administration of Mr. Carter.

Mr. LATTA. Mr. Chairman, let me say, if the gentleman from Florida (Mr. LEHMAN) will yield further, that President Ford planned to present a balanced budget in fiscal year 1979, and spelled out exactly how he would do it in the last budget he submitted to Congress. When the Carter administration came in, I heard that they were going to balance the budget by 1981, but that has all been forgotten about now.

Mr. GIAIMO. Mr. Chairman, I do not quite know how Mr. Ford would have gone from an estimated $61 billion deficit in 1978 to a balanced budget in 1979 without some drastic and practically impossible actions.

Mr. DERRICK. Mr. Chairman, will the gentleman yield?

Mr. LEHMAN. I yield to the gentleman from South Carolina.

Mr. DERRICK. Mr. Chairman, in answer to the statements of the gentleman from Ohio (Mr. LATTA), I might say that when I came here, President Ford had given us a $76 billion deficit. We now have it down to $40 billion, and I will just say to the gentleman that we are doing the best we can. If he will just give us a little more time, we will work it out.

Mr. LEHMAN. Mr. Chairman, I would just like to say in the short time I have remaining that without the Committee on the Budget, even with all the deficits we still have, there would have been in my opinion a very much larger deficit. I think we have been a very constructive influence to keep the deficit from getting too far out of hand.

Mr. BURGENER. Mr. Chairman, will the gentleman yield?

Mr. LEHMAN. I yield to the gentleman from California.

Mr. BURGENER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, while we are busy patting ourselves on the back, those of us who are on the Committee on the Budget, let me just remind my colleague in the well that we might think again about what the budget and the deficit might have been without us, because the national debt 4 years ago, when this vehicle was created, was some $400 billion, and today it is close to $800 billion.

Presidents do not enact tax laws, Presidents do not appropriate dollars; Congress does it, and "there ain't no two ways about it."

Mr. LEHMAN. Mr. Chairman, I will only say briefly in answer to that that I am still not convinced by the argument of the gentleman from California (Mr. BURGENER).

The CHAIRMAN. The time of the gentleman from Florida (Mr. LEHMAN) has expired.

Mr. GIAIMO. Mr. Chairman, I yield 2 additional minutes to the gentleman from Florida (Mr. LEHMAN).

Mr. Chairman, will the gentleman yield?

Mr. LEHMAN. I yield to the chairman of the committee.

Mr. GIAIMO. Mr. Chairman, I will say that meeting the needs of the American people is a job in which both the Congress and the executive branch play a role and must play a role.

The purpose of my comments was not to cast bouquets at the Committee on the Budget. My remarks were in response to statements that were made about this dreadful or this free-spending Congress, as if Presidents did not make requests for necessary expenditures and send up budget messages and requests to Congress each and every January. I think there are very real reasons why we make these expenditures of money, and I am not faulting former President Ford for the requests that he made and which were necessary in all areas of Federal activities—in defense, in foreign aid, in education, in income security, in health, and all the rest of them. I am not faulting him at all.

I am just saying, let us not play the game of trying to create the impression in the minds of people that this is some new phenomenon of free-spending and wild-spending that Congress has developed.

I will say, in defense of the Budget Committees, that I think the Budget Committees have acted as a discipline on us, albeit not a perfect one, because the process is new and I think we have a lot to learn as to what the effects of voting for legislation is on outlays. But I think we are making a start, and I think we have exercised caution and gotten across to the Members of this body the idea of a need for discipline in our spending and a need for restraint. I do not think we have reached the "Promised Land" yet, but I do not like to leave the impression that the White House and those in the executive branch do not have anything to do with the magnitude and size of the national budget.

Mr. LATTA. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, let me say to my friend, the gentleman from Connecticut (Mr. GIAIMO), if I may refresh his memory, that one of the first acts of the Carter administration was to send down a request to add about $21 billion for CETA, public works and other so-called stimulus programs to the Ford budget. That request came to our committee. So we have had a lot of add-ons to that Ford budget by this administration and by this "stimulus" package.

Mr. GIAIMO. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Connecticut.

Mr. GIAIMO. The gentleman recalls that these took place, I think, in the third budget resolution. This was in the latter days of the Republican administration.

Mr. LATTA. The gentleman did not say "the Latta days," did he?

Mr. GIAIMO. In the later days of the Republican administration, when we were in the depths of a recession, as the gentleman will recall. And there was a need for stimulus and a need to bring the country back out of this recession and the low rate of economic growth and high employment.

Mr. LATTA. Mr. Chairman, let me say that these little add-ons added about $20 million to the deficit. I have to agree there is a function for the administration, but there is also a function for this Congress to perform, and especially the Budget Committee, and I think we can perform that function much better by putting these spending ceilings on in the beginning and saying that we are going to live with them instead of going along with the various requests which keep adding up and hoping that by the time we end up we will come out all right. That was one of the reasons we came forward with the Budget Act, in the first place, because we had these Appropriation Committees making appropriations and hoping that in the end everything would come out OK. Now we have the Budget Committee and we are doing the same thing the Appropriations Committee did. I just hope we will be able to do something about it tomorrow by adopting the figures that will be proposed by the gentlewoman from Maryland (Mrs. HOLT) and that we can make some further reductions without anybody getting seriously hurt.

Mr. Chairman, I yield 5 minutes to the gentlewoman from Maryland (Mrs. HOLT).

Mrs. HOLT. Mr. Chairman, the able chairman of our committee says that he does not want us to try to create the impression that Congress is free spending. Well, I do not think we have to try to create that impression. I think we are hearing—and I know the chairman agrees with me—day after day from people all over this country trying to reclaim their birthright to liberty. They are rising up about our wasteful spending and our high taxes. I will bet there are not 50 Members in this body who would say that their constituents want more government. Proposition 13 in California recently excited the Nation about voting to limit governments' power to tax, and we are seeing this all over the

country. It is happening back in my State of Maryland.

So tomorrow I am going to offer an amendment to the second concurrent budget resolution that will permit us to really impose some discipline on ourselves. Remember that this is the purpose of the Budget Act which we passed in 1974—to set a limit on the growth of Government. The Budget Committee, a majority of the committee, thus far has failed to exercise this responsibility. It has become an accounting operation, estimating and adding numbers to arrive at bigger budgets to accommodate everybody's wish list. And that is why I feel compelled to offer this amendment to the budget proposed by the committee. We must have some meaning in this budget process. We can make this second budget resolution the beginning of a direct and certain path toward a balanced budget.

The President, just yesterday, in Columbia, Mo., was quoted as saying that the Congress must stop the spiraling growth rate of Government.

Mr. Miller, Chairman of the Federal Reserve Bank, said before our committee that this was the only way to curb inflation and to restore confidence in our dollar.

Mr. GILMAN. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from New York.

Mr. GILMAN. I thank the gentlewoman for yielding.

Mr. Chairman, I rise in support of the amendment in the nature of a substitute which will be offered by my distinguished colleague, the gentlelady from Maryland (Mrs. HOLT) to House Concurrent Resolution 638, the second concurrent resolution on the budget, fiscal year 1979.

The gentlelady's measure is a fiscally sound, comprehensive Republican alternative budget for fiscal year 1979, representing the first year of a 5-year plan to ease Federal tax burdens and to produce a balanced budget by 1982. It is an alternative that responds to the rightful demands of the American people for relief from escalating taxes supporting wasteful and ineffective Federal programs.

To stem double-digit inflation and inordinately escalating Federal taxes which are robbing the pocketbooks of our Nation's taxpayers, this measure would accomplish the following: (1) limit the growth in Federal spending for 1979 to approximately 7.4 percent (versus 10 percent proposed by the Budget Committee); (2) cut taxes by $28 billion beginning January 1, 1979; and reduce the deficit to $35 billion ($10 billion below the Budget Committee's proposal for fiscal year 1979 of $43.7 billion).

The Holt measure is a viable alternative to those budget proposals emerging from the majority in Congress which have spelled record-high spending rates and record-high taxes. This misdirected fiscal planning only fuels inflation; inflation which was 4.8 percent in 1976, 6.9 percent in 1977, and now in 1978 has reached 10.3 percent—an increase of over 100 percent.

Under the proposal I am urging my colleagues to support, spending would increase, but at a fixed rate of approximately 7 percent which is designed to hold current levels of spending after adjusting for inflation. By adopting this approach, we are in effect saying that if the President or the Congress wants new programs then it is incumbent on them to find the money to fund those programs by cutting waste and reallocating moneys from outdated, ineffective programs.

Mr. Chairman, there are many who proclaim that rising taxes and accelerating inflation are the No. 1 enemies of the American people. Yet after identifying these two economic culprits, we are still left with the task of minimizing their deleterious effect upon the taxpayers of this Nation. Many of my colleagues and I attempted to do just that by supporting and voting for the Kemp 33-percent tax cut, and voting against previous budget resolutions containing sky-high spending and bloated deficits.

Unfortunately, however, even though the proposition 13 inspired antitax sentiment has elevated taxpayer resentment to tidal wave proportions there are still those supporting swollen budgets which in no way recognize the loud protests of this Nation's taxpayers.

Accordingly, I urge my colleagues to support the proposed amendment to be offered by the gentlelady from Maryland providing this Nation with a budget specifically designed to reduce inflation, to cut unnecessary Federal spending, and to trim the national deficit so that the scales of our Nation's economy will finally be tipped in favor of our taxpayers and hopefully will result in a balanced budget by 1982.

Mr. DERRICK. Mr. Chairman, will the gentlewoman yield?

Mrs. HOLT. I yield to the gentleman from South Carolina.

Mr. DERRICK. Mr. Chairman, I rise in strong support of the second budget resolution for fiscal year 1979, and urge all of my colleagues to vote for its passage.

A little more than 3 years ago the Budget Committee brought to the House the first budget resolution for fiscal year 1976; its action under the, then new, Congressional Budget Act. That first resolution recommended a deficit of $73.2 billion; it reflected an economy that had an unemployment rate of 8.7 percent, and which was recovering from the worst recession since the 1930's. We are now in the third year of recovery; unemployment is in the 5.5- to 6-percent range; the economy has created a record number of jobs; business investment and profits are looking better; and your Budget Committee is recommending a deficit of about $40 billion.

The economy is still not completely back on track. Inflation is too high; unemployment, especially "structural" unemployment, is too high, the rate of capital formation is too low, and our balance-of-payments position is precarious. It would be ingenuous to argue that all of the credit for the recovery, or the responsibility for the future of the economy, belongs to the budget process. We all know that fiscal policy is only one instrument of economic policy. Monetary policy, trade policy, and regulatory policy are equally important. I would argue that the fiscal policies called for in our past budget resolution have contributed significantly to the recovery. I believe that the fiscal policy called for in this resolution will help sustain the recovery. and I hope that future budget resolution will guide the economy back to full employment without igniting another round of double-digit inflation.

This is a good budget resolution. It will be made better by a budget committee amendment reflecting House action on the tax bill, and the defense and foreign aid appropriations bill. With the committee amendment the deficit will be $40.5 billion, $10.4 billion less than the first resolution, and will be the lowest deficit since fiscal 1975 and outlays of $490.5 billion, $7.8 billion less than the first resolution.

There will be some other amendments offered on the floor which purport to make major changes in your Budget Committee's recommendations. I would like to point out to my colleagues that some of these amendments would require the Ways and Means Committee to report out a new tax bill, and the appropriations Committee to report out 12 new appropriations bills and that the House and Senate act on these bills before this Congress can adjourn. I do not believe that this is realistic. Such amendments, because they demand unrealistic actions are inherently not worthy of our support. This budget resolution largely reflects actions already taken by the House; about 96 percent of the "dollars" in this resolution have already been acted on by the House. We have spent months fashioning tax and spending legislation. I do not believe we are prepared to do this work again.

This resolution restrains total Federal spending while providing for needed increases in defense, education, agriculture, jobs, veterans, and transportation programs. It provides for a large tax cut. It is a good resolution and it needs your support.

Mrs. HOLT. Mr. Chairman, our Budget Committee chairman has told us that this is a lean and austere budget. This is really not the case. We have simply reestimated the amounts that the agencies can spend. They cannot spend money as fast as we have been shovelling it out to them. Actually, a slim committee majority has reported a budget with a growth rate of almost 10 percent in fiscal year 1979. My amendment simply proposes a 7-percent growth rate, which should be enough to accommodate existing Federal programs adjusted for inflation. I am not proposing cuts in any program.

I am suggesting that we can expand less rapidly, and budget authority must be curbed. We cannot blindly go on increasing budget authority in future

years if we hope to ever control our budget.

The committee majority has proposed a phantom tax reduction which is really a tax increase. It falls far short of offsetting the increase in social security taxes and the inflationary push of people into higher tax rate brackets. Moreover, the committee uses an unrealistic inflation rate.

My substitute allows for a substantial tax reduction of $20 billion. The chairman of the Finance Committee in the other body has indicated that he wants a tax reduction significantly larger than that recently approved by the House. My budget allows for this happy possibility.

Last week, as we debated the tax bill, speaker after speaker said that we need a real tax reduction, but that it must be linked with a slowdown in the rate of the growth. This amendment really gives us the opportunity to do this.

Mr. PICKLE said in his comments:

The American people are scared to death of inflation.

Mr. YOUNG of Missouri said:

All of us sense the present mood of the Nation in favor of a reasonable tax cut and a sensible reduction in Federal spending.

Mr. BIAGGI said:

Enactment of a tax cut coupled with a concerted effort to reduce inflation must be viewed as this Nation's most important domestic priority.

The CHAIRMAN. The time of the gentlewoman from Maryland has expired.

Mr. LATTA. Mr. Chairman, I yield 3 additional minutes to the gentlewoman.

Mrs. HOLT. Mr. VANIK said:

They want tax cuts to come out of a Government which is going to spend less. . . .

The gentleman from Missouri (Mr. ICHORD) reminded us very eloquently that we cannot cut taxes without cutting spending. We cannot do either without experiencing devastating inflation. He went on to say:

We should start paying the fiddler if we continue the spending dance.

I think we got the message in all the comments Members made. The committee has reported a $44 billion deficit, which represents very little improvement from the inflationary deficit this year. My substitute would reduce the deficit further, and demonstrate that we really want to start the trend toward responsibility.

We are going to be told that we cannot accomplish this goal because of time limitations. It can be done. If we adopt this amendment, it will force us to really budget; decide how much money we anticipate receiving from a tax rate which would be more acceptable to the American people; how much we should spend; how we can reach a balanced budget.

This would then start a responsible trend in our economy and show that we are able to cope with our troubled economy and reach a balanced budget.

What greater accomplishment could we achieve before we go home to face the voters.

Mr. GIAIMO. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. MINETA).

Mr. MINETA. Mr. Chairman, first of all I would like to express my appreciation to the chairman of the Budget Committee for the leadership he has exhibited in working with all of us in trying to resolve the different problems that always are involved in putting the budget resolution together. I know that through his patience and willingness to take, I guess one might call it, input from all of us, he has been able to guide our committee through the very difficult task of coming up with a budget resolution. I wanted to express that first of all.

Second, Mr. Chairman, I rise in support of House Concurrent Resolution 683, the second concurrent resolution on the budget for fiscal year 1979.

This resolution represents the culmination of the third complete cycle of the congressional budget process. The success of this process, and the willingness of the House to support it, is an accomplishment of which the membership of this body should be especially proud. At a time when confidence in Government seems to sink lower with the release of each new public opinion poll, the vitality of the budget process should come as a welcome sign to the American voter.

Quite frankly, this second budget resolution for fiscal year 1979, which decreases the deficit by some 24 percent compared to the President's budget request last January, will be quite popular with our constituents. It responds to the sentiment for reduced expenditures, yet still provides adequate funding for important national priorities. I think this is a budget the American voters will be happy with.

House Concurrent Resolution 683 revises the first budget resolution, taking into account action taken by the House since adoption of the first budget resolution, changing economic conditions, and recent estimates of Government spending. In essence this second resolution continues the policies of the first resolution, yet suggests that we reduce budget authority by $7.3 billion and outlays by $8.3 billion. Beyond this, the committee will offer an amendment which will conform the amounts in the resolution to reflect actions taken on the floor since the committee reported the resolution. If the House accepts that amendment the deficit will be over $20 billion lower than the figure projected by the President last January, and almost $10 billion below the amount projected in the first budget resolution. Thus, House Concurrent Resolution 683 represents real progress toward reaching a balanced budget early in the 1980's.

Mr. Chairman, the budget resolution is Congress single most important statement of fiscal policy. The economic assumptions for calendar year 1979 underlying this resolution are as follows: A real GNP growth rate of 4 percent, an unemployment rate of 5.7 percent, industrial capacity utilization rate of 83.6 percent, and an inflation rate of 6.7 percent.

The economic situation we face today is one of relatively high rates of unemployment and near double digit rates of inflation. During preparation of this second budget resolution the committee heard testimony from a great number of economists and budget experts. Almost unanimously these people agreed that appropriate fiscal policy under today's conditions must sustain effective demand and encourage investment, while restraining stimulative efforts that would increase the rate of inflation. Large increases in Federal expenditures or greatly enlarged tax cuts could easily add to inflationary pressures, ultimately leading to a credit crunch which would abort the healthy pattern and level of investment now emerging.

Therefore, the committee has designed the second budget resolution to achieve two broad economic goals:

First, to maintain a healthy rate of economic growth and to move the American economy closer to full utilization of manpower and capital resources; and

Second, to achieve such a healthy rate of growth without adding to inflationary pressure in the economy.

These goals are to be accomplished by restraining expenditures to a level nearly $10 billion below the President's original budget proposals, and by a tax cut that will provide stimulus without accelerating inflation.

Mr. Chairman, despite the notable progress we have made in employment since the recession in 1975, there are groups in our society which still suffer from intolerably high rates of unemployment. During 1977, while overall unemployment fell, black unemployment rose. Among black youths in this Nation's cities, unemployment is reaching levels of 50 and 60 percent.

Recognizing the needs of these groups, this resolution recommends support for ongoing training and employment assistance programs, including maintenance of 725,000 public service jobs. It recommends support for the accelerated local public works program, and for job-creating "soft" public works.

I ask my colleagues to hold the line on these programs. We are all concerned with the fight against inflation and so we are tempted to cut these job-creating programs. This would be a short-sighted move that will contribute nothing to reducing inflation. To turn our backs on these groups now is tantamount to saying we will fight inflation with the jobs and livelihood of the black poor.

Again, I ask you to hold the line on these programs. For many people these public service jobs are the only hope they have in the fight against inflation. These are narrowly focused programs of a targeted nature. They do not create pressures in the labor market—in fact, most economists agree that if we are going to fight inflation on a long term basis, structural unemployment programs, such as these, are essential to insure that an adequate labor force will exist in the years ahead.

Finally, Mr. Chairman, I hope we can

all be guided by the underlying purpose of the congressional budget process: to insure that we in Congress assume the responsibility for the total fiscal consequences of our various actions. I rise in support of House Concurrent Resolution 683 because I want to urge every Member of Congress to assume that responsibility. A "no" vote on final passage is an indiscriminate and irresponsible vote. Nay-saying does not offer an alternative; it only sabotages the one mechanism by which each Member of Congress must take responsibility for the consequences of the many separate decisions we make.

I would urge all Members to vote in favor of the second budget resolution for fiscal year 1979 and support the congressional budget process of which it is a part.

Thank you.

Mr. LATTA. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Chairman, first of all I want to compliment the chairman of the Budget Committee. It has been a pleasure serving with him and I appreciate the evenhanded way in which he presides over this committee. I think we all work hard at trying to solve the problems, recognizing that there is a great diversity of opinion as to how to deal with budget matters.

Second, I want to indicate my support for the amendment that will be offered by the gentlewoman from Maryland (Mrs. HOLT). I think this is a vital step toward a balanced budget, a goal that many pay lip service to but find difficult to achieve.

I think it is interesting and it probably says more eloquently than words, as to our priorities that here we are dealing with a budget resolution which will have a substantial impact on what the pollsters tell us is the No. 1 concern of the American public; namely, the problem of inflation, and yet we speak to an empty Chamber and to a largely empty press gallery.

If it were not for the fact that in the chair presiding tonite is the gentleman from Kentucky (Mr. NATCHER) who, in my judgment, is the finest presiding officer in the House of Representatives, I would not believe that consideration of the budget is one of the most important activities of this body.

In assessing blame, for our present financial situation, we should recognize that there is enough to go around with varying degrees of responsibility. What we have is a legacy from previous Congresses and previous Presidents. We need to search for techniques that will bring fiscal stability to the people's business.

I remember so well the statement that we could have guns and butter, that it did not require anything in the way of increased taxes because this Nation was so rich we could afford to have both. Yet just the other day I read that the estimated cost of those guns that we were talking about at that time; namely, the Vietnam war, when finally the bill is totally in, will be in excess of $500 billion, to say nothing of the cost in human terms.

That is a figure that was probably never discussed on this floor and yet, when it is all totaled, this will be the cost to the taxpayers of the United States.

I think this points out the fact that it is vital that we begin to have a greater public dialogue on budget matters; to recognize that there are no free meals and that somebody has to pay for every government activity and for every benefit bestowed by Government.

Today my colleague, the gentleman from South Carolina (Mr. DERRICK) and I introduced an amendment to the Budget Impoundment Act that would require 5-year targets in the budget resolution. This is at least an attempt to look ahead as to what the overall cost of the programs that are started in any given year might be in the future. I think perhaps in this way we can, in part, have some public recognition that these meals are not free and if we are going to start small programs or small projects that they eventually get large and costly and must be ulimately paid for by taxpayers.

I am reminded as we go forward with the budget debate today of the statement of Senator RUSSELL LONG about public attitude toward taxes. It goes like this: "Don't tax me, don't tax thee, tax the man behind the tree."

We find the same attitude when it comes to proposals to reducing spending increases or in the debate we find that everybody is for a balanced budget. We hear it on the streets of our hometowns, people are for reducing taxes, but when it comes to their favorite program, it is, "Don't cut me, don't cut thee, cut the man behind the tree." In other words, cut somebody else's program and thereby achieve our goals.

I think we have to recognize if we really do want to achieve fiscal responsibility it is going to mean a reduction in the increases in most of the Federal programs. It seems to me that we need to adopt a long range program that would have the following elements.

First of all, we need a permanent tax reform package, particularly in the middle income brackets, to encourage productivity, capital investment and ultimately greater tax receipts.

Last week we had a start in the passage of the tax bill that had bipartisan support in the Committee on Ways and Means and on the floor.

Second, I think we need to declare a moratorium on new programs, unless the same can be financed by eliminating or reforming the existing failures.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LATTA. I yield 3 additional minutes to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Chairman, we need to bring management to the Government.

Third, I think we need to reduce gradually program aspects evaluated to be unsuccessful and/or duplicative.

During the committee hearings I asked the Director of OMB if agencies are required to prioritize their programs, and he indicated that that is the case.

I have written to several agencies and requested information about how they have done this. This information should be helpful to the Budget Committee. Today a number of Members reintroduced a bill that would require the President to rate programs as to effectiveness. This is a good step toward a better management handle for Government activities and a very essential part of reducing the expenditures of the Federal Government as a part of our gross national product.

Another value that will result from this proposed legislation, if adopted, would be that of stimulating public dialog as to what we really want in terms of Government programs, and more particularly, as to what people are willing to pay for. It is great to talk about Federal programs, but people somehow think that the "man behind the tree" ultimately is going to pay the bill.

Fourth, Mr. Chairman, I think we need to hold the majority of existing programs and funding at current policy levels. I can see no reason that expenditures for Federal programs should rise faster than our gross national product and the Consumer Price Index.

Fifth, I think we need to reform major Federal programs, such as welfare and health, to provide better management of the delivery system.

The experience in HEW where the head of the agency points out that there is anywhere from $5 billion to $7 billion that cannot really be accounted for, is indicative of the need for a better control or management of the delivery system for these services.

Sixth, we need to revise the Federal structure to coincide with the private sector in the areas of retirement and Federal wages so as to equal, but not exceed, comparable private employment.

Mr. Chairman, I think that if we could start down the road outlined herein perhaps, working together, we can achieve what the American people, in my judgment, want; and that is a responsible Government which gives them value received for their hard-earned tax dollars, which maintains the kind of economic system that rewards productivity, which encourages people to participate in the economic system and which has brought this Nation dynamic growth during the past 200 years.

Mr. GIAIMO. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman and my colleagues in the House, my distinguished colleague, the gentleman from Ohio (Mr. REGULA) has referred to the paucity of the crowd here on the floor and in the galleries. While we may lack something in quantity, we have quality here tonight for our brief discussion, and I think I can say that with unanimous agreement.

Mr. Chairman, I would like to join my colleagues in commending our chairman

for handling a difficult chore with great skill. I also commend the staff which is here. We are going to be losing one staff member to the Federal Reserve Board if the published reports are accurate. We shall miss her services. The staff has been excellent.

Mr. Chairman, I also want to commend our colleagues on the other side of the aisle. We have had a good working relationship, which has not always been evidenced by the votes on final passage. Beyond that, however, the working relationship has been good.

Mr. Chairman, let me just make a couple of points very quickly. One is the bottom line, and that is the deficit. After having in fiscal year 1978 a deficit of about $50 billion, we are coming in with a figure in the committee amendment which is down to $40 billion for fiscal year 1979. In fact, after we take further action in the House and the Senate and we have shortfalls, it will probably be below $36 billion.

That is an appreciable drop. If the Members remember where we started, the President recommended a $60 billion deficit and the Chairman of the Joint Economic Committee came in and said it would probably be $70 billion. Many of us—and I was one of them—agreed with them at that point because there were many things included and many assumptions made by the President that we did not think were realistic—hospital cost containment, and a variety of other things. We have moved from that assumption of about $70 billion down to $36 billion, and even if you include the off-budget items, we are down to roughly $70 billion in deficit.

The chances for the future, I think, depend on three things. One is restraint on the part of all of us. No. 2, what can happen in the area of defense. Can the United States and the Soviet Union mutually reach agreements that are enforceable that will permit us to have some realistic reductions in this major controllable expenditure. The third area is what can happen in the area of employment. My distinguished colleague, the gentleman from Ohio (Mr. LATTA) said that the goal of no deficit by 1981 is unrealistic. If one takes a look at where we have come from in 1978 to 1979, from about $50 billion down to $36 billion and simply project it, then we get down to an $8 billion deficit, and with a little restraint and with a little luck it seems to me that that it is not an unrealistic possibility to hope for a balanced budget in 1981. It may be that at some point, particularly in a nonelection year, we will exercise a little more restraint. I personally was one of those who voted for the Vanik-Pickle amendment. Had that amendment been adopted, we would be another $10 billion below this projection.

The distinguished gentleman from Ohio (Mr. LATTA), the minority member on the Committee on the Budget, complained that we have not been doing what we should on the Budget Committee, but the Budget Committee has not worked effectively and has not had a restraining effect at all. I would differ with him

Mr. LATTA. Will my friend yield to me?

Mr. SIMON. I yield to the gentleman from Ohio.

Mr. LATTA. I do not believe the gentleman is quoting me accurately. I think we could have done a better job. I think we could have done more of a restraining job than we have done.

Mr. SIMON. The gentleman did add that. In fact, I have in quotes that we can do a better job. There is no question—and I do not care what committee it is—we can do a better job, and I think gradually we are going to do a more effective job in the area of priorities.

Just as a matter of interest, as I was seated there, I looked at the areas where we have increased. The most areas of percentage we have decreased. The areas we have increased are energy; natural resources and environment; community and regional development; education, training, employment, and social services; health; income security; and interest. In 17 of the 19 categories we have increased. In the others we have decreased. I am talking about from 1971 to 1975 in interest we went from $19 billion to $48 billion. The big increase other than in income security, incidentally, is in health where we have gone from $14 billion to $49 billion.

I think this budget that we have is a sound proposal. As I sense the mood of the House, it will be carried and carried surprisingly not by a small margin. I am proud to be a part of this committee. I am proud to be associated with the men and women of this committee who are on the floor and in the gallery. I hope we do the responsible thing tomorrow and pass this overwhelmingly, and I hope we can come back from the conference committee with a final figure that is approximately the same as the one that will emerge from the House.

Mr. LATTA. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. DEVINE).

Mr. DEVINE. Mr. Chairman, it is nearly 8 o'clock and with less than 10 Members on the floor, this is an important resolution and if anybody bothers tomorrow to read the RECORD, I think we ought to put a few statistics in so we know what this is all about. Some of our colleagues have been patting themselves on the back and trying to create the impression that this is a conservative Congress, probably stimulated by the successful passage of proposition 13 in California.

We have an opportunity to vote on this second concurrent budget resolution tomorrow. We should keep in mind that this resolution includes an increase in Federal spending of 9.7 percent over 1978; an increase in budget authority of 12.3 percent; an increase in taxes of $11.4 billion; a budget deficit of $44 billion, and an extra tax bill of about $700 per American family.

It will result in higher rates of inflation and it includes funding for wasteful and pork-barrel programs.

The fiscal and economic policies of the Democrat-controlled Congress and the Carter administration are responsible for taxes nearing confiscatory levels. The record for the past 3 years of this Democrat-controlled Congress shows that Federal spending has increased by $122 billion, or 33 percent, over 1976. Cumulative deficits for the 3 years total a recordbreaking $140 billion.

Consumer prices have risen from an annual rate of 4.8 percent in 1976 to an annual rate of almost 11 percent. Wholesale prices have risen from an annual rate of 4.7 percent in 1976 to 11 percent.

The Holt amendment that was described by the charming gentlewoman from Maryland (Mrs. HOLT) represents the first year of a 5-year plan to gradually lower the Federal tax burden and produce a balanced budget by 1982. It contains a real tax cut of $28 billion beginning next January. It holds the rate of growth in Federal spending to 7.4 percent, and reduces the budget outlays by $10 billion.

I hope that the Members will support the Holt amendment when it is offered tomorrow.

The message from the American people is that the burdens of Government have become too great. It has eroded the earnings and savings, destroying aspirations, and crippling the ability of people to make productive, job-creating investments.

As my colleague, the gentleman from Ohio (Mr. LATTA) said, notwithstanding who is in the Congress, only the Congress can authorize, only the Congress can appropriate Federal funds and the Democrats have controlled the Congress for a quarter of a century uninterruptedly. They can take the credit or accept the blame, whichever pleases them the most.

Mr. GRASSLEY. Mr. Chairman, will the gentleman yield?

Mr. DEVINE. I yield to the distinguished gentleman from Iowa.

Mr. GRASSLEY. Mr. Chairman, I congratulate the gentleman from Ohio for his comments. I thank the gentleman for yielding.

Mr. Chairman, I rise to point out that the Senate passed a balanced budget amendment on July 31, 1978. It passed by a vote of 58 to 28. It was sponsored by the good and fiscally responsible senior Senator from Virginia. This is the first time I know in the 4 years I have been in Congress that the Senate has expressed its opinion on balanced budget amendments. Obviously, this is a result of the proposition 13 movement.

I hope we do not have any trouble with the amendment of the gentlewoman from Maryland (Mrs. HOLT), a very responsible amendment to have a balanced budget in 5 years. In fact, I am hoping that with the Senate, as liberal a body as the Senate tends to be, that we will be able to accomplish a balanced budget in less than 5 years since the Senate is now inclined to go in that direction.

So once again, I thank the gentleman from Ohio for his comments and hope as the gentleman does, that we will be able

to get a balanced budget sooner than in 5 years.

Mr. DEVINE. Mr. Chairman, I thank the gentleman from Iowa for his contribution.

Mr. Chairman, in conclusion, let me say this: When the Committee on the Budget was created, with the hope of getting a handle on spending, I think our national debt was around $400 billion. It is double that now. I think we just passed an increase in the budget of over $800 billion. I wonder where we would have been had this conservative budget committee not been created.

Mr. Chairman, I yield back the balance of my time.

Mr. GIAIMO. Mr. Chairman, I have no further requests for time.

Mr. LATTA. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, I do not intend to take a great deal of time, except to say that I do support the Holt substitute, which I think will be far more responsible than what the committee has finally produced.

In addition to that, I will offer a balanced budget amendment in the nature of a substitute along the lines of what my colleague, the gentleman from Iowa (Mr. GRASSLEY) has just suggested we might achieve.

There are three ways in which I think we can reduce expenditures or put a restraint on the increases in expenditures.

First, several General Accounting Office reports show that there is a minimum of $25 to $30 billion per year wasted through cost overruns, mismanagement, and unwarranted expenditures. We must put pressure on the various agencies to eliminate that amount of waste and inefficiency.

Second, the Congressional Budget Office estimates that for fiscal year 1979 there will again be shortfalls in the executive level of expenditures. Four to five billion dollars, they report. In other words, we go ahead and appropriate money, and they still cannot spend it as fast as we dish it out, as my colleague, the gentlewoman from Maryland (Mrs. HOLT), has already indicated.

Mr. Chairman, in current years we have had so-called shortfalls—what many of us would call savings on the expenditure side—of anywhere from $12 to $17 billion. So here again is an area where a simple restraint on increases in expenditures could be applied. If we would just trim that expenditure level to conform with those shortfalls, we would be able to bring down the expenditure level.

Additionally, there are very, very substantial unexpended balances in many of the agencies. These unexpended balances add up to billions.

So, even though we did not appropriate any dollars in this budget in certain function categories for this coming budget for 1979, many of these agencies would be able to survive very readily on just unexpended balances.

So, Mr. Chairman, I suggest that, as the Senate has recommended in its resolution on July 31, we can come to a balanced budget much more quickly, and I intend to offer that balanced budget amendment tomorrow on the floor at an appropriate time.

Let me now review that amendment in the nature of a substitute:

Amendment in the nature of a substitute to the second concurrent budget resolution by Mr. ROUSSELOT:

Resolved by the House of Representatives (the Senate concurring), That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1978—

(1) the recommended level of Federal revenues is $464,148,000,000 and the amount by which the aggregate level of Federal revenues should decrease is $29,500,000,000;

(2) the appropriate level of total new budget authority is $519,046,000;

(3) the appropriate level of total budget outlays is $464,148,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $0; and

(5) the appropriate level of the public debt is $798,300,000,000 and the amount by which the statutory limit on such debt should accordingly be increased is $300,000,000 (this figure represents off-budget agency outlays and trust fund surplus).

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1978, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):
(A) New budget authority, $127,102,000,000
(B) Outlays, $112,403,000,000
(2) International Affairs (150):
(A) New budget authority, $8,754,000,000,
(B) Outlays, $6,200,000,000
(3) General Science, Space, and Technology (250):
(A) New budget authority, $5,146,000,000,
(B) Outlays, $5,001,000,000.
(4) Energy (270):
(A) New budget authority, $9,200,000,000,
(B) Outlays, $7,100,000,000.
(5) Natural Resources and Environment (300):
(A) New budget authority, $12,900,000,000,
(B) Outlays, $11,001,000,000.
(6) Agriculture (350):
(A) New budget authority, $9,197,000,000,
(B) Outlays, $7,628,000,000.
(7) Commerce and Housing Credit (370):
(A) New budget authority, $5,386,000,000,
(B) Outlays, $2,814,000,000.
(8) Transportation (400):
(A) New budget authority, $16,200,000,000,
(B) Outlays, $16,500,000,000.
(9) Community and Regional Development (450):
(A) New budget authority, $8,500,000,000,
(B) Outlays, $9,001,000,000.
(10) Education, Training, Employment and Social Services (500):
(A) New budget authority, $22,100,000,000,
(B) Outlays, $26,600,000,000.
(11) Health (550):
(A) New budget authority, $48,600,000,000,
(B) Outlays, $46,102,000,000.
(12) Income Security (600):
(A) New budget authority, $182,394,000,000,
(B) Outlays, $150,100,000,000.
(13) Veterans Benefits and Service (700):
(A) New budget authority, $21,100,000,000,
(B) Outlays, $20,913,000,000.
(14) Administration of Justice (750):
(A) New budget authority, $4,100,000,000
(B) Outlays, $4,051,000,000;
(15) General Government (800):
(A) New budget authority, $4,098,000,000
(B) Outlays, $3,903,000,000;
(16) General Purpose Fiscal Assistance (850):
(A) New budget authority, $9,019,999,000
(B) Outlays, $9,237,000,000;
(17) Interest (900):
(A) New budget authority, $43,500,000,000
(B) Outlays, $43,500,000,000;
(18) Allowances (920):
(A) New budget authority, −$1,087,000,000
(B) Outlays, −$743,000,000
(19) Undistributed Offsetting Receipts (950):
(A) New budget authority, −$17,163,000,000
(B) Outlays, −$17,163,000,000

● Mr. LEGGETT. Mr. Chairman, the report of the House Budget Committee on the second concurrent budget resolution is now available to Members of the House. Unfortunately, my concurring views which appear in the report contain several significant typographical errors which substantially alter the thoughts I intended to express. For that reason, I wish to insert in the RECORD at this point a corrected copy of those views which address primarily the necessity for a balanced budget and for the House to hold the line on spending as set in the second resolution. As preamble to that statement, an illustration of the recent meteoric increase in the Federal debt more than illustrates the need for budgetary restraint:

Year	Gross national product	Budget receipts		Outlays (total)		Federal debt, end of year			
						Total		Held by the public	
		Amount	Percent of GNP	Amount	Percent of GNP	Amount	Percent of GNP	Amount	Percent of GNP
1956	411.0	74.5	18.1	70.5	17.1	272.8	66.4	222.2	54.1
1957	432.7	80.0	18.5	76.7	17.7	272.4	62.9	219.4	50.7
1958	442.1	79.6	18.0	82.6	18.7	279.7	63.3	226.4	51.2
1959	473.3	79.2	16.7	92.1	19.5	287.7	60.8	235.0	49.7
1960	497.3	92.5	18.6	92.2	18.5	290.9	58.5	237.2	47.7
1961	508.3	94.4	18.6	97.8	19.2	292.9	57.6	238.6	46.9
1962	546.9	99.7	18.2	106.8	19.5	303.3	55.5	248.4	45.4
1963	576.3	106.6	18.5	111.3	19.3	310.8	53.9	254.5	44.2

Year	Gross national product	Budget receipts		Outlays (total)		Federal debt, end of year

The size of the annual deficit has become, in the mind of the public, the yardstick by which to measure the shortcomings of Federal fiscal policy and programs. Why is the Federal Government committed to spending more money than it takes in, thereby making deficit politics an almost permanent feature of American Life? Although the answer may not be clear, what is certain is that Washington is no longer regarded simply as the Nation's Capital; it is also regarded as the capital of waste, bureaucratic arrogance and mismanagement, and irresponsible spending.

My 4 years on the Budget Committee have convinced me that we must balance our budget in order to restore confidence in our Government, to take a step toward the elimination of waste and mismanagement, and to restrain the continuous crunch on our credit system that has driven interest rates to all-time high levels. The best and most politically feasible way we can accomplish this goal in our highly charged, special interest oriented political environment is to make a balanced budget a constitutional requirement.

I support this resolution because within the constraints of what would pass, and in view of the outside pressures on all Members, this, perhaps, is the best we could do. The deficit has been reduced from an estimated $60.1 billion included in the President's budget submission in January and $50.9 billion targeted in the first budget resolution passed in May, to a $43.7 billion estimated deficit recommended in this resolution. Some of this reduction was accomplished through a sort of budgetary legerdemain; that is, the ingenious device of reestimates; but some of it also results from specific program decisions. That greater progress could have been made toward balancing revenue with expenditures is obvious to all of us on the Budget Committee. Yet, it is equally obvious that there is insufficient self-discipline to balance the budget without the additional leverage of a constitutional requirement.

Despite its imperfections and the frequent timidity of its proponents, the budget process has achieved a degree of discipline in spending and tax policy that may not have been possible without it. In this resolution, it is apparent that the spending committees of both bodies have stayed within the targets adopted in the first resolution. In so doing, and as we do in this resolution, the Congress has continued to address the critical fiscal policy questions brought about by high unemployment and high inflation.

In fiscal year 1979, we should be able to produce an additional 1 million jobs as a result of public service and public works employment programs. We have provided over $1 billion in aid to cities in fiscal distress. We have increased our commitment to education, veterans, the aged and the poor by providing higher levels of funding than those recommended by the President. Also, we continue to provide more than adequate resources to preserve our national security. This year's budget ceiling carries $127.1 billion in budget authority and $112.4 billion in outlays for function 050—national defense.

I believe, however, that the resources committed to national defense exceed necessity. For example, we do not need another $2 billion aircraft carrier. I am convinced, based upon the hearings held before the Task Force on National Security, which I chair, that we can further reduce defense expenditures by at least $1 billion at no peril to our military posture. In fact, I would argue that if we trimmed the defense budget properly and eliminated some of the waste and mismanagement we would be significantly stronger militarily.

Although I endorse the policies in this ceiling resolution, I am greatly troubled by the state of our economy. I believe that our fiscal policies have helped to keep the economy from being worse off than it is and, therefore, I have supported them, but the figures do not lie. We are in trouble.

We are estimating an annual inflation rate in this resolution of 6.7 percent and that is overly optimistic. Our international dependence on oil—which pushes the inflation rate up—has not diminished. We are spending over $45 billion annually to import oil, which causes our balance-of-payments deficit and undermines the value of the dollar. True we have shown more restraint in Federal spending, but certainly no where nearly enough to curb the inflationary spiral. The President has called for a deceleration program, but it is very mild, indeed, and the Congress has not even endorsed it. Let me just cite the current price figures to show how entrenched inflation has become in our economy:

Consumer Price Index for all urban consumers: Rose 0.9 percent in June, 0.9 percent in April, and 0.9 percent in May;

Food prices: Rose 1.4 percent in June, 1.8 percent in May, and 2.4 percent in April, and

The Producers Price Index—finished goods: Rose 0.7 percent in June, 0.7 percent in May, and 1.3 percent in April.

The time has come for a wage/price control policy. We do not have to be too rigid about this, but at least we need some effective guidelines. In short, it will take more than mere words, slogans, and jawboning to curb inflationary pressures. Hobart Rowen has made this clear in a recent article that appeared in the Washington Post. Let me quote him at length:

IS IT TIME FOR WAGE-PRICE CONTROLS?

(By Hobart Rowen)

This country is barrelling downhill into a disastrous inflation, without a policy to cope with it. For the first six months of 1978, the consumer price index has been advancing at the double-digit rate of 10.4 percent, and there is no relief in sight.

An unbridled American inflation was a basic concern at the recent economic summit in Bonn, because alone among leading powers, the United States has shown an inability to bring inflation down.

While the United States has moved to the 10-plus inflation level from 5.5 percent last year, Japan has seen a decline from 7.5 percent to 5 percent, and West Germany's 4 percent inflation rate of 1977 has dipped to an astonishing 3 percent this year.

That explains the weakness of the dollar, the agitation in currency markets, and the recent phenomenal rise in the price of gold to well over $200 an ounce. What the rest of the world is saying to the United States by pricing the dollar down and gold up is that it doesn't believe the Carter administration knows how to manage the American economy.

What is needed in this situation is a bolder attack on inflation, perhaps leading to wage and price controls, rather than the namby-pamby jawboning exercised by a willing but powerless Robert S. Strauss.

It is true that the very suggestion of wage and price controls tends to be controversial and—to some—frightening. A pledge against the institution of controls has tended to become synonymous with purity and virtue, a symbol of dedication to the free-market system. President Carter has made such a pledge, but can he keep it?

It's not yet been publicized, but Carter aides have been directed to look for some sort of sanction to apply in individual cases—short of full-fledged controls. "Words alone are not enough," a high official told this reporter.

Convinced that the next six months will be crucial, Carter policymakers have thrown

the problem to the "Troika"—the deputies at the Treasury, Council of Economic Advisers and the Budget Bureau.

The idea is to get a new policy in place before a crucial round of labor negotiations begins with the Teamsters next year. "If that round is again 10 percent a year, forget about moderating inflation in the near future," says Barry Bosworth of Carter's Council on Wage and Price Stability.

It is plain, as made clear in Brookings' 1975 landmark text, "Exhortation and Controls," that the success of controls depends on achieving a real national consensus on supporting the goals and the rules of such a policy. That is not likely to be achieved "except in wartime or under other emergency conditions," the Brookings book concludes.

But I suggest that those emergency conditions are virtually upon us, and warrant the sober consideration of mandatory controls, at least on a selective basis. The only alternative is a fiscal and monetary crunch that will produce an unacceptable recession.

Moreover, the case for controls is buttressed by the public's growing willngness to accept them—which shows that the voters have moved out ahead of their national leadership.

The latest Gallup poll figures, unaccountably ignored by much of the media, were published in the organization's August edition from a survey taken in mid-April. They show that 52 percent of respondents favor reimposition of governmental wage-price controls, against 44 percent in February of this year, 44 percent in December 1976, and 50 percent in August 1974.

Even more significant, sentiment in favor of controls increased since February among every single grouping—by sex, race, education region, income, political or labor-union affiliation. Moreover, the only groups of which a majority oppose controls are the most conservative—the best educated and most affluent.

For Carter or any president, the main roadblock to controls is the strong opposition of labor leaders. The standard George Meany pitch is that wage-price controls are really wage controls—that labor gets shafted while prices are not held in check.

Labor would rather endure a 10 or 12 percent inflation than support controls. Union leaders feel their members could come close to staying even, whatever happens to the rest of the economy.

But judging from the Gallup poll, Carter would have the country (including rank-and file union members) behind him if he called business and labor together and tried to work out an equitable program.

That, by the way, is the secret of West Germany's success in controlling inflation. The Germans run a big budget deficit—proportionately bigger than ours. But at the beginning of each legislative session, business and labor leaders sit down with the government and agree on broad wage and price standards that are compatible with the government's plans for growth of the economy.

Carter has not only the opportunity, but the obligation, to seize leadership. Perhaps he can find a halfway, guidepost measure between the current toothless program and full controls. If not, he ought to go all the way.

Equally disturbing is the persistent problem of high unemployment, particularly among our young people and minorities. The following figures dramatize the failure of the capitalistic system and the fiscal policies of our Government to deal adequately and responsibly with our unemployment situation:

[Percent—July 1978]

Unemployment:	
Total, 16 and over	6.2
Men, 20 and over	4.1
Women, 20 and over	6.5
Both sexes, 16 to 19	16.3
White, total	5.3
Men, 20 and over	3.6
Women, 20 and over	5.6
Both sexes, 16 to 19	13.4
Black and others, total	12.5
Men, 20 and over	8.4
Women, 20 and over	11.6
Both sexes, 16 to 19	37.0

Unless we stop the pernicious growth of inflation, reduce unemployment, eliminate waste and mismanagement in Government, and eliminate deficit spending once and for all, we are going to carry this Nation into economic catastrophe. Hidden underneath almost all of our economic forecasts are these seeds of economic destruction. We are going to have to deal with these problems more effectively in the months and years to come and perhaps give up a few luxuries in order that we may target our efforts toward solving our basic economic problems. On balance, the budget process has been helpful to all of us in understanding our dilemma, but has yet to be very effective in helping us to solve our problems. This is going to have to change, but the motor for change must be the will of the Congress, not the mere existence of mechanical budget procedures.●

● Mr. FRENZEL. Mr. Chairman, the second budget resolution, House Concurrent Resolution 683, as presented by the Budget Committee, seems at first blush to be a great improvement over the first resolution. Outlays have been reduced by about $8 billion, and the deficit reduced by $7 billion.

But, after analysis, the net reductions are shown to be reestimates of costs, not program cuts. The good news is not very good. The largest single cut, $3.3 billion in national defense, results from a reduced outlay estimate because the Department of Defense cannot spend fast enough in fiscal 1979. Many of the actual outlay cuts result not from Budget Committee frugality, but from cuts in appropriations bills by the full House.

But by far the great criticism of the Budget Resolution is the same criticism I had of the first resolution. In short, it is that the committee missed some wonderful opportunities to make deep, significant cuts in expenditures.

Outlays of $490 billion are still much too high. A deficit of $44 billion is still too high.

We are not going to make a dent in the rate of inflation by reestimating or by making timid little cuts in amounts that were too big to spend anyway.

Until the Federal Government tightens its belt and shows a real willingness to make sacrifices, no other persons or institutions in our economy are going to make any sacrifices. Cutting Government spending is not the only way to reduce inflation, but no other solutions will help much until spending is cut.

We need a balanced budget as soon as possible. I know we can never get a balanced budget unless we establish a specific year in which we can reach that goal. President Ford established fiscal year 1979 as his goal. The open-handed Congress rejected his budget and that goal.

President Carter promised to balance the budget by 1981. Then he promptly raised his spending budgets so a balance was not achievable by 1981. Congress liked that. It was relieved that it would not have pressure to balance its budget. In fact, the majority in the House recently voted down an amendment setting a target for a balance in 1983.

It was, therefore, a great disappointment to me, but no surprise, that the Budget Committee voted down an amendment which would have cut spending further and produced a balanced budget by 1982 at the latest. That plan would have cut outlays another $10 billion. That is only a modest cut of about 2 percent, but it would set our feet on the path of righteousness. Had the committee adopted it, we would be heading toward a balance.

But a simple balance is not enough. Any free-spending Congress can balance its budget if it is willing to raise taxes high enough. I personally insist on a balance at a level of taxation no higher than 18.6 percent of GNP. That was the average rate from the early 1950's until 1976.

Under this budget that figure has escalated to 19.7 percent already. President Carter's projected budget, which moves too slowly toward a balance, does so only over the broken bodies of the taxpayers, who under this budget estimates, would be paying taxes of 22 percent of GNP by the middle 1980's.

To return to the spending side, I cannot vote for a resolution that increases spending by nearly 10 percent, and increases budget authority by over 12 percent. The spending increase is profligate on its face, but in some ways the budget authority increase is worse. It allows future expenditures at higher rates, and has been described, accurately I believe, as a time bomb set to detonate in the future. Unspent money or unused budget authority never lapses. It is simply a promise of future spending over which there is no control.

I therefore will vote for the Holt amendment, which reduces aggregate outlays by $10 billion and budget authority by $22.5 billion. It will reduce the deficit this year by $4 billion, and in future years by even more.

The Holt amendment addresses only aggregates. It allows appropriations committees, or the House, to make the cuts they, or it, feel are most reasonable. Each of us has some favorite appropriations that should never be cut and each of us has some pet prospects for cuts.

In actual practice, if the Holt amendment is passed, the resolution will probably be returned to the Budget Committee which then will adjust the program costs as it sees fit.

But, I do not see how the budget process can establish the law and order we desire unless it first deals with aggregate figures. So far the Budget Committee

has never set a goal, but has rather compiled a list of committee and subcommittee wants. When the list is totaled, the committee is surprised to find we are in the red again.

Aggregates have been described as a blunt instrument, and indeed they are. But I see no other way to control the process.

I have discussed taxes earlier in this discussion. but it is important to restate that the budget process must include both tax and spending projections. The integrated projections must begin from two assumptions or lead to two goals. They are: First, taxes must not exceed 16.5 percent of GNP; and second, the budget must be balanced by 1982.

The Holt amendment has these assumptions and goals, and it still would cause a greater increase in GNP through its 5-year period than the committee bill. The difference is 10 percent and it means more economic activity and more jobs.

In summary. the second budget resolution does nothing to reduce the double digit inflation of the second quarter this year. A budget resolution which ignores or exacerbates the country's No. 1 problem is not deserving of support. If not amended, it should be defeated.●

● Mr. ARMSTRONG. Mr. Chairman, how much inflation will Congress inflict on the Nation next year? This is the main question to be settled as we vote on the budget resolution now pending before the House.

A vote for the Budget Committee resolution is a vote for more inflation, more taxes, more unemployment, and slower economic growth.

The House Budget Committee resolution provides for expenditures of $490.5 billion, up 9.7 percent from a year ago. Budget authority, which commits the Government to spending in future years, is set at $561.5 billion, up 12.3 percent from a year ago. Taxes will increase by $11.4 billion. The budget deficit will grow by nearly $44 billion.

All serious economists today agree that it is deficit spending by the Federal Government that is the principal and underlying cause of inflation. A glance at the evidence makes it impossible to conclude otherwise. Since 1973, we have run deficits of $14.9 billion, $4.7 billion, $45.1 billion, $66.4 billion, and $45.4 billion. In those years the rate of inflation was 6.2, 11, 9.1, 5.8, and 6.5 percent, respectively. Inflation has returned to double digit levels in 1978, averaging 10.5 percent so far this year.

One of the most insidious effects of inflation has been taxflation, a secret tax amounting to confiscation of wealth on all working Americans. As nominal incomes rise, taxpayers are forced into higher and higher brackets, even though the purchasing power of the dollars they earn has stayed the same or even declined. Since 1969, taxflation has confiscated between $350 and $450 each year from every family in America.

All too often debate on the budget bogs down in economic terminology and statistics. A discussion that is, somehow, far removed from human concerns.

But today I hope Members of the House will be thinking of people, individuals, and families, at home as they vote on this resolution. I hope Members will ask themselves how the inflation caused by this resolution will affect the people at home.

How many young couples will be unable to buy a home because of the inflationary impact of this bill? How many elderly persons, and others on a fixed income, will be forced to accept a cut in their standard of living as a result of the inflation this bill will foster? How many people of all ages will see the buying power of their wages and savings accounts eroded? How many people will be thrown out of work because of the inflation this bill will inflict on the Nation's economy?

As far as I am concerned, human hardship is the real issue in this budget. It is time for Congress to make a conscious, deliberate decision to balance Federal spending and revenues, not for some abstract and theoretical reason, but because the people of this country are suffering. We, in Congress, have caused their suffering. Only we can alleviate it by balancing the Federal budget.

We have permitted the budget to get so far out of kilter that it may be impossible, as a practical matter, to bring it into balance within a single fiscal year. However, my fellow Republicans and I will present today an amendment which points the way toward a balanced budget within 5 years.

My colleague MARJORIE HOLT will propose an amendment which will lower the spending proposed by the Budget Commitee by a modest, but extremely significant amount.

Under the Republican proposal, outlays for fiscal 1979 would be only $480 billion, $10.5 billion less than proposed by the committee. Budget authority would be set at $539 billion, $22.5 billion less than recommended. The GOP substitute provides for a tax cut of $20 billion, $5 billion more than the tax cut provided in the pending resolution. Most important, the projected deficit would be only $35 billion, $8.7 billion less than in the committee plan.

I personally favor even lower spending and deficit totals and a higher tax cut. However, I recognize that compromise is the essence of the legislative process. In that spirit, I urge my colleagues to support the Republican plan. It is not a stringent reduction; on the contrary, our substitute would increase spending for all Federal agencies by 7.4 percent—enough to fund all needed functions at an adequate level.

By adopting this amendment, Congress can take a major step toward balancing the Federal budget, the essential prerequisite for controlling inflation. If the Republican amendment is not adopted, the entire resolution should be defeated and returned to the committee for further study.●

Mr. LATTA. Mr. Chairman, I yield back the balance of my time.

Mr. GIAIMO. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Pursuant to clause 8 of rule XXIII, the concurrent resolution is considered as having been read for amendment and open to amendment at any point.

The concurrent resolution is as follows:

Resolved by the House of Representatives (the Senate concurring), That the Congress hereby determines and declares, pursuant to section 310(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1978—

(1) the recommended level of Federal revenues is $446,800,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $23,900,000,000;

(2) the appropriate level of total new budget authority is $561,506,000,000;

(3) the appropriate level of total budget outlays is $490,487,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $43,687,000,000; and

(5) the appropriate level of the public debt is $842,000,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $44,000,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 310(a) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1978, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):
(A) New budget authority, $127,102,000,000;
(B) Outlays, $112,408,000,000.
(2) International Affairs (150):
(A) New budget authority, $12,540,000,000;
(B) Outlays, $7,138,000,000.
(3) General Science, Space, and Technology (250):
(A) New budget authority, $5,146,000,000;
(B) Outlays, $4,991,000,000.
(4) Energy (270):
(A) New budget authority, $9,601,000,000;
(B) Outlays, $8,684,000,000.
(5) Natural Resources and Environment (300):
(A) New budget authority, $12,963,000,000;
(B) Outlays, $11,380,000,000.
(6) Agriculture (350):
(A) New budget authority, $12,225,000,000;
(B) Outlays, $7,628,000,000.
(7) Commerce and Housing Credit (370):
(A) New budget authority, $5,551,000,000;
(B) Outlays, $2,814,000,000.
(8) Transportation (400):
(A) New budget authority, $19,451,000,000;
(B) Outlays, $17,063,000,000.
(9) Community and Regional Development (450):
(A) New budget authority, $10,327,000,000;
(B) Outlays, $9,474,000,000.
(10) Education, Training, Employment and Social Services (500):
(A) New budget authority, $34,022,000,000;
(B) Outlays, $31,446,000,000.
(11) Health (550):
(A) New budget authority, $52,158,000,000;
(B) Outlays, $49,298,000,000.
(12) Income Security (600):
(A) New budget authority, $192,139,000,000;
(B) Outlays, $159,650,000,000.
(13) Veterans Benefits and Services (700):
(A) New budget authority, $21,251,000,000;
(B) Outlays, $20,913,000,000.
(14) Administration of Justice (750):
(A) New budget authority, $4,163,000,000;
(B) Outlays, $4,173,000,000.
(15) General Government (800):

(A) New budget authority, $4,098,000,000;
(B) Outlays, $4,035,000,000.
(16) General Purpose Fiscal Assistance (850):
(A) New budget authority, $9,019,000,000;
(B) Outlays, $9,297,000,000.
(17) Interest (900):
(A) New budget authority, $48,000,000,000;
(B) Outlays, $48,001,000,000.
(18) Allowances (920):
(A) New budget authority,—$1,087,000,000;
(B) Outlays,—$743,000,000.
(19) Undistributed Offsetting Receipts (950):
(A) New budget authority,—$17,163,000,000;
(B) Outlays,—$17,163,000,000.

The CHAIRMAN. Are there any amendments?

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. GIAIMO

Mr. GIAIMO. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. GIAIMO: Strike all after the resolving clause and insert in lieu thereof the following:

That the Congress hereby determines and declares, pursuant to section 310(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1978—

(1) the recommended level of Federal revenues is $450,000,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $19,900,000,000;

(2) the appropriate level of total new budget authority is $561,242,000,000;

(3) the appropriate level of total budget outlays is $490,463,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $40,463,000,000; and

(5) the appropriate level of the public debt is $838,800,000,000, and the amount by which the statutory limit on such debt should accordingly be increased is $40,800,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 310(a) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1978, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):
(A) New budget authority, $127,013,000,000;
(B) Outlays, $112,403,000,000.
(2) International Affairs (150):
(A) New budget authority, $12,365,000,000;
(B) Outlays, $7,119,000,000.
(3) General Science, Space, and Technology (250):
(A) New budget authority, $5,146,000,000;
(B) Outlays, $4,991,000,000.
(4) Energy (270):
(A) New budget authority, $9,601,000,000;
(B) Outlays, $8,684,000,000.
(5) Natural Resources and Environment (300):
(A) New budget authority, $12,963,000,000;
(B) Outlays, $11,380,000,000.
(6) Agriculture (350):
(A) New budget authority, $12,225,000,000;
(B) Outlays, $7,628,000,000.
(7) Commerce and Housing Credit (370):
(A) New budget authority, $5,551,000,000;
(B) Outlays, $2,814,000,000.
(8) Transportation (400):
(A) New budget authority, $19,451,000,000;
(B) Outlays, $17,063,000,000
(9) Community and Regional Development (450):
(A) New budget authority, $10,327, 000,000;
(B) Outlays, $9,474,000,000.
(10) Education, Training, Employment and Social Services (500):
(A) New budget authority $34,022,000,000;
(B) Outlays, $31,446,000,000.
(11) Health (550):
(A) New budget authority $52,158,000,000;
(B) Outlays, $49,298,000,000.
(12) Income Security (600):
(A) New budget authority $192,139,000,000;
(B) Outlays, $159,650,000,000.
(13) Veterans Benefits and Services (700):
(A) New budget authority, $21,251,000,000;
(B) Outlays, $20,913,000,000.
(14) Administration of Justice (750):
(A) New budget authority, $4,163,000,000;
(B) Outlays, $4,173,000,000.
(15) General Government (800):
(A) New budget authority, $4,098,000,000;
(B) Outlays, $4,035,000,000.
(16) General Purpose Fiscal Assistance (850):
(A) New budget authority, $9,019,000,000;
(B) Outlays, $9,297,000,000.
(17) Interest (900):
(A) New budget authority, $48,000,000,000;
(B) Outlays, $48,001,000,000.
(18) Allowances (920):
(A) New budget authority, —$1,087,000,000;
(B) Outlays, —$743,000,000.
(19) Undistributed Offsetting Receipts (950):
(A) New budget authority, —$17,163,000,000;
(B) Outlays, —$17,163,000,000.

Mr. GIAIMO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. GIAIMO. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. BENNETT) having assumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the concurrent resolution (H. Con. Res. 683) revising the congressional budget for the U.S. Government for the fiscal year 1979, had come to no resolution thereon.

LEGISLATION REQUIRING LABELING OF BREAD TO DISCLOSE COST TO MANUFACTURER OF INGREDIENTS

(Mr. HIGHTOWER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HIGHTOWER. Mr. Speaker, I am introducing a bill today to lay the groundwork for legislation to be passed as early in the next Congress as possible. This legislation will require the label of any loaf of bread to disclose the cost to the manufacturer of the farm product ingredients.

We have heard much in the past few weeks about the cost of food. News stories often mention increases in the grocery store and increases on the farm in the same breath. Bills that are brought to the floor of this Chamber attempting to improve the income of the family farmers of our country are branded as inflationary and often anticonsumer.

Low prices and rapid changes on the agricultural scene have forced many farmers off the farm this past year and into the cities looking for jobs that yield a steady paycheck. While some farm prices are up a little over what they were last year, prices are still below the farmers' cost of production.

This is an important piece of consumer legislation. The time has come for consumers to understand what effect an increase in the price of wheat has on the cost of bread. The wrapper often costs more than the wheat in that bread.

It is necessary for all of us to place the price of farm products in proper perspective. We must come to clearly understand this issue before we find ourselves depending on someone besides the family farmer for our daily bread.

The farmer can no longer bear the full burden of fighting inflation. The producer cannot continue to see production and living costs soar while the prices of farm products are kept at levels of past years.

The requirements of this legislation will be simple to comply with for the manufacturers. The cost on the wrapper is based on the average cost for the previous marketing year. The "by the loaf" figure will place the cost in terms to which we all can relate.

It is not my purpose to add any burden to the cost of the baker, but his interests will also be better served by the understanding of costs by the consumer.

I am confident this can go a long way in creating better understanding between farmers and consumers. No group in this country consumes like the American farmer. Inflation is the problem for rural America as it is for urban America.

If we can reach an understanding that keeping the family farmer in business is as important to the housewife as it is to the farmer and baker, we are well on our way to finding long range answers to our food and fiber problems. I urge each of you here today to join me in starting us down that road.

NATIONAL HEALTH SOCIALISM

(Mr. DEVINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DEVINE. Mr. Speaker, those pushing for the "cure-all" national health insurance should read Anthony Lejeune's article entitled "The Two Enemies." All that glitters is not gold.

THE TWO ENEMIES

(By Anthony Lejeune)

Doctors in Britain today are having to fight a constant battle on two fronts—against what they are increasingly compelled to regard as twin enemies; against the unions within the National Health Service and the politicians who control it. Recent

clashes have been so bizarre that they would have seemed scarcely credible even a few years ago.

Starting at some 200 hospitals in the West Midlands, but then spreading to other parts of the country, the telephone operators went on strike. Or rather they announced that they were "working to rule," and the rule they decided to work to was that they would allow no calls through the switchboard, in or out, which did not deal with urgent medical matters. If any doctor, administrator, or patient had the temerity to make a call which, in the opinion of the listening switchboard operator, was not "genuine," the operator was instructed by the union simply pull out the plug.

Actually four unions were involved—the National Union of Public Employees (NUPE), the Confederation of Health Service Employees (COHSE), the Transport and General Workers Union, and the General and Municipal Workers Union. They were angry because there had been a breakdown in their pay-talks; talks not with specific hospitals, but, since they are working for a National Health Service, at national level. The hospital doctors, administrators, and patients were not involved at all, except as instruments of blackmail.

Mr. Keith Holmes, the COHSE shop steward who was coordinating strike action in the West Midlands, explained his policy. "We are allowing doctors to take calls or make calls which involve patient care, emergency work, or hospital business," he said condescendingly. "We are not being rigid about emergency only calls at this stage because we realize that would involve clinical decisions which we are not qualified to make. But unless our pay dispute is settled, there is no doubt that a firm emergency call rule will be enforced as the next phase of the action."

In this next phase, apparently, the strikers would be quite prepared to make clinical decisions which they realize they are not qualified to make. Indeed some of their colleagues were already doing so. Mr. Mohammed Yussuf, the NUPE shop steward, had instructed his members to allow only emergency calls, because, he explained, a few of the hospital staff had been making non-medical calls "on the pretext of being emergencies, and it is these we are concerned about."

In most of the hospitals involved, the administrative staff were not allowed to make any calls through the switchboard at all. They had to use public phone booths, in order, for example, to allocate beds. And, despite the comfortable assurances of Mr. Holmes, instances were soon being reported of urgent medical calls failing to get through.

Among these which were unplugged in mid-sentence were: a general practitioner asking for an urgent admission, a surgeon asking an anesthetist to attend, a junior doctor asking the advice of a consultant surgeon before starting an operation, and a doctor requesting drugs from a laboratory.

At Kingston Hospital, near London, the switchboard operators simply walked out. Doctors who dialed the emergency code could get no reply. Among them was a senior consultant trying to answer a junior house doctor's urgent plea for help over a patient suffering a sudden hemorrhage, and a general practitioner wanting emergency medical supplies.

Dr. William Bond, a leading cancer specialist at the Queen Elizabeth Hospital, Birmingham, said he was quite sympathetic to the telephonists' cause, but didn't see how they could possibly justify interfering in, and eavesdropping on, confidential medical calls. The switchboard operators had refused to let him call a research laboratory for information about a special appliance which could ease a patient's pain; wouldn't allow a call to another hospital to tell the nursing staff that the doctor would be late and other arrangements should be made; and cut him off while he was trying to change a patient's appointment.

"They cross-question us, he said, "and want to know if a call is private or concerns a patient. My colleagues are very angry about what's going on. Many would be happy to leave the hospital service at the earliest opportunity.

"Once it was a case of getting a patient out as quickly as possible and getting another patient into bed, achieved through teamwork. But now, if a hospital (orderly) picks up a parcel and says it's too heavy, there is potential trouble."

That sort of trouble had just closed the two main operating rooms at Dulwich Hospital in south London. Orderlies were refusing to work in the operating rooms because they didn't like the senior nurse. "She treats surgeons better than she treats us," one of them grumbled. Another complained that he was just having a cup of coffee when she asked him to move a trolley. "I said she could move it herself. I was upset."

Other orderlies in the Dulwich Hospital who explained their grievances to the press said that tea-breaks were too short and that they were expected to clean out the storerooms and collect items from the laundry. One was extremely indignant because he had been told to stop reading a novel in the operating room.

The man at the center of this particular row was an orderly named Joe Daly, whose behavior had brought a series of warnings from the hospital authorities, culminating in a final warning after the nurse, Mrs. Jennifer Burke, had caught him wheeling a bicycle through the operating room. He stirred up the other orderlies, who "blacked" the operating room.

When Sister Burke went on vacation, the orderlies came back, but the nurses then refused to work with them. They supported Sister Burke, saying that she's been bullied and abused by the orderlies. Deadlock. Operations had to be cancelled, patients (including one with cancer of the stomach, another with a gangrenous leg) sent home or transferred to other hospitals. The union—NUPE—was unrepentant. "We are fed up with being treated like dirt," said a union representative. Both the union and the hospital managers were annoyed when the story was published in the newspapers. It would make negotiations more difficult, they said.

But this was by no means an isolated incident. During the past two or three years union militancy has been rampant in British hospitals. And pay demands have been only part of the reason. The other part was ideological, an egalitarian resentment of authority and a determination to shape the National Health Service in a left-wing political mold. The unions' crucial victory was when they persuaded, or forced, the Labor government to squeeze out all private patients from the hospitals.

Since then there has been a whole series of horrifying episodes, most of which ended in appeasement, if not a complete surrender to the unions.

Last year, for example, food and medical supplies were cut off from elderly and mentally ill patients in the Epsom health area during an eight-day strike by ancillary workers over a new roster system. At Hackney hospital two patients committed suicide, depressed (so it was said) by the conditions there. According to one of the doctors, it was "a public showplace of squalor," because of the falling standard of ancillary care and low staff morale.

At the Queen Elizabeth Hospital for Children, telephone operators and cleaning staff—members of NUPE—walked out, leaving the switchboard and the special emergency telephone system for cardiac arrests to be operated by inexperienced volunteers. At the Great Ormond Street Hospital for Children it was the orderlies—also members of NUPE—who walked out.

In September militants from both NUPE and COHSE at Greenwich hospitals refused to hand over bodies to funeral workers unless they produced union cards.

And so on. The list could be almost endlessly extended.

John Studd, a 37-year-old obstetrician and gynecologist, who works a 12-hour day, including Saturday and Sunday, and who could earn perhaps five times his present income by moving to America or Europe, put the situation vividly in context when he was interviewed by a reporter from the London *Daily Mail* about the Dulwich affair.

"Like any nationalized industry," he said, "the Health Service is rapidly being dominated by unionized non-medical staff. The inevitable result is that patients will die. It's quite clear to me that NUPE are looking very hard for 52 percent membership of hospital staff, so that they can have a closed shop and speak for all the hospitals.

"Five years ago it was a disgrace to cancel an operation. Now it's commonplace. When you have to cancel for the second or third time, it's devastating for the patient.

"All the major decisions of the past ten years in the Health Service have been bad ones. The reorganization of the service was a disaster. It created an army of bureaucrats—60 percent of NHS employees are clerical staff—all with decreasing responsibility and overwhelming powers of delegation . . .

"The public is getting a rotten service and paying through the nose for it. They are, quite simply, being swindled.

"The saddest thing is that doctors have been so battered by governments and abused by unions that they've lost heart. There are funds available in the National Health Service, but they're going to ancillary workers and bureaucrats."

Almost while Dr. Studd was talking to the Daily Mail, one of Britain's leading orthopedic surgeons, Dr. John Cozens-Hardy, was addressing a crowded meeting of his patients or would-be patients. He felt they were entitled to know why they had to spend years "imprisoned by constant pain." At the present rate, he told them, it would take 36 years to clear the 127 people on his waiting list. The delay was caused by a chronic shortage of beds, operating rooms, and trained medical staff; and the reason for the delay was political.

"I'm paid to help these people," he said before the meeting, "but I am denied the opportunity. They have paid, through their contributions and taxes, for that help. When this everworsening situation goes on, year after year, one reaches the point where one either resigns, commits suicide, or screams. I have decided to scream.

"It was the comment of Mr. Ennals, the Health Minister, that really angered me. He was quoted as saying 'In spite of the prophets of doom, some of them inside who ought to know better, the National Health Service is very much alive and providing magnificent service to our people.'

"I thought, well, I'm on the inside and I ought to know better. I have 127 crucial patients getting excellent service? The top man says they are! I decided it was time someone told the truth."

In fact, quite a lot of people have told the truth about the National Health Service by now. They are the ones referred to by Mr. Ennals as "prophets of doom." But so far they have had little or no effect.

Part of the problem could at least be eased by tapping new (or, rather, old) sources of

money; by encouraging, instead of discouraging, private insurance, local charity, and payments for service. Another part is a symptom of the general British sickness; it can be cured only when the balloon of trade union arrogance is pricked and the dead wood of bureaucracy slashed. The essence of the trouble, however, as Dr. Studd pointed out, lies in the fact that the Health Service is a nationalized industry—from which certain consequences flow, always and inevitably. How they could be reversed, without denationalizing it, no one can suggest.

LET US STRENGTHEN THE FARMER'S MARKET POWER IN THE MARKETPLACE

(Mr. AMMERMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AMMERMAN. Mr. Speaker, on behalf of the Pennsylvania Farmers Association and its parent organization, the American Farm Bureau Federation, I am today introducing the National Agricultural Bargaining Act of 1978. The members of our association in Pennsylvania believe that, in the quest for greater market power for the farmer, the approach embodied in this bill represents, at least in part, an alternative to farmers' strikes and demands for mandated parity.

As many Members will know, similar legislation has been considered at various points over the past 10 years, with several bills having been introduced by our retiring colleague from California, the Honorable BERNIE SISK. In this instance the bill's sponsors have developed support from a broad spectrum of farm organizations. I am informed that not only the Farm Bureau but also the Grange, the Farmers Union and the National Council of Farmer Co-ops have participated in the drafting of this legislation and fully support it.

Mr. Speaker, I don't presume to speak for these other organizations, but I do believe that Pennsylvania farmers, as represented by the PFA, believe one important way we can help farmers get better returns is to strengthen their bargaining position in existing markets. By doing that we will be improving the farmer's economic position within the traditional structure of the American free market system. Thus the PFA recommends greater reliance on advance contract selling of agriculture commodities. Selling agriculture products on contract with terms of sale negotiated prior to planting or growing the product is a reasonable approach. Its premise, purely and simply, is that farmers can no longer afford the luxury of growing the crop and then hoping there will be a market for it. With the inflationary cost-price squeeze he is caught in, this can only lead farmers to financial disaster.

We all know that major changes have occurred in the food and fiber production, processing, and distribution industries in recent years. Traditional methods are rapidly giving way to new technology, and changes in market structure have accompanied those changes in technology. Firms throughout the food and fiber industries are becoming fewer, larger, and more specialized, and are requiring larger amounts of capital. The traditional terminal and auction markets are giving way to direct buying, vertical integration, forward contracts, and other coordinating arrangements.

Processors and retailers are more specific in their requirements for products regarding quantity, quality, and coordination of production and marketing activities similar to that of the more complex industrial operations.

Integration of production-market functions by processors has had a great impact on market structure. Individual farmers are at a competitive disadvantage in such an economic climate. Their position is continuing to weaken, as fewer and larger buyers negotiate for the farmer's products. Present trends indicate that large-scale marketing agencies will push integration even further to gain greater control over product supply, time and condition of delivery, and product quality and appearance.

To help cope with these changes, growers in various commodity areas have formed bargaining associations as one way of securing what is commonly referred to as bargaining power, muscle in the marketplace, or countervailing power. Many new bargaining groups have been formed including groups which bargain for milk, fruits, vegetables, and other specialized commodities. Others have been proposed. The ultimate success of these associations, however, may well depend on legislative clarification and sanction for these bargaining activities.

The National Agricultural Bargaining Act of 1978 establishes standards of fair practices that shall be observed by handlers and associations of producers in their dealings in agricultural products, provides standards for the accreditation of cooperative associations of producers of agricultural products for the purpose of bargaining, defines the mutual obligations of handlers and associations of producers to bargain with respect to the production, sale and marketing of agricultural products and provides for the enforcement of such obligations.

Under this act, associations of farmers can petition the Secretary of Agriculture, who will be the program administrator, stipulating the conditions of the proposed bargaining unit. These items will include such things as the commodity and handlers involved and such other information as the Secretary may request, such as suggested time and duration of the negotiating period.

The association requesting accreditation must be owned and controlled by producers; must have contracts, which are binding under State laws, with its members empowering the association to sell or negotiate terms of sale for the products of its members; must represent a sufficient number of producers or products to enable it to function as an effective agent for producers in bargaining with the designated handler; and must have negotiations with handlers as one of its principal functions. Once the Secretary has decided to accredit an association, he will give notice to the handlers designated in the petition.

This act does not require that either party come to an agreement. It does prescribe the mutual obligation of a handler and an accredited association to meet at reasonable times and for reasonable periods of time for the purpose of negotiating in good faith with respect to the price, terms of sale, compensation for products produced under contract, or other provisions relating to the products that are marketed within the bargaining unit. This bill provides guidelines for mediation and arbitration services if requested by the accredited association or handler, or if in the Secretary's judgment, an impasse in bargaining has occurred. It also repeals the Agricultural Fair Practices Act of 1967, but replaces the unfair practices described in the 1967 act with an expanded list of unfair practices, not only for handlers but also, for the first time, for accredited associations.

The need for this new authority is becoming more acute as a result of the continuing decline in the number of auction and central markets which have provided a source of price information and an alternative market outlet for many producers. More and more farm production is being sold directly to handlers under forward contracts.

Organized marketing and bargaining provides an alternative to increased reliance on the Federal Treasury for farm income subsidy payments, and with minimal Government intervention. Producers of all farm commodities would be more apt to commit capital and farm produce to existing or newly created bargaining associations if they have assurance that handlers will not be able to circumvent or sabotage the bargaining process.

Numerous associations already exist for crops, and new ones would likely be formed by producers of other commodities sold under forward contracts such as cattle and hogs. These associations will be able to improve farm prices and the conditions and terms of sale, which are now prescribed by handlers with individual producers or associations having little power to counter or reject the contract offered by the handler or processor.

In sum, passage and implementation of marketing and bargaining legislation will improve the capability of farmers to enhance their net farm income and standard of living. I urge my colleagues to give due consideration to this market-oriented alternative to greater reliance on Government price supports.

THE AMERICAN ROLE IN AFRICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. GOLDWATER) is recognized for 5 minutes.

● Mr. GOLDWATER. Mr. Speaker, the U.S. Government throughout his-

tory has often said that the U.S. role in world affairs is one of a peacemaker. We sought out to be a stabilizing influence. Under the Carter administration, the rhetoric of the right of self-determination seems louder than ever. Yet, our actions in Africa seem to contradict all that we have been saying.

Soviet-Cuban intervention throughout Africa has had a tremendous destabilizing effect on the internal self-determination movements of several African countries. By supporting radical factions that are often in the minority, such as in Angola, the Soviets are attempting to enlarge their sphere of influence by such manipulation. The Soviets can maintain this position unless there is counteraction by the West. In Angola, the success of the Cubans would have been in doubt if the United States continued to send military support, not men, to the majority groups. At the time the United States stopped sending arms, 22 African nations were ready to support the pro-Western groups. Then we withdrew our support, and many nations concerned over the apparent unreliability of the United States switched sides.

An estimated 40,000 Cuban troops in 17 African countries are not a stabilizing influence, regardless of what the whims of Andy Young may indicate. Our policy of condemning Soviet internal policies and turning our cheek regarding their external activities is contributing to the collapse of any semblance of American foreign policy.●

TEAM APPROACH FOR CANCER PATIENTS: AN UPDATE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. CLEVELAND) is recognized for 5 minutes.

● Mr. CLEVELAND. Mr. Speaker, on November 1, 1973, I submitted an article, written by the Director of Nurses at the Claremont (N.H.) General Hospital, Patricia Waite, R.N., which was inserted in the CONGRESSIONAL RECORD. The article discussed the development of a specialized team nursing program for the particular needs of the victims of various categories of illnesses. Since the article appeared in the CONGRESSIONAL RECORD in 1973, many improvements and developments have been made with regard to the concept of specialized team nursing practiced at Claremont General Hospital, the cancer nursing team in particular.

A breast cancer rehabilitation team was established at Claremont General Hospital in 1974 to provide important postoperative care and support for both the patient and family. Special educational programs for the nursing staff at Claremont General, and for patients, have also been developed.

Eleanor Champagne, R.N., cancer nurse coordinator at Claremont General Hospital, has been instrumental in the field of nurse education for the American Cancer Association of New Hampshire, and has been awarded for the past 3 years for her contributions. Mrs. Champagne received the American Cancer Society award for outstanding cancer nursing program in 1974–75 and the outstanding professional education program award for Sullivan County, N.H., in 1977. At the Third Annual National Oncology Convention in Washington, D.C., during April 1978, the paper "Travelling Oncology Education for Nurses" was presented by Eleanor Champagne, and the two abstracts she wrote were printed in the proceedings of the Oncology Nursing Society—Third Annual Convention.

I would like to submit the following: "Update of the Cancer Nursing Team at Claremont General Hospital" and two related abstracts, written by Cancer Nurse Coordinator Eleanor Champagne, R.N.

UPDATE OF CANCER NURSING TEAM AT CLAREMONT GENERAL HOSPITAL

(By Eleanor Champagne, R.N.—Cancer Nurse Coordinator Claremont General Hospital)

The Cancer Nursing Team consists of six R.N.'s, two L.P.N.'s, one of whom is an Enterostomal Therapist, a surgeon and a radiologist. The surgeon is a team consultant, the radiologist is a coordinator for the Norris Cotton Cancer Center. Team nurses are resources for all three shifts. Each nursing team member has specific duties and responsibilities. A manual of ostomy guidelines has been compiled by the Enterostomal Therapist. An ostomy team is being implemented. Each ward has a qualified Self Breast Exam instructor. Nurse examiners for Pap Smears insure that all females have a pap smear before they leave the hospital. Monthly in-service programs in Cancer Nursing are presented to all three shifts.

A Breast Cancer Rehabilitation Team was developed in 1974. All mastectomy patients are seen by the social worker, physical therapist, a Reach to Recovery Volunteer and a Cancer Nursing Team member. A free evaluation visit is done by the V.N.A. cancer team member two weeks after discharge. A telephone interview three months after discharge is done by the Cancer Nursing Coordinator. Evaluations and follow up indicate the teaching program to be very effective. Patients have developed a support group. The patient and family are aware that a special teaching program has been set up. Patients and families have requested programs to be developed for each type of cancer. The interest, cooperation and support of the entire medical, nursing and allied health staff at Claremont General Hospital has made this successful program possible.

Special educational programs for the entire nursing staff have been presented. A seven contact hour "Overview" on Breast Cancer reached a total of 29 nurses from Obstetrics, ICU, Medical and Surgical Departments. The sessions were attended simultaneously by means of Interact Television by nurses from Rockingham Memorial and Central Vermont. The videotapes were distributed to other community hospitals as a model type of nursing education in community hospitals.

A Nurse Education and Patient Teaching program was implemented as a result of a six contact hour session "Overview" in GYN Cancer. Telephone interviews will be done on all Gynecological cancer patients in order to evaluate preoperative, postoperative and discharge teaching.

The Cancer Nursing Team has shown dedicated commitment to continuing education not only in their own facility, but facilities throughout the state. As chairman of the A.C.S., N.H. Division, Nurse Education Subcommittee, Eleanor Champagne was instrumental in setting up a Travel Oncology Nurse Team. The Team presented 39 inservice programs on Breast Cancer, Ostomy Care and developing Cancer Nursing Teams to community hospitals, VoTechnical Colleges and Nursing Homes.

Eleanor Champagne was the first nurse in the State of New Hampshire to be cited by the American Cancer Society for her work with cancer patients. She received the American Cancer Society award for Outstanding Cancer Nursing Program in 1974–75 and the Outstanding Professional Education Program award for Sullivan County in 1977.

The following abstracts were printed in the Proceedings of the Oncology Nursing Society—Third Annual Convention in Washington, D.C., April 1978. The paper: "Traveling Oncology Education for Nurses" was presented by Eleanor Champagne, R.N.

DEVELOPING CANCER NURSING TEAMS IN COMMUNITY HOSPITALS

(By Eleanor Champagne, Nurse Coordinator in Cancer, Claremont General Hospital)

The Cancer Nursing Team consists of six R.N.'s, two L.P.N.'s, one of whom is an enterostomal therapist, a surgeon and a radiologist. The surgeon is a team consultant. The radiologist is a coordinator for the nearby Cancer Center. Team nurses are resource nurses for all three shifts. Each Nursing Team member has specific duties and is a qualified R.N. who promotes knowledge, skills and monitors the nursing care given to cancer patients. She sets up guidelines for the care of cancer patients, detection, provides team members with information concerning cancer conferences and acts as coordinator for members of the health team when a multidisciplinary approach is used. In order to initiate change, she must have extensive background in cancer, be well established in her role and have significant support in her own setting. The Enterostomal Therapist sets up guidelines for the care of ostomy patients. She enables the ostomate to leave the hospital with the mental and physical confidence in his ability to care for changes in body function. Each ward has a qualified instructor in SBE. Nurse Examiners for Pap Smears insure that females 18 years and older have a pap smear performed before they leave the hospital. Home care follow-up is done by a Visiting Nurse team member.

The Cancer Nursing Team has developed a Breast Cancer Rehabilitation Team which consists of a nurse, a physical therapist, a social worker and a Reach to Recovery Volunteer. An "Overview" in Breast Cancer has been presented to R.N.'s, L.P.N.'s and nursing assistants. Cancer Nursing Teams meet the need of the cancer patient and continuing education in community hospitals.

BREAST CANCER "OVERVIEW" IN A COMMUNITY HOSPITAL

(By Eleanor Champagne, Nurse Coordinator in Cancer, Claremont General Hospital)

A five-session seminar entitled "Overview" in Breast Cancer was presented to the Nursing Staff for Continuing Education. The purpose was to promote knowledge, skills and a positive attitude in delivering comprehensive nursing care to the breast cancer patient.

Specific objectives were to update the nurse's knowledge in breast cancer, to develop the nurse's role in caring for the breast cancer patient, to increase the nurse's involvement in early detection, to make known the social agencies, resources available and to develop a cooperative effort among the Rehabilitation Team and the direct-care provider. Through the use of nursing process, the nurse will demonstrate her ability to coordinate and deliver quality nursing care, understand the newer advances in detection techniques and demonstrate awareness of the Rehabilitation Team by making appropriate referrals.

The first session dealt with the role of the nurse and the Reach to Recovery Volunteer. Guidelines were presented on Mastectomy teaching, nurse care plans and progress notes. The program "Reach to Recovery" has been described by the Volunteer. The second session was covered by the role of the Physical Therapist and the Social Worker. Goals and objectives of the Physical Therapist were presented. The Social Worker described patient's visits and community referrals. In the third session the Pathologist lectured on Histopathology and staging. The Radiologist explained the Breast Screening Program, advances in Mammography-Thermography and needle technique biopsy on the fourth session. The surgeon presented in the final session curative versus palliative measures, preoperative and postoperative care and aspects of rehabilitation.

TRAVELING ONCOLOGY EDUCATION FOR NURSES

(By Susan B. Baird, R.N., B.A.; Mary Allen, R.N.; Eleanor Champagne, R.N.)

Less than 4 percent of practicing nurses were reached by the New Hampshire Division, American Cancer Society nursing symposia in 1976, and the majority were hospital based. The discovery of this startling statistic mandated that the Nursing Education Committee investigate alternative methods to reach nurses in varied settings throughout the state and led to the development of the Oncology Nursing Traveling Education Team. The goal of this approach is to provide nurses with updated and relevant information on the care of the cancer patient. By taking programs to nurses in their respective settings, it was hoped that larger numbers of nurses could be reached than by traditional methods and that content could be specifically geared to needs identified at individual facilities.

To initiate the two year pilot program, letters outlining the program were sent to Directors of Nursing Service and Inservice Coordinators at hospitals, long term care facilities, home health agencies and technical nursing programs. Three topics were offered; nursing care of the ostomy patient, nursing care of the breast cancer patient, and the delivery of quality care through the cancer care team. Instructors for the program were five members of the Nursing Education Committee who evidence expertise in one or more of these areas and whose employers agreed to free them for this purpose.

The response to the initial introductory letter was greater than anticipated and during the first year of the project, 39 programs have been delivered reaching a significantly larger nursing population than by traditional methods. Desired outcomes at participating facilities were identified as an increase in cancer Inservice programming, the development of a cancer care team and the request for other travel team programs. Evaluation based on these outcomes is in progress and preliminary findings are very favorable.

During the second year of the pilot program, three new topics will be added to the existing offerings. More volunteer instructors will be recruited and trained to allow the traveling team to meet the increased demand for programming. The Nursing Education Committee views this project as a highly effective means to help meet the cancer education needs of practicing nurses in the state.

Meeting the cancer-related educational needs of nurses in New Hampshire is the primary function of the Nursing Education Subcomimttee of the New Hampshire Division, American Cancer Society. For several years, committee members have utilized a centralized workshop as their main approach to supplement unit level activities. While evaluations by those nurses present were consistently favorable, committee members became increasingly concerned with shortcomings of this format. Attendance patterns were evaluated and it was found that:

Less than 4 percent of New Hampshire nurses were reached by these workshops.

The majority of attendees were from community hospitals. Fewer nurses attended from long term care facilities, home health or ambulatory care settings.

Only two to four nurses from each facility were freed for attendance.

Large workshops allow insufficient flexibility to encompass individual learner needs.

The Cancer Nursing Travel Team was developed to address those shortcomings and to supplement rather than replace the centralized workshop. It was felt that updated and relevant information on the care of the cancer patient could be offered to nurses in their respective settings, thus reaching larger numbers of nurses. Content could be geared to specific facility or agency needs to increase its relevancy. A two years pilot project was initiated in the Fall of 1976 with the first several months devoted to planning.

An important concern, which surfaced during planning, was that programs offered should reflect an understanding of the way cancer patients are cared for in New Hampshire. (slide 1) Here, community hospitals maintain a vital role in the diagnosis and treatment of cancer. An analysis of tumor registry data demonstrated that certain cancer sites are more likely to receive primary therapy at the community hospital level than other sites. Educational programs targeted for nurses working at these facilities should focus on informational needs related to those sites. Care of the ostomy patient and the postmastectomy patient were selected as the first two program areas to be developed. Selection was based on incidence rates in our area and treatment patterns at the community level. Increased concern with the provision of quality care through a team approach encouraged us to include the cancer care team as a program choice.

The committee anticipated that they would serve as faculty members and that any additional faculty requirements could be met from outside the committee. Letters outlining the project were sent to Directors of Nursing Service and Inservice Coordinators at hospitals, long term care facilities, home health agencies and technical nursing programs. (slide 2) The letters carefully outlined the division of responsibilities between requesting agencies as outlined here, and the sponsor. Asking the requesting facility to assume these duties clarified responsibilities and evidenced their commitment to the program. (slide 3) While requesting agencies' responsibilities were mainly organizational in nature, the American Cancer Society retained content and delivery responsibilities. It was anticipated that specific informational needs of the requesting agency would be identified at the time scheduling arrangements were made and that the nurse presenting could gear the content accordingly.

The response to the initial letter was far greater than anticipated (slide 4) and during the spring and summer of 1977, 39 programs were delivered. As depicted in this circle graph, community hospitals received 56% of the programs given, but long term care facilities accounted for very significant amount of programming. It is notable that programs were given at half of New Hampshire's general acute hospitals. (slide 5) The most frequently requested program was Quality Care, the title of the program on the team approach to cancer care. Interest in the formation and operation of cancer care teams accounts for a large proportion of this interest. Popularity was also due in part, however, to some confusion over the content in this program. Analysis of the evaluation forms has led to the belief that a few facilities elected this offering because it was the only program offered that was not site specific and they erroneously interpreted this to mean it was an overview. (slide 6) Through review of postprogram evaluation forms completed by participants and supplemented by feedback from those serving as faculty, the effectiveness of the project's first year has been determined. It had been anticipated that this programming would stimulate these agencies to begin to take a more active and informed role in the provision of quality cancer care. This objective has been met, as evidenced by an increase in cancer related inservice programs and in hospital activities such as the formation of cancer patient care guidelines. Certainly, the program strengths as outlined here outweighed the weakness noted. I would like to spend just a minute discussing the problems encountered in the first year—hopefully you might avoid them if you plan a similar program!

Scheduling difficulties arose because agencies phoned in their request to the American Cancer Society office over the span of several months. Coordinating schedules between available faculty and requesting agency was very time consuming and inefficient.

Too few instructors also added to scheduling difficulties. The committee had planned to purchase part of an E.T.'s time from a nearby hospital to do the ostomy programming. When budget constraints made this impossible, the increased load was borne by a few committee members. The rurality of the region and its accompanying long travel distances between agencies increased the time demands to accomplish programming. Few committee members were able to make that kind of commitment. The total programming was accomplished by only five nurses.

The lack of clarity in objectives for certain programs led to some minor confusion and was evident in varying degrees.

The inability to meet some specific learner needs was perhaps a shared weakness; faculty members were not always flexible enough in their presentations to address individual needs, and some agencies were unable to identify specific learner needs.

These weaknesses have served as an important tool in the planning for Year II of the program. Mary Allen will describe this to you.

In preparation of Year II of this pilot project, the committee reviewed the evaluation forms from Year I, and discussed at length the strengths and weaknesses from Year I. An approach to remedy each identified problem area was developed.

(Slide 7) To ease scheduling difficulties, all requests will be written on a form included in the handout you received. All scheduling will be done centrally to geographically group programming requests, decrease travel time and make the most efficient use of available instructors.

(Slide 8) More instructors have been recruited and they are more geographically distributive. While the programming will be concentrated somewhat into the spring months, a greater response will necessitate extension of programming periods.

(Slide 9) In Year I, specific program objectives were communicated only over the phone, and not included in the written proposal. As noted in the handout, this year we have included the specific program objectives for requesting agencies to review and revise before the program request is made.

(Slide 10) Learner needs may be better met when the requesting facility has a clearer idea of what the program has to offer. Inclusion of content outlines in the proposal letter should assist requesting facilities to identify their own specific needs before programs are requested. The preferred content focus can then be agreed upon.

The handout you received is a somewhat abbreviated form of the material that was mailed to Directors of Nursing Service and Inservice Coordinators in February. You will note we are again offering the same topics as last year. Originally, the committee had planned to expand or change the topics offered during the second year. The decision to keep the topics the same was based both on directives from evaluation forms, and from the feeling by committee members that the original target population had not yet been reached. Judging from the response to date, this assumption seems to be true. (Slide 11)

During Year I, the travel team reached 525 nurses. Even though only one statewide workshop was held during the 1976–77 program year, the total numbers of nurses reached by chapter level activities was more than doubled. Projections for the 1977–78 year program are even greater.

Far more important than total numbers reached is what is going on at those facilities requesting programs. Increased interest in quality cancer care and assumed responsibility by nurses for the provision of that care has become more apparent. There is increased utilization of designated resource people and growing communication and sharing between facilities.

The cancer care travel team program can very easily be adapted to meet changing needs and varied target populations. This project is viewed as a highly effective means to help meet the cancer educational needs of practicing nurses in the state.

Thank you.●

THE COMPREHENSIVE ANTI-INFLATION ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LUNDINE) is recognized for 30 minutes.

● Mr. LUNDINE. Mr. Speaker, yesterday with Mr. FISHER, Mr. MAGUIRE, Ms. MIKULSKI, Mr. MIKVA, Mr. MOORHEAD of Pennsylvania, Mr. PATTISON of New York, and Mr. SIMON, I introduced the comprehensive Anti-Inflation Act of 1978.

There should be little dispute about the gravity of this Nation's inflation problem. The June increase in consumer prices, which translated to an annual inflation rate of over 10 percent, is only the most recent setback. For the last 3 years, we have experienced a basic inflation rate of at least 6 percent, despite a major recession and substantial economic slack. Whether or not the latest figures signal a return to "double digit" inflation, it is clear these conditions must not go unchecked.

While the impact of inflation is somewhat uneven, ultimately everyone is hurt. Even people with moderate incomes find it difficult to avoid some erosion in their standard of living, and increasing numbers of families see their budgets strained by the costs of basic necessities alone. Above all, our inability to control inflation is undermining confidence—of the business community and of individual citizens—in our economy and its promises of opportunity. Despite hard work and thrift, many manage at best to break even, and are simply losing hope of ever getting ahead.

We are convinced these conditions are not inevitable. In sponsoring this legislation, moreover, we do not believe the country faces an inherent choice between inflation and unemployment. While economists traditionally warned of a trade-off relationship between these two problems, we have managed to experience intolerable levels of both at the same time.

A little over a year ago, I arranged an informal discussion group for House Members with mutual interests in innovative economic policies. Since January, this group has defined inflation as its principal focus and met regularly to explore alternatives to the macroeconomic remedies relied upon in the past. In rejecting the tradeoff theory, we have sought solutions that encourage economic growth and allow us to pursue the objectives of reducing inflation and unemployment together.

For these sessions, the idea of a comprehensive anti-inflation policy evolved. The group consulted with outside experts, as well as colleagues with particular responsibility for economic policy. Gradually and methodically, we settled on the elements of the bill we are introducing today.

Basically, our bill would require a coordinated Federal approach to combating inflation, combining fiscal, monetary, and regulatory policy. Each year, as part of the economic report, the President would propose numerical inflation goals and prepare a plan for meeting those goals. An annual statement is similarly required of the Federal Reserve Board. Our ultimate aim is to obtain agreement between the President and the Congress on a comprehensive strategy to control inflationary pressures in a manner consistent with our other economic priorities.

The choice of specific policies is purposely left open, though the bill suggests a number of options worth considering. Where possible, we emphasize incentives—in the tax system and other areas of Federal policy—to encourage noninflationary behavior in the public and private sectors.

Other provisions require the President to formulate specific guidelines for wages and prices, and suggest ways to promote voluntary compliance. Mandatory controls, however, are explicitly ruled out.

The bill further calls for special hearings by the Joint Economic Committee to review the full set of policy and guideline proposals. The guidelines will take effect unless disapproved by the Congress, while legislative recommendations must be referred to appropriate committees for action.

As a group, we essentially view this approach as a solid first step, rather than a final answer. In many cases, additional measures would be needed to implement suggested changes in policy. Several of the proposals from this act may be introduced separately: My distinguished colleague from Virginia (Mr. FISHER), for example, is introducing a measure stressing the guidelines approach. Others of us intend to develop the tax incentive proposals, to authorize tax cuts rewarding voluntary restraint by workers and businesses. The anti-inflation bill we are outlining today should give a sharper focus to these efforts and assure a more systematic approach to the basic problem.

There is presently little cohesiveness to Federal anti-inflation efforts. Legislation and administrative regulations are considered one by one, without much attention to the collective impact. Last year, for example, I am convinced the Government undermined its attack on inflation by sharply raising social security payroll taxes and minimum wage rates. In the case of social security, proposals with much less of a direct effect on price levels were largely ignored.

Our bill would encourage the Government to put its own house in order. Recognizing the "cost-push" nature of much of the current inflationary pressures, we suggest a variety of ways to cut Government-induced costs.

In the regulatory area, for example, we recommend significant revision of procedures for setting standards, to assure more careful balancing of the need for particular requirements against the added costs they impose. The bill specifically seeks incentives for agencies to develop cost-effective regulations and advances the idea of a special "regulatory budget." Under such a system, which I believe was first proposed by economist Robert Crandall of the Brookings Institution, the Office of Management and Budget would recommend annual limits on the total amounts of resources that could be required to meet the standards of each regulatory agency. Along with encouraging more thorough analysis of costs and benefits, the process should guarantee a greater effort to minimize the costs of compliance.

Other options discussed in the bill include tax revision, deregulation of certain industries, measures to increase productivity, antitrust and trade policies. As I have already indicated, overall fiscal and monetary policies must be supportive. While the bill does not mandate particular choices, I personally feel it is inappropriate to maintain huge Federal deficits in a period of recovery. Ultimately, without a credible effort by Government to reduce its own contribution to the inflation problem, we stand virtually no chance of securing support from from the private sector.

Government, clearly, cannot break the wage-price spiral by itself. Lasting progress will depend on cooperation by the private sector in moderating wage and price behavior. But traditionally, the problem with voluntary restraint has been that no one wants to be the first to settle for lower wages or price increases, for fear that others will not go along.

Our bill seeks ways to make such voluntary efforts worthwhile. Specific recommendations include the use of tax incentives, in the form of credits or refunds, to induce workers and firms to hold cost increases below particular levels. Modeled on proposals of Brookings economist Arthur Okun, the program we envision would be entirely optional. But with properly designed incentives, workers and firms should want to participate, causing the momentum of the wage-price spiral to subside.

Our proposals for annual wage and price guidelines also stress cooperation rather than coercion. Though the levels may be determined by formula, the President is also directed to seek the recommendations of representative industries and labor organizations concerning guidelines they believe they could attain. The bill further establishes procedures and timetables for congressional action on the guidelines.

Finally, we recognize that in certain sectors of the economy—like food, energy, health care, and housing—prices have accelerated at unusually rapid rates. Our bill proposes separate examinations of the problems in these sectors, and urges a reconsideration of certain Federal policies.

What we envision, in conclusion, is a multifaceted approach to inflation, involving new efforts by both the public and the private sectors. Our legislation offers a way to fit the policies together, and achieve some consensus on the elements of a workable anti-inflation plan.

SECTION-BY-SECTION ANALYSIS

Section 1. Comprehensive Anti-Inflation Act of 1978.

Section 2. Purposes.

(1) to reduce and stabilize the rate of inflation, without impairing economic growth, adding to unemployment, or creating inefficiencies and distortions in the allocation of resources.

(2) to obtain agreement between the President and the Congress on a comprehensive plan for combating inflation, including specific economic and regulatory policies and programs.

(3) to promote consideration of new policies to encourage voluntary wage-price restraint.

(4) to promote analysis of the costs and benefits of Federal regulatory and program activities, and establish a Federal commitment to minimize the excess costs imposed by such policies.

(5) to require short- and long-term inflation goals and establish reasonable guidelines for price increases and wage settlements.

TITLE I—COORDINATION OF ECONOMIC POLICIES

Section 101. Amends the Employment Act of 1946 to require the President to include, as part of his annual Economic Report, a comprehensive plan for reducing inflation. The plan shall include numerical inflation goals for the next two years (short-term goals) as well as longer-term objectives covering a five-year period. Both short and long-term goals must be consistent with other national economic priorities, including maintenance of healthy economic growth and progress toward full employment. The plan shall also include the President's recommendations on fiscal policy and on specific programs intended to achieve the anti-inflation goals. In explaining the plan, the President's report shall discuss the range of options considered and the reasons for particular choices.

Section 102. Requires an independent annual statement from the Federal Reserve Board describing its anticipated monetary policies and the relationship of those policies to the President's anti-inflation goals.

TITLE II—ESTABLISHMENT OF GUIDELINES

Section 201. Amends the Employment Act of 1946 to require the President to formulate annual wage and price guidelines. These targets, to be set forth in the Economic Report, should apply to all businesses and labor organizations. The President may use a formula to determine guideline levels, and also seek recommendations from representative industries and labor organizations concerning the levels they think they can attain. A possible formula would take the cost-of-living increase for the preceding year, and add an estimate for economy-wide productivity gains, and subtract from the sum an inflation reduction factor of approximately 25 percent. The section further permits the President to take steps to promote voluntary compliance with the guidelines, but forbids the use of mandatory wage or price controls.

Section 202. Provides for appropriate consultations between the Council of Economic Advisers and other government agencies, including the Council on Wage and Price Stability, in preparing the President's anti-inflation plan and guidelines.

TITLE III—POLICIES AND PROGRAMS TO REDUCE INFLATION

Section 301. The purpose of the title is to set forth a variety of options for the President to consider as elements of a comprehensive anti-inflation plan, in recognition of the drawbacks of relying solely on general economic remedies. Each section lists policy alternatives aimed at reducing costs, to encourage wage and price moderation without undermining other national economic objectives.

Section 302. Recommends reducing or replacing taxes which directly increase prices, including Federal payroll taxes, Federal excise taxes, state and local sales, excise, and consumption-related taxes, and providing needed financing from income taxes and other revenue sources.

Section 303. Recommends revision of Federal regulatory procedures, to include thorough analyses of the costs and benefits of regulatory standards and to encourage the private sector to meet the requirements with as little extra cost as possible. The section further directs the President and the Office of Management and Budget to consider preparing a "regulatory budget" that would set annual limits on private and public expenditure levels that could be required to meet the standards of each regulatory agency.

Section 304. Recommends deregulation, specifically in the transportation sector.

Section 305. Recommends steps to encourage private and public sector productivity, including federal support for voluntary labor-management activities.

Section 306. Recommends the use of tax incentives to induce workers and firms to hold cost increases to specified levels. The section suggests incentives in the form of tax credits or refunds for achieving such moderation, but also requires a study of the possibilities from the Council of Economic Advisers and the Treasury Department. The section further outlines procedures the Council on Wage and Price Stability may use to obtain information and promote voluntary compliance with the wage and price guidelines. The Council may choose to require prior notice of price increases anticipated by large firms, as well as information concerning wage settlements and fee structures of professional associations, and issue reports when particular guidelines appear to have been violated. The President may further utilize mediation processes to achieve compliance in such cases.

Section 307. Provides for special attention to sectors exhibiting unusually rapid increases in prices, including food, energy, housing, and health care.

Section 308. Recommends efforts to strengthen and improve enforcement of the antitrust laws.

Section 309. Recommends emphasis on fair trade policies that could lower domestic costs, with appropriate consideration of the effects on domestic production and employment.

TITLE IV—CONGRESSIONAL REVIEW

Section 401. Amends the Employment Act of 1946 to provide for review of the President's anti-inflation plan and proposed wage and price guidelines by the Joint Economic Committee. After holding hearings, the committee is required to issue a report and refer its policy recommendations to the appropriate legislative committees. The section further sets a timetable for congressional action on the proposed guidelines, providing 30 days for the House and Senate to disapprove these targets by concurrent resolution. If the guidelines are disapproved, the President may resubmit new ones to Congress within 30 days. If Congress fails to act by the deadline, the President's guidelines would take effect.

H.R.—

A bill to reduce the rate of inflation and keep it within reasonable bounds by providing for a comprehensive plan for coordinating Federal economic and regulatory policies to offset inflationary pressures, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Comprehensive Anti-Inflation Act of 1978".

PURPOSE

SEC. 2. It is the purpose of this Act to—

(1) reduce the rate of inflation and to keep it within reasonable bounds, without impairing economic growth, adding to unemployment, or creating other inefficiencies and distortions in the allocation of resources;

(2) obtain agreement between the President and the Congress on a comprehensive plan for moderating inflationary pressures, that outlines the role of specific economic and regulatory policies and programs;

(3) promote consideration of new policies to encourage voluntary wage-price restraint;

(4) promote analysis of the costs and benefits of Federal regulatory and program activities, and establish a Federal commitment to minimize the excess costs imposed by such policies; and

(5) require short- and long-term inflation goals and establish reasonable guidelines for price increases and wage settlements.

TITLE I—COORDINATION OF ECONOMIC POLICIES

COORDINATION OF ECONOMIC POLICIES

SEC. 101. (a) Section 3(a) of the Employment Act of 1946 is amended—

(1) by striking out "and" immediately before "(4)"; and

(2) by inserting before the period at the end thereof the following new clause: "(5) a coordinated set of fiscal (tax, expenditure, and borrowing), monetary, and other economic and regulatory policies designed to combat inflation and to achieve the related goals set forth in the Report, established in accordance with subsection (c)".

(b) Section 3 of such Act is further amended by redesignating subsection (c) as subsection (e), and by inserting after subsection (b) the following new subsection:

"(c) The economic and regulatory policies referred to in subsection (a)(5) shall set forth—

"(1) current trends in the levels of prices, wages, productivity, and production costs, as well as analysis of relevant factors and economic conditions affecting such trends, including projections for inflation rates in the next calendar year;

"(2) annual numerical inflation goals for the calendar year of the Economic Report and for the following calendar year, designated as short-term goals, which shall be

fully consistent with the goals of maintaining healthy economic growth, achieving full employment, increasing productivity, and promoting efficient uses of resources; and longer-term inflation objectives designated for a period of five years beyond the calendar year of the report, together with acceptable ranges for annual fluctuations in the price level;

"(3) fiscal policy targets for the calendar year of the Economic Report, with an explanation of how the President's recommended levels of outlays and receipts are consistent with the short-term goals of clause (2), and the direction of budgetary policy for the full five-year period and its relation to the longer-term objectives in clause (2); and

"(4) specific programs and initiatives designed to achieve the inflation goals in clause (2), including any recommendations of the President respecting programs and policies described in title III of the Anti-Inflation Act of 1978.

In describing the policies, the President shall indicate the range of options considered and give the reasons for his choices.".

FEDERAL RESERVE BOARD MONETARY POLICIES

SEC. 102. The Board of Governors of the Federal Reserve System shall annually transmit to the Congress an independent statement of its intended monetary policies for the year, and explain their relationship to the short-term and longer-term inflation objectives set forth in the Economic Report for such year as required by clause (5) of section 3(a) of the Employment Act of 1946. Nothing in this Act shall be interpreted to require that policies proposed by the Board be followed if the Board and the Federal Open Market Committee determine that they cannot or should not be followed because of changing conditions.

TITLE II—ESTABLISHMENT OF GUIDELINES

ESTABLISHMENT OF GUIDELINES

SEC. 201. (a) Section 3(a) of the Employment Act of 1946 is amended by inserting before the period at the end thereof the following new clauses: "; and (6) a set of guidelines to govern price increases and wage settlements, established in accordance with subsection (d)".

"(d) The guidelines referred to in subsection (a)(6) shall be designed to reduce and stabilize the rate of inflation, and shall apply to business concerns and labor organizations. Such guidelines—

"(1) shall be formulated in consultation with congressional, business, labor, and private advisers, as well as with the Council of Economic Advisers;

"(2) shall take into account the recommendations of representative industries and labor organizations from major sectors of the economy respecting annual targets which such industries and organizations could comply with;

"(3) shall take into account existing and projected national economic conditions, the pattern of wage and price movements in recent years, trends in nonlabor cost increases, and other relevant considerations; and

"(4) may be based on a formula that reflects the increase in the cost-of-living which has occurred during the preceding year (as measured by the change in the Consumer Price Index) and adds an estimate of productivity gains throughout the economy and subtracts from this sum, a factor of approximately 25 percent of such cost-of-living increase and such productivity gains, or any other formula the President considers appropriate.

The President may take appropriate actions to promote voluntary compliance with the guidelines, but the President shall not utilize any form of mandatory controls on either wages or prices.

COUNCIL OF ECONOMIC ADVISERS

SEC. 202. (a) Section 4(c)(1) of the Employment Act of 1946 is amended by inserting before the semicolon at the end thereof the following: ", including the portions of such Report establishing economic policies and guidelines as required by clauses (5) and (6) of section 3(a)".

(b) Section 4(e)(1) of such Act is amended by inserting before the semicolon at the end thereof the following: ", and shall seek the advice and concurrence of the Council on Wage and Price Stability, as well as the cooperation of other departments and agencies of the United States, in carrying out its functions with respect to the portions of the Economic Report establishing economic policies and guidelines in accordance with clauses (5) and (6) of section 3(a)".

TITLE III—POLICIES AND PROGRAMS TO REDUCE INFLATION

PURPOSE

SEC. 301. The Congress recognizes the inadvisability of relying solely on general economic policies to reduce inflation in a manner consistent with other national objectives for economic growth and employment as provided for in title I of this Act. It is, therefore, the purpose of this title to urge the President to undertake, with recommendations to the Congress where necessary, additional programs and policies capable of achieving the anti-inflation goals set forth in this Act.

TAXES

SEC. 302. In formulating and revising tax policy, the President shall endeavor to reduce, or substitute for, taxes which significantly increase price levels. The President shall specifically consider—

(1) reductions in Federal payroll taxes for social security and unemployment compensation, with provision for alternative financing of some segments of these programs to produce sufficient revenues;

(2) rescinding of Federal excise taxes, replacing lost revenues with income taxes;

(3) the use of Federal revenues to compensate States and localities that choose to reduce or repeal indirect taxes, such as sales taxes, excise taxes, and various consumption-related taxes, for at least part of their revenue losses, if these jurisdictions do not substitute other cost-raising taxes; and

(4) the use of tax incentives to induce workers and firms to hold down cost increases.

REGULATORY REVIEW

SEC. 303. (a) The Congress recognizes that Federal regulatory requirements have added substantially to costs in many industries and that existing procedures for setting standards do not assure thorough analysis of either the costs or the social benefits, or comparison of alternative approaches to achieving particular regulatory aims.

(b) To promote the purposes of this Act, the President shall encourage executive and independent agencies to utilize analytic information on costs and benefits in determining appropriate standards. As far as possible, regulations shall allow private agents the technolcgical and administrative flexibility to meet the requirements in the least costly way.

(c) The President, in consultation with the Office of Management and Budget and other advisory agencies, shall further develop specific procedures to promote the promulgation of economically efficient and socially desirable regulations. Such a system could include annual limits on the total amounts of private and public resources that could be devoted to meeting the requirements of each regulatory agency, to provide incentives to adopt cost-effective regulations and obtain maximum benefits for given levels of expenditures.

DEREGULATION

SEC. 304. The President shall take appropriate steps toward deregulation of industries over which the Federal Government has rate-setting authority, if he determines that deregulation would promote competition and reduce service costs without harm to the public. The President shall specifically consider deregulation of entry and fare-setting in the transportation sector, including the airline, trucking, shipping, and railroad industries.

PRODUCTIVITY

SEC. 305. The President shall encourage the growth of productivity in both the private and public sectors, and develop policies to promote investment in human resources as well as technological advancement. To accomplish these purposes, the President may support the establishment and operation of joint labor-management activities conducted by plant, area, and industry-wide committees, designed to increase productivity and organizational effectiveness, and improve the utilization of human resources.

VOLUNTARY WAGE AND PRICE RESTRAINT

SEC. 306. (a)(1) In seeking voluntary cooperation from business and labor to achieve objectives of this Act, the President shall examine the use of tax incentives, to workers and to firms, to hold cost increases to specified levels. Such approaches could involve tax refunds, equal to a particular percent of wages, to workers whose companies hold average pay increases to a specific rate per year. Corresponding tax reductions could be offered to firms that pledge in advance to take such action, and to firms that limit their price increases to a specific annual rate.

(2) The Council of Economic Advisers and the Department of the Treasury shall jointly prepare a study and make recommendations regarding the use of tax incentives to induce compliance with the wage and price guidelines established under section 3(a)(6) of the Employment Act of 1946. Such study and recommendations shall be transmitted to the Committee on Ways and Means of the House of Representatives, the Committee on Finance of the Senate, and the Joint Economic Committee for their consideration and appropriate action.

(b)(1) The Council on Wage and Price Stability may require each business concern with annual sales of not less than $100,000,000 to which (under section 3(c) of the Employment Act of 1946) the guidelines currently in effect under section 3(a)(6) of such Act are applicable, and which proposes to make a significant price change in any major product line, to notify the Council of such change at least 30 days before it becomes effective. In addition, the Council on Wage and Price Stability may require each professional association to submit to the Council an annual report on the fee structures of the persons or groups it represents, including the results of surveys conducted of such persons or groups, and the Council may monitor and study the provisions of all major wage settlements.

(2) The Council on Wage and Price Stability may obtain information respecting the range of anticipated wage settlements from the Department of Labor.

(c) The Council on Wage and Price Stability, on its own initiative or at the request of any business concern or labor organization substantially affected by the guidelines involved (or at the request of a consumer group having a substantial and direct connection with such a concern or organization), may make and publish a report on any price increase, wage settlement, or change in

fee structures which in its judgment exceeds or violates the applicable wage or price guidelines currently in effect under section 3(a)(6) of the Employment Act of 1946. Each such report shall cover price trends, wage and other cost trends, agreements reached in similar situations, any mitigating or unusual factors, the profit picture in related firms and industries, and other relevant considerations. Any business concern, labor organization, or professional association whose plans, practices, or actions are the subject of such a report shall be given a reasonable opportunity to reply in writing, citing any special circumstances which may explain or justify the violation of such guidelines or demonstrating that no such violation exists.

(d) Whenever the Council makes a report on a price increase, wage settlement, or change in fee structures under subsection (b), the President may—

(1) institute and carry out (in the case of a wage settlement) a process of mediation between the business concern or concerns and the labor organization or organizations which are involved, under the direction of an independent mediator, or

(2) institute and carry out (in the case of a price increase or a change in fee structures) such process of mediation as in his judgment is suitable to the circumstances, including participation by appropriate business, labor, and consumer interests.

in order to achieve compliance with the applicable guidelines.

SPECIAL SECTORS

SEC. 307. (a)(1) The Congress recognizes that food prices have contributed significantly to recent inflationary trends, and that Federal policies to stabilize crop prices and farm income have tended to exert upward pressure on prices. These include such choices as price supports, acreage set-asides, and other output limitations.

(2) In formulating agricultural policy, the President shall strive to preserve production incentives and allow market forces to operate wherever possible. The President shall specifically consider—

(A) the use of commodity reserves to moderate price fluctuations; and

(B) direct payments to farmers, subject to an appropriate limit, as the means of support during periods of low income.

(b)(1) The Congress recognizes the urgent need for a national energy policy that reduces United States dependence on imported oil, and takes appropriate action to promote conservation. To the extent such measures increase energy prices to discourage consumption, higher costs will be felt throughout the economy.

(2) The President, with assistance from the Council on Wage and Price Stability and other relevant agencies, shall explicitly address the price implications of energy policies in the Economic Report and seek ways to offset inflationary effects.

(c) The President shall examine and analyze the causes of rapid acceleration in housing prices, and seek ways to reduce supply bottlenecks and lower land, financing, and other relevant costs. In formulating policy in this area, the President shall also explore with the Federal Reserve Board the role of its actions on interest rates and possibilities for accommodations in the general structure of interest rates.

(d) The President shall set forth programs and policies to limit the acceleration of health care costs, including proposals to restrain increases in hospital costs.

ANTITRUST

SEC. 308. The President shall explore ways to increase competition in concentrated industries and take appropriate action to strengthen and enforce the antitrust laws.

TRADE

SEC. 309. The President shall pursue negotiations for fair trade agreements with foreign nations and explore the potential for adjustments in trade policies that would lower domestic costs. In recommending revisions, the President shall weigh the effects on domestic production and make appropriate arrangements for direct assistance to workers and industries affected by such policies.

TITLE IV—CONGRESSIONAL REVIEW

CONGRESSIONAL REVIEW BY JOINT ECONOMIC COMMITTEE

SEC. 401. Section 5 of the Employment Act of 1946 is amended by adding at the end thereof the following new subsection:

"(g)(1) In conjunction with its annual review of the Economic Report, the joint committee shall hold special hearings for the purpose of reviewing the President's proposed economic policies to combat inflation (as included in such report pursuant to section 3(a)(5)) and his proposed guidelines for wages and prices (as included in such report pursuant to section 3(a)(6)). As soon as possible after such hearings are completed, the joint committee shall submit to the House of Representatives and the Senate its findings and recommendations with respect to such guidelines and policies (and shall in addition transmit directly to the committees of the House and Senate having jurisdiction with respect to such policies its specific recommendations for appropriate action thereon by those committees).

"(2) The proposed guidelines for wages and prices which are included in the Economic Report shall become effective, as the national standard to be followed by business concerns and labor organizations in accordance with section 401 of the Anti-Inflation Act of 1978, on the 30th day following the day on which the joint committee submits its findings and recommendations to the House and Senate under paragraph (1), unless prior to such 30th day the Congress (in accordance with paragraph (3)) adopts a concurrent resolution stating in substance that it disapproves of the guidelines as included in the Report. If the Congress adopts such a concurrent resolution, such guidelines shall not become effective and the President may within 30 days resubmit them with such modifications as he may consider necessary or appropriate; and the guidelines as so resubmitted shall become effective unless prior to the 30th day after the date of resubmittal the Congress (in accordance with paragraph (3)) adopts a concurrent resolution stating in substance that it disapproves of the guidelines as resubmitted.

"(3) Any concurrent resolution described in paragraph (2) which is introduced in either House of Congress shall be considered under and in accordance with the procedures set forth in section 1017 of the Congressional Budget and Impoundment Control Act of 1974, as though it were a resolution to which that section applies; except that for purposes of applying such procedures (A) a concurrent resolution which has passed one House and is transmitted to the other House shall be considered to have been introduced in the latter, and (B) the term '25 calendar days of continuous session of the Congress' in subsection (b)(1) of such section 1017 shall be deemed to read "15 calendar days'.".●

● Mr. PATTISON of New York. Mr. Speaker, during my two terms in Congress, I have spoken with thousands of my constituents about the inflation problem. Time after time, people in my congressional district have told me that they are concerned over the Federal Government's inability to really do something about inflation.

In these discussions, I often point out the complexity of the inflation problem, and the need for industry, labor, consumers, and government on all levels to work together to find a solution. However, for a retiree struggling to make ends meet on a fixed income, or for a young couple trying to maintain a decent standard of living for a growing family, such generalities have little meaning.

Clearly, the Federal Government must take the lead. As a member of the Economic Policy Group of the class of the 94th Congress, I have met periodically with several of my colleagues to discuss methods and to draft legislation to bring about a unified Federal policy on inflation. Today, we are introducing this legislation—the Comprehensive Anti-Inflation Act of 1978.

The main thrust of this bill is to foster a comprehensive Federal approach to lower the inflation rate, and to take actions, short of wage and price controls, to encourage business and labor to avoid excessive wage and price increases.

The approach of the bill is long-term and "process" oriented. It provides no easy or quick fix to the problem.

The Comprehensive Anti-Inflation Act directs the President to submit to Congress an annual statement of short-term and long-term policies for combating inflation. It mandates a coordinated effort among the White House and the Federal agencies for drawing up voluntary wage and price guidelines for major industries in consultation with labor and management, reducing the social security payroll tax and other taxes which most directly increase the costs of goods and services; reforming Federal regulations to minimize their inflationary impact; fostering greater labor-management cooperation for increased productivity; and improving the enforcement of the antitrust laws to foster competition. The bill also requires an independent annual statement from the Federal Reserve Board describing its anticipated monetary policies and the relationship of those policies to the President's anti-inflation goals.

Finally, the Comprehensive Anti-Inflation Act provides a defined process of congressional review of the President's report.

Our current efforts to slow the inflation rate are hamstrung by conflicting policies. We cannot confront a complex problem with piecemeal solutions. The President's wage and price guidelines are hard to sell to companies who feel that Government regulations needlessly increase their costs of doing business. Furthermore, we cannot expect some segments of the economy to bear all the burdens of fighting inflation.

Once a large group of workers, the coal miners, for example, obtain large wage increases, other workers are understandably reluctant to accept less. We must look at the economy as a whole, so that our attempts to slow inflation are not counteracted by other policies.

This does not mean that we should cut back on our attempts to clean up the environment, improve occupational safety, or set standards for goods and services. What we must do, and what the Anti-

Inflation Act mandates, is that we examine all of our options in a coordinated way and try to accomplish our other goals in the least costly manner possible.

It is my hope that this bill will be an important tool for fighting inflation. While it does not demand any fundamental shift in our present policies, it does provide a central focus to our efforts to solve this problem. And I do not think it will be possible to cut the inflation rate without a truly comprehensive policy.

I commend my colleague from New York, Congressman STAN LUNDINE, for his leadership on this issue. Congressman WILLIAM MOORHEAD, showing his usual commitment to solving tough economic problems, has committed the Economic Stabilization Subcommittee, which he chairs, and on which I serve, to hold hearings on this bill in September. I urge my colleagues to support the Comprehensive Anti-Inflation Act of 1978, and I look forward to its early passage when the 96th Congress convenes in January.●

● Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I am pleased to be a cosponsor of the Comprehensive Anti-Inflation Act of 1978, and to announce that the Subcommittee on Economic Stabilization of the Banking Committee, of which I am chairman, will hold a hearing on the bill next month. While it may be too late in the current session of Congress to enact comprehensive legislation this year, I want to remind Members that the House will certainly consider legislation in this field next year, if for no other reason than the need for renewal of the statutory life of the Council on Wage and Price Stability, which expires September 30, 1979.

While I am not wedded to every provision of the bill introduced today, it is an excellent starting point for considering the difficult question of how we can improve and toughen our legislative approach to inflation. My opposition to mandatory wage and price controls is unchanged—and is confirmed in this bill—but beyond that my mind is open.

Apart from the controversial question of price and wage guidelines, Mr. Speaker, Members will note that this bill serves as an excellent reminder of all the ways in which the Government can affect the price level beyond its macroeconomic monetary and fiscal policies. It instructs the President to examine every one of them, and make recommendations. From payroll taxes to farm policy, from cost-raising regulation to the role of imports, the list is extensive.

We have learned to our sorrow that inflation will not just go away—and indeed that even a deep recession, with all its pain and suffering, will no longer make a major dent in inflation, as illustrated by the experience of 1974–1976. It is a time for fresh thinking, and I believe the Comprehensive Anti-Inflation Act of 1978 being introduced today starts us in that direction.●

A RECOGNITION OF OUR CONSTITUTED AUTHORITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, I was indeed delighted to hear from Mr. Arthur Burck of Palm Beach, Fla., a longtime friend and most dedicated citizen, concerning some of his experiences while attending and testifying at several subcommittee hearings in the House of Representatives.

Mr. Burck wrote a most interesting letter that has been submitted to several leading newspapers for publication, and I wish to share this letter with you as a source of inspiration for all "constituted authority" and a sincere recognition that the American public does indeed empathize with the difficult plight of elected officials. I include the text at this point:

PALM BEACH, FLA.,
August 4, 1978.

Letter to the Editor:

Our Senators and Congressmen in Washington are too often viewed as mediocrities who are overprivileged, overpaid and oversexed. For years our press has been headlining the occasional peccadilloes of our legislators, but rarely is there an article summarizing the hard work, dedication to duty and ability of incredible breadth that are required by the complexities of the myriad issues they must deal with.

Last week I testified before a Senate and a House Subcommittee, made presentations before two chairmen of powerful House committees and addressed all FTC commissioners. In addition we had a small cocktail party for some government leaders and Washington friends.

Again, as we had observed in prior work with Congressional committees and government leaders, we were impressed by the complete dedication to duty of what on average is a group of exceptional ability. We taxpayers can be thankful that we don't have to pay overtime rates to our legislators because more often than not they are in legislative session until late evening hours. Indeed, a leading Washington hostess commented that evening sessions had become so common that astute hostesses no longer plan sit-down dinners—buffets have become the practical means for fashionable entertaining when legislators and high government officials are invitees.

My work as a corporate merger expert takes me into scores of the nation's leading executive suites every year. It is my observation that our leading businessmen and their subordinates do not work as hard as our national legislators and their staffs. It is therefore time we put to rest some of the many canards concerning goings-on in Washington.

To be sure, many have human frailities, as do all of us. Moreover, everyone is impatient with the pace of progress in resolving the many problems that surround us. But today's problems have no easy solution. Unmindful of these difficulties, some are flailing out for quick and easy answers, and so we have a proliferation of "to hell with our leader" ideas that may also be characterized as the "Proposition 13" mentality.

The danger of course is that such lack of respect for constituted authority accompanied by deep-seated problems that bother the common man, is fertile ground for the emergence of crackpots with easy solutions. We should all study the history of Germany and Italy in the twenties and thirties before we lightly follow any Pied Piper, or needlessly denigrate our governmental leaders at any level.

ARTHUR BURCK.●

CRIME SUBCOMMITTEE POSTPONES HEARING ON REAUTHORIZATION OF THE LAW ENFORCEMENT ASSISTANCE ADMINISTRATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 5 minutes.

● Mr. CONYERS. Mr. Speaker, the Subcommittee on Crime, which I chair, has postponed its scheduled hearing on legislation to reform and reauthorize the Law Enforcement Assistance Administration. This hearing was scheduled to take place on August 16, 1978, at 9 a.m. in room 2141 Rayburn House Office Building. As soon as a new date has been set, it will be announced.●

TEAGUE RETIRING FROM HOUSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. ROBERTS) is recognized for 5 minutes.

● Mr. ROBERTS. Mr. Speaker, veterans across the Nation, speaking through their great organizations, share the sorrow all of us feel at the coming retirement of OLIN TEAGUE from Congress. An expression of this general feeling of loss appeared in the June–July issue of the Veterans of Foreign Wars national magazine.

I include it in the RECORD at this point:

TEAGUE RETIRING FROM HOUSE

When the 96th Congress convenes, one House member who will be missing for the first time since the end of World War II is Texas' Olin E. (Tiger) Teague who has carved a record for himself as one of the veterans' best legislative friends.

Teague is resigning from the House at the end of his present term because of ill health brought on by the wounds he suffered during World War II as a battalion commander in the 314th Infantry of the 79th Division. He spent two years in an Army hospital recovering from his injuries.

Commissioned on his graduation from Texas A & M, Teague volunteered for the Army in 1940 after serving three years as an enlisted man in the National Guard. During World War II he was awarded the Silver Star, Bronze Star and Purple Heart three times each. He also was decorated with the French Croix de Guerre and fourragere.

He was discharged as an infantry colonel in 1946 to take his seat in the 79th Congress.

From the 84th Congress through the 92nd, he chaired the Veterans' Affairs Committee, working closely with the V.F.W. to provide the veterans of all wars with benefits tailored to their special needs.

He resigned his chairmanship of that committee to head the Space and Astronautics Committee during the 93rd Congress and continued in that leadership role through the 95th. It has since been named the Science and Technology Committee. Meanwhile, he did not let his interest in veterans' concerns lapse, for he retained his membership on the Veterans' Affairs Committee as senior majority member. He chairs the Education and Training Subcommittee.

Teague also has served on a variety of Congressional boards and commissions, including the Board of Visitors to the U.S. Military Academy at West Point from 1955 to 1971.

One of the highlights of his Congressional career came when he was honored by the

V.F.W. at the 1969 Washington Conference with the annual Congressional Award. At that time he was its sixth honoree.

In his acceptance speech, he noted that "there are a lot of problems in America but there are a lot more things that are right with America than there are that are wrong."

"Our system demands that we seek out and identify our problems," he continued. "It is true that there are some who still suffer the indignities of inequality and the shame of injustice. We must forever and with all our energy continue to seek to correct these injustices and inequalities. We must always strive to improve the quality of life for all our people, but sometimes it seems to me that we become so engrossed in these problems, so centered on what is wrong, that we seldom acknowledge what is right."

Since the presentation of his award occurred at the height of anti-Vietnam War rioting and student protests, his words came as a welcome antidote.

Teague, a supporter of American efforts in Vietnam, announced at the 1968 V.F.W. National Convention in Detroit that he would not support a Democratic presidential nominee who would back away from the U.S. commitment in Southeast Asia.

Teague was one of the first in Congress to recognize the plight of American prisoners of the North Vietnamese and Viet Cong, as well as those missing in action.

To underscore the tragedy of those men, he brought the wives of four of them to the 1969 V.F.W. National Convention in Philadelphia and in 1970 to Miami Beach to tell their heartbreaking story and to arouse public opinion on that issue.

Throughout his Congressional career, Teague participated in many other V.F.W. National Conventions to bring delegates up to date on the status of veterans' legislation, to criticize VA shortcomings in fulfilling its missions of assistance to Veterans and to advocate further veterans' benefits.

To enable V.F.W. members to demonstrate their gratitude for what Rep. Teague has been able to accomplish for veterans during his 32 years in the House of Representatives, a scholarship has been established in his honor at Texas A & M University to which they may contribute.

The first $1,000 for the Olin E. Teague Scholarship Fund was given by the V.F.W. during the Washington Conference through Commander-in-Chief John Wasylik.

Contributions may be sent to the Olin E. Teague Scholarship Fund in care of the Quartermaster General, V.F.W. National Headquarters, Kansas City, Mo. 64111.●

OFF-ROAD VEHICLES, FUEL RATIONING AND LAND MANAGEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Montana (Mr. BAUCUS) is recognized for 10 minutes.

● Mr. BAUCUS. Mr. Speaker, I am concerned that we in Washington occasionally lose sight of the valuable contributions made by off-road vehicles, or ORV's, in many parts of the United States. ORV's often provide the only access to rugged or snowbound areas in States such as Montana, and many farmers, ranchers, and outdoorsmen have come to depend upon these vehicles for their livelihoods, as well as for recreational purposes.

I have noticed an unfortunate tendency among some people that associate ORV operators with antienvironmentalists who would pollute and abuse natural resources at every opportunity. This is an unfair misconception. The great majority of those who use off-road vehicles do so in order to experience the very qualities in nature which all of us value and appreciate. In areas such as Yellowstone National Park, snowmobile users have been among the visitors who were most considerate of their natural surroundings.

Additionally, while I can understand that many city dwellers and suburbanites would think that ORV's are only used for recreational purposes, we must not let ourselves forget that ORV's have many unique, practical applications for farmlands, grazing lands, and forest areas. Many farmers and ranchers rely on snowmobiles for cattle feeding and other agricultural tasks during the winter. ORV's have also been responsible for saving thousands of lives during rescue operations and provide access to off-road areas for land management purposes. In short, just as automobiles are often used for recreational or nonessential purposes, off-road vehicles are necessities for the lifestyles of many Americans.

Naturally, ORV users become resentful when we try to restrict their activities based upon some of the misconceptions I have just outlined. As an example, the Department of Energy recently proposed a contingency gas rationing plan (Federal Register, June 28, 1978). This plan would be implemented by Congress and the President during a fuel shortage to "assure access to gasoline by all motorists" in order to "mitigate the economic dislocation caused by a severe energy supply interruption." Yet nowhere, Mr. Speaker, does this plan provide for a fuel allocation to the off-road vehicle users I have been discussing.

Though I support the idea of a contingency rationing plan, no such plan should neglect the economic and recreational importance of ORV's or assign these vehicles a low priority. The Department of Energy should provide a gasoline allocation for registered ORV's as they do for other registered motorized vehicles.

Such an allotment could be calculated as a percentage of the amount granted to automobiles. For instance, the average snowmobile uses approximately 80 gallons of gasoline per year, or roughly one-tenth the amount consumed by an automobile. Thus, the contingency plan might allow for a snowmobile fuel allotment equal to one-tenth the amount provided for an automobile during a given shortage. Allocations for other ORV's could be similarly determined.

During an especially severe shortage, another possibility might be to ask ORV users to distinguish between the essential and nonessential uses of their vehicles. ORV users would voluntarily comply with national energy needs in such cases rather than facing the undue restrictions which the present plan certainly imposes.

In any case, a failure to allocate fuel for ORV use would tantamount to ignoring the transportation needs of many Americans. During the energy crunch several years ago, Congress repeatedly expressed its opposition to discriminating against any industry or any region of the United States—including recreational activities. As we formulate our plans to deal effectively with any future shortages, we should ensure that such activities as ORV use are not unduly discriminated against.

An example of such a good nondiscriminatory policy in another area is contained in the Bureau of Land Management's proposed regulations for ORV use on lands under its jurisdiction. While it would be convenient if ORV's could travel in an accessible region, wise land management practices necessitate the regulation of ORV's in certain areas. Most ORV operators understand and appreciate efforts to preserve fragile lands which have a low capacity to handle ORV use.

The BLM regulations are exemplary in that they allow for the diversity among different types of ORV's, flexibility from season to season and area to area, and minimize conflicts among users and needs for a particular area.

Snowmobiles, motorcycles, four-wheel drive vehicles, and all-terrain vehicles each have different capabilities and affect the land they use in different ways. For example, an area which may have to be closed to motorcycles in the summer could be opened to snowmobiles in the winter because of the protection which the snowpack affords. The BLM regulations permit such areas to be "restricted" by type of vehicle or season in order to allow for variations in soil capabilities, wildlife migration patterns, or severe weather-related developments, such as droughts.

In other cases, lands can be "closed" to ORV's where other uses of the land would be endangered or "open" to ORV's, where no damage would result.

Until a given area is designated under these new provisions, it will be open to ORV use unless it is subject to previously issued restrictions. In all instances, however, the BLM is inviting the public to submit comments for each specific case as it comes up for designation. The BLM anticipates that all of its lands will receive the new designations by 1987. In the meantime, I urge my colleagues to take advantage of this time allowance to insure that ORV operators and other interested groups receive a fair representation in this process.

Finally, the BLM regulations establish certain minimum requirements which protect its lands from wreckless or inconsiderate operation of ORV's. Reasonable licensing provisions and equipment standards are included in their proposals to maintain ORV use as the safe and constructive activity that it has been in the past.

Effective land management policies must not only guarantee that damage to areas of natural beauty or importance is avoided, but we must also provide access to such lands so that the public may enjoy them. Otherwise, we may find ourselves in the position of the art collector who is so concerned about the safety of his paintings that he locks them up in a vault where they can never be appre-

ciated. Many Americans rely on ORV use as a helpful, practical and enjoyable outdoor experience, and I am encouraged that the BLM has given them such consideration during the development of ORV policy.

In conclusion Mr. Speaker, Montana has a great number of ORV users who want and feel a responsibility to share the concerns of conserving energy and our natural resources. It is important that the Congress, as well as other Government agencies, maintain an appropriate perspective toward ORV users as we formulate relevant legislation. We should not fall prey to the misconceptions which have led to discriminatory practices in the past. I urge my colleagues to contact the Department of Energy on behalf of ORV users and to review the specific BLM designations as they are presented.●

PERSONAL EXPLANATION

(Mr. SHUSTER asked and was given permission to extend his remarks at this point in the RECORD.)

● Mr. SHUSTER. Mr. Speaker, I ask that the RECORD show that I was not present yesterday, August 14, 1978, because I was attending the funeral of a close relative, Miss Sylvia Zeigler, in Duquesne, Pa. Had I been present, I would have voted against the foreign aid bill.●

TASK FORCE ON EMPLOYEE FRINGE BENEFITS BEGINS WORK

(Mr. PICKLE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PICKLE. Mr. Speaker, today the Ways and Means Committee's task force on employee fringe benefits began its work on settling the very difficult question of whether or not to tax fringe benefits.

Today's hearings received testimony from Assistant Secretary of the Treasury for Tax Policy Donald Lubick, and Commissioner of the Internal Revenue Service Jerome Kurtz. The task force also had before it a brief report on the problems in this area from the Joint Committee on Taxation staff.

I would ask that these materials be placed in the CONGRESSIONAL RECORD along with the announcement of the hearings.

The reason I seek this permission is because I want the widest possible circulation for the statements of the IRS, Treasury, and Joint Committee staff. These are very important statements for the task force's consideration. They lay out the parameters for our work in drafting up a recommendation solution to what is, or is not, taxable benefits. The task force is now soliciting statements from interested parties on their thoughts on taxation of fringe benefits. We are asking that the statements be submitted to us by September 5, and that where possible they be limited to three pages.

These statements that I am putting in the RECORD will aid those wanting to submit statements by giving them the opportunity to analyze what the executive branch agencies and congressional staff are saying about fringe benefits.

Mr. Speaker, today's hearings begin a very tough assignment for the Ways and Means Committee. Fringe benefits, and their treatment under the Tax Code, has plagued our income tax system since it started in full force in the 1920's.

Our task force's task will not be easy, for every American believes that he or she has certain inalienable rights, including life, liberty, the pursuit of happiness, and their own fringe benefits—tax free.

CHAIRMAN J. J. PICKLE, TASK FORCE ON EMPLOYEE FRINGE BENEFITS, COMMITTEE ON WAYS AND MEANS, INVITES WRITTEN STATEMENTS FROM THE GENERAL PUBLIC, TO RECEIVE TESTIMONY FROM TREASURY DEPARTMENT OFFICIALS AND IRS COMMISSIONER JEROME KURTZ, WITH RESPECT TO THE TAX TREATMENT OF FRINGE BENEFITS

The Honorable J. J. Pickle (D., Texas), Chairman of the Task Force on Employee Fringe Benefits, Committee on Ways and Means, today announced a one-day hearing on Monday, August 14, 1978, to receive testimony from Treasury Deparment officials and Commissioner of Internal Revenue Jerome Kurtz with respect to the tax treatment of "fringe benefits". The Task Force is charged with the responsibility to review this important area of tax policy, and make recommendations to the full Committee. In announcing this hearing, Chairman Pickle indicated that the Task Force intends to explore thoroughly the administrative and enforcement problems that exist under present law, as well as such policy recommendations as the Administration may be prepared to present at this time.

In addition, Chairman Pickle stated: "The treatment of fringe benefits is one of the most sensitive and complex tax issues that will come before Congress. We will be looking into the tax treatment of fringe benefits such as free travel for employees, free parking, company-paid entertainment, employee discounts on company goods and services, and many other areas. The result of the debate on this issue will have an impact on nearly every employee and employer in the nation."

The hearing will begin at 10:00 a.m. on August 14, 1978, in the Main Hearing Room of the Committee on Ways and Means, Room 1100 Longworth House Office Building. Treasury Department officials and Commissioner of Internal Revenue Jerome Kurtz will be the only witnesses at this hearing. However, at the present time, the Task Force anticipates conducting further hearings with invited public witnesses, prior to adjournment of the 95th Congress.

In addition to announcing the August 14 hearing, Chairman Pickle takes this occasion to invite all interested individuals and organizations to submit *written comments and recommendations* to the Task Force on any aspect of the tax treatment of employee fringe benefits. The Task Force is particularly interested in receiving information about (1) the specific concerns of those parties submitting statements; (2) areas of present law involving the greatest uncertainty; (3) such statistical information relating to fringe benefits as those parties submitting statements may wish to include; and (4) constructive recommendations for either legislative or administrative solutions to the problems. The Task Force encourages all interested parties to limit their written statements, to the extent practicable, to 3 pages, and requests five copies of any submission. In the event that it is necessary to exceed the suggested length of written statements, the Task Force strongly urges the party to include a brief summary of principal points and recommendations.

The written statements should be submitted to John M. Martin, Jr., Chief Counsel, Committee on Ways and Means, U.S. House of Representatives, Room 1102 Longworth House Office Building, Washington, D.C. 20515. Statements must be received no later than close of business Tuesday, September 5, 1978. It is the present intention of the Task Force to compile and print these written submissions in due course for release to the general public.

TAXATION OF FRINGE BENEFITS

(Prepared for the use of the Task Force on Employee Fringe Benefits, Committee on Ways and Means)

I. INTRODUCTION

This pamphlet was prepared by the staff of the Joint Committee on Taxation for the use of the Task Force on Employee Fringe Benefits of the House Committee on Ways and Means. The pamphlet contains a brief background statement of current law concerning the taxation of fringe benefits as well as a description of legislative action in the 95th Congress affecting this issue. In addition, the pamphlet contains examples of some of the types of fringe benefits which are currently in widespread use.

II. TAXATION OF FRINGE BENEFITS

A. Background of tax treatment

Section 61 of the Internal Revenue Code, and the regulations issued under that section, are quite broad, providing that gross income includes income in any form. Under these rules, income may be realized in the form of services, meals, accommodations, stock or other property, as well as in cash. The Supreme Court has also interpreted section 61 broadly to mean that "all accessions to wealth" realized by taxpayers are subject to tax unless specifically exempted. See *James* v. *United States*, 366 U.S. 213 (1961).

However, there have long been certain statutory exceptions to these rules for such items as employer contributions to qualified pension plans, health and disability plans, specified amounts of group life insurance, and meals and lodging furnished for the convenience of the employer.

In addition, certain kinds of fringe benefits have been exempted by rulings or regulations. For example, in 1921, the Service issued a ruling to the effect that railroad passes issued to railroad employees were gifts and did not constitute income to the employes (O.D. 946, 4 C.B. 110). This ruling has generally been interpreted to apply to airline and bus transportation provided by those carriers for their employees. In 1920, the Service ruled that reimbursement for supper when paid to an employee in connection with voluntary overtime work is for the convenience of the employer and therefore is not income (O.D. 514, 2 C.B. 90).

Other types of fringe benefits, such as free parking furnished at the worksite by an employer, have been considered nontaxable, even though there is no statute, ruling or regulation which specifically provides this.

Issued involving fringe benefits often turn on the facts and circumstances of a particular case. For example, the IRS has successfully litigated cases holding that the personal use of an automobile provided by an employer to an employee is taxable income to the employee. *Dole* v. *Commissioner*, 351 F. 2d 308 (1st. Cir. 1965). On the other hand, the taxability of the use of demonstrator automobiles by car salesmen and free or discount cars for automobile company employees or executives has not been publicly ruled on by the National Office. Another issue which the National Office has not yet publicly ruled concerns the treatment of

Federal employees who have use of a Federal car and chauffeur.

Further illustrating the continuing controversy over taxability of certain fringe benefits, the U.S. Supreme Court recently decided that amounts paid to State police officers as a cash allowance for meals consumed while on duty were includible in gross income (because such payments did not come within the statutory—meals for the convenience of the employer—exclusion adopted by Congress in sec. 119 of the code). *Commissioner* v. *Kowalski*, 98 S. Ct. 315 (1977).

Another troublesome issue which has recently come to the forefront is the treatment of tuition remission to families of university employees. In 1976, the IRS issued proposed regulations, holding that these amounts constituted taxable income. However, these proposed regulations were later withdrawn.

Other examples of types of fringe benefits which are commonly furnished to employers include employer-furnished subsidized housing, daycare centers, free schools, interest free loans provided to employees, free financial counseling, free trips to conventions for families, reimbursement for or directly furnished free commuting, subsidized cafeteria for employees or executives, health care services or medicial expense reimbursement plans not exempt by statute, price discounts and rebates for employees, tickets to sporting or cultural events, and employer-paid club dues. The issue as to the taxability or nontaxability of many of these benefits has not yet been finally resolved by ruling or litigation.

The problem concerning the taxation of fringe benefits is generally considered in the context of the Federal income tax. However, other areas of the Internal Revenue Code are also affected. For example, there is the question of whether fringe benefits should be taken into account for purposes of social security (FICA) taxes, unemployment (FUTA) taxes, and Federal income tax withholding.

B. 1975 Treasury discussion draft

In 1975, the Treasury Department issued a "discussion draft" of proposed regulations relating to fringe benefits which was later withdrawn in December of 1976. Under this discussion draft, there would have been a "safe harbor" (nontaxable treatment) for fringe benefits meeting three tests—(1) the goods or services provided to the employee were owned or provided by the employer in connection with a regular trade or business; (2) the goods or services were furnished to the employee under such conditions that the employer incurred no substantial incremental costs; and (3) the goods or services were made available to employees on a nondiscriminatory basis.

Fringe benefits not qualifying under the safe harbor were to be evaluated in terms of a non-part facts and circumstances test. These factors included (1) the cost to the employer of providing the benefit is not significant; (2) use of the benefit occurs during, or immediately before or after the employee working hours and the benefit is provided at or near the business premises of the employer; (3) the benefit is provided under a nondiscriminatory basis; (4) the service is similar to one commonly provided by a government agency; (5) the benefit is related to the convenience of the employer; (6) the benefit constituted reimbursement for cost of living factors necessitated by employment; (7) the benefit is safety related; (8) the value of the benefit is relatively modest in comparison to the employee's regular compensation; and (9) the item is generally not thought of as constituting compensation. Not one of the facts or circumstances was necessarily controlling.

In addition, the discussion draft provide a de minimis rule exempting from taxation fringe benefits of little value. Where an item was required to be taken into income under the discussion draft, however, the amount includible in gross income constituted the amount the employee would have had to pay for the goods or services on an arm's length basis.

The Internal Revenue Service raised objections to the discussion draft, believing that in some cases the discussion draft changed prior law and would have conferred nontaxable status on items which had previously been held to be taxable. Prior to the withdrawal of the discussion draft, the Service and the Assistant Secretary for Tax Policy agreed upon a package of revenue rulings in the area of fringe benefits. On December 17, 1976, Secretary Simon announced that the rulings would not be issued. The general thrust of the rulings would have been much less favorable to taxpayers than the Treasury discussion draft. The general tenor of the Internal Revenue Service ruling package did become public, even though some of the specifics were not known. This in turn triggered a public reaction on the part of certain groups which felt that their tax position might be worsened if the fringe benefit controversy were finally resolved within the Administration.

As indicated above, the so-called discussion draft was withdrawn in December of 1976 and the Internal Revenue Service package of rulings were never published. At this point, the situation is that the National Office of the IRS is not making any new rulings in the fringe benefit area. However, fringe benefit questions continue to be raised by IRS agents upon audit, and some of these questions are currently being litigated. Until such time as Congress, Treasury, or the IRS, as the case may be, resolve some of these issues on a national basis, there is a possibility that fringe benefit cases involving similar facts and issues may be resolved differently, depending on the jurisdiction where the case is audited or litigated.

C. Current congressional action

The Tax Treatment Extension Act of 1978 (H.R. 9251) provided that no rulings or regulations are to be issued in final form on or after October 1, 1977, and before July 1, 1978, providing for the inclusion of any fringe benefit in gross income by reason of section 61 of the Code. That bill passed the House on October 25, 1977, and the Senate on May 11, 1978. H.R. 12841 extends the freeze on the issuance of fringe benefit regulations until January 1, 1980. This bill was passed by the House on June 28, 1978, and by the Senate on August 4, 1978 (with an unrelated amendment).

The House Committee on Ways and Means has also established the Task Force on Employee Fringe Benefits to consider the legislative aspects of the issues in the fringe benefit area.

STATEMENT OF DONALD C. LUBICK, ASSISTANT SECRETARY OF THE TREASURY FOR TAX POLICY

Mr. Chairman and Members of this Task Force: I am pleased to appear here today to comment on the tax treatment of employee fringe benefits.

The income tax treatment of most types of fringe benefits is clear. Unless specifically exempted from tax by statute, the Internal Revenue Code requires that fringe benefits be included in income, and the courts have upheld this requirement over many years in many different circumstances.

The uncertainty which exists under present law is limited primarily to two types of fringe benefits. One type is the fringe benefit which is a product of the employer's business—such as transportation provided by a transportation company, education provided by a university, and discounts provided by a company which produces or sells the discounted goods. Another type is the fringe benefit which is indirectly related to the employee's job, such as limousines for commuting and "supper money".

The primary question before this Task Force, then, is whether these two types of fringe benefits should be taxable. The answer to this question will turn on identification of the true nature of the particular benefit and the administrative feasibility of subjecting it to tax. I shall, at a later point, suggest some principles to be applied in deciding these issues. However, I would like first to discuss the considerations of equity and economic efficiency which demonstrate that these issues must be squarely faced.

INEQUITY AND ECONOMIC INEFFICIENCY CAUSED BY EXEMPTING FRINGE BENEFITS FROM TAX

Fringe benefits come in a wide variety of shapes and sizes. They also vary widely in their patterns of distribution. As the Commissioner has pointed out, the nature and extent of fringe benefits vary from industry to industry, from employer to employer within industries, and from employee to employee in the case of a single employer. For these reasons, exempting fringe benefits from tax or valuing them at less than real value creates substantial tax inequities among employees.

Fairness requires that taxpayers with equal incomes be treated equally for income tax purposes. Compensation received in kind may be just as valuable as compensation received in cash. When fringe benefits are exempted from tax, taxpayers with equal incomes pay unequal taxes.

Exempting fringe benefits from tax produces unfairness not only among employees at the same income level, but also among employees at different income levels. When a fringe benefit is exempted from tax, the exemption is of greater value to a high-income taxpayer than to a low-income taxpayer. For a person in the highest tax bracket, an exemption provides 70 cents in tax savings for every dollar's worth of fringe benefits received. For a person in the lowest tax bracket, the exemption is worth only 14 cents. For a person with income too low to be taxed, the exemption is worth nothing.

There may be a social welfare purpose which justifies these horizontal and vertical inequities for the statutory exclusions, such as for pensions or life insurance, which already exist. No such purpose exists with respect to the cases which have become controversial.

When a fringe benefit is exempted from tax, the resulting tax savings to the employee makes the fringe benefit worth more than cash compensation of equal value. Suppose, for example, that an employee in the 50 percent tax bracket receives as a fringe benefit an item worth $100. In order to purchase that benefit out of after-tax dollars, the employee would have to earn $200 in wages, pay tax on the wages, and then use the remainder to purchase the item. It is true that the item may not be worth $100 to the employee; that is, the employee may only be willing to pay $80 in after-tax wages for the item. Still, since that would require $160 in before-tax wages, the employee would prefer the $100 fringe benefit to any amount of wages up to $160. Thus, exempting fringe benefits from tax creates a strong incentive to convert cash compensation into tax-free fringe benefits.

This incentive to provide tax-free fringe benefits instead of cash has unfortunate effects. First, it is likely to result in significant erosion of the tax base. This, in turn, would make it necessary to increase tax rates for items of income which are not exempt, exacerbating tax inequities among employees which resulted from exempting fringe benefits in the first place.

As taxpayers perceive themselves as being treated unfairly in comparison to other tax-

payers, they may begin to lose confidence in the income tax system and in government. In a tax system that is dependent upon self-reporting, such a decline in confidence may lead to a decline in compliance.

Second, an incentive to provide tax-free fringe benefits instead of cash reduces economic efficiency. When fringe benefits are exempted from tax, employees demand and employers provide more compensation in the form of those benefits than they would if the benefits were taxed. This shift in demand causes a distortion in the economy. The tax law is interfering with free choice in the allocation of economic resources.

Third, exempting fringe benefits from tax leads to distortions in labor markets and creates inequities among employers. Employees accept less total compensation if a portion is in tax-free fringe benefits than if the entire compensation is in cash. In the example I gave before, an employer offering less than $160 in wages could not compete with an employer offering the $100 fringe benefit. Thus, employers who are able to provide compensation in the form of tax-free fringe benefits are given a competitive advantage over employers who are not. When fringe benefits are exempted from tax, employees shift to the tax preferred industries. Employers who do not want to play these games, who want to pay cash compensation, who want to concentrate on increasing production rather than finding ways to take advantage of tax subsidies, or who simply are limited in the extent to which they can offer fringe benefits, are heavily penalized.

In sum, exempting fringe benefits from tax leads to inequities among employees and employers and distortions in demand and in labor markets. These inequities and distortions imply added complexity in the economy and loss of welfare to individuals.

PRACTICAL PROBLEMS IN TAXING FRINGE BENEFITS

Despite these compelling policy reasons for taxing fringe benefits, some claim that practical problems make it impossible to do so. They point to difficulties in distinguishing between fringe benefits and working conditions. They point to problems in valuing fringe benefits. And they point to the administrative burdens of accounting for many benefits of small value.

While these obstacles to taxing fringe benefits may be significant, they should not be insurmountable. However, problems in identifying, valuing, and reporting fringe benefits are an appropriate subject for public comment before this Task Force. We can suggest some general guidelines.

Working conditions distinguished

Some noncash items provided by employers to employees are so closely connected with the employee's performance of his job that the items would not be considered compensation and therefore would not be taxed. Items provided to enable the employee to perform the job, rather than to compensate him for performing it, are commonly called working conditions.

The basic factor in distinguishing between working conditions and other noncash items is the relationship between the item and the employee's performance of his job. Generally, items which are used by the employee in performing his job should be considered working conditions, at least to the extent of that use.

Many working conditions are easy to recognize. For example, tools provided by an employer for an employee's use on the job are working conditions. Offices also are working conditions, even if they have features designed to make work more pleasant, such as air conditioning and piped-in music. Even if those features do, in fact, make work more pleasant, the office still is a working condition.

Many items which are not working conditions also are easy to recognize. An all-expenses-paid vacation at a luxurious resort may improve an employee's attitude toward his job, but that vacation is no more a working condition than is a $5,000 bonus.

In determining whether an item is used by the employee in performing his job, it is relevant to look at where and when the item is used. Items are more likely to be working conditions if they are used by the employee at his place of employment during normal working hours. For example, if an automobile manufacturer provides one of its executives with a new car for personal use and requires that the executive report his reaction to the car, the use of the car is not likely to be a working condition even though it must be used in order to write the report.

Even if an item is not used in performing the employee's job, it still may be appropriate to consider it a working condition if it plays an essential role in enabling the employee to perform the job. For example, lodging provided at the job site because the employee is required to be available for duty at all times, is excludable from income under Code section 119.

The relationship between an item and the employee's job should be scrutinized with particular care if the item is essentially personal in nature. By "essentially personal" items, I mean those which individuals ordinarily pay for out of after-tax dollars, such as food, clothing, shelter, and any item provided to a member of the employee's family.

Items which are essentially personal are likely to be compensatory. If exempted from tax, they are also likely to be a primary source of inequity among taxpayers. In developing rules to determine which essentially personal benefits are to be subject to tax, it would seem appropriate to focus on whether the cost of an item would be deductible if paid for by the employee. Since personal expenses such as meals and commuting are not deductible, the creation of rules of inclusion which deviate too far from the rules regarding employee deductibility could result in substantial inequity.

Even when use of an item is noncompensatory at a particular time, allocation between periods of compensatory and noncompensatory use should be made where it is feasible to do so. Such allocation often is possible where personal and business use of an item do not occur simultaneously. For example, a salesperson may use an employer-provided automobile during the day to travel to customers, and may use the same automobile during the evening for personal purposes. In such a case, allocation of value should be made between compensatory and noncompensatory use.

Valuation

The next question is how taxable fringe benefits should be valued. As the Commissioner has said, the regulations under section 61 require the recipient of compensation paid in any form other than cash to include in income the "fair market value" of the compensation. In addition, a specific statutory provision, section 83 of the Code, provides that where "property" has been transferred in connection with the performance of services, the recipient is required to include in income the excess of the fair market value of the property over the amount paid for it. For these purposes, "fair market value" is the price which would be paid for the benefit if it were purchased in an informed marketplace transaction. This standard has been generally applied by the courts in determining the value of in-kind benefits and was specifically adopted by the Staff of the Joint Committee on Taxation in determining the amount of income President Nixon realized on account of the personal use of government aircraft by his family and friends.

Some assert that it is unfair to treat a fringe benefit as having a value equal to its market price because fringe benefits are generally nontransferable and are substituted for cash in a process which depends upon the relative bargaining strengths of the employer and the employee. They conclude that the value of the benefit should be equal to the cash payment the employee would demand if the benefit were not available. In other words, they assert that subjective value is the appropriate income measure.

Subjective value is a superficially appealing choice. Indeed, it was adopted once by the Tax Court in determining the value of first class steamship tickets won as a prize on a radio quiz. Assuming accurate measurement of the personal value of the benefit, a system based on personal value would achieve a type of tax neutrality. It would avoid establishing a tax incentive to provide benefits in kind, without creating an offsetting tax disincentive. By definition, tax treatment would not determine whether compensation is received in cash or in kind because tax liability would not vary according to the form of the payment.

Unfortunately, however, it would be administratively impossible to tax fringe benefits on the basis of their subjective value to the recipient. It is unreasonable to expect a self-assessment tax system to function effectively if income is subjectively determined on a case-by-case basis. Problems of accurate withholding and information reporting under such a system are virtually insoluble.

Of course, even if it is agreed that fringe benefits should be taxed on the basis of objective fair market value, a number of important questions remain. An item may have more than one objective fair market value. For example, when the Joint Committee Staff determined the value of the economic benefit to President Nixon of personal use of government aircraft, it had to choose between two "fair market" values—the per-passenger cost of first class air fare on a commercial airline, or an allocated portion of the cost of renting a comparable plane. It chose the former.

The same issue arises in other contexts. For example, if an employee discount is treated as a taxable fringe benefit, should the value of the discount be determined by reference to the price of the discounted item at the time of purchase, or the lowest price at which the item has been offered to the public within a defined time period?

Further, notwithstanding the fact that the objective fair market value standards is consistent with generally accepted valuation standards, it may be appropriate to consider the alternatives. For example, some suggest that the objective fair market value standard be adopted as the base for income inclusion but that the base value be discounted by some percentage to reflect individual utility.

Administrative difficulties of valuation, particularly those involving withholding, may be alleviated by the creation of generally applicable guidelines or safe harbor rules regarding either the value of the benefit or the amount to be withheld. As an illustration of the former, the value of a personal flight on a company airplane could be determined by reference to first class airfare between the points. As to the latter, an employer who allows an employee to use, in nonworking hours, a company car usually used for business could be deemed to have satisfied his withholding obligation by withholding based on a fixed dollar amount.

Accounting and reporting

The taxability of noncash items provided by employers to employees should depend not only on the nature of the item, but also on the administrative implications of taxing it. Tax simplicity is as important as tax equity. Unreasonably expensive recordkeeping requirements should not be imposed on

employers. Nor should Internal Revenue Service audit resources be frittered away.

Compensation in kind should not be taxed if it would be administratively impractical to do so. If the total combined costs of an employer in accounting for an item and of the government in collecting tax on it would be unreasonably large in relation to the value of the item, the item should not be subject to tax.

When looking at specific, isolated examples of employer-provided items, it is not difficult to suggest some which should be exempt from tax for administrative reasons. For example, Revenue Ruling 59–58, 1959–1 C.B. 17 holds that the value of a turkey or ham provided by an employer to each of his employees at Christmas or a comparable holiday should be excludable from income. Similarly, employees should not be taxed on the value of attending their employer's annual company picnic.

Rules for determining which benefits should be excluded for administrative reasons (de minimis rules) could apply on an item-by-item basis. For example, an item whose value did not exceed a specified dollar amount could be excludable from income. A discount on an employee purchase could be excludable if the sales price of the item purchased did not exceed a specified dollar amount, or if the discount did not exceed a specified percentage of the sales price. We are not suggesting that we have decided upon these rules. Rather, we raise them as examples of the types of solutions the public may wish to address in its comments.

We note that applying de minimis rules solely on an item-by-item basis could allow large total amounts to be excluded from income. A Christmas dinner may be de minimis, but a year of free meals in an executive dining room may not be. A set of china may not be de minimis, and every piece of china in the set can be purchased separately.

To avoid becoming a sieve, ideally de minimis rules should take into account in some way the aggregate value of noncash items provided by an employer to an employee during the year. We recognize the potential difficulty of accounting for numerous small items, but we believe this difficulty can be avoided. Reasonable approximation of value may well be appropriate for some types of items. We also note that employers already keep records of the amounts and recipients of many types of fringe benefits. They may do so for purposes of tax deductibility, internal cost accounting, or disclosure required by the Securities and Exchange Commission.

In conclusion, we note that most types of fringe benefits are clearly subject to tax and that an exemption for others would create serious inequities and economic distortions.

We recognize that there are potential administrative problems in taxing some types of fringe benefits. However, we believe these problems can be solved. Hearings before this Task Force could provide the information needed to do so.

STATEMENT OF JEROME KURTZ, COMMISSIONER OF INTERNAL REVENUE, BEFORE THE TASK FORCE ON EMPLOYEE FRINGE BENEFITS, COMMITTEE ON WAYS AND MEANS, AUGUST 14, 1978

Mr. Chairman and Members of the Task Force: I appreciate the opportunity to appear before this Task Force today to assist you in finding an equitable solution to the vexing problem of the taxation of nonstatutory fringe benefits.

It might be helpful as background for your consideration of these problems if I review where the Service is today in administering these rules, and how we got here.

A fringe benefit or perk may be defined generally as a personal benefit made available to an employee in connection with employment, other than normal salary. It may be and frequently is a benefit made available in kind, although it may be in the form of cash payments that are designed as reimbursements or allowances for specific personal expenses. There is a great variety of fringe benefits.

The Internal Revenue Code definition of gross income is all inclusive—"all income from whatever source derived." [1] The legislative history states that this definition is intended to include income "realized in any form." [2]

Under the Code, when compensation for services is received in the form of property, the fair market value of the property, less any amount paid for it, is includable in income.[3] No deductions from amounts included in gross income are allowed for personal, living, or family expenses, with certain limited statutory exceptions.[4]

Consistent with the broad statutory language and the broad intent stated in the legislative history as to the scope of gross income, Treasury regulations have long provided that if services are paid for other than in money, the fair market value of the property or services taken in payment must be included in gross income.[5]

Further, the regulations provide that the value of meals or living quarters that an employee receives in addition to salary constitutes gross income,[6] unless furnished for the convenience of the employer under the rules of Code section 119.

As early as 1929, the Supreme Court held that a fringe benefit was taxable.[7]

Later, in 1945, the Supreme Court stated that the Code "is broad enough to include in taxable income any economic or financial benefit conferred on the employee as compensation, whatever the form or mode by which it is effected" [8] The Court has repeated this theme on several occasions.[9]

From time to time, over the years, Congress has specifically exempted from taxation certain fringe benefits, most of which would otherwise be taxable under section 61. However, when Congress has excluded certain benefits from income it has usually done so within relatively narrow limits; frequently subject to restrictions such as ceilings on the amounts excludable and requirements that the benefit be broadly available.[10]

Most of these exclusions from income are based on a desire of Congress to encourage employers to provide specific benefits, viewed as socially desirable, to wide range of employees. Examples are pensions, life, accident and health insurance, death benefits and most recently, group legal service plans. In other cases the purpose of the exclusion was to clarify an unsettled state of the law (such as the convenience-of-the-employer rule for meals and lodging) or to provide equity and limits to an area that had evolved with inconsistencies, such as moving expenses.

Courts have frequently been called upon to decide whether taxpayers are taxable on their receipt of a variety of fringe benefits that are not specifically exempt by statute. Significantly, the Government has experienced considerable success in the litigation of these issues. There are many reported court cases involving a variety of fringe benefits, holding that the fair market value of the economic benefit conferred on an employee by the employer must be included in the employee's gross income as compensation for services. For example, courts have held taxable the fair rental value of housing provided an employee;[11] the value of the personal use of an automobile; [12] a per diem living allowance paid to an employee who was not "traveling away from home"; [13] the value of meals and lodging that are provided an employee but are not exempt under section 119; [14] premiums paid on an employee's individual life insurance policy; [15] reimbursement of an employee's indirect moving expenses; [16] sums paid by a corporation for the personal medical expenses of its president, [17] cash allowances "in lieu of subsistence and quarters" received by a civilian shipmaster; [18] the payment of an employee's spouse's travel expenses while accompanying the employee on a business trip; [19] the amount of the expenses, paid by the employer, for a convention trip for an employee and the employee's spouse where the convention was found to be primarily for pleasure; [20] the fair market value of vacation trips provided employees by the employers; [21] and distributions from corporate educational benefit trusts for children of employees.[22]

Within the last year, the Supreme Court has held that cash meal allowances paid to state troopers who are not away from home overnight are taxable.[23] This May, the Tax Court Small Tax Case Division held that the amount of substantial discounts provided by a residential builder to certain employees on their purchases of homes was taxable to the employees.[24] And the Tax Court held in June that an employer's reimbursements of employees' club dues, and the reimbursements of amounts paid by employees for their own lunches when entertaining others at a business lunch, are taxable income.[25]

The Service has also issued rulings expressing its position on the taxability of a wide variety of fringe benefits. In accordance with the Code and court decisions, these rulings have generally held the particular benefit in question to be taxable. For example, the Service has issued rulings holding taxable an employer's payment of an employee's expenses at a resort health program,[26] the amount of loans forgiven by an employer to its commissioned salesmen,[27] the value of prize points redeemable for merchandise awarded by a distributor to employees of its dealers,[28] the amounts a club distributes to club employees from a fund made up of club contributions,[29] employees' FICA contributions paid by the employer without withholding from the employees' income,[30] "tool allowances" paid to employees who were already provided a complete set of tools by the employer and were not required to account for the allowance,[31] and distributions from corporate educational benefit trusts for educational expenses of employees' children.[32]

Notwithstanding the legislative and judicial background and the many published rulings holding numerous fringe benefits to be taxable, inconsistencies in the treatment of similar items remain, and administrative problems are increasing.

Why is this so?

In the very early days of the income tax—1920 and 1921—before there was much judicial interpretation of the scope of the income tax, the Service issued two rulings. One held that free personal railroad passes issued to railroad employees were nontaxable gifts.[33] The other held that "supper money" paid to an employee in connection with voluntary overtime work was nontaxable.[34] Subsequent judicial decisions raise the question whether these rulings are consistent with the present state of the law.[35]

Taxpayers argue that by analogy these old rulings should be extended to cover other types of benefits; and some inconsistencies in the treatment of generally comparable benefits have developed over the years. For example, on the basis of the 1921 railroad pass ruling, the Service has not ruled taxable the value of free or discounted personal air travel provided by airlines to their employees. Yet the use of company cars for vacation and other personal purposes is taxable.[36]

Footnotes at end of article.

Similarly, though "Supper money" paid to those working overtime is not taxed under the 1920 ruling, other cash meal allowances are taxed.

Other areas in which inconsistencies have developed over the years involve the treatment of employer-provided scholarships or tuition assistance for dependents of employees, and retail discounts for employees on employer products.

Existing regulations provide that if an educational institution maintains or participates in a plan whereby the tuition of a faculty member's child is remitted by a participating institution, the amount of tuition remitted will not be taxed to the faculty member but will be considered a tax-free scholarship.[37] At the same time, tuition benefits provided by employers other than educational institutions, for employees' dependents, are taxable.[38]

In the case of retail discounts, existing regulations provide that "courtesy" discounts of relatively small amounts, that are furnished by an employer to employees generally to promote goodwill, are not subject to withholding of income tax or to employment tax payments.[39] Substantial discounts, such as discounts of several thousand dollars provided by a residential builder to employees on their purchase of a new home, have been taxed.[40]

Why have the problems in this area become aggravated recently?

Agents have always raised fringe benefit issues on examinations of individual taxpayers; but audit coverage of individuals is limited by available resources. With the advent of our special employment tax program in 1972, employers' fringe benefit practices came under closer scrutiny than had previously been the case. When examining the employers, fringe benefits became major issues as agents saw the large amount of benefits involved in the aggregate. Agents began raising more and more fringe benefit issues. Through field requests for technical advice and taxpayers requests for rulings, National Office attention focused on a broad range of fringe benefit issues.

To deal with the numerous questions that were arising, Treasury published on September 5, 1975, a "discussion draft" of proposed regulations on fringe benefits. The document was a "discussion draft" rather than a proposed regulation because the latter requires the consent of the Commissioner of Internal Revenue, and the Commissioner did not agree to the draft. In the view of many, the draft departed substantially from well established legal principles. After much comment, it was withdrawn on December 28, 1976.

Prior to withdrawal of the "discussion draft", the Commissioner of Internal Revenue and the Assistant Secretary for Tax Policy agreed on a package of 11 fringe benefit rulings. However, the Secretary of the Treasury did not agree to issue the proposed rulings and they were not issued.

Proposed regulations that would have taxed tuition remission to employees of educational institutions were issued on November 1, 1976, and withdrawn on January 17, 1977.

Pending legislation provides that no final regulations requiring the inclusion of any fringe benefit in gross income by reason of Code section 61 should be issued before January 1, 1980.

Not being able to provide rules to taxpayers and to our own personnel creates severe problems for tax administration. Existing inconsistencies continue and expand. Uncertainties and apparent inequities in the treatment of different benefits undermine the voluntary compliance system. It is important to formulate a comprehensive and consistent treatment of fringe benefits.

INCOME TAX WITHHOLDING AND EMPLOYMENT TAX CONSIDERATIONS

Up to this point, I have been discussing only the question whether certain fringe benefits are taxable income to the employee.

A completely separate question is whether the employer is required to withhold income tax and the employee's portion of the FICA tax, and to pay the employer's portion of the FICA tax and the employer FUTA tax, with respect to fringe benefits.

The Internal Revenue Code requires the employer to withhold income tax and to withhold and pay employment taxes with respect to "wages."[41] "Wages" are separately defined for income tax withholding, FICA and FUTA purposes.[42] Though by and large the definitions are similar, there are some fringe benefit items, such as the value of meals and lodging exempt from tax under Code section 119, that are not subject to income tax withholding but that are nevertheless subject to employment taxes.[43] While this rule requires the employer to keep records for employment tax purposes, even though the benefits are exempt from income tax, it permits the employee to accrue additional Social Security and unemployment benefit rights.

There are also some fringe benefits that are taxable income to the employee but that have been held not to be wages under the present provisions of the Code and regulations. We are currently considering the implications of the Supreme Court's decision in *Central Illinois Public Service Company* v. *United States* [44] with respect to the fringe benefits area generally. The Court in that case held that certain cash meal allowances were not subject to income tax withholding, although taxable to the employee.

Withholding is a crucial enforcement mechanism. It is important that the withholding obligations of employers be clarified.

CONCLUSION

Fringe benefits are an increasingly popular form of compensation. In our experience the variety of such benefits is large and growing.

It has been our experience that the nature and extent of fringe benefits varies from industry to industry, from employer to employer within industries, and from employee to employee in the case of a single employer. In many instances, fringe benefits are provided in greater amounts to highly compensated or executive personnel than to lower-paid employees. An example in a recent case is the discounts on the purchase price of homes, provided by a residential real estate builder to its employees, than ranged from 2% for lower paid employees to 8% for top level personnel.[45]

Any examination of the fringe benefits area should be comprehensive. If particular fringe benefits are exempted from taxation without consideration of the full range of benefits, we can expect inconsistencies and uncertainties to develop just as they have done in the past and constant pressure for further exclusion by analogy. Moreover, if any item of compensation is specifically exempted because of its form, we can expect compensation which would otherwise have been paid in cash to be converted to the exempt form in large amounts, reducing the tax base and requiring higher rates for all taxpayers.

As a tax administrator, the values I rank highest in this controversial fringe benefit area are certainty, uniformity, and compliance.

By certainty, I mean that the answers as to whether particular benefits are taxable should be clear. Taxpayers should be able to plan their affairs with certainty. Our agents must make decisions on audit and we must be able to answer the questions of taxpayers or our agents about taxability of benefits in particular cases.

By uniformity, I mean that the answers should not vary depending on such irrelevant factors as geography or the type of industry involved. The only way to achieve uniformity is by enunciating comprehensive rules.

By compliance, I mean that whatever is determined to be taxable should be collectable without the expenditure of undue compliance resources. One way to accomplish this is to dovetail withholding at the source with whatever benefits are taxable.

I believe that formulation of a comprehensive and consistent treatment of fringe benefits will contribute to voluntary compliance by supporting a public perception that the tax system in fairness treats substantially similar compensation in a comparable way.●

[10] Among the benefits specifically exempted are:

Employer contributions to qualified pension and profit sharing plans which meet the elaborate nondiscrimination provisions and the other rules of ERISA (Code sections 402(a) and 403(a)).

Group term life insurance premiums subject to a ceiling of $50,000 of insurance. (Code section 79).

Certain employee death benefits subject to a $5,000 ceiling (Code section 101(b)).

Certain employee accident or health insurance benefits and certain disability payments. (Code section 105).

Certain military injury or sickness benefits. (Code section 104(a)(4)).

Contributions to accident or health plans. (Code section 106).

Meals and lodging furnished for the convenience of the employer. (Code section 119).

Employer contributions and services provided under group legal service plans which do not discriminate in favor of the highly compensated. (Code section 120).

Limited exclusion for contributions by exempt organizations to employees' annuity plans. (Code section 403(b)).

The rental value or rental allowance for a parsonage. (Code section 107).

Certain government civilian employees' allowances in foreign areas. (Code section 912).

Reimbursement of employees' moving expenses within defined dollar limits. Such amounts are included in gross income under Code section 82 but are deductible without regard to whether the standard deduction is taken, up to limited amounts under Code section 217 and 61(8).

Certain employees' stock option or stock purchase plans subject to severe limits concerning price and terms. (Code section 421(a)).

GENERAL LEAVE

Mr. ECKHARDT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of the special order today by the gentleman from New York (Mr. LUNDINE).

The SPEAKER pro tempore (Mr. NATCHER). Is there objection to the request of the gentleman from Texas?

There was no objection.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. GONZALEZ, and to include extraneous material, for 15 minutes today.

(The following Members (at the request of Mr. CUNNINGHAM) and to revise and extend their remarks and include extraneous matter:)

Mr. GOLDWATER, for 5 minutes, today.
Mr. CLEVELAND, for 5 minutes, today.

(The following Members (at the request of Mr. ECKHARDT) to revise and extend their remarks and include extraneous material:)

Mr. LUNDINE, for 30 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. PEPPER, for 5 minutes, today.
Mr. CONYERS, for 5 minutes, today.
Mr. ROBERTS, for 5 minutes, today.
Mr. BAUCUS, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. PICKLE, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,642.50.

(The following Members (at the request of Mr. CUNNINGHAM) and to include extraneous matter:)

Mr. SNYDER.
Mr. SAWYER.
Mr. VANDER JAGT.
Mr. PURSELL.
Mr. ANDERSON of Illinois in two instances.
Mr. FINDLEY.
Mr. HYDE.
Mr. LENT in two instances.
Mr. DERWINSKI.
Mr. WHITEHURST.
Mr. JEFFORDS.
Mr. KASTEN.
Mr. HANSEN in three instances.

(The following Members (at the request of Mr. ECKHARDT) and to include extraneous material:)

Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. RANGEL.
Mr. HARKIN.
Mr. McDONALD in five instances.
Mr. PEPPER.
Mr. DINGELL in two instances.
Mr. DRINAN.
Mr. DANIELSON.
Mr. PATTISON of New York.
Mr. SIKES.
Mr. NEAL.
Mr. SIMON in three instances.
Mr. LEGGETT.
Mr. WAXMAN in three instances.
Mr. ADDABBO.
Mr. TEAGUE.
Mr. NOWAK in five instances.
Mr. BRECKINRIDGE in two instances.
Mr. LONG of Maryland.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 2333. An act for the relief of James Edward Slowey, Carole Anne Slowey, Christopher James Slowey, Elaine Margaret Slowey, and Carole-Ann Slowey; to the Committee on the Judiciary.

ENROLLED BILL SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 10732. An act to authorize appropriations to carry out the Fishery Conservation and Management Act of 1976 during fiscal year 1979, to provide for the regulation of foreign fish processing vessels in the fishery conservation zone, and for other purposes.

ADJOURNMENT

Mr. ECKHARDT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 9 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, August 16, 1978, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4815. A letter from the Assistant Secretary of Defense (Comptroller), transmittnng notice of transfers between accounts of various amounts appropriated to the Department of Defense for fiscal year 1978, pursuant to section 833, of Public Law 95-111; to the Committee on Appropriations.

4816. A letter from the Executive Secretary to the Department of Health, Education, and Welfare, transmitting proposed final regulations governing the award of grants for the planning and operation of magnet schools, cooperative programs between local educational agencies and universities or businesses, and the planning of neutral site schools under the Emergency School Aid Act, pursuant to section 431(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

4817. A letter from the Administrator, Agency for International Development, Department of State, transmitting notice of a proposed change in an existing records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

4818. A letter from the Secretary of State, transmitting notice of the State Department's intention to obligate Middle East Special Requirements funds for a study of the economic implications of peace in the Middle East, pursuant to section 903 of the Foreign Assistance Act of 1961, as amended; to the Committee on International Relations.

4819. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Nicholas A. Veliotes, Ambassador-designate to Jordan, and by members of his family, pursuant to section 6 of Public Law 93-126; to the Committee on International Relations.

4820. A letter from the General Counsel, Department of Energy, transmitting notice of a meeting relating to the International Energy Program to be held August 16, 1978,

in New York, N.Y.; to the Committee on Interstate and Foreign Commerce.

4821. A letter from the Administrator of General Services, transmitting a prospectus proposing the continued lease of space at 2025 M Street, NW., Washington, D.C., pursuant to section 7 of the Public Buildings Act of 1959, as amended; to the Committee on Public Works and Transportation.

4822. A letter from the Comptroller General of the United States, transmitting a report on the examination of financial statements of the National Credit Union Administration for the 15 months ended September 30, 1977 (FOD–78–2, August 14, 1978), pursuant to sections 102(f) and 209(b) of the Federal Credit Union Act, as amended; jointly, to the Committees on Government Operations, and Banking, Finance and Urban Affairs.

4823. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend section 3755 of the Revised Statutes, as amended (40 U.S.C. 310) to transfer to the Secretary of the Interior the functions of the Administrator of General Services with respect to wrecked, abandoned, or derelict property, and for other purposes; jointly, to the Committees on Government Operations, and Interior and Insular Affairs.

4824. A letter from the Under Secretary of Energy, transmitting modification 9 to the Department of Energy contract with the Ohio Valley Electric Corp., for the supply of electric power to the DOE uranium enrichment plant at Portsmouth, Ohio, extending the contract through December 31, 1979, pursuant to section 164 of the Atomic Energy Act of 1954, as amended; jointly, to the Committees on Interior and Insular Affairs, Interstate and Foreign Commerce, and Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4384. A bill to amend the laws relating to the Osage Tribe in Oklahoma (Rept. No. 95–1491, pt. I). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. S. 2101. An act to modify the boundary of the White River National Forest in the State of Colorado; with amendment (Rept. No. 95–1492). Referred to the Committee of the Whole House on the State of the Union.

Mr. EILBERG: Committee on the Judiciary. H.R. 13349. A bill to repeal certain sections of title III of the Immigration and Nationality Act, and for other purposes; with amendment (Rept. No. 95–1493). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee of conference. Conference report on S. 2701 (Rept. No. 95–1494). Ordered to be printed.

Mr. McKAY: Committee of conference. Conference report on H.R. 12927 (Rept. No. 95–1495). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. AMMERMAN:

H.R. 13869. A bill to establish standards of fair practices that shall be observed by handlers and associations of producers in their dealings in agricultural products; to the Committee on Agriculture.

By Mr. COCHRAN of Mississippi:

H.R. 13870. A bill to clarify the circumstances under which territorial provisions in licenses to manufacture, distribute, and sell trademarked soft drink products are lawful under the antitrust laws; to the Committee on the Judiciary.

By Mr. GRASSLEY:

H.R. 13871. A bill to amend the Internal Revenue Code of 1954 to provide that nonresident aliens are taxable on gain from the sale or exchange of farming property and undeveloped real property at capital gains rates; to the Committee on Ways and Means.

By Mr. HIGHTOWER (for himself, Mr. GLICKMAN, Mr. SEBELIUS, Mr. HAGEDORN, Mr. ENGLISH, Mr. FITHIAN, Mr. WEAVER, Mr. MARLENEE, Mr. HARKIN, Mr. BAUCUS, Mr. NOLAN, and Mr. KRUEGER):

H.R. 13872. A bill to require the label on each loaf of bread to disclose the cost to the manufacturer of the farm product ingredients; to the Committee on Interstate and Foreign Commerce.

By Mr. KASTEN:

H.R. 13873. A bill to amend part A of title IV of the Social Security Act to require each State, under the AFDC program, to establish a maximum income level beyond which an individual or family may not be eligible for aid to families with dependent children; to the Committee on Ways and Means.

By Mr. MADIGAN (for himself, Mr. WAMPLER, Mr. LEACH, and Mr. BALDUS):

H.R. 13874. A bill to provide indemnities to beef, goat, or sheep producers or owners when import quotas are used to suppress market prices; to the Committee on Agriculture.

By Mr. MAGUIRE (for himself, Mr. CORRADA, Mr. DOWNEY, Mr. DRINAN, Mr. EDGAR, Mr. EVANS of Delaware, Mrs. FENWICK, Mr. HEFTEL, Mr. HOLLENBECK, Mr. HOWARD, Mr. HUGHES, Mr. LE FANTE, Mr. MCHUGH, Mr. MCCLOSKEY, Mr. MARKEY, Mrs. MEYNER, Mr. MIKVA, Mr. MILLER of California, Mr. MINETA, Mr. MINISH, Mr. MOFFETT, Mr. MOSS, Mr. PATTEN, Mr. PATTISON of New York, and Mr. RANGEL):

H.R. 13875. A bill to amend section 307 of the Communications Act of 1934 to provide that each State shall have at least one very high frequency commercial television station located within the State; to the Committee on Interstate and Foreign Commerce.

By Mr. MAGUIRE (for himself, Mr. RINALDO, Mr. RODINO, Mr. ROE, Mr. SIMON, Mrs. SPELLMAN, Mr. THOMPSON, Mr. TSONGAS, Mr. WALGREN, and Mr. WAXMAN):

H.R. 13876. A bill to amend section 307 of the Communications Act of 1934 to provide that each State shall have at least one very high frequency commercial television station located within the State; to the Committee on Interstate and Foreign Commerce.

By Mr. QUIE:

H.R. 13877. A bill to direct the Secretary of Agriculture to establish a price support program for honey; to the Committee on Agriculture.

By Mr. REGULA (for himself and Mr. DERRICK):

H.R. 13878. A bill to amend the Congressional Budget Act of 1974 to require that congressional budget resolution set forth 5-year target levels of budget authority, budget outlays, and Federal revenues; to the Committee on Rules.

By Mr. SANTINI:

H.R. 13879. A bill to amend the Geothermal Steam Act of 1970 for the purpose of enhancing the development of geothermal resources situated beneath Federal lands; to the Committee on Interior and Insular Affairs.

By Mr. SAWYER:

H.R. 13880. A bill to require the Federal Bureau of Investigation to classify the offense of arson as a part I offense for purposes of the Uniform Crime Reporting Program and the Uniform Crime Reports for the United States; to the Committee on the Judiciary.

By Mr. SYMMS (for himself, Mr. EVANS of Georgia, Mr. MCDONALD, Mr. DEVINE, Mr. GEPHARDT, Mr. KEMP, Mr. EDWARDS of Oklahoma, Mr. FRENZEL, Mr. WHITEHURST, Mr. GUYER, Mr. KINDNESS, Mr. HANSEN, Mr. BOB WILSON, Mr. BADHAM, Mr. COLLINS of Texas, and Mr. RYAN):

H.R. 13881. A bill to amend the Federal Food, Drug, and Cosmetic Act to provide that drugs will be regulated under the act solely to assure their safety, to promote the efficient and fair treatment of new drug applications, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. WAGGONNER (for himself and Mr. FRENZEL):

H.R. 13882. A bill to amend the Internal Revenue Code of 1954, and the Tax Reduction Act of 1975, with respect to employee stock ownership plans; to the Committee on Ways and Means.

By Mr. BRODHEAD:

H.R. 13883. A bill to amend the Internal Revenue Code of 1954 to allow certain individuals who are participants in employer pension plans a deduction for their contributions to individual retirement savings plans; to the Committee on Ways and Means.

By Mr. KEMP (for himself, Mr. MARRIOTT, and Mr. MOLLOHAN):

H.R. 13884. A bill to provide for an alternative amortization period for pollution control facilities; to the Committee on Ways and Means.

By Mr. STEIGER (for himself, Mr. GEPHARDT, Mr. HORTON, Mr. FUQUA, Mr. LAGOMARSINO, Mr. KEMP, Mr. WINN, Mr. ANDREWS of North Dakota, Mr. WHITEHURST, Mrs. HOLT, Mr. FORSYTHE, Mr. CORCORAN of Illinois, Mr. STEERS, Mr. EDWARDS of Oklahoma, Mr. HYDE, Mr. REGULA, Mr. QUIE, Mr. LOTT, Mr. PATTERSON of California, Mr. STOCKMAN, Mr. ERLENBORN, Mr. MANN, Mr. CONABLE, and Mr. WEAVER):

H.R. 13885. A bill to require biennial reports to Congress on the effectiveness of Government programs, and for other purposes; to the Committee on Government Operations.

By Mr. WOLFF (for himself and Mr. PRICE):

H.R. 13886. A bill to amend the Internal Revenue Code of 1954 to suspend the imposition of interest and to prohibit the imposition of a penalty for failure to pay tax on underpayments of tax resulting from erroneous advice given in writing by the Internal Revenue Service; to the Committee on Ways and Means.

By Mr. ROUSSELOT:

H. Con. Res. 695. Concurrent resolution setting forth the congressional budget for the U.S. Government for the fiscal year 1979; to the Committee on the Budget.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 7308

By Mr. LATTA:

—Page 40, after line 4, insert the following new subparagraph and redesignate subparagraphs (2) and (3) accordingly:

(2) Notwithstanding any other law, the President, through the Attorney General, may authorize electronic surveillance without a court order under this title to acquire foreign intelligence information for periods up to one year—

(A) during a period of war declared by the Congress; or

(B) during a period of national emergency, declared by the President in accordance with the National Emergencies Act, with specific reference to this Act, and upon the transmittal to the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate of a statement by the President setting forth the facts and circumstances giving rise to the need for such declaration.

H.R. 11280

By Mr. DERWINSKI:

—Strike out title VII (beginning on line 12 of page 288, and ending on line 12 of page 348) and insert in lieu thereof the following new title:

TITLE VII—LABOR-MANAGEMENT RELATIONS

SEC. 701. (a) Subpart F of part III of title 5, United States Code, is amended by adding after chapter 71 the following new chapter:

"Chapter 72—FEDERAL SERVICE LABOR-MANAGEMENT RELATIONS

"Subchapter I—General Provisions

"Sec.
"7201. Findings and purpose.
"7202. Definitions; application.
"7203. Federal Labor Relations Authority; General Counsel.
"7204. Powers and duties of the Authority and of the General Counsel.

"Subchapter II—Rights and Duties of Employees, Agencies and Labor Organizations

"7211. Employees rights.
"7212. Recognition of labor organizations.
"7213. National consultation rights.
"7214. Exclusive recognition.
"7215. Representation rights and duties.
"7216. Unfair labor practices.
"7217. Standards of conduct for labor organizations.
"7218. Basic provisions of agreements.
"7219. Approval of agreements.

"Subchapter III—Grievances and Impasses

"7221. Grievance procedures.
"7222. Federal Service Impasses Panel; negotiation impasses.

"Subchapter IV—Administrative and Other Provisions

"7231. Allotments to representatives.
"7232. Use of official time.
"7233. Remedial action.
"7234. Subpenas.
"7235. Regulations.

"Subchapter I—GENERAL PROVISIONS

"§ 7201. Findings and purpose

"(a) The Congress finds that the public interest demands the highest standards of employee performance and the continued development and implementation of modern and progressive work practices to facilitate and improve employee performance and the efficient accomplishment of the operations of the Government.

"(b) The Congress also finds that, while significant differences exist between Federal and private employment, experience under Executive Order Numbered 11491 indicates that the statutory protection of the right of employees to organize, to bargain collectively within prescribed limits, and to participate through labor organizations of their own choosing in decisions which affect them—

"(1) may be accomplished with full regard for the public interest,

"(2) contributes to the effective conduct of public business, and

"(3) facilitates and encourages the amicable settlement between employees and their employers of disputes involving personnel policies and practices and matters affecting working conditions.

"(c) It is the purpose of this chapter to prescribe certain rights and obligations of the employees of the Federal government subject to the paramount interest of the public and to establish procedures which are designed to meet the special requirements and needs of the Federal government in matters relating to labor-management relations.

"§ 7202. Definitions; application

"(a) For purposes of this chapter—

"(1) 'agency' means an Executive agency other than the General Accounting Office;

"(2) 'employee' means an individual who—

"(A) is employed in an agency;

"(B) is employed in a nonappropriated fund instrumentality described in section 2105(c) of this title;

"(C) is employed in the Veterans' Canteen Service, Veterans' Administration, and who is described in section 5102(c)(14) of this title; or

"(D) is an employee (within the meaning of subparagraph (A), (B), or (C)) who was separated from the service as a consequence of, or in connection with, an unfair labor practice described in section 7216 of this title;

but does not include—

"(i) an alien or noncitizen of the United States who occupies a position outside the United States;

"(ii) a member of the uniformed services (within the meaning of section 2101(3) of this title);

"(iii) for purposes of exclusive recognition or national consultation rights unless authorized under the provisions of this chapter, a supervisor, a management official, or a confidential employee;

"(3) 'labor organization' means any lawful organization of employees which was established for the purpose, in whole or in part, of dealing with agencies in matters relating to grievances and personnel policies and practices or in other matters affecting the working conditions of the employees, but does not include an organization which—

"(A) except as authorized under this chapter, consists of, or includes, management officials, confidential employees, or supervisors;

"(B) assists, or participates, in the conduct of a strike against the Government of the United States or any agency thereof or imposes a duty or obligation to conduct, assist, or participate in such a strike;

"(C) advocates the overthrow of the constitutional form of government of the United States; or

"(D) discriminates with regard to the terms or conditions of membership because of race, color, religion, national origin, sex, age, or handicapping condition;

"(4) 'agency management' means the agency head and all management officials, supervisors, and other representatives of management having authority to act for the agency on any matters relating to the implementation of the agency labor-management relations program established under this chapter;

"(5) 'Authority' means the Federal Labor Relations Authority established under section 7203 of this title;

"(6) 'General Counsel' means the General Counsel of the Federal Labor Relations Authority;

"(7) 'Panel' means the Federal Service Impasses Panel established under section 7222 of this title;

"(8) 'Assistant Secretary' means the Assistant Secretary of Labor for Labor-Management Relations;

"(9) 'confidential employee' means an employe who assists, and acts in a confidential capacity to, individuals who formulate and carry out management policies in the field of labor relations;

"(10) 'management official' means an employee having authority to make, or to influence effectively the making of, policy with respect to personnel procedures or programs which is necessary to an agency or an activity;

"(11) 'supervisor' means an employee having authority, in the interest of an agency, to hire, transfer, suspend, lay off, recall, promote, discharge, assign, reward, or discipline other employees or responsibility to direct them, or to adjust their grievances, or effectively to recommend such action, if in connection with the foregoing the exercise of authority is not of a merely routine or clerical nature, but requires the use of independent judgment;

"(12) 'professional employee' means—

"(A) any employee engaged in the performance of work—

"(i) requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study in an institution of higher learning or in a hospital, as distinguished from work requiring knowledge acquired from a general academic education, an apprenticeship, or training in the performance of routine mental, manual, or physical processes;

"(ii) requiring the consistent exercise of discretion and judgment in its performance;

"(iii) which is predominantly intellectual and varied in character and not routine mental, manual, mechanical or physical work; and

"(iv) which is of such a character that the measurement of the output produced, or of the result accomplished, cannot be standardized by relating it to a given period of time; or

"(B) any employee who has completed the courses of specialized intellectual instruction and study described in subparagraph (A) and who is performing related work under the direction or guidance of a professional employee to qualify the employee to become a professional employee.

"(13) 'agreement' means an agreement entered into as a result of collective bargaining pursuant to the provisions of this chapter;

"(14) 'collective bargaining', 'bargaining', or 'negotiating' means the performance of the mutual obligation of the representatives of the agency and the exclusive representative as provided in section 7215 of this title;

"(15) 'exclusive representative' includes any labor organization which has been—

"(A) selected pursuant to the provisions of section 7214 of this title as the representative of the employees in an appropriate collective bargaining unit; or

"(B) certified or recognized prior to the effective date of this chapter as the exclusive representative of the employees in an appropriate collective bargaining unit;

"(16) 'person' means an individual, labor organization, or agency covered by this chapter; and

"(17) 'grievance' means any complaint by any person concerning any matter which falls within the coverage of a grievance procedure.

"(b) Except as provided in subsections (c), (d), and (e) of this section, this chapter applies to all employees of an agency.

"(c) This chapter shall not apply to—

"(1) the Federal Bureau of Investigation;

"(2) the Central Intelligence Agency;

"(3) the National Security Agency;

"(4) any agency not described in paragraph (1), (2), or (3), or any unit within any agency, which has as a primary function intelligence, investigative, or national security work, if the head of the agency deter-

mines, in the agency head's sole judgment, that this chapter cannot be applied in a manner consistent with national security requirements and considerations;

"(5) any unit of an agency which has as a primary function investigation or audit of the conduct or work of officers or employees of the agency for the purpose of insuring honesty and integrity in the discharge of official duties, if the head of the agency determines, in the agency head's sole judgment, that this chapter cannot be applied in a manner consistent with the internal security of the agency;

"(6) the United States Postal Service;

"(7) the Foreign Service of the United States;

"(8) the Tennessee Valley Authority; or

"(9) officers and employees of the Federal Labor Relations Authority, including the Office of General Counsel and the Federal Service Impasses Panel.

"(d) The head of an agency may, in the agency head's sole judgment and subject to such conditions as he may prescribe, suspend any provision of this chapter with respect to any agency, installation, or activity located outside the United States if the agency head determines that such suspension is necessary for the national interest.

"(e) Employees engaged in administering a labor-management relations law who are otherwise authorized by this chapter to be represented by a labor organization shall not be represented by a labor organization which also represents other employees covered by such law or which is affiliated directly or indirectly with an organization which represents such employees.

"§ 7203. Federal Labor Relations Authority; Office of General Counsel

"(a) There is established, as an independent establishment of the executive branch of the Government, the Federal Labor Relations Authority.

"(b) The Authority shall consist of three members, not more than two of whom may be adherents of the same political party and none of whom may hold another office or position in the Government of the United States except as provided by law or by the President.

"(c) Members of the Authority shall be appointed by the President, by and with the advice and consent of the Senate, and shall be eligible for reappointment. The President shall designate one member to serve as Chairman of the Authority. Any member of the Authority may be removed by the President.

"(d) The term of office of each member of the Authority is 5 years, except that a member may continue to serve beyond the expiration of the term to which appointed until the earlier of—

"(1) the date on which the member's successor has been appointed and has qualified, or

"(2) the last day of the session of the Congress beginning after the date the member's term of office would (but for this sentence) expire.

"(e) A vacancy in the Authority shall not impair the right of the remaining members to exercise all of the powers of the Authority. An individual chosen to fill a vacancy shall be appointed for the unexpired term of the member such individual replaces.

"(f) The Authority shall make an annual report to the President for transmittal to the Congress and shall include in such report information as to the cases it has heard and the decisions it has rendered under this chapter.

"(g) There is established within the Authority an Office of General Counsel. The General Counsel shall be appointed by the President, by and with the advice and consent of the Senate. The General Counsel shall be appointed for a term of 5 years and may be reappointed to any succeeding term. The General Counsel may be removed by the President. The General Counsel shall hold no other office or position in the Government of the United States except as provided by law or by the President.

"§ 7204. Powers and duties of the Authority and of the General Counsel

"(a) The Authority shall administer and interpret the provisions of this chapter, decide major policy issues, prescribe regulations, and disseminate information appropriate to the needs of agencies, labor organizations, and the public.

"(b) The Authority shall, in accordance with regulations prescribed by it—

"(1) decide questions submitted to it with respect to the appropriate unit for the purpose of exclusive recognition and with respect to any related issue;

"(2) supervise elections to determine whether a labor organization has been selected by a majority of the employees in an appropriate unit who cast valid ballots in the election;

"(3) decide questions with respect to the eligibility of labor organizations for national consultation rights; and

"(4) decide unfair labor practice complaints.

"(c) The Authority may consider, in accordance with regulations prescribed by it, any—

"(1) appeal from any decision on the negotiability of any issue as provided in subsection (e) of section 7215 of this title;

"(2) exception to any arbitration award as provided in section 7221 of this title;

"(3) appeal from any decision of the Assistant Secretary issued pursuant to section 7217 of this title;

"(4) exception to any final decision and order of the Panel issued pursuant to section 7222 of this title; and

"(5) other matters it deems appropriate in order to assure it carries out the purposes of this chapter.

"(d) The Authority shall adopt an official seal which shall be judicially noticed.

"(e) The Authority shall maintain its principal office in or about the District of Columbia but it may meet and exercise any or all of its powers at any time or place. Subject to subsection (g) of this section, the Authority may, by one or more of its members or by such agents as it may designate, make inquiry necessary to carry out its duties wherever persons subject to this chapter are located. A member who participates in such inquiry shall not be disqualified from later participating in a decision of the Authority in the same case.

"(f) The Authority shall appoint an Executive Director, such attorneys, regional directors, administrative law judges, and other officers and employees as it may from time to time find necessary for the proper performance of its duties and may delegate to such officers and employees authority to perform such duties and make such expenditures as may be necessary.

"(g) All of the expenses of the Authority, including all necessary traveling and subsistence expenses outside the District of Columbia, incurred by members, employees, or agents of the Authority under its orders, shall be allowed and paid on the presentation of itemized vouchers therefor approved by the Authority or by an individual it designates for that purpose and in accordance with applicable law.

"(h)(1) The Authority is expressly empowered and directed to prevent any person from engaging in conduct found violative of this chapter. In order to carry out its functions under this chapter, the Authority is authorized to hold hearings, subpena witnesses, administer oaths, and take the testimony or deposition of any person under oath, and in connection therewith, to issue subpenas requiring the production and examination of evidence as provided in section 7234 of this title relating to any matter pending before it and to take such other action as may be necessary. In the exercise of the functions of the Authority under this title, the Authority may request from the Director of the Office of Personnel Management an advisory opinion concerning the proper interpretation of regulations or other policy directives promulgated by the Office of Personnel Management in connection with a matter before the Authority for adjudication.

"(2) If a regulation or other policy directive issued by the Office of Personnel Management is at issue in an appeal before the Authority, the Authority shall timely notify the Director, and the Director shall have standing to intervene in the proceeding and shall have all the rights of a party to the proceeding.

"(3) The Director may request that the Authority reopen an appeal and reconsider its decision on the ground that the decision was based on an erroneous interpretation of law or of a controlling regulation or other policy directive issued by the Office of Personnel Management.

"(i) In any matter arising under subsection (b) of this section, the Authority may require an agency or a labor organization to cease and desist from violations of this chapter and require it to take such remedial action as it considers appropriate to carry out the policies of this chapter.

"(j)(1) The Authority shall maintain a record of its proceedings and make public any decision made by it or any action taken by the Panel under section 7222 of this title.

"(2) The provisions of section 552 of this title shall apply with respect to any record maintained under paragraph (1).

"(k) The General Counsel is authorized to—

"(1) investigate complaints of violations of section 7216 of this title;

"(2) make final decisions as to whether to issue notices of hearing on unfair labor practice complaints and to prosecute such complaints before the Authority;

"(3) direct and supervise all field employees of the General Counsel in the field offices of the Authority; and

"(4) perform such other functions as the Authority prescribes.

"(l) Notwithstanding any other provision of law, including chapter 7 of this title, the decision of the Authority on any matter within its jurisdiction shall be final and conclusive, and no other official or any court of the United States shall have power or jurisdiction to review any such decision by an action in the nature of mandamus on appeal of that decision or by any other means, except that nothing in this section shall limit the right of persons to judicial review of questions arising under the Constitution of the United States.

"Subchapter II—Rights and Duties of Employees, Agencies and Labor Organizations

"§ 7211. Employees' rights

"(a) Each employee shall have the right freely and without fear of penalty or reprisal to form, join, or assist any labor organization, or to refrain from such activity, and each employee shall be protected in exercising such rights. Except as otherwise provided under this chapter, such rights include the right to—

"(1) participate in the management of a labor organization,

"(2) act for the organization in the capacity of a representative,

"(3) present, in such representative capacity, the views of the organization to agency heads and other officials of the executive branch of the Government, the Congress, or other appropriate authorities, and

"(4) bargain collectively, subject to the limits prescribed in section 7215(c) of this title, through representatives of their own choosing.

"(b) This chapter does not authorize—

"(1) a management official, a confidential employee, or a supervisor to participate in the management of a labor organization or to act as a representative of such an organization, unless such participation or activity is specifically authorized by this chapter, or

"(2) any employee to so participate or act if such participation or activity would result in any conflict of interest, or appearance thereof, or would otherwise be inconsistent with any law or the official duties of the employee.

"§ 7212. Recognition of labor organizations

"(a) An agency shall accord exclusive recognition or national consultation rights at the request of a labor organization which meets the requirements for such recognition or consultation rights under this chapter.

"(b) Recognition of a labor organization, once accorded, shall continue as long as the organization meets the requirements of this chapter for recognition.

"(c) Recognition of a labor organization shall not—

"(1) preclude an employee, regardless of whether the employee is in a unit of exclusive recognition, from exercising grievance or appellate rights established by law or regulation or from choosing the employee's own representative in a grievance or appellate action, except when the grievance or appeal is covered by and pursued under a negotiated procedure as provided in section 7221 of this title;

"(2) preclude or restrict consultations and dealings between an agency and a veterans organization with respect to matters of particular interest to employees in connection with veterans preference; or

"(3) preclude an agency from consulting or dealing with a religious, social, fraternal, professional, or other lawful association not qualified as a labor organization with respect to matters or policies which involve individual members of the association or are of particular applicability to it or its members.

Consultations and dealings under paragraph (3) shall not assume the character of formal consultation on matters of general employee-management policy covering employees in that unit or extend to areas where recognition of the interests of one employee group may result in discrimination against or injury to the interest of other employees.

"§ 7213. National consultation rights

"(a) An agency shall accord national consultation rights to a labor organization which qualifies under criteria established by the Authority as the representative of a substantial number of employees of the agency. National consultation rights shall not be accorded for any unit if a labor organization already holds exclusive recognition at the national level for that unit. The granting of national consultation rights shall not preclude an agency from appropriate dealings at the national level with other organizations on matters affecting their members. An agency shall terminate national consultation rights if the labor organization ceases to qualify under the established criteria.

"(b) If a labor organization has been accorded national consultation rights, the agency shall notify representatives of such organization of proposed substantive changes in personnel policies that affect employees such organiation represents and provide an opportunity for such organization to comment on the proposed changes. Such organization may suggest changes in the agency's personnel policies and have its views carefully considered. Representatives of such organization may consult, at reasonable times, with appropriate officials on personnel policy matters and may, at all times, present in writing the organization's views on such matters. An agency is not required to consult with any such organization on any matter on which it would not be required to negotiate if the organization were entitled to exclusive recognition.

"(c) Any question with respect to the eligibility of a labor organization for national consultation rights may be referred to the Authority for decision.

"§ 7214. Exclusive recognition

"(a) Any agency shall accord exclusive recognition to a labor organization if the organization has been selected as the representative, in a secret ballot election, by a majority of the employees in an appropriate unit who cast valid ballots in the election.

"(b) A unit may be established on an agency, plant, installation, craft, functional, or other basis which will assure a clear and identifiable community of interest among the employees concerned and will promote effective dealings and efficiency in the agency's operations. A unit shall not be established solely on the basis of the extent to which employees in the proposed unit have organized, nor shall a unit be established if it includes—

"(1) except as provided in section 701(b)(1) of the Civil Service Reform Act of 1978, any management official, confidential employee, or supervisor;

"(2) an employee engaged in Federal personnel work in other than a purely clerical capacity; or

"(3) both professional and nonprofessional employees, unless a majority of the professional employees vote for inclusion in the unit.

Any question with respect to the appropriate unit may be referred to the Authority for decision.

"(c) All elections shall be conducted under the supervision of the Authority or persons designated by the Authority and shall be by secret ballot. Employees eligible to vote shall be provided the opportunity to choose the labor organization they wish to represent them from among those on the ballot and, except in the case of an election described in paragraph (4), the opportunity to choose not to be represented by a labor organization. Elections may be held to determine whether a labor organization should—

"(1) be recognized as the exclusive representative of employees in a unit;

"(2) replace another labor organization as the exclusive representative;

"(3) cease to be the exclusive representative;

"(4) be recognized as the exclusive representative of employees in a unit composed of employees in units currently represented by that labor organization or continue to be recognized in the existing separate units. An election need not be held to determine whether an organization should become, or continue to be recognized as, the exclusive representative of the employees in any unit, or subdivision thereof, during the 12-month period after a valid election has been held under this chapter with respect to such unit.

"§ 7215. Representation rights and duties

"(a) If a labor organization has been accorded exclusive recognition, such organization shall be—

"(1) the exclusive representative of employees in the unit and is entitled to act for and negotiate agreements covering all employees in the unit;

"(2) responsible for representing the interests of all employees in the unit without discrimination and without regard to labor organization membership; and

"(3) given the opportunity to be represented at formal discussions between management and employees or employee representatives concerning grievances, personnel policies and practices, or other matters affecting general working conditions of employees in the unit.

"(b) An agency and an exclusive representative shall have a duty to negotiate in good faith and in exercising such duty shall—

"(1) approach the negotiations with a sincere resolve to reach an agreement;

"(2) be represented at the negotiations by appropriate representatives prepared to discuss and negotiate on all negotiable matters;

"(3) meet at such reasonable times and places as may be necessary; and

"(4) execute upon request of the agency or the organization a written document embodying the terms of, and take such steps as are necessary to implement, any agreement which is reached.

"(c) An agency and an exclusive representative shall, through appropriate representatives, negotiate in good faith as prescribed under subsection (b) of this section with respect to personnel policies and practices and matters affecting working conditions but only to the extent appropriate under laws and regulations, including policies which—

"(1) are set forth in the Federal Personnel Manual,

"(2) consist of published agency policies and regulations for which a compelling need exists (as determined under criteria established by the Authority) and which are issued at the agency headquarters level or at the level of a primary national subdivision, or

"(3) are set forth in a national or other controlling agreement entered into by a higher unit of the agency.

In addition, such organization and the agency may determine appropriate techniques, consistent with section 7222 of this title, to assist in any negotiation.

"(d) In prescribing regulations relating to personnel policies and practices and working conditions, an agency shall give due regard to the obligation to negotiate imposed by this section, except that such obligation does not include an obligation to negotiate with respect to matters concerning the number of employees in an agency, the numbers, types, and grades of positions or employees assigned to an organizational unit, work project or tour of duty, or the technology of performing the agency's work. The preceding sentence shall not preclude the parties from negotiating agreements providing appropriate arrangements for employees adversely affected by the impact of realignment of work forces or technological change.

"(e)(1) If, in connection with negotiations, an issue develops as to whether a proposal is negotiable under this chapter or any other applicable law, regulation, or controlling agreement, it shall be resolved as follows:

"(A) An issue which involves interpretation of a controlling agreement at a higher agency level is resolved under the procedures of the controlling agreement, or, if none, under regulations prescribed by the agency.

"(B) An issue not described in paragraph (1) which arises at a local level may be referred by either party to the head of the agency for determination.

"(2) An agency head's determination under paragraph (1) concerning the interpretation of the agency's regulations with respect to a proposal shall be final.

"(3) A labor organization may appeal to the Authority from a decision under paragraph (1) if it—

"(A) disagrees with an agency head's determination that a proposal is not negotiable under this chapter or any other applicable law or regulation of appropriate authority outside the agency, or

"(B) believes that an agency's regulations, as interpreted by the agency head, are in violation of this chapter or any other applicable law or regulation of appropriate authority outside the agency, or are not otherwise applicable to bar negotiations under subsection (c) of this section.

"§ 7216. Unfair labor practices

"(a) It shall be an unfair labor practice for an agency—

"(1) to interfere with, restrain, or coerce an employee in connection with the exercise of rights assured by this chapter;

"(2) to encourage or discourage membership in any labor organization by discrimination in regard to hiring, tenure, promotion, or other conditions of employment;

"(3) to sponsor, control, or otherwise assist any labor organization, unless such assistance consists of furnishing customary and routine services and facilities—

"(A) in a manner consistent with the best interest of the agency, its employees, and the organization, and

"(B) on an impartial basis to organizations (if any) having equivalent status;

"(4) to discipline or otherwise discriminate against an employee because the employee has filed a complaint, affidavit, petition, or given any information or testimony, under the provisions of this chapter;

"(5) to refuse to accord appropriate recognition to a labor organization qualified for such recognition; or

"(6) to refuse to consult or negotiate in good faith with a labor organization as required by this chapter.

"(b) It shall be an unfair labor practice for a labor organization—

"(1) to interfere with, restrain, or coerce an employee in connection with the exercise of the rights assured by this chapter;

"(2) to cause or attempt to cause an agency to coerce an employee in the exercise of rights under this chapter;

"(3) to coerce or attempt to coerce an employee, or to discipline, fine or take other economic sanction against a member of the labor organization, as punishment or reprisal or for the purpose of hindering or impeding work performance, productivity, or the discharge of duties of such employee;

"(4) to—

"(A) call, or participate in, a strike, work stoppage, slowdown, or picketing of an agency in a labor-management dispute if such picketing interferes or reasonably threatens to interfere with an agency's operations, or

"(B) condone any activity described in subparagraph (A) by failing to take action to prevent or stop it;

"(5) to discriminate against an employee with regard to the terms or conditions of membership in the organization because of race, color, religion, national origin, sex, age, or handicapping condition; or

"(6) to refuse to consult or negotiate in good faith with an agency as required by this chapter.

"(c) It shall be an unfair labor practice for a labor organization which is accorded exclusive recognition to deny membership to an employee in an appropriate unit unless such denial is for failure to meet reasonable occupational standards uniformly required for admission or for failure to tender initiation fees and dues uniformly required as a condition of acquiring and retaining membership. This subsection shall not preclude a labor organization from enforcing discipline in accordance with procedures under its constitution or bylaws which conform to the requirements of this chapter.

"(d) Issues which can properly be raised under an appeals procedure may not be raised as unfair labor practices prohibited under this section. Except for matters wherein, under section 7221 (e) and (f) of this title, an employee has an option of using the negotiated grievance procedure or an appeals procedure, issues which can be raised under a grievance procedure may, in the discretion of the aggrieved party, be raised under that procedure or as an unfair labor practice under this section, but not under both procedures. Appeals or grievance decisions shall not be construed as unfair labor practice decisions under this chapter nor as a precedent for such decisions. All complaints of unfair labor practices prohibited under this section that cannot be resolved by the parties shall be filed with the Authority.

"(e) Any question with respect to whether an issue can properly be raised under an appeals procedure shall be referred for resolution to the agency responsible for final decisions relating to those issues.

"§ 7217. Standards of conduct for labor organizations

"(a) An agency shall only accord recognition to a labor organization that is free from corrupt influences and influences opposed to basic democratic principles. Except as provided in subsection (b) of this section, an organization is not required to prove that it is free from such influences if it is subject to governing requirements adopted by the organization or by a national or international labor organization or federation of labor organizations with which it is affiliated, or in which it participates, containing explicit and detailed provisions to which it subscribes calling for——

"(1) the maintenance of democratic procedures and practices, including provisions for periodic elections to be conducted subject to recognized safeguards and provisions defining and securing the right of individual members to participate in the affairs of the organization, to receive fair and equal treatment under the governing rules of the organization, and to receive fair process in disciplinary proceedings;

"(2) the exclusion from office in the organization of persons affiliated with communist or other totalitarian movements and persons identified with corrupt influences;

"(3) the prohibtion of business or financial interests on the part of organization officers and agents which conflict with their duty to the organization and its members; and

"(4) the maintenance of fiscal integrity in the conduct of the affairs of the organization, including provisions for accounting and financial controls and regular financial reports or summaries to be made available to members.

"(b) Notwithstanding the fact that a labor organization has adopted or subscribed to standards of conduct as provided in subsection (a) of this section, the organization is required to furnish evidence of its freedom from corrupt influences or influences opposed to basic democratic principles if there is reasonable cause to believe that—

"(1) the organization has been suspended or expelled from, or is subject to other sanction, by a parent labor organization, or federation of organizations with which it had been affiliated, because it has demonstrated an unwillingness or inability to comply with governing requirements comparable in purpose to those required by subsection (a) of this section; or

"(2) the organization is in fact subject to influences that would preclude recognition under this chapter.

"(c) A labor organization which has or seeks recognition as a representative of employees under this chapter shall file financial and other reports with the Assistant Secretary, provide for bonding of officials and employees of the organization, and comply with trusteeship and election standards.

"(d) The Assistant Secretary shall prescribe such regulations as are necessary to carry out the purposes of this section. Such regulations shall conform generally to the principles applied to labor organizations in the private sector. Complaints of violations of this section shall be filed with the Assistant Secretary. In any matter arising under this section, the Assistant Secretary may require a labor organization to cease and desist from violations of this section and require it to take such action as he considers appropriate to carry out the policies of this section.

"§ 7218. Basic provisions of agreements

"(a) Each agreement between an agency and a labor organization shall provide the following:

"(1) In the administration of all matters covered by the agreement, officials and employees shall be governed by—

"(A) existing or future laws and the regulations of appropriate authorities, including policies which are set forth in the Federal Personnel Manual,

"(b) published agency policies and regulations in existence at the time the agreement was approved, and

"(C) subsequently published agency policies and regulations required by law or by the regulations of appropriate authorities, or authorized by the terms of a controlling agreement at a higher agency level.

"(2) Management officials of the agency shall retain the right to determine the mission, budget, organization, and internal security practices of the agency, and the right, in accordance with applicable laws and regulations, to—

"(A) direct employees of the agency;

"(B) hire, promote, transfer, assign, and retain employees in positions within the agency, and to suspend, demote, discharge, or take other disciplinary action against employees;

"(C) relieve employees from duties because of lack of work or for other legitimate reasons;

"(D) maintain the efficiency of the Government operations entrusted to such officials;

"(E) determine the methods, means, and personnel by which such operations are to be conducted; and

"(F) take such actions as may be necessary to carry out the mission of the agency in situations of emergency.

"(b) Nothing in subsection (a) of this section shall preclude the parties from negotiating—

"(1) procedures which management will observe in exercising its authority to decide or act in matters reserved under such subsection; or

"(2) appropriate arrangements for employees adversely affected by the impact of management's exercising its authority to decide or act in matters reserved under such subsection,

except that such negotiations shall not unreasonably delay the exercise by management of its authority to decide or act, and such procedures and arrangements shall be consistent with the provisions of any law or regulation described in 7215(c) of this title, and shall not have the effect of negating the authority reserved under subsection (a).

"(c) Nothing in the agreement shall require an employee to become or to remain a member of a labor organization or to pay money to the organization except pursuant to a voluntary, written authorization by a member for the payment of dues through payroll deductions.

"(d) The requirements of this section shall be expressly stated in the initial or basic agreement and apply to all supplemental, implementing, subsidiary, or informal agreements between the agency and the organization.

"§ 7219. Approval of agreements

"An agreement with a labor organization as the exclusive representative of employees in a unit is subject to the approval of the head of the agency or his designee. An agree-

ment shall be approved within 45 days from the date of its execution if it conforms to this chapter and other applicable laws, existing published agency policies and regulations (unless the agency has granted an exception to a policy or regulation), and regulations of other appropriate authorities. An agreement which has not been approved or disapproved within 45 days from the date of its execution shall go into effect without the required approval of the agency head and shall be binding on the parties subject to the provisions of this chapter, other applicable laws, and the regulations of appropriate authorities outside the agency. A local agreement subject to a national or other controlling agreement at a higher level shall be approved under the procedures of the controlling agreement, or, if none, under agency regulations.

"Subchapter III—Grievances and Impasses

§ 7221. Grievance procedures

"(a) An agreement between an agency and a labor organization which has been accorded exclusive recognition shall provide a procedure, applicable only to the unit, for the consideration of grievances. Subject to the provisions of subsection (d) of this section and to the extent not contrary to any law, the coverage and scope of the procedure shall be negotiated by the parties to the agreement. Except as otherwise provided in this section, such procedure shall be the exclusive procedure available to the parties and the employees in the unit for resolving grievances which fall within its coverage.

"(b) Any employee or group of employees in the unit may present grievances falling within the coverage of the negotiated grievance procedure to the agency and have them adjusted without the intervention of the exclusive representative if the adjustment is not inconsistent with the terms of the agreement and the exclusive representative has been given an opportunity to be present at the adjustment.

"(c) A negotiated grievance procedure shall provide for arbitration as the final step of the procedure. Arbitration may be invoked only by the agency or the exclusive representative. Except as provided in subsection (g) of this section, the procedure must also provide that the arbitrator is empowered to resolve questions as to whether or not any grievance is on a matter subject to arbitration under the agreement.

"(d) A negotiated grievance procedure may cover any matter within the authority of an agency if not inconsistent with the provisions of this chapter, except that it may not include matters involving examination, certification and appointment, suitability, classification, political activities, retirement, life and health insurance, national security, or the Fair Labor Standards Act of 1938 (29 U.S.C. 201 et seq.).

"(e) Matters covered under sections 4303 and 7512 of this title which also fall within the coverage of the negotiated grievance procedure may, in the discretion of the aggrieved employee, be raised either under the appellate procedures of section 7701 of this title or under the negotiated grievance procedure, but not both. Similar matters which arise under other personnel systems applicable to employees covered by this chapter may, in the discretion of the aggrieved employee, be raised either under the appellate procedures, if any, applicable to those matters, or under the negotiated grievance procedure, but not both. An employee shall be deemed to have exercised his option under this subsection to raise a matter either under the applicable appellate procedures or under the negotiated grievance procedure at such time as the employee timely files a notice of appeal under the applicable appellate procedures or timely files a grievance in writing in accordance with the provisions of the parties' negotiated grievance procedure, whichever event occurs first.

"(f) An aggrieved employee affected by a prohibited personnel practice under section 2302(b)(1) of this title which also falls under the coverage of the negotiated grievance procedure may raise the matter under a statutory procedure or the negotiated procedure, but not both. An employee shall be deemed to have exercised his option under this subsection to raise the matter under either a statutory procedure or the negotiated procedure at such time as the employee timely initiates an action under the applicable statutory procedure or timely files a grievance in writing, in accordance with the provisions of the parties' negotiated procedure, whichever event occurs first. Selection of the negotiated procedure in no manner prejudices the right of an aggrieved employee to request the Merit Systems Protection Board to review the final decision pursuant to subsections (h) and (i) of section 7701 of this title in the case of any personnel action that could have been appealed to the Board, or, where applicable, to request the Equal Employment Opportunity Commission to review a final decision in any other matter involving a complaint of discrimination of the type prohibited by any law administered by the Equal Employment Opportunity Commission.

"(g) Any question that cannot be resolved by the parties as to whether or not a grievance is on a matter excepted by subsection (d) of this section shall be referred for resolution to the agency responsible for final decisions relating to those matters.

"(h) In matters covered under sections 4303 and 7512 of this title which have been raised under the negotiated grievance procedure in accordance with the provisions of subsection (e) of this section, an arbitrator shall be governed by the provisions of section 4303(f) or 7701(d) of this title, as applicable.

"(i) Allocation of the costs of the arbitration shall be governed by the collective-bargaining agreement. An arbitrator shall have no authority to award attorney or other representative fees, except that in matters where an employee is the prevailing party and the arbitrator's decision is based on a finding of discrimination prohibited by any law referred to in section 7701(h) of this title attorney fees may be awarded and shall be governed by the standards applicable under the Civil Rights Act of 1964, as amended (42 U.S.C. 2000e–5(k)).

"(j) Either party may file exceptions to any arbitrator's award with the Authority, except that no exceptions may be filed to awards concerning matters covered under subsection (e) of this section. The Authority shall sustain a challenge to an arbitrator's award only on grounds that the award violates applicable law, appropriate regulation, or other grounds similar to those applied by Federal courts in private sector labor-management relations. Decisions of the Authority on exceptions to arbitration awards shall be final, except for the right of an aggrieved employee under subsection (f) of this section.

"(k) In matters covered under sections 4303 and 7512 of this title which have been raised under the provisions of the negotiated grievance procedure in accordance with the provisions of subsection (e) of this section, the provisions of section 7702 of this title pertaining to judicial review shall apply to the award of an arbitrator in the same manner and under the same conditions as if the matter had been decided by the Merit Systems Protection Board. In matters similar to those covered under sections 4303 and 7512 which arise under other personnel systems and which an aggrieved employee has raised under the negotiated grievance procedure, judicial review of an arbitrator's award may be obtained in the same manner and on the same basis as could be obtained of a final decision in such matters raised under applicable appellate procedures.

"§ 7222. Federal service impasses panel; negotiation impasses

"(a)(1) There is established within the Authority, as a distinct organizational entity, the Federal Service Impasses Panel. The Panel is composed of the Chairman, and an even number of other members, appointed by the President solely on the basis of fitness to perform the duties and functions of the Office, from among individuals who are familiar with Government operations and knowledgeable in labor-management relations. No employee (as defined under section 2105 of this title) shall be appointed to serve as a member of the Panel.

"(2) At the time the members of the Panel (other than the Chairman) are first appointed, half shall be appointed for a term of 1 year and half for a term of 3 years. An individual appointed to serve as the Chairman shall serve for a term of 5 years. A successor of any member shall be appointed for terms of 5 years, except that an individual chosen to fill a vacancy shall be appointed for the unexpired term of the member whom such individual replaces. Any member of the Panel may be removed by the President.

"(3) The Panel may appoint an executive secretary and such other employees as it may from time to time find necessary for the proper performance of its duties. Each member of the Panel is entitled to pay at a rate equal to the daily equivalent of the maximum annual rate of basic pay currently paid, from time to time, under the General Schedule for each day the member is engaged in the performance of official business on the work of the Panel, including traveltime, and is entitled to travel expenses and a per diem allowance under section 5703 of this title.

"(b) Upon request, the Federal Mediation and Conciliation Service shall provide services and assistance to agencies and labor organizations in the resolution of negotiation impasses.

"(c) If voluntary arrangements, including the services of the Federal Mediation and Conciliation Service or other third-party mediation, fail to resolve a negotiation impasse, either party may request the Panel to consider the matter.

"(d) The Panel or its designee shall promptly investigate any impasse presented to it under subsection (c) of this section. The Panel shall consider the matter and shall either recommend procedures to the parties for the resolution of the impasse or assist the parties in arriving at a settlement through such methods and procedures, including fact finding and recommendations, as it may find appropriate to accomplish the purposes of this section. Arbitration, or third-party fact finding with recommendations to assist in the resolution of an impasse, may be used by the parties only when authorized or directed by the Panel. If the parties do not arrive at a settlement, the Panel may hold hearings, compel under section 7234 of this title the attendance of witnesses and the production of documents, and take whatever action is necessary and not inconsistent with the provisions of this chapter to resolve the impasse. Notice of any final action of the Panel shall be promptly served upon the parties and such action shall be binding upon them during the term of the agreement unless the parties mutually agree otherwise.

"Subchapter IV—Administrative and Other Provisions

"§ 7231. Allotments to representatives

"(a) If, pursuant to an agreement negotiated in accordance with the provisions of this chapter, an agency has received from an employee in a unit of exclusive recogni-

tion a written assignment which authorizes the agency to deduct from the wages of such employee amounts for the payment of regular and periodic dues of the exclusive representative for such unit, such assignment shall be honored. Except as required under subsection (b) of this section, any such assignment shall be revocable at stated intervals of not more than 6 months.

"(b) An allotment for the deduction of labor organization dues terminates when—

"(1) the dues withholding agreement between the agency and the exclusive representative is terminated or ceases to be applicable to the employee; or

"(2) the employee has been suspended or expelled from the labor organization which is the exclusive representative.

"§ 7232. Use of official time

"Solicitation of membership or dues and other internal business of a labor organization shall be conducted during the nonduty hours of the employees concerned. Employees who represent a recognized labor organization shall not be on official time when negotiating an agreement with agency management, except that the negotiating parties may agree to arrangements which provide that the agency will authorize a reasonable number of such employees (not normally in excess of the number of management representatives) to negotiate on official time for up to 40 hours, or up to one-half the time spent in negotiations during regular working hours.

"§ 7233. Remedial actions

"If it is determined by appropriate authority, including an arbitrator, that certain action will carry out the policies of this chapter, such action may be directed by the appropriate authority if consistent with law, including section 5596 of this title.

"§ 7234. Subpenas

"(a) Any member of the Authority, including the General Counsel, any member of the Panel, and any employee of the Authority designated by the Authority may—

"(1) issue subpenas requiring the attendance and testimony of witnesses and the production of documentary or other evidence from any place in the United States or any territory or possession thereof, the Commonwealth of Puerto Rico, or the District of Columbia, except that no subpena shall be issued under this section which requires the disclosure of intramanagement guidance, advice, counsel, or training within an agency or between an agency and the Office of Personnel Management; and

"(2) administer oaths, take or order the taking of depositions, order responses to written interrogatories, examine witnesses, and receive evidence.

"(b) In the case of contumacy or failure to obey a subpena issued under subsection (a)(1), the United States district court for the judicial district in which the person to whom the subpena is addressed resides or is served may issue an order requiring such person to appear at any designated place to testify or to produce documentary or other evidence. Any failure to obey the order of the court may be punished by the court as a contempt thereof.

"(c) Witnesses (whether appearing voluntarily or under subpena) shall be paid the same fee and mileage allowances which are paid subpenaed witnesses in the courts of the United States.

"§ 7235. Regulations.

"The Authority, including the General Counsel and the Panel, and the Federal Mediation and Conciliation Service shall each prescribe rules and regulations to carry out the provisions of this chapter applicable to them. Unless otherwise specifically provided in this chapter, the provisions of subchapter II of chapter 5 of this title shall be applicable to the issuance, revision, or repeal of any such rule or regulation.".

(b)(1) The amendments made by subsection (a) shall not preclude—

(A) the renewal or continuation of an exclusive recognition, certification of a representative, or a lawful agreement between an agency and a representative of its employees entered into before the effective date of this section; or

(B) the renewal, continuation, or initial according of recognition for units of management officials or supervisors represented by labor organizations which historically or traditionally represent management officials or supervisors in private industry and which hold exclusive recognition for units of such officials or supervisors in any agency on the effective date of this section.

(2) Policies, regulations, and procedures established, and decisions issued, under Executive Order Numbered 11491, or under the provision of any related Executive order in effect on the effective date of this section, shall remain in full force and effect until revised or revoked by Executive order or statute, or unless superseded by appropriate decision or regulation of the Federal Labor Relations Authority.

(c) Any term of office of any member of the Federal Labor Relations Authority and the General Counsel of the Federal Labor Relations Authority serving on the effective date of this section shall continue in effect until such time as such term would expire under Reorganization Plan Numbered 2 of 1978, and upon expiration of such term, appointments to such office shall be made under section 7203 of title 5, United States Code. Any term of office of any member of the Federal Service Impasses Panel serving on the effective date of this section shall continue in effect until such time as members of the Panel are appointed pursuant to section 7222 of title 5, United States Code.

(d) There are hereby authorized to be appropriated such sums as may be necessary to carry out the functions and purposes of this section.

(e) The table of chapters for subpart F of part III of title 5, United States Code, is amended by adding after the item relating to chapter 71 the following new item:

"72. Federal Service Labor-Management Relations ---------- 7201".

(f) Section 5314 of title 5, United States Code, is amended by adding at the end thereof:

"(69) Chairman, Federal Labor Relations Authority.".

(g) Section 5315 of title 5, United States Code, is amended by adding at the end thereof:

"(124) Members (2), Federal Labor Relations Authority.".

(h) Section 5316 of title 5, United States Code, is amended by adding at the end thereof:

"(145) General Counsel, Federal Labor Relations Authority.".

REMEDIAL AUTHORITY

SEC. 702. Section 5596 of title 5, United States Code, is amended by striking out subsections (b) and (c) and inserting in lieu thereof the following:

"(b) An employee of an agency who, on the basis of an administrative determination or a timely appeal, is found by appropriate authority to have suffered a withdrawal, reduction, or denial of all or part of the employee's pay, allowances, differentials, or other monetary or employment benefits, or a denial of an increase in such pay, allowances, differentials, or other monetary or employment benefits, which would not have occurred but for unjustified or unwarranted action taken by the agency—

"(1) is entitled, on correction of the action—

"(A) to be made whole for all losses suffered less, in applicable circumstances, interim earnings, and

"(B) if appropriate, to reinstatement or restoration to the same or a substantially similar position, or promotion to a higher level position; and

"(2) for all purposes is deemed to have performed service for the agency during the period of the unjustified or unwarranted action, except that—

"(A) annual leave restored under this paragraph which is in excess of the maximum leave accumulation permitted by law shall be credited to a separate leave account for the employee and shall be available for use by the employee within the time limits prescribed by regulations of the Office of Personnel Management, and

"(B) annual leave credited under subparagraph (A) of this paragraph but unused and still available to the employee under regulations prescribed by the Office of Personnel Management shall be included in the lump-sum payment under section 5551 or 5552(1) of this title but may not be retained to the credit of the employee under section 5552(2) of this title.

"(c) For the purposes of this section—

"(1) 'unjustified or unwarranted action' includes—

"(A) any act of commission, either substantive or procedural, which violates or improperly applies a provision of law, Executive order, regulation, or collective bargaining agreement; and

"(B) any act of omission, or failure to take an action, or confer a benefit which must be taken or conferred under a nondiscretionary provision of law, Executive order, regulation, or collective-bargaining agreement;

"(2) 'administrative determination' includes, but is not limited to, a decision, award, or order issued by—

"(A) a court having jurisdiction over the matter involved;

"(B) the Office of Personnel Management;

"(C) the Merit Systems Protection Board;

"(D) the Federal Labor Relations Authority;

"(E) the Comptroller General of the United States;

"(F) the head of the employing agency or an agency official to whom corrective action authority is delegated; or

"(G) an arbitrator under a negotiated binding arbitration agreement between a labor organization and agency management;

"(3) 'appropriate authority' includes, but is not limited to—

"(A) a court having jurisdiction;

"(B) the Office of Personnel Management;

"(C) the Merit Systems Protection Board;

"(D) the Federal Labor Relations Authority;

"(E) the Comptroller General of the United States;

"(F) the head of the employing agency or agency official to whom corrective action authority is delegated; or

"(G) an arbitrator under a negotiated binding arbitration agreement between a labor organization and agency management.

"(d) The provisions of this section shall not apply to reclassification actions nor shall they authorize the setting aside of an otherwise proper promotion by a selecting official from a group of properly ranked and certified candidates.

"(e) The Office of Personnel Management shall prescribe regulations to carry out this section. However, the regulations are not applicable to the Tennessee Valley Authority and its employees.".

Page 143, beginning on line 19, strike out "Section 7203 of title 5, United States Code (as redesignated in section 703(1) of this Act)" and insert in lieu thereof "Section 7153 of title 5, United States Code,".

Page 264, beginning on line 14, strike out "supervisor or management official (as de-

fined in paragraphs (10) and (11) of section 7103 of this title, respectively)" and insert in lieu thereof "management official or supervisor (as defined in paragraphs (10) and (11) of section 7203 of this title, respectively)".

Page 376, beginning on line 1, strike out "before '7203' (as added in section 703(d)(2) of this Act)" and insert in lieu thereof "before '7153'".

Page 386, beginning on line 1, strike out "7203, and 7204 (as redesignated in section 703(a)(1) of this Act)," and insert in lieu thereof "7153, and 7154,".

Conform the table of contents accordingly.

H.R. 11280

By Mr. QUAYLE:

—Page 195 at line 10: insert a new (g) to read:

"(g) Section 3318(a) of title 5, United States Code is amended to read as follows:

"(a) The nominating or appointing authority shall select for appointment to each vacancy from the highest 7 eligibles available for appointment, unless the Office of Personnel Management determines that another referral and selection procedure is appropriate.".

Redesignate succeeding lines and sections accordingly.

—Page 219 at line 17: following the words "may not exceed", delete "10" and insert in lieu thereof "20".

H.R. 11622

By Mr. EDGAR:

—Page 55, strike out line 15 and all that follows down through line 23 and insert in lieu thereof the following:

"(d)(1) Not later than 1 year after the date of the enactment of this subsection, the Secretary shall conduct a study, and submit a report thereon to the Congress, on the effects which would result from including within the coverage of this Act various types and classes of facilties and equipment used in the transportation on land of gas or liquefied petroleum gas in interstate or foreign commerce, or storage in connection with such transportation. If the Secretary finds, based on such study that the purposes of this Act would be furthered, he shall, by regulation, provide that the provisions of this Act, in whole or in part, apply to any such type or class of facility or equipment to the same extent and manner as such provisions apply with respect to pipeline facilities.

H.R. 11622

By Mr. OTTINGER:

—Page 41, line 20, strike out "or".

Page 42, line 3, strike out the period and insert in lieu thereof ", or".

Page 42, after line 3, insert the following:

"(C) if such pipeline facility has been the subject of a recommendation from the National Transportation Safety Board to the owner or operator of such facility correct a hazardous condition determined to exist by such Board in connection with any investigation by such Board of an accident or hazardous condition.".

Page 43, line 3, strike out the quotation marks and the period which follows.

Page 43, after line 3, insert the following:

"(5) The Secretary shall require any operator of a pipeline facility which has been the subject of a recommendation described in paragraph (2)(C) to demonstrate to the Secretary, within 15 days after receipt of such recommendation, that such person has implemented such recommendation with respect to such facility and all other pipeline facilities for which it is likely that similar conditions exist as those precipitating the Board's investigation. Such demonstration shall not be considered adequate unless the operator involved has conducted such system tests as the Secretary may require.".

Page 72, line 18, insert after "facilities" the following: "; other penalties".

Page 72, line 21, strike out "subsection" and insert in lieu thereof "subsections".

Page 73, line 8, strike out the quotation marks and the period which follows.

Page 73, after line 8, insert the following:

"(c) Any person who willfully continues to operate a pipeline facility without making any demonstration required under section 10(b)(5), shall, be fined not more than $15,000 or imprisoned not more than five years, or both.".

—Page 51, strike out line 6 and all that follows down through line 17, and insert in lieu thereof the following:

"(b) Any storage facility, or category of storage facilities, used for the storage of liquefied petroleum gas shall be included by the Secretary, by regulation, within the meaning of subsection (a)(5) if the Secretary finds that such inclusion would further the purposes of this Act.".

—Page 59, after line 12, insert the following:

PREEMPTION

SEC. 110. Section 3(a), as redesignated, is amended by striking out the last 2 sentences and inserting in lieu thereof the following new sentence: "Any State agency may adopt additional or more stringent standards for pipeline transportation if such standards are compatible with the Federal minimum standards.".

—Page 60, line 17, after "was filed" insert "and finally approved".

H.R. 12611

By Mr. SNYDER:

—Page 138, after line 18, insert the following new section:

COLLECTION OF FEES, CHARGES, AND PRICES

SEC. 33. Notwithstanding any other provision of law, neither the Secretary of Transportation nor the Administrator of the Federal Aviation Administration shall collect any fee, charge, or price for any approval, test, authorization, certificate, permit, registration, conveyance, or rating relating to any aspect of aviation (1) which is in excess of the fee, charge, or price for such approval, test, authorization, certificate, permit registration conveyance, or rating which was in effect on January 1, 1973, or (2) which did not exist on January 1, 1973, until all such fees, charges, and prices are reviewed and approved by Congress.

Renumber the succeeding section of the bill accordingly.

H.R. 13488

By Mr. JEFFORDS:

—At the end thereof, add the following:

SEC. 10. RESIDENTIAL ENERGY CREDIT.

(a) GENERAL RULE.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting after section 44B the following new section:

"SEC. 44C. RESIDENTIAL ENERGY CREDIT.

"(a) GENERAL RULE.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the sum of—

"(1) the qualified energy conservation expenditures, plus

"(2) the qualified renewable energy source expenditures, plus

"(3) the qualified hydrogen energy expenditures.

"(b) QUALIFIED EXPENDITURES.—For purposes of of subsection (a)—

"(1) ENERGY CONSERVATION.—In the case of any dwelling unit, the qualified energy conservation expenditures are 20 percent of so much of the energy conservation expenditures made by the taxpayer during the taxable year with respect to such unit as does not exceed $2,000.

"(2) RENEWABLE ENERGY SOURCES.—In the case of any dwelling unit, the qualified renewable energy source expenditures are the following percentages of the renewable energy source expenditures made by the taxpayer during the taxable year with respect to such unit.

"(A) 30 percent of so much of such expenditures as does not exceed $2,000, plus

"(B) 20 percent of so much of such expenditures as exceeds $2,000 but does not exceed $10,000.

"(3) HYDROGEN ENERGY.—In the case of any dwelling unit, the qualified hydrogen energy expenditures are 20 percent of so much of the hydrogen energy expenditures made by the taxpayer during the taxable year with respect to such unit as does not exceed $2,000.

"(4) PRIOR EXPENDITURES BY TAXPAYER ON SAME RESIDENCE TAKEN INTO ACCOUNT.—If for any prior taxable year a credit was allowed to the taxpayer under this section with respect to any dwelling unit by reason of energy conservation expenditures or renewable energy source expenditures, paragraph (1), (2), or (3), (whichever is appropriate) shall be applied for the taxable year with respect to such dwelling unit by reducing each dollar amount contained in such paragraph by the prior year expenditures taken into account under such paragraph.

"(5) MINIMUM DOLLAR AMOUNT.—No credit shall be allowed under this section with respect to any return for any taxable year if the amount which would (but for this paragraph) be allowable with respect to such return is less than $10.

"(c) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) ENERGY CONSERVATION EXPENDITURE.—The term 'energy conservation expenditure' means an expenditure made on or after April 20, 1977, by the taxpayer for insulation or any other energy-conserving component (or for the original installation of such insulation or other component) installed in or on a dwelling unit—

"(A) which is located in the United States, the Virgin Islands, or Guam,

"(B) which is used by the taxpayer as his principal residence, and

"(C) the construction of which was substantially completed before April 20, 1977.

"(2) RENEWABLE ENERGY SOURCE EXPENDITURE.—

"(A) IN GENERAL.—The term 'renewable energy source expenditure' means an expenditure made on or after April 20, 1977, by the taxpayer for renewable energy source property installed in connection with a dwelling unit—

"(i) which is located in the United States, the Virgin Islands, or Guam, and

"(ii) which is used by the taxpayer as his principal residence.

"(B) ITEMS INCLUDED.—The term 'renewable energy source expenditure' includes only expenditures for—

"(i) renewable energy source property,

"(ii) labor costs properly allocable to the onsite preparation, assembly, or installation of renewable energy source property, or

"(C) SWIMMING POOL, ETC., USED AS STORAGE MEDIUM.—The term 'renewable energy source expenditure' does not include any expenditure properly allocable to a swimming pool used as an energy storage medium or to any other energy storage medium which has a function other than the function of such storage.

"(8) HYDROGEN ENERGY EXPENDITURES.—

"(A) IN GENERAL.—The term 'hydrogen energy expenditures' means an expenditure made on or after April 20, 1977, by the taxpayer for hydrogen energy property and installation installed in connection with a dwelling unit—

"(i) which is located in the United States, the Virgin Islands, or Guam, and

"(ii) which is used by the taxpayer as his principal residence.

"(B) ITEMS INCLUDED.—The term 'hydrogen energy expenditures' includes only expenditures for—

"(i) hydrogen energy property, and

"(ii) labor costs properly allocable to the onsite preparation, assembly, or installation of hydrogen energy property, or to the modification of conventional property for the use of hydrogen as a fuel.

"(4) INSULATION.—The term 'insulation' means any item—

"(A) which is specifically and primarily designed to reduce when installed in or on a dwelling (or water heater) the heat loss or gain of such dwelling (or water heater),

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 3 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the item.

"(5) OTHER ENERGY-CONSERVING COMPONENT.—The term 'other energy-conserving component' means any item (other than insulation)—

"(A) which is—

"(i) a furnace replacement burner designed to achieve a reduction in the amount of fuel consumed as a result of increased combustion efficiency,

"(ii) a device for modifying flue openings designed to increase the efficiency of operation of the heating system.

"(iii) an electrical or mechanical furnace ignition system which replaces a gas pilot light.

"(iv) a storm or thermal window or door for the exterior of the dwelling,

"(v) an automatic energy-saving setback thermostat,

"(vi) caulking or weather stripping of an exterior door or window,

"(vii) a heat pump which replaces an electric resistance heating system,

"(viii) meters which display the cost of energy usage,

"(ix) a replacement fluorescent lighting system,

"(x) an evaporative cooling device,

"(xi) is an item (other than a fireplace) which is designed to use wood and peat as a fuel for space heating, the heating of water or cooking of food, or any combination thereof, including any controls, ducts, stovepipes, footing or other item (other than a chimney) necessary for the safe and efficient operation of any such item, or

"(xii) an item of the kind which the Secretary specifies by regulations as increasing (by conversion or otherwise) the energy efficiency of the dwelling,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 3 years, and

"(D) which meets the performance and quality standards, if any which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the item.

In establishing regulations under this paragraph, the Secretary shall prescribe (i) guidelines setting forth the criteria which are used in the determination of whether an item is an energy-conserving component, and (ii) a procedure under which a manufacturer of an item may request the Secretary to specify or certify that item as an energy-conserving component.

"(6) RENEWABLE ENERGY SOURCE PROPERTY.—The term 'renewable energy source property' means property—

"(A) which, when installed in connection with a dwelling—

"(i) uses solar energy in either an active or passive method the primary purpose of which is heating or cooling such dwelling or providing hot water for use within such dwelling, or in the production of electricity,

"(ii) uses wind energy for nonbusiness residential purposes,

"(iii) is necessary to distribute or use geothermal deposits (as defined in section 613 (e)) which provide geothermal energy to heat or cool such building or provide hot water for use within such building, or

"(iv) uses any other form of renewable energy which the Secretary specifies by regulations,

"(B) the original use of which begins with the taxpayer,

"(C) which can reasonably be expected to remain in operation for at least 5 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the property.

"(7) HYDROGEN ENERGY PROPERTY.—The term 'hydrogen energy property' means property—

"(A) which, when installed in connection with a dwelling—

"(i) uses hydrogen as a fuel for the purpose of heating or cooling such dwelling or providing hot water for use within such dwelling, or

"(ii) is used in the electrolysis of water for the production of hydrogen,

"(B) the original use of which begins with the taxpayer

"(C) which can reasonably be expected to remain in operation for at least 5 years, and

"(D) which meets the performance and quality standards, if any, which—

"(i) have been prescribed by the Secretary by regulations, and

"(ii) are in effect at the time of the acquisition of the property.

"(8) CONSULTATION IN PRESCRIBING STANDARDS.—Performance and quality standards shall be prescribed by the Secretary under paragraphs (4), (5), (6), and (7) only after consultation with the Secretary of Energy, the Secretary of Housing and Urban Development, and other appropriate Federal agencies.

"(9) WHEN EXPENDITURES MADE; AMOUNT OF EXPENDITURES.—

"(A) Except as provided in subparagraph (B) an expenditure with respect to an item shall be treated as made when original installation of the item is completed.

"(B) In the case of renewable energy source expenditures in connection with the construction or reconstruction of a dwelling, such expenditures shall be treated as made when the original use of the constructed or reconstructed dwelling by the taxpayer begins.

"(C) The amount of any expenditure shall be the cost thereof.

"(D) If less than 80 percent of the use of an item is for nonbusiness residential purposes, only that portion of the expenditures for such item which is properly allocable to use for nonbusiness residential purposes shall be taken into account. For purposes of the preceding sentence, use for a swimming pool shall be treated as use which is not for residential purposes.

"(10) PRINCIPAL RESIDENCE.—The determination of whether or not a dwelling unit is a taxpayer's principal residence shall be made under principles similar to those applicable to section 1034, except that—

"(A) no ownership requirement shall be imposed, and

"(B) the period for which a dwelling is treated as the principal residence of the taxpayer shall include the 30-day period ending on the first day on which it would (but for this subparagraph) be treated as his principal residence.

"(1) ENVIRNMENTAL RESTRICTIONS ON CERTAIN WOOD AND PEAT BURNING ITEMS.—No credit shall be allowed under subsection (a) for expenditures with respect to any item described in paragraph (5)(A)(xii) which are to be installed in any metropolitan or other area after the date on which—

"(A) the Administrator of the Environmental Protection Agency certifies to the Secretary that the emissions from such items would cause air quality in such area to be in violation of any Federal law, or

"(B) the Secretary of Agriculture certifies to the Secretary that additional consumption of wood in connection with such items would endanger forests in that area.

"(d) SPECIAL RULES.—For purposes of this section—

"(1) DOLLAR AMOUNTS IN CASE OF JOINT OCCUPANCY.—In the case of any dwelling unit which is jointly occupied and used during any calendar year as a principal residence by 2 or more individuals—

"(A) the amount of the credit allowable under subsection (a) by reason of energy conservation expenditures or by reason of renewable energy source expenditures (as the case may be) made during such calendar year by any of such individuals with respect to such dwelling unit shall be determined by treating all of such individuals as one taxpayer whose taxable year is such calendar year; and

"(B) each of such individuals shall be allowed a credit under subsection (a) for the taxable year in which such calendar year ends (subject to the limitation of paragraph (5) of subsection (b)) in an amount which bears the same ratio to the amount determined under subparagraph (A) as the amount of such expenditures made by such individual during such calendar year bears to the aggregate of such expenditures made by all of such individuals during such calendar year.

"(2) TENANT-STOCKHOLDER IN COOPERATIVE HOUSING CORPORATION.—In the case of an individual who holds stock as a tenant-stockholder (as defined in section 216) in a cooperative housing corporation (as defined in such section), such individual shall be treated as having made his tenant-stockholder's proportionate share (as defined in section 216(b)(3)) of any expenditures of such corporation.

"(3) CONDOMINIUMS.—

"(A) IN GENERAL.—In the case of an individual who is a member of a condominium management association with respect to a condominium which he owns, such individual shall be treated as having made his proportionate share of any expenditures of such association.

"(B) CONDOMINIUM MANAGEMENT ASSOCIATION.—For purposes of this paragraph, the term 'condominium management association' means and organization which meets the requirements of paragraph (1) of section 528 (c) other than subparagraph (E) thereof) with respect to a condominium project substantially all of the units of which are used as residences.

"(e) BASIS ADJUSTMENTS.—For purposes of this subtitle, if a credit is allowed under this section for any expenditure with respect to any property, the increase in the basis of such property which would (but for this subsection) result from such expenditure shall be reduced by the amount of the credit so allowed.

"(f) TERMINATION.—This section shall not apply to expenditures made after December 31, 1985.".

(b) CARRYOVER OF UNUSED CREDIT.—If the amount of the credit determined under this section for the taxable year exceeds the liability for the taxpayer for the tax under this chapter for the taxable year, the excess shall be carried over to each of the two taxable years succeeding that taxable year. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the two taxable years to which it may be carried, and then to the succeeding taxable year to the extent that it may

not be added for a prior taxable year to which it might be carried.

(c) INSPECTION.—To the extent not presently authorized and utilized by any agency of the United States in the assessment and collection of income taxes, no procedure or practice which utilizes onsite inspection of the residence of an individual shall be employed to determine if that individual is entitled to a credit under section 44C of the Internal Revenue Code of 1954, as added by subsection (a), unless such procedure or practice provides that such inspection shall take place only with the written consent of such individual.

(d) TECHNICAL AND CLERICAL AMENDMENTS.—

(1) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting after the item relating to section 44B the following new item:

"Sec. 44C. Residential energy credit.".

(2) Subsection (c) of section 56 (defining regular tax deduction) is amended by striking out "credit's allowable under—" and all that follows and inserting in lieu thereof "credits allowable under subpart A of part IV other than under sections 31, 39, 43, 44C, 44E, 44F, 44G, 44H, 44I, and 44J.".

(3) Subsection (a) of section 1016 (relating to adjustments to basis) is amended by inserting after paragraph (20) the following new paragraph:

"(21) to the extent provided in section 44C(e), in the case of property with respect to which a credit has been allowed under section 44C.".

(4) Subsection (b) of section 6098 (relating to designation of income tax payment to Presidential Election Campaign Fund) is amended by striking out "and 44B" and inserting in lieu thereof "44B, and 44C"

(e) EFFECTIVE DATE.—Notwithstanding subsection (a) of section 9, the amendments made by this section shall apply to taxable years ending on or after April 20, 1977.

H. CON. RES. 683

By Mr. ROUSSELOT:

(Amendment in the nature of a substitute.)

—strike all after the resolving clause and insert the following:

That the Congress hereby determines and declares, pursuant to section 301(a) of the Congressional Budget Act of 1974, that for the fiscal year beginning on October 1, 1978—

(1) the recommended level of Federal revenues is $464,148,000,000 and the amount by which the aggregate level of Federal revenues should decrease is $29,500,000,000.

(2) the appropriate level of total new budget authority is $519,046,000;

(3) the approrpriate level of total budget outlays is $464,148,000,000;

(4) The amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $0; and

(5) the appropriate level of the public debt is $798,300,000,000 and the amount by which the statutory limit on such debt should accordingly be increased is $300,000,000 (this figure represents off-budget agency outlays and trust fund surplus).

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares pursuant to section 301(a)(2) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1978, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050):
(A) New budget authority, $127,102,000,000,
(B) Outlays, $112,403,000,000;
(2) International Affairs (150):
(A) New budget authority, $8,754,000,000,
(B) Outlays, $6,200,000,000,
(3) General Science, Space, and Technology (250):
(A) New budget authority, $5,146,000,000
(B) Outlays, $5,001,000,000
(4) Energy (270):
(A) New budget authority, $9,200,000,000
(B) Outlays, $7,100,000,000
(5) Natural Resources and Environment (300):
(A) New budget authority, $12,900,000,000
(B) Outlays, $11,001,000,000
(6) Agriculture (350):
(A) New budget authority, $9,197,000,000
(B) Outlays, $7,628,000,000
(7) Commerce and Housing Credit (370):
(A) New budget authority, $5,386,000,000,
(B) Outlays, $2,814,000,000
(8) Transportation (400):
(A) New budget authority, $16,200,000,000,
(B) Outlays, $16,500,000,000
(9) Community and Regional Development (450):
(A) New budget authority, $8,500,000,000,
(B) Outlays, $9,001,000,000
(10) Education, Training, Employment and Social Services (500):
(A) New budget authority, $22,100,000,000
(B) Outlays, $26,600,000,000
(11) Health (550):
(A) New budget authority, $48,600,000,000,
(B) Outlays, $46,102,000,000
(12) Income Security (600):
(A) New budget authority, $182,394,000,000,
(B) Outlays, $150,100,000,000
(13) Veterans Benefits and Service (700):
(A) New budget authority, $21,100,000,000
(B) Outlays, 20,913,000,000
(14) Administration of Justice (750):
(A) New budget authority, $4,100,000,000
(B) Outlays, $4,051,000,000;
(15) General Government (800):
(A) New budget authority, $4,098,000,000
(B) Outlays, $3,903,000,000;
(16) General Purpose Fiscal Assistance (850):
(A) New budget authority, $9,019,000,000
(B) Outlays, $9,237,000,000;
(17) Interest (900):
(A) New budget authority, $43,500,000,000,
(B) Outlays, $43,500,000,000;
(18) Allowances (920):
(A) New budget authority, —$1,087,000,000
(B) Outlays, —$743,000,000
(19) Undistributed Offsetting Receipts (950):
(A) New budget authority, —$17,163,000,000
(B) Outlays, —$17,163,000,000

EXTENSIONS OF REMARKS

AUDREY PERRY

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. PURSELL. Mr. Speaker, this summer has brought Monroe County, Mich. the retirement of one of its most respected educators, and a woman I have long admired, Mrs. Audrey Perry. On July 18, Mrs. Perry presented her resignation to the Monroe Public Schools Board, announcing her intentions to retire to Florida. With this retirement, Mrs. Perry leaves vacancies at the Monroe Junior High School where she was eighth grade assistant principal, and on the Monroe County Community College Board of Trustees, a post she has held since 1976.

Mrs. Perry has led a very active life, not only in education, but in politics as well. She was elected chairman of the Monroe Education Association Women's Political Caucus, was elected chairman of the Monroe County Republican Committee, was named president of the Michigan Republican Women's Political Caucus and was founder and president of the State Coalition of Michigan's Women's Organizations, "WOMAN."

Also in the field of education, Mrs. Perry was elected president of the Monroe City Education Association in 1962.

In that same year, she helped organize the Parent's Association for the Mentally Retarded in Monroe. She was a high school teacher and then assistant principal, and then principal of Riverside Elementary School in Monroe. She has been a member of the executive board of the Michigan Association for Talented and Gifted Children, a representative to the State legislature for the Monroe Public Schools, and first vice president of the Monroe County Council for High Potential Youth.

In addition to her very active life in education and politics, Mrs. Perry was also the first woman to be elected first vice president for the Eastern Michigan Chapter of Phi Delta Kappa. She was a member of the National Honor Society of the Humanities and Arts, and a member of the Michigan Chamber of Commerce Task Force on Education and Welfare.

Mrs. Perry was also honored in 1977 by receiving the Governor's Award during Michigan Week, and was chosen woman of the year that year by the Monroe Business and Professional Women's Club.

Obviously, Audrey Perry is a woman of many talents, and those talents will be sorely missed by the people of Monroe. She served her community with distinction and honor, as well as making a meaningful contribution to the political life of the State of Michigan.

We do not often see people of the stature of Audrey Perry in public life, and Monroe County has indeed been fortunate to have had her services.

I offer Audrey Perry my very sincere congratulations and thanks for an out-

standing career. I am grateful to have known her these many years, and wish her every success and happiness in her new life.●

NO UNEMPLOYMENT

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. WHITEHURST. Mr. Speaker, a constituent and good friend of mine, Mr. Henry Dusinberre of Norfolk, Va., recently sent me the following commentary on the value of personal involvement, and I am pleased to take this opportunity to share it with my colleagues. I think it has great merit.

Mr. Dusinberre told me, too, that during his last command at sea, they had a program of personal improvement, and as a result 34 percent of the crew were advanced in rating on the servicewide examinations. Thus his comments are the result of considerable personal experience and deserve our careful attention.

NO UNEMPLOYMENT

I didn't say reduce unemployment. I said eliminate unemployment.

It is reported that Japan, in a recent depression, sent everyone, not otherwise occupied, to school, either to learn or to teach.

The greatest loss during a recession, depression, or unemployment period, is the time lost. It can never be regained.

Prisoners of war found that the only way they could keep from going nuts, was for each prisoner, in turn, to teach the others whatever his specialty was. If one knew German, he taught the others all the German he knew. Another knew mathematics and taught that. The point is that learning is basic. Furthermore, each generation must, in turn, learn everything, as everyone is born completely ignorant.

(Also, Ben Franklin said that if you would pour your pocketbook into your head, no one could steal it from you.)

Back to Japan, the net effect of the program was an investment in human resources. Every technician out of a (paying) job became a better technician. No wonder Japan is flooding this country with radios, tape recorders, TV's and automobiles.

When I ran "Forty-Plus of Tidewater" for people in the upper brackets who were unemployed, we used to tell them that they already had a job. Their job was to find a job! They had to learn how, they had to prepare a resume, make a prospect list, join with others in Forty-Plus to do cooperative canvassing and promotion. This job didn't pay anything but it was a job just as any other task-assignment was a job, and they had to work at it.

Along the same lines, it should be possible to organize all "unemployed" in an educational program. In other words, everyone was either (1) working at a paying job, or (2) learning a job skill of their choice in order to get a paying job, or (3) learning to improve their job skill in order to get a better paying job than the last one they had, or (4) are teaching others how to do the jobs at which they are proficient.

In other words, everyone has a job. No time is lost. Productivity may be lost, but our human resources are improved.

I am speaking here at the lowest level, that is, where we believe that everyone should be able to be self-supporting, certainly off welfare. Once the person is self-supporting and not a burden upon society, he then has a free choice as to his pursuits.

Our basic requirements for a good citizen are, briefly:

Be literate; be a registered voter; be self-supporting, certainly off welfare; be a taxpayer; be law-abiding; and be a supporter of the law-abiding system.

It would seem that society has a responsibility to educate citizens to good citizenship, and the periods of "unemployment" would present an opportunity to do this.

Particularly helpful would be those interest and aptitude tests which point an individual's efforts toward those occupations, trades or professions where that particular individual would be most happy and most successful.

Maybe, if we called it a "Lifetime Employment" program it would catch on.

Thomas Edison is quoted as saying that he never did a day's work in his life, it was all fun.●

BOTSWANA AMBASSADOR POINTS TO RECORD

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. SIMON. Mr. Speaker, I noted with pleasure recently that the Ambassador of Botswana had a letter to the editor in which he made clear that Botswana does not assist terrorism in any way.

One of the most stable, progressive and enlightened countries of Africa is Botswana.

That country has no shortage of problems, and I hope that there can be a growing, working relationship between the United States and Botswana.

I insert this item in the CONGRESSIONAL RECORD simply to make sure there is no misunderstanding about the policies of Botswana.

BOTSWANA DOES NOT ASSIST TERRORISM

The Embassy of Botswana has read with dismay the July 7 column by Jack Anderson listing Botswana as one of the "patrons" of "dealers in death."

We further note that Jack Anderson alleges that his source of information is secret Central Intelligence Agency papers. That article is completely untrue.

The embassy wishes to make it very clear that Botswana does not harbor, or assist, any form of terrorism. It is assumed that by terrorism the article is referring to activities of freedom movements against minority regimes in southern Africa. If that is the case, the embassy wishes to state categorically that Botswana does not wish her territory to be used as a springboard for any movement launching attacks against neighboring states.

Botswana has repeatedly taken this stand when it was attacked by the Rhodesian forces, under the pretense that they were following freedom fighters in Botswana, or were attacked by freedom fighters based in Botswana. There are no bases or camps for freedom movements in Botswana.

Botswana has made this policy known to the international community at various forums such as the OAUUNO. Botswana continues to adhere to this policy.

Therefore the article referred to is both untrue and without foundation.

On July 4, the president of Botswana reiterated that policy.

The embassy is tempted to suspect that the idea in the article, being identical with the one Ian Smith's regime uses to attack Botswana, identifies the writer and his alleged sources with the views of the Smith minority regime—i.e., perpetuation of the suppression of the blacks and using Botswana as a scapegoat against mounting activities by the freedom fighters in Rhodesia.

BIAS MOOKODI,
Ambassador of Botswana.●

POLICEMAN IN THE GHETTO

HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. PATTISON of New York. Mr. Speaker, in the Washington Post of Friday, August 11, 1978, there appeared an article containing an interview with Tony Bouza, the commander of the New York City Police Department with jurisdiction in the Bronx.

It is a thoughtful interview of a thoughtful cop. I have met Tony Bouza and have discussed the problems with him that he discusses in the article. He has been a cop all his adult life. He is an excellent cop, and he has risen through the ranks to his present position of responsibility. He knows what he is talking about. I hope my colleagues will take a few minutes and read the article. Maybe, just maybe, we can avoid reliving the "hot summers" of the 1960's over and over again.

The article follows:

A POLICEMAN IN THE GHETTO

(This article is excerpted from an interview with Anthony V. Bouza, Bronx borough commander of the New York Police Department, on "The Police Tapes," a program aired by WNET–TV in New York and seen locally on WETA–TV. The program was produced by Alan and Susan Raymond.)

Chief Bouza: You look at the average policeman, and he comes from the lower middle class or upper lower class, and suddenly he's going to become a policeman. He wants security; he wants a nice-paying job; he wants to work out of doors; he wants to help people. And this is the psychology.

And he goes to the police academy, and he is taught how to help people. He's going to be preserving the fabric of our society. He's going to be preserving life and property and maintaining peace.

And then he gets out there, and he suddenly discovers that he's regulating human behavior, that he is bitterly resented. And he's shocked. The police officer's reaction to this is absolute shock—that a citizen, and I mean the citizen generically, should resent his presence. And it is resented. And it is resented rightly. We all bridle at control.

The policeman has great difficulty assimilating that knowledge. He becomes a bit cynical. He becomes a bit hardened. He cannot permit every motional contact to drain him: He has to have emotions for his life and for his family. So like the prostitute who cannot afford to become emotionally, romantically involved with every client, the policeman cannot afford to become emotionally or romantically involved with every client. And the result is that he develops callouses over his emotions.

As a matter of fact, that hardness and that cynicism permit him to cope with what he encounters. I think that if you maintained the involvement of the philosopher in the

ghetto in a policeman, he'd disintegrate after a very little while. . . .

The policeman fundamentally has a ringside seat on the greatest show on earth. One of the beautiful things about being a policeman is that you're at the center of action all the time. You are seeing people, sometimes famous people, under most incredible circumstances. You're in on every secret of society in a sense. And that's very exciting.

The public doesn't understand everything that you see. You can't even explain it. Most policemen have a tighter relationship with their partners than they do with their wives, which is a whole different situation. So the insularity grows, the secretiveness grows, the parochialism grows. Society doesn't understand. The policeman is shocked that society doesn't appreciate him sufficiently, and they are driven apart. And that really creates a kind of ineluctable drift that I don't know how to combat. . . .

Just as in "Clockwork Orange," a dehumanized and impersonal society is brutalizing and conditioning its citizens. . . . We have a subculture in our society, and it resides in the ghetto. And we are conditioning that subculture, and their reaction is very predictable. B. F. Skinner would have no difficulty identifying what is happening there. We are conditioning people to become alcoholics. We are conditioning them to be violent. And we give them no other mechanisms with which to cope.

There is nothing inevitable about it. It is a process that is taking place because of forces that are conditioning this response, just as forces are conditioning my response to educate my children effectively—make sure they get a good education. I pay my mortgage, pay my taxes. I resolve my disputes with my wife or my colleagues through communications. In the ghetto I'd be stabbing and punching and kicking and scratching and doing everything else that everybody else is doing—simply because I'm a human being, and I'm conditionable. . . .

The levels of rage and frustration have created an emotional gorge that people are permanently endowed with in the ghetto. So it may take quite a while for me to get you angry enough to be violent; if you were walking around with an emotional gorge up to here, it would take only another fraction of an inch to get you to respond.

And that's really what is happening. The frustrations that I'm talking about: the heat, the misery, the lack of rest, the whole miserable condition of poverty. And Aristotle did say 2,500 years ago that poverty is the parent of revolution and crime. It is still true. And when you're going around with those levels of frustration and permanent anger, and you don't even know what you want, the first available target becomes the focus of the violence.

America attacks the problems that it sees. It doesn't see these problems. They're now under the rug. The fact is that we have ignored them. They are being more ignored now than they ever have been. They're poorer than they ever have been. There hasn't been a significant redistribution of income in this nation for 30 years. The bureaucracy and the government are failing, and fundamentally, the federal government has simply got to look at what is happening in the city ghetto and address it. And one of the reasons it hasn't done so is that no one is filming it, no one is writing about it, no one is doing stories about it. It is just invisible, and if you go out into the streets of the Bronx, you will see a lot of black and Hispanic energetic young men and women all dressed up, no place to go, nothing to do, no jobs, no point in living, and seeking any form of escape that they can find, whether that form is drugs or alcohol or whatever. Most frequently it's alcohol, and thank God that it's so freely available.

To the degree that I succeed in keeping the ghetto cool, to the degree that I can be effective—to that degree, fundamentally, am I deflecting America's attention from discoverng this cancer? And the longer the discovery is deferred—as in Vietnam—the greater the moral dilemma, the greater the moral problem when it is ultimately discovered. So maybe I would be better off failing. Maybe I'd be better off not working quite so hard. Maybe I'd be better off not being as effective as I presume myself to be.

And that way America would be confronting the problem as it had to do during the urban riots of the '60s and so on. The fact of the matter is that we are manufacturing criminals. We are manufacturing brutality out there. We are very efficiently creating a very volatile and dangerous sub-element of our society. And we are doing it simply because we don't want to face the burdens and the problems and the responsibilities that their existence imposes on any society with conscience. So rather than awaken your conscience to the problem, you're far better off just ignoring it.

And that's what we are doing. And I am very well paid, almost to be the commander of an army of occupation in the ghetto. And that is a great tragedy, I think, and I don't know that anyone's useful life ought to be employed in that kind of a pursuit however well paid one is.●

FIFTY YEARS OF CARING

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. VANDER JAGT. Mr. Speaker, I want to take this opportunity to recognize an outstanding business firm in our 9th Congressional District in Michigan, Gerber Products Co., of Fremont, which this year marks its 50th anniversary in the baby food business. As I mentioned in a "Dear Colleague" letter today in distributing a very special booklet on the company's golden anniversary, Gerber's first introduced a line of five strained baby foods in 1928 because Mrs. Dan Gerber asked her husband why baby food couldn't be strained at the family cannery. Dan Gerber agreed that "there must be a better way to feed a baby."

Today, the company offers 160 varieties of strained and junior foods, cereals, meats, juices, and related items in 80 countries. In addition to its food line, Gerber produces a broad line of infant clothing, nursers, and nurser accessories and baby need items.

"Fifty Years of Caring" is the theme selected by Gerber for its yearlong anniversary observance. Gerber interest and its belief that nothing can be too perfect for the world's babies have brought the company and its customers along a road of constant development and improved health.

In recognition of the anniversary, a number of commemorative events are planned by the company. A major event is an international symposium on infant nutrition scheduled for October 16–19 in Lansing, Mich. The symposium will be under the auspices of the Nutrition Foundation with Dr. Robert A. Stewart, retired director of research for Gerber Products Co., spearheading the informational and educational gathering. The major topic of discussion will concern how the world's, including Third World nations, nutritional needs are being met and what factors influence that status.

The 50th anniversary observance is a time Gerber people everywhere take pride in a job well done while looking ahead to continual growth, prosperity, and a better world for all babies.●

THE LEGACY OF POPE PAUL VI

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. LENT. Mr. Speaker, during the past week, millions of Roman Catholics throughout the world, along with millions of their brethren of other faiths, have joined in mourning the death of Pope Paul VI. Sadly, for all too many, the passing of this world leader brought for the first time a real appreciation of his courage, his ability, and achievements.

Pope Paul's election in 1963 coincided with very great changes in the Roman Catholic Church and within its heirarchy, many of which had been instituted by his predecessor Pope John XXIII. As these changes progressed, and their effects multiplied, Pope Paul's steady, compassionate leadership guided the church through some of its most difficult years of this century.

Pope Paul's courage became most evident in his profound devotion to defense of human life. Paul's 1968 encyclical "Humane Vitae" rejected artificial birth control. It provoked much criticism. But the encyclical clearly demonstrated the pontiff's unwavering commitment to preservation of strong moral values in the world.

I am sure that most of us will remember Pope Paul's fervent devotion to the cause of world peace. Those of us in New York will not forget his visit in 1964, and his emotional plea to the United Nations "Never again war. War never again." And ceaselessly, Pope Paul labored to achieve that goal. Unlike most of his predecessors, Paul frequently left the Vatican. He visited world leaders and the people in 16 countries on 6 continents. He truly was—as he pledged he would be—a "pilgrim Pope." His pilgrimages always were in the cause of peace and dignity for all mankind.

That pilgrimage has now ended. But Pope Paul's unremitting efforts on behalf of his fellow man will continue to provide a source of inspiration and encouragement for all of us.●

THE BUSINESS OF AMERICA

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. McDONALD. Mr. Speaker, business whether it is agriculture or industrial provided the basis for America's greatness. It is only because of this strength that the United States of America has been able to do many of the things it has done under the free enterprise system. However, since our Government embarked upon the road to Government controls and interference in the business of America some 50 years ago, the inevitable price is now being paid and we are seeing our economic position in the world decline, of which the tobogganing slide of the dollar is just one symptom. Mr. Anthony Harrigan, in a recent editorial that appeared in the U.S. Industrial Council Bulletin for August 1, 1978, thoughtfully describes this trend and how it fits with the current tax revolt mood of the American people. I commend this item to the attention of my colleagues. The item follows:

THE BUSINESS OF AMERICA

(By Anthony H. Harrigan)

Fifty years ago no one seriously questioned the statement that the business of America is business. Indeed, President Calvin Coolidge used those very words in describing the nation's primary activity.

Since that time, attitudes towards a business civilization have changed radically. For years, Coolidge has been treated—by liberals—as a ludicrous figure. His comment on the "business of America" has been treated as a narrow-minded observation.

Yet, as the American people sink deeper into debt slavery, as inflation worsens, and as the dollar is increasingly discounted on world money markets, the soundness of the Coolidge years—the business epoch—is beginning to come across to many formerly doubting Americans. The current tax revolt is a sign of a new awareness of economic realities.

Syndicated newspaper columnist Holmes Alexander recently called attention to a remarkably discerning statement by Richard N. Needham, a writer for the Toronto, Canada, *Globe and Mail*

Mr. Needham made reference to the Coolidge statement about "the business of America is business." Then he added:

"That was then, this is now. The business of President Jimmy Carter's America is politics, bureaucracy, welfare, the redistribution of wealth from people who've earned it to people who haven't. The business of Jimmy Carter's America is legislation, regulation, litigation, rehabilitation, confrontation, discrimination, taxation, inflation and centralization. The business of Jimmy Carter's America is 'human rights' and 'unmet needs' and 'social justice.' The business of Jimmy Carter's America is to moralize and meddle all over the place (how Coolidge would have hated this) from Asia to Africa to the Middle East to Latin America."

Mr. Needham then added this punch line: "Real business—the efficient production of marketable goods and services—has got lost somewhere in the shuffle. Or perhaps I should have said transferred itself to more favorable environments."

Unquestionably, the American people lost their way somewhere between the 1920s and the 1970s. While remarkable things were achieved in those years in technological terms, the country lost sight of the primacy of business.

It lost sight of the vital importance of allowing people to accumulate money, of investment in new productive facilities, of the importance of capitalization of heavy industry, of profits as the key to a comfortable life for all our people.

One has only to listen to President Carter's condemnation of proposals to improve the capital gains tax situation to realize that he doesn't understand the importance of strengthening the truly productive, investing sector of the American population.

America prospered in the early 20th century because the free enterprise system permitted the enrichment of energetic individuals. They were allowed to earn money and to keep it. We have had more than 45 years of "soak the rich" policy, and the antiquated, rundown character of much of our basic industry—our railroads, for instance—is a by-product of that political philosophy.

It will be very hard, after these years of economic leveling philosophy to rebuild public support for an economic philosophy that favors allowing people to make money and to keep it. Today, we have an army of bureaucrats and academics who believe government exists to transfer the wealth of individuals to those deemed deserving.

The result of the transfer philosophy, however, is the gradual deterioration and impoverishment of our country. It's very simple: if you aren't allowed to keep your money, you won't work hard to earn it.

The current public protest against high property taxes, which are a form of wealth transfer by bureaucrats, is the first encouraging sign of a return to reason. We need to work very hard to educate a new generation that the business of America *is* business.●

MARK FRANKLIN COMMENDED BY CONGRESSMAN DANIELSON

HON. GEORGE E. DANIELSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. DANIELSON. Mr. Speaker, it is my great pleasure to bring to the attention of my colleagues the installation of Mark Franklin as president of the Alhambra Friendship B'nai B'rith Lodge 1179.

The installation and membership breakfast will take place on Sunday, September 10, 1978 at the Temple Beth Torah in Alhambra, Calif. Lodge 1179 encompasses the cities of Alhambra, Monterey Park, Montebello, and the west San Gabriel Valley area.

Mark Franklin is a resident of Monterey Park, a city in the 30th Congressional District which I am privileged to represent and in which I also reside. He is the owner of Alton Litho Printers, and vice president and director of Technology Associates of Southern California, also of Monterey Park. A graduate of MIT with a B.S. degree in business and engineering administration, Mark has a wonderful wife, Shirley, and three equally fine children: Edie, Michael, and Karen.

Mr. Speaker, Mark is a dedicated civic leader. A long-time resident of Monterey Park, he is a past director of the chamber of commerce, the Rotary Club, and the American Institute of Industrial Engineers. He is a member of the Valley Booster Chapter of the City of Hope; the Los Angeles World Affairs Council, past president of the local Toastmasters International and a director of Temple Beth David in Temple City. Mark, a public spirited citizen, was also a candidate in 1976 for the Monterey Park City Council.

Mark Franklin is an outstanding citizen and is most deserving and qualified for the honor and responsibility which will be his on September 10.

Mr. Speaker, I am sure that my colleagues join me in congratulating Mark Franklin on the occasion of his installation as president of B'nai B'rith Lodge 1179, and to convey to him, his wife and family our very best wishes.●

NUCLEAR FUSION: ENERGY FOR THE FUTURE

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. RANGEL. Mr. Speaker, I would like to bring to your attention and to the attention of my colleagues an article in the Sunday, August 13, Washington Post reporting a major advance in nuclear fusion technology. For the first time, scientists have been able to produce and maintain the tremendously high temperatures necessary for the fusion reaction to take place without damaging the magnetic field that contains the fuel material.

Nuclear fusion, the joining of two atomic particles at high temperatures, is the true power of the future. Yielding 180 times more usable energy than it consumes, nuclear fusion is a clean energy process which leaves no radioactive wastes. Furthermore, one glass of water contains fusion fuel equal to the energy in one ton of gasoline.

The nuclear fusion produces no radioactive wastes, inspires hope and confidence. For the wastes of nuclear fission—fission is the process of splitting the atom—make that process so dangerous as a power source. We are unable to dispose of those wastes safely, and they will endanger our descendants for centuries. In the fusion process there are no such wastes and no such dangers.

There are still many problems to be overcome before fusion is commercially applicable; the article estimates that that time is 20 to 30 years away. Almost miraculously, that coincides with most estimates of the time of depletion of the world's oil supplies. If we continue our fusion research, we will be able to implement fusion technology just as our oil runs out.

The implications of this advancement are tremendous. A solution to the world's energy problems is before us. We must seize the initiative and pursue it. This breakthrough compels us to redirect our energies and to channel further funds and attention into highly promising and

vitally important nuclear fusion research. The text of the article follows:

[From the Washington Post, Aug. 13, 1978]

U.S. MAKES MAJOR ADVANCE IN NUCLEAR FUSION

(By Bill Peterson)

Princeton University scientists have made a major advance in the race to tame nuclear fusion—the hydrogen bomb process—which a top government energy expert said yesterday could lead to the production of the first practical working fusion reactors.

Using a small, donut-shaped test reactor, the scientists produced sun-like temperatures of more than 60 million degrees centigrade inside a kind of magnetic bottle.

"It is the first time we've produced the actual conditions of a fusion reactor in a scale-model device," said Dr. Stephen O. Dean director of the Department of Energy's magnetic confinement systems division.

"This is the biggest thing that has ever happened in fusion research," he said.

"The question of whether fusion is feasible from a scientific point of view has now been answered," Dean added. "The practical questions of what price it will cost and when it will be duplicated commercially are now engineering and economic questions."

The potential payoff is unlimited electrical energy, one of the prerequisites for the long-term survival of advanced civilization.

The attractions of taming the fusion process are great. Fusion, the joining of two atomic particles at high temperatures, is the same nuclear reaction that powers the sun.

The reaction is the most efficient one known, producing 180 times more usable energy than it consumes. Its fuel, "heavy" forms of hydrogen, is as inexhaustible as sea water. One glass of water contains fusion fuel equal to the energy in a ton of gasoline. One pound of "heavy" hydrogen produces the same energy as 5,000 tons of coal.

Heavy hydrogen refers to isotopes of hydrogen known as deuterium and tritium. They possess much greater mass than ordinary hydrogen. They occur naturally and can be extracted from sea water.

The fuel has the added attraction of "burning out" without leaving radioactive waste like that from modern atomic power plants.

Current nuclear reactors use fission, the same process used in the atomic bomb. They depend on a limited world supply of uranium and plutonium.

Scientists have known about the fusion process for more than 40 years. It was first made to work in the hydrogen bomb.

But the problem has been controlling it for peaceful uses. The basic problem has been to contain a searing plasma of hydrogen ions long enough and in thick enough concentration for them to smash together with sufficient energy to fuse, releasing energy.

Two conditions must be met for the ionized plasma to undergo a continuous fusion: the reaction temperature must be at least 44 million degrees centigrade, and each cubic centimeter of the plasma must contain at least 100 trillion ions for one second.

Two years ago both American and Soviet scientists achieved 10 million degrees in experiments. The Princeton group, working under government contracts, reached 25 million degrees last December.

Using a donut-shaped device called Princeton Large Torus, a concept originally developed by the Soviets, the New Jersey scientists produced a temperature of 60 million degrees in recent weeks, and they estimate that their scale model will reach up to 100 million.

They did so without damaging the confinement of the plasma in its strong magnetic field—a fear long expressed by scientists.

The experiments were conducted in a 3-foot-high and 10-foot-wide donut-shaped device that encloses two smaller donuts. The smaller plasma donut is about 30 inches in diameter. It is surrounded by a vacuum chamber about 3 times as large, which forms a "magnetic bottle."

An intense beam of hydrogen atoms is shot through the walls of the magnetic bottle to heat up the plasma and make the reaction occur.

The process was developed by Dr. Harold P. Eubank of Princeton's Plasma Physics Laboratory and Dr. H. H. Hazleton of Oak Ridge, Tenn.

It is to be announced in a scientific paper to be delivered Aug. 23 at an international conference on controlled fusion and plasma physics at Innsbruck, Austria.

The Department of Energy is expected to announce the advance next week, although official press spokesmen yesterday denied that.

Dr. Harold Furth, one of the chief Princeton researchers, said DOE officials had asked the scientists to refrain from comment.

"All I can say is we've developed something really important," he said. "Nothing has happened of this significance in fusion research in the last 10 years."

Dean said the temperature experiment was one of two major breakthroughs expected in the fusion reactor field. The second, expected next year, will be to sustain the temperature for longer periods.

"We now know how to set the size of the reactor and how to calculate and scale it up in size," he said.

The temperature and time elements will be brought together in a full-scale test reactor, currently under construction at Princeton. It is scheduled to be completed in 1982.

It will probably be 20 to 30 years before the commercial applicability of fusion reactors is demonstrated, Dean said.●

SHOULD U.S. IMPLEMENT NEW TREATIES AS PANAMA MOVES CLOSER TO SOVIET ORBIT?

HON. GENE SNYDER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. SNYDER. Mr. Speaker, it did not take long for the Torrijos regime in Panama to vindicate those of us who have opposed the new Panama Canal treaties because, among other grave factors, that regime has too often shown pro-Soviet and pro-Communist leanings.

Shortly after Persident Carter in ill-advised haste, and in my belief, contrary to the intent of the Senate, flew to Panama City to exchange instruments of ratification with dictator Omar Torrijos, the Panamanian Foreign Ministry declared the United States should get out of its strategic naval base at Guantanamo, Cuba.

Other aspects of the international Communist line were parrotted in a broad foreign policy statement issued by the Torrijos regime.

Mr. Speaker, I have warned, as have others, that as the United States withdrew from the Isthmus of Panama over the next two decades, the Soviet Union would move in.

There is continuing evidence this move has already set in.

The Torrijos regime's declaration in support of the Communist effort to drive the United States from all its overseas military bases, including those in the Canal Zone and Guantanamo, is but one notable item.

Mr. Speaker, today I wish to call to the attention of my colleagues an item from Moscow applauding Panama's increasing ties to the U.S.S.R. and its Socialist bloc of satelite states.

As a "news story" it was just about buried in seven lines in the Washington Post for August 9 on page C6 which reported an Associated Press dispatch:

PRAVDA SEES CLOSER TIES WITH PANAMA

Moscow (AP).—The communist daily newspaper Pravda praised Panama yesterday for taking steps to develop warmer relations with the Soviet Union and other communist countries.

Mr. Speaker, the Carter administration loudly proclaimed the new Panama Canal treaties were vital to the success of the foreign policy of the United States, not only in Latin America, but throughout the world.

The bankruptcy of that concept, in my belief, is demonstrated by the full text of the Moscow commentary on which the above-mentioned dispatch was based.

It shows that the new treaties in no way have strengthened the hand of the United States. Rather it shows new strength throughout Latin America by the ever aggressive Soviets.

Mr. Speaker, Pravda for August 8 carried a commentary by Yuliy Rusanov entitled, "Reliable Partners." The text of that commentary is as follows:

[Text] As has been reported in the country's press, the Panamanian Government intends to strengthen relations of friendship and cooperation with socialist states and to develop economic ties with them on a mutually advantageous basis. A socialist countries section has been created in Panama's Foreign Ministry for this purpose.

Panama's initiative is yet another indication of the changes taking place in Latin America, whose peoples do not want the United States to continue looking upon their countries as its private domain. The urge to establish and to broaden economic, scientific and technical and cultural cooperation with the socialist world is growing in a number of states in the region.

The public in many Latin American countries advocates mutual understanding, friendship and cooperation with the socialist world, is sure that this is essential for the establishment and development of the national economy and for strengthening political and economic independence.

It was led to this conclusion by all the previous experience of relations with the United States, other imperialist powers and the multinational monopolies. For their part, the peoples of Latin America have always been subjected to harsh diktat, oppression and exploitation in the pursuit of superprofits. The United States acts as patron in this region to such harsh dictatorships as, for example, that in Chile, since these regimes safeguard its imperialist interests here.

The socialist community states are building their relations with the developing countries on a profoundly democratic foundation, strictly adhering to the principles of complete equality and mutual benefit. Rigorous adherence to these principles has brought them well-earned trust as reliable partners.

Economic cooperation between the developing states of Latin America and the socialist community countries has already been enriched by considerable useful experience and has yieded concrete and positive results. The agreement on cooperation concluded between Mexico and CEMA is being successfully implemented. The recent visit to the USSR by Mexican President Jose Lopez Portillo, was a fruitful one. Despite the intrigues of reaction Soviet-Venezuelan economic ties are developing normally. Colombia is declaring its interest in cooperation with the Soviet Union and other socialist countries. Cooperation between the USSR and Argentina in the energy sphere is growing.

Cooperation between the USSR and the other socialist community states and the developing countries of Latin America fully accords with the interests of peace and progress.●

CATTERSON PUSHES KEMP-ROTH TAX REDUCTION ACT

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. LENT. Mr. Speaker, recently the U.S. Senate held hearings on the Kemp-Roth Tax Reduction Act. A most convincing and persuasive case in favor of the bill was made in a statement for the record submitted by an attendee at those hearings. Mr. James Catterson, Jr., of Suffolk County, N.Y., eloquently points up in his argument the need on Long Island for a general across-the-board tax cut such as Kemp-Roth would provide.

For the benefit of my colleagues to whose attention Mr. Catterson's statement might otherwise not come, I submit it herewith for the RECORD:

PORT JEFFERSON, N.Y.

Senator HARRY F. BYRD, Jr.,
Chairman, Subcommittee on Taxation and Debt Management of the Senate Finance Committee, 2227 Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR BYRD: Thank you for the opportunity to submit a statement for the record on the hearings conducted by the Subcommittee during consideration of the Kemp-Roth tax reduction proposals.

S. 1860 and H.R. 8333, applicable to taxpayers generally, provide for permanent tax rate reductions for individuals of approximately 30 percent over the next three years, for a permanent reduction in corporate income tax rates from 48 to 45 percent over the next three years, and for a permanent increase in the corporate surtax exemption from $50,000 to $100,000.

Nowhere in America is the need for the economic transfusion afforded by Kemp-Roth more dramatically underscored than on Long Island. Consisting of the suburban counties of Nassau and Suffolk, Long Island represents a major economic sector in New York State. Created by colonial patents some of which date from 1659, the twin counties awakened to a post-World War II baby boom and suburban migration explosion that saw their populations increase some 900 percent in twenty-five years.

But the insular nature of Long Island's geography also created strategic pressure points. Transportation developed around a single commuter railroad and three east-west arterials all of which terminated in the colossal sprawl of New York City. The transformation of thousands of acres of truck farm land into bedroom communities gave rise to an overnight need for community municipal services on a scale which gives planners king-sized migraines.

Real property tax rates soared and local manufacturers began an exodus to the sun belt. As the population explosion cooled and the construction boom tapered off, the long range effects of an insufficient industrial tax base, an over-taxed transportation system and an under-developed job oriented economy took its toll. The economy of Long Island became stagnant.

In a series entitled, "Long Island at the Crossroads", the prize winning daily paper Newsday explored in depth the major problems and potential solutions facing this prime cross-section of American society. Newsday pointed out that:

a. Between 1966 and 1975 the average property tax for Long Island increased 137 percent;

b. That if the present rate of increase continues, by the year 2000 Long Islanders will be spending twenty-one percent of their income for local taxes;

c. Auto insurance on Long Island is two times that of cities like Atlanta and property taxes at least two-thirds higher than the Georgia metropolis;

d. Thirty-three percent of the average Long Island family's income goes for taxes in one form or another;

e. Seventy-five percent of Long Island's high school seniors do not plan to settle on Long Island due to a lack of job opportunities and the high cost of living;

f. The out-migration of manufacturing firms has cost Long Island more than twelve thousand jobs since the mid-sixties;

g. Since 1969 twenty thousand defense jobs have also been lost; and

h. Last year, Nassau and Suffolk were unable to provide jobs for 290,000 persons, an increase from 271,000 in 1970.

Long Island needs an economic shot in the arm which the Kemp-Roth tax incentive bill is uniquely structured to provide. Thomas Conoscenti, native Long Islander, former director of economic research for the Long Island Association of Commerce and Industry and now a faculty member at Polytechnic Institute of New York has estimated that Kemp-Roth would generate an increase of 7.1 percent in personal income for the average Long Island wage earner by 1982. (See letter and table, attached.)

Kemp-Roth would also create 17,000 new jobs in Nassau-Suffolk with a resultant decrease in the unemployment rate from one and one half to two percent.

In raw dollars, Mr. Conoscenti calculated Kemp-Roth passage would pump 220.8 million dollars into Long Island's economy by 1982. The ripple effect of this infusion is pegged at about 552 million. The highly regarded economist further estimated that the Gross Long Island Product (G.L.I.P.) would be increased at the end of 1979 by 1.2 percent; by 1980 1.5 percent and increased again by 1.9 percent for 1981 and 1982, respectively. Assuming that the current rate of inflation and wage-prices would remain relatively stable the average Long Island per capita income could be expected to increase from $12,000 in 1979 to $14,100 by 1982.

Such an increase in 1979 dollars would be directly attributable to the Kemp-Roth stimulus and would work to offset the loss in tax revenues occasioned by the slow down in production and industrial growth during the last decade. Mr. Chairman, the obvious benefits of the Kemp-Roth income tax reduction package on the Long Island economy makes it the number one priority for New York's congressional contingent. History has proved that permanent tax reductions are a sure way to get the economy moving and to settle the inflation v. unemployment dilemma. It is axiomatic that people react to rewards for their efforts.

Unfortunately in America today when a worker earns wages, or a manufacturer increases production, or a salesman makes a sale, a greater share of these transactions are being eaten up by government.

When taxes go up, when cumbersome regulations are issued, and when subsidies are offered to individuals on the condition that they refrain from work, the government increases the "wedge" that makes work less attractive than leisure.

When you tax something there is going to be less of that thing in the future. When you subsidize something there is going to be more of it.

In this country, in this state and on Long Island, we are taxing work, investment, savings, growth and commerce in an unprecedented degree and we are subsidizing debt, welfare, nonwork and mediocrity.

America must construct a coalition for income growth that transcends the partisan and ideological divisions of the past. More and more, America needs and wants a return on its investment, a piece of the pie, a restoration of pride and incentive. The Kemp-Roth tax proposals which move toward tax reduction and income growth will do more than save Long Island. It will point the way toward an exciting, productive new era for the people of New York and all Americans. Mr. Chairman, the people of Long Island heartily endorse and strongly support Kemp-Roth.

Respectfully submitted,

JAMES M. CATTERSON, Jr., Esq.

ECONOMIC PROJECTS OF LONG ISLAND, INC.,
Nesconset, N.Y.

JAMES M. CATTERSON, Jr., Esq.,
Port Jefferson, N.Y.

DEAR MR. CATTERSON: As per your request, we have estimated the impact of the Kemp-Roth Bill on the Long Island economy.

Based on our calculations, we estimate that between 1979 and 1983 the Kemp-Roth Bill will stimulate the Long Island economy by increasing the Long Island Gross Regional Product by 1.7 per cent. This additional increase in the region's growth rate should create an additional 17,000 jobs in the region which will generate an additional 220.8 million dollars in wages and salaries. Based on the region's estimated multiplier, Income plus 1.5 (Income) we calculate that this will pump into the Long Island economy an additional $552.0 (M). (See Attached)

Should you require any additional information concerning the impact of the Kemp-Roth Bill on the Long Island economy, please feel free to contact me.

Very truly yours,

THOMAS CONOSCENTI,
President.

KEMP/ROTH IMPACT ON THE LONG ISLAND ECONOMY

[Income generation = y + Δ1.5 (220.8 + 331.2 = 552,000,000)]

	Without stimulus growth rate		With stimulus growth rate		Net stimulus impact on L.I. economy	Employment stimulus	Income generation (millions)
	GNP	GLIP[1]	GNP	GLIP[1]			
1979	2.4	1.0	2.8	1.2	0.2	2,000	24.0
1980	2.5	.7	3.4	1.5	.8	8,000	101.6
1981	3.4	1.4	4.4	1.9	.5	5,000	67.0
1982	3.9	1.7	4.4	1.9	.2	2,000	28.2
1983	3.7	1.5	3.6	1.5	0	0	
1984	3.9	1.6	3.4	1.4	0	0

Total						17,000	220.8

[1] Gross Long Island product.

Note: Wages assumed to increases by 1980/79 5.8, 5.5, 5.2 to 1983 over base of 12,000. Employment/GLIP ratio [0.1 to 1,000].●

STATEMENT OF HON. JOHN M. MURPHY, CHAIRMAN OF THE MERCHANT MARINE AND FISHERIES COMMITTEE ON THE FLOOR OF THE HOUSE, IN REGARD TO H.R. 13268

HON. JOHN M. MURPHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. MURPHY of New York. Mr. Speaker, I introduced H.R. 13268 on June 30, 1978. It is a sample bill that authorizes the appointment of Col. Lloyd Leslie Burke, U.S. Army (retired) to the grade of brigadier general on the retired list of the Army. The measure provides no increase in basic pay, retired pay, allowance, or other benefit not now accruing to Colonel Burke after 34 years of the most dedicated kind of service to his Nation.

He did not seek this promotion, nor was he aware that I was to introduce it on his behalf. It is not in his character to seek self-aggrandizement. I was moved personally to introduce this measure out of respect for one of America's genuine heroes—a selfless man who has given the best he had in him during more than three decades of public service. But I was not alone in sharing these feelings, more than 80 of my colleagues have written me and would be listed here today as cosponsors but for a ruling by the Parliamentarian that the measure is a private bill and as such could not be cosponsored. I have listed them earlier in the RECORD.

It all began some 34 years ago when Colonel Burke, who retired on June 30, 1978, stepped out of the crowd at Stuttgart, Ark., and into the recruiting office in 1943 to volunteer his services on behalf of his country. Since that time his exploits have been legendary. And more, he has always had the respect of both his officers and his men.

There probably is no former private currently on active duty as a full colonel who has been awarded more decorations for valor. These decorations as a combat soldier in three wars include: the Congressional Medal of Honor, Distinguished Service Cross, Silver Star, two Bronze Stars for valor, four purple Hearts, two Combat Infantry Badges, and sundry other commendations and citations.

This is an exemplary record of a citizen soldier turned professional. As such, it serves as a lasting standard for present and future volunteers, not only for the Army, but for all of our defense branches.

My proposal is not new or novel in any way, and the precedent for such legislation was set many years ago. On June 21, 1930, Congress approved similar legislation which provided for the promotion of Peyton C. March and Parker H. Bliss to the rank of general in the Regular Army on the retired list. This act gave wartime rank, "* * * without increased pay or allowances to officers and former officers of the U.S. Army upon retirement from active service." There have been a number of other such precedents, most recently the belated promotion of George Washington to the rank of General of the Army. A similar promotion was conferred on Adm. Hyman Rickover by an act of Congress, November 16, 1973, and in the 2d session of the 89th Congress in similar legislation, the Senate recommended the promotion of Maj. Gen. Robert Wesley Colglazier, Jr., to the grade of lieutenant general, Report No. 1598.

For the past 10 years, Colonel Burke has been an Army liaison officer to the U.S. House of Representatives. This assignment, rounding out 35 years' military service, has been carried out in his typically excellent way. Colonel Burke voluntarily remained in this important assignment beyond the normal expectation, where his exceptional ability to represent the Army was of crucial importance during a difficult period. By voluntarily remaining in this position, Colonel Burke relinquished the opportunity for rotation into command assignments within the Army, which would have provided greater opportunity for further promotion as an active duty officer. H.R. 13268, therefore, is intended to provide unique recognition for a unique career.

The measure has been considered carefully by the House Armed Services Committee which reported it unanimously on August 2, 1978. The Congressional Budget Office has considered the measure carefully and found that it will cost the Government nothing. The fact is, there has been no objection registered to H.R. 13268.

I believe approving this promotion is an honor which a grateful America can well afford to confer on that rare breed of man whose character and courage are the bricks and mortar that have made this Nation a bastion of freedom. It would be an honorable and civilized way for a grateful Nation to say, "thank you."

I believe it would be an appropriate recognition for a soldier who has dedicated a lifetime of selfless service to a Nation when his help was needed most, and a fitting reminder to our youth that their efforts on behalf of this Nation will not go unrecognized.●

TIGER CAGES IN USE AGAIN

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. McDONALD. Mr. Speaker, we can all recall the carefully staged press conferences arranged by the anti-Vietnam claque and certain members of the press corps to dramatize the "sudden" discovery of the "tiger cages" at Con Son. The carefully orchestrated howls of outrage lasted for weeks. Now of course, the "tiger cages" are again in use—this time by the Communist government of Vietnam. Where are the howls of outrage? Where are the ringing denunciations by our so-called objective press? Don't hold your breath folks. However, just for the record, I am including the story from the London Daily Telegraph of August 9, 1978, for the edification of those of us who never seem to learn. The news item follows:

[From the London Daily Telegraph, Aug. 9, 1978]

TIGER CAGES IN USE AGAIN

(By Ian Ward)

The infamous "tiger cages" on the Vietnamese prison island of Con Son are back in business again restored to their role of housing hardcore political detainees by the same Hanoi authorities who led the worldwide propaganda effort to have them abolished seven years ago.

Vietnam's Communist leaders are believed to have restored the "tiger cages"— to full-time prison cells within the past 12 months.

Western sources who have just returned from the Vietnam-China border regions said that they spoke to an ethnic Chinese refugee from Vietnam who had been held prisoner on Con Son island and had fled the country soon after his release.

The refugee, a former academic from Saigon University, said that the "tiger cages" were now crammed with prisoners in conditions infinitely worse than had ever existed there during the anti-Communist regime of former President Nguyen van Thieu.

SUCCESSFUL PROPAGANDA

The Con Son "tiger cages" became one of the most successful propaganda exercises ever conducted by Hanoi's psychological warfare department.

The story was first written by American

Left-wing journalist, Don Luce, and quickly became a rallying point in the early part of this decade for the anti-Vietnam war movement in the United States.

For several months the Western Press hammered the alleged horrors of the "tiger cages" in the island.

Night after night Hanoi Radio beamed propaganda broadcasts to the English-speaking world running excerpts from the American Press reports.

Libera and Leif-Wing elements alike, fed with further information from North Vietnamese front operations based in Paris, worked up the issue until Washington finally applied heavy political pressure on President Thieu, forcing him to abandon the "tiger cages" in favour of rows of pre-fabricated cells constructed within the same general compound.

IRONY OF STORY

One of the real ironies of the "tiger cage" story was that the cells themselves, built by the former French colonial authorities, were portrayed as particularly horrifying because they were underground.

Only their ceilings, which consisted in part of thick steel bars, were above ground and the Communist-inspired news accounts made much of how prisoners were fed through the bars like caged tigers.

But immediately the South Vietnamese prisoners were removed from the underground cells to the ground-level prefabricated replacements, government officials and their families took up residence in the "tiger cages."

Because of their underground position the cages happened to be among the coolest spots on the steamy tropical island.

According to refugees recently arrived in China from Vietnam the present prisoner list on Con Son island consists mainly of intellectuals and former members of the professional class in what was South Vietnam.

The Chinese authorities have also learned from the refugees that the prisons throughout the southern region of Vietnam, about 1,000 political prisoners, are now jammed with more than twice that number.

And it would seem that the reality of the extraordinarily successful Vietnamese "political prisoners" propaganda line—so strongly supported by Peking at the time—is finally making its mark with the Chinese authorities.●

ADDITIONAL THOUGHTS ON FINANCIAL DISCLOSURE

HON. STEPHEN L. NEAL

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. NEAL. Mr. Speaker, in May of this year I entered into the CONGRESSIONAL RECORD the Federal income tax returns for my wife and me for 1977 and a full financial disclosure for me, my wife, and our children for 1977. At this time, I would like to amend and elaborate on the financial disclosure.

Reexamination of the records from which the disclosure statement was compiled reveals two oversights which I have reported to the Clerk of the House as an amendment to my original statement, and which I am now reporting here to make the statement in the RECORD complete. The two items are (1) an asset of $11,035.77 which I have invested in the retirement system, and (2) a liability of $21,226.16, a procedural loan from the small businesses which I previously operated.

Mr. Speaker, going over these records again makes me doubly aware that this financial reporting is a nuisance and an invasion of privacy. It has taken much of my personal time and caused me a good deal of irritation. But, also, I have come to the conclusion that it is very necessary and I hope that when we consider the ethics legislation, we will make a full disclosure requirement a part of the law.

Mr. Speaker, this is a time of great distrust of public officials at all levels, and in a very real way, our country runs on confidence. Almost as important as solving the problems of inflation, energy, trade deficits, and so forth, is the problem of trying to restore confidence. I can think of no better way of starting than by conducting all of the Nation's business in the full light of day, making our voting records public, and requiring complete disclosure of the tax returns and personal financial statements of people in public life, as well as those of their immediate families.

On another level, it is important for the constituents of one in public life to know where and how a person gets his or her money; how he or she has accumulated assets; and why and to whom he or she owes money. This information tells us much about the person concerned, for all our thinking is bound to be molded and colored by previous experience. Nowadays, that's known as "where we're coming from."

In my own case, I have spent most of my adult life in small business. I know that has influenced my attitude, my view of the world, and of my place in it. Certainly, it influences my voting on fiscal matters. In small business, we struggled for years meeting a payroll. We had to make the business pay its own way. We could not run constantly in debt. We learned the value of saving; of getting the cooperation of people; of working together to get the job done. We learned by and through our own experience that life is not easy for small business people, or for small farmers, or for people who work for modest salaries or wages. Everyday life can become a constant struggle. Faced with economic forces beyond our control—such as apparently unmanageable inflation—each day can be filled with uncertainty for the worker, the small farmer, the small businessman. We get the helpless feeling that we would not be able to meet the payroll, or pay the mortgage, or pay medical costs, or educate our children. We also learn that we cannot waste and expect to escape any of these financial horrors.

Again, Mr. Speaker, I admit that my experience influences my thinking. It is part of me and I could not, even if I wished, escape from it. I came here out of a world of small business, where one must work hard and conserve at the same time. The small farmers and the working people are, in this respect, the same as small business people. They have to apply these principles of hard work and good management to their farms, their homes, and their lives. They cannot afford to waste, or to spend more than they have, and they do not want to see the Federal Government waste or spend more than it has.

Mr. Speaker, a person's background greatly influences his or her present attitudes and behavior and full financial disclosure is a very important way of knowing about a person's background. When we consider making our ethics rules a part of the law, I hope we will include a full disclosure requirement. I believe it will help the public make better decisions about those they elect to represent their views and will go a long way toward restoring confidence in this great system of constitutional democracy.●

DESCRIPTIONS OF LIFE IN CAMBODIA

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, I would like to have the following accounts of life in Cambodia placed in the RECORD:

[Interview with Cambodian refugee in Surin, Thailand conducted by American Embassy officer in June 1978]

ACCOUNT OF KHUT PHAY*

Khut Phay, 43, was from Romiet, Siem Reap. In February, 1978. He was ordered to move to Cheung Tien. He fled to Thailand June 6 and arrived June 14, 1978. His account follows:

Conditions of Living in Democatic Kampuchea. "We had rice gruel to eat, but the ration was very small. We usually received only one bowl of gruel each day. About once a month, we received two bowls.

"We had only herb medicines in the village which did not help people who were sick."

System of Administration and Punishment. "Our village was run by civilian administrators. There were no soldiers or spies (chhlop) we knew about. We could not complain or suggest anything. We could only work. If we became sick and they did not believe you, then you were executed. I knew a fellow with penumonia. They didn't believe him and he was 'taken away.'

"My son, Say, 22, was assigned to collect human excrement. After collecting the excrement, he mixed it with water buffalo dung and water hyacinth to make fertilizer.

"In March 1978, I asked the collective chief to let Say marry Mon, a girl in our village whom Say had known for many years. Mon was 24 and very pretty. Her parents also asked permission for them to marry. The collective chief said 'no', and warned them not to get together again. It was after this happened that Say was assigned to collect excrement, in an area away from Mon.

"The young do not like the new regime. Nobody likes it."

Executions. "I knew of a dozen people who were executed on three different occasions. I don't know why. I also know of a huge graveyard in the village of Phum Ta Ngel near O Chik in Siem Reap Province. There is a hole there twenty meters square and eight meters deep. The families of former solders, officials and teachers were killed and thrown into the pit. People are not allowed near the place, but refugees, including myself, have seen it."

Human, Civil and Political Rights. "The Khmer Rouge had some rights but the peo-

*(Refugee agreed to use of his name in public document.)

ple had no rights. The Khmer Rouge had the right to kill the people. We had no freedom of movement and had to stay in the same place."

ANGKOR REVISITED

[Airgram report by an Officer of the American Embassy at Bangkok, March 3, 1976]

SUMMARY

After Siem Reap fell to the communists and persons associated with the government were executed, along with their families, the remaining people were sent to work at Angkor, which was in fairly good condition. In early May, Siem Reap was completely evacuated.

INTRODUCTION

Radio Phnom Penh has announced that Cambodian Deputy Prime Minister Ieng Sary has escorted a group of diplomats to Siem Reap for the purpose of viewing the damage caused by the alleged U.S. bombings. The diplomats were to travel to Angkor Wat to visit the celebrated ruins on March 1. This first (at least publicly announced) visit by foreigners since well before the fall of Cambodia will hopefully produce some interesting photographs and commentary on the condition of the ruins by some of the participants in the guided tour. By way of comparison, the following observations of the area last year on the part of a refugee who arrived in Thailand in mid-January are of interest.

SIEM REAP

The source was a schoolteacher, a native of the city of Siem Reap. On April 17–18, he watched the Khmer Communists empty the hospital of all its patients. On April 18, the KC forced all known GKR military and civilian employees and their families to leave the town. There were sufficient sightings of the bodies of these people later to conclude that all were executed. This included the head of the fourth military region, General Em San; his legs were cut off at the knees on April 20, and he was left to bleed to death. (We have heard a different report that he was executed by crucifixion to the east of Siem Reap.)

ANGKOR

Those remaining in Siem Reap after April 18 included teachers, health personnel, and Chinese residents. They were all made to go daily to the Angkor area to repair the roads, across all of which the KC had dug trenches during the war for security reasons. While working there, the teacher noticed several things. First, the ruins were essentially in good condition. Only part of the right side of the main monument of Angkor Wat (looking at it from the western causeway) had been damaged, as had some of the wall around the monument. This the KC blamed on military action taken by the Lon Nol side. Second, the KC had erected a war memorial at Angkor Wat, at the top of which was a sign in red with the names of communist soldiers, their dates of birth, and the location where they were killed, indicated. He said there was also a burial ground there. Finally, the teacher was dismayed to find that all statues of Buddha in the Angkor area were either headless or destroyed, reportedly the result of KC soldiers searching for jewels inside them. Gold Buddhas had been removed.

On April 23, the population of Siem Reap was required to turn out for a communist victory celebration at Angkor Wat. Banners were erected, one large one reading "Long Live Marxist-Leninist Thought" and another "Long Live Communist Cambodia". Flying above Angkor Wat's central tower was a large red flag with a hammer and sickle in the upper left-hand corner. Red flags also flew over the other four main towers. With people crowded on the western causeway, the main figure of attention was apparently Chey Sombat, of whom it was said that he had led the KC capture of Siem Reap and Oddar meanchey provinces. (Although he has reportedly undergone a name change, Chey Sombat is said to have remained on the scene as military chief of the sector encompassing Siem Reap province.)

In early May all the residents of Siem Reap were moved out into the countryside to work in the ricefields, according to our source, leaving the town largely empty.●

TAX REVOLT AND PERSONAL LIBERTY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. McDONALD. Mr. Speaker, Governor Meldrim Thomson of New Hampshire made a very eloquent speech on August 2, 1978, before the annual sales meeting of the West Publishing Co. in St. Paul, Minn. In this speech he outlined the history of tax revolt in the United States and how tax revolt is as American as "apple pie" and certainly did not begin in California with proposition 13. He further points out why and how this present tax revolt has come about. I commend his speech to the attention of my colleagues:

TAX REVOLT AND PERSONAL LIBERTY

(By Governor Meldrim Thomson, Jr.) [1]

Tax revolt in America did not begin in California with Proposition 13.

Protest, revolt and ultimately revolution against oppressive taxation actualy began in New Hampshire more than two hundred years ago.

On January 9, 1766, nine years before our national Declaration of Independence, the Liberty Boys of Portsmouth, New Hampshire flew a flag from their liberty pole protesting the iniquitous Stamp Act of 1765. This was the first such protest made in the colonies.

The stamp tax was resorted to by Great Britain to raise the large revenues required to protect the colonies against the Indians and French.

The oppressiveness of the tax was felt with excruciating pain by the colonists as a result of the suddenness of its imposition.

Imagine what would happen to the legal profession today if abruptly a tax equivalent to the value of two pounds was levied on every "skin or piece of velum or parchment, or sheet or piece of paper" on which was engrossed the certificate of any degree taken in any university, academy or college of learning!

Or suppose tomorrow every lawyer receiving his certificate of admission had to pay a tax equal to ten pounds.

What indeed would be the reaction in West Publishing Company, or any other printer of books, if the next news from Washington advised that for every sheet in every pamphlet, book or newspaper a tax of one shilling must be paid?

A quick calculation of a popular pocket supplement suggests that the stamp tax, if applied to it, would cost a modern publisher about $1 million for the tax alone!

I suspect that consternation and revolt would quickly become the order of the day.

The stamp tax pervaded every aspect of colonial life—foodstuffs, lumber, legal papers, advertisements, spiritous liquors, cards, dice, and host of other articles in daily use.

Small wonder protest spread across the colonies like wildfire.

While New Hampshire people were protesting in Portsmouth and other parts of our colony, and Sam and John Adams began their surreptitious work in Massachusetts against the foreign tyrant, Patrick Henry rose in righteous indignation in the Virginia House of Burgess to proclaim that he knew not what course others might take but that as for him he wanted liberty or death.

However, as repressive as the stamp tax was on the lives of the colonists, it could never compare with the weight of oppressive taxation which Americans meekly bear today.

Every year the productive workers of our nation labor from January through March for the federal government. Then they dutifully work from March through most of May for their state and local governments.

Forty-four cents of every dollar earned today goes for taxes.

But worse still, the very excessive escalation of the costs of government in recent years has sapped the dollar of its value. For example, a 1967 dollar was worth only 52 cents as of May of this year.

Back in 1789 when our federal government came into being the total national budget for our four million people was $630,000. This amounted to a levy of about 23 cents per capita.

Today the annual per capita cost of the federal government is more than $2,500!

From 1789 to 1929 the total of all of the costs of the federal government—including all the wars we fought, all the ships we built, all the services rendered, all the labor expended to conquer and develop a continent—amounted to approximately $100 billion.

Then, just 33 years later, in 1962, the Congress adopted our first annual budget of $100 billion. Nine years later the annual budget rose to $200 billion. Four years later it climbed to $300 billion. And now, four years later we are putting together our first $500 billion budget plus.

By gradation we have allowed ourselves to be taxed far beyond the worst tax nightmares of our Founding Fathers.

The significance of the adoption of Proposition 13 in California is that it jolts the consciousness of the American taxpayer to a realization of the heavy tax burden he bears and arouses a hope that he might do something about it.

Proposition 13 itself is bitter medicine in that it severely cuts back on the amount of taxes to be raised on real estate. It will inevitably mean a shifting of tax burdens. Once the current $5 billion surplus is exhausted, new taxes will sprout in California as freely as weeds in a garden.

Instead of the drastic action of Proposition 13, what is needed at all levels of government, is a severe curb on the escalating costs of government.

The quickest, surest way to restore confidence in our faltering dollar would be to balance our national budget, curb the expansion of the federal bureaucracy, and get the tax collectors sticky fingers out of the pockets of our producers.

New Hampshire, the third oldest English settlement in America, was first in many ways in its contributions to the American system of government.

Our people were the first to strike a blow for freedom when on December 14th, 1774 we captured Fort William and Mary and captured powder, muskets and cannon that were used the next summer at the Battle of Bunker Hill.

Sixty percent of those who fought at Bunker Hill were New Hampshire men.

It was New Hampshire men under our illustrious and highly independent John Stark, who three years later won the Battle of Ben-

---

Footnote at end of article.

nington, recognized by historians as the successful turning-point of the Revolutionary War.

On January 5, 1776 New Hampshire wrote the first Constitution of the western hemisphere and two weeks before the national Declaration of Independence we impatiently declared our independence from the Mother Country.

When we rewrote our Constitution in 1784, now the second oldest in continuous operation, we included several interesting provisions in our Bill of Rights, among these is an admonition that advises our citizens that "a frequent recurrance to the fundamental principles of the Constitution, and a constant adherence to justice, moderation, temperance, industry and frugality and all the social virtues, are indispensable necessary to preserve the blessings of liberty and good government.'

Through the years our people have practiced industry and frugality. These great virtues are reflected in the way we operate state government.

By our Constitution we prohibit a graduated income tax. We are the only state in the nation with neither a sales nor income tax!

I believe our government to be the most democratic of any in America.

The governor is elected once every two years.

Our legislature, consisting of 24 Senators and 400 Representatives, is the third largest in the English speaking world. One legislator represents less than two thousand people. Under our Constitution we pay our legislators the lowest salary of any state—$200 a biennium.

Small wonder our lawmakers ruefully say that with their income it is clear why our state motto is "Live Free or Die."

In New Hampshire we have not strayed far from our founding roots.

We have the lowest state tax in the nation at $235 per capita.

Our state and local tax, which includes real estate, is the lowest in New England at $571. In Massachusetts, fondly referred to by some as Taxachusetts, the state and local tax amounts to $902.

We are the only New England state with a Triple A bond rating.

Also, we are the only state in New England with a surplus in our employment security fund. This means we have not had to borrow from the federal government a half billion dollars as has Connecticut, or a quarter of a billion, as has Massachusetts, to pay off unemployment benefits. All of this must some day be paid off by the employers of the borrowing states: Unless, of course, a fiscally slipshod administration is prepared to forgive more than $5 billion in unemployment indebtedness owed by 23 states.

Our favorable tax climate, fostered by such advantages as no general sales or income tax, no inventory or stock-in-trade tax, and no corporate tax as such, but only a flat tax of 8 percent on business profits, has been very attractive to new businesses.

Also, the work ethic of our people who believe in giving a good day's work for a good day's pay, and the favorable attitude of our administration toward the free enterprise system have all helped to attract more than 250 new businesses to New Hampshire and 20,000 new jobs in the past five years.

In my fight to keep state government off the back of our business community I have vetoed 105 bills in five and a half years and had most of them sustained. And that is more vetoes than were made by all of my predecessors in the last one hundred years.

New Hampshire was correctly referred to several months ago by *Newsweek* as a "Standout State in a Hard Luck Area."

During my almost six years as Governor we have completed every fiscal year with a surplus, which is no easy task with a legislature that likes to spend everything in sight—and more besides!

As of May our unemployment was 2.7 percent—the lowest in New England, and one of the lowest, if not the lowest, in the nation.

Our Constitution, adopted four years prior to the Federal Constitution and eight years before the tenth amendment guaranteeing State sovereignty, contains a provision proclaiming that we are a free, sovereign and independent people except for such powers as we have expressly delegated to the Congress. We believe that those delegated powers are precious few, indeed!

That is why I am constantly at war with the Federal Government.

When we were asked to take a census of our State employees and show their ethnic and racial background by merely eyeballing them I told the feds to scram. I instructed our personnel director to write in the word "American" to describe our employees.

And when the Coast Guard told me they were taking over our rivers and lakes, I replied "not without a fight." After a successful statewide petition drive in protest and favorable support in the Congress, the Coast Guard struck its colors and fled.

More recently when I tried to fly our flags at half mast on Good Friday that great un-American Civil Liberties Union, which as far as I know has never once defended a patriotic institution or cause, took me to court. We lost on a procedural technicality and are now taking the case to the Supreme Court on its merits.

If this nation is to remain strong and a government of the people, it is essential that the concept of dual sovereignty, as devised by the drafters of the federal Constitution and as described by James Madison in the 45th Federalist Paper, be preserved. The powers over the lives, property and liberty of the people that have been ruthlessly usurped by the federal government, must be returned to the people in their respective states.

We have a saying in our state that, "New Hampshire is What American was." We say that not in disrespect of our sister states but because we believe we have held firm to the basic concepts of liberty and the free enterprise system that made this nation great.

We listen to and try to follow the words of the prophet in the book of Proverbs, "Remove not the ancient landmark which thy Fathers have set."

However, we know well the truth of our distinguished son, Daniel Webster, that ours is a union indivisible.

We are a part of the whole, and though we have been frugal and industrious in our ways, we realize that our fortunes and our future are woven inextricably into the warp and woof of the national fabric.

What we see occurring on the national scene leaves us distraught and sad of heart.

This nation cannot long survive half capitalistic and half socialistic. No man, company or state can live forever on credit. The road of the prodigal borrower leads only to bankruptcy.

The great strength of our nation has been our ability to produce a flood tide of products in the free enterprise system.

Although we have only 5 percent of the world's population, we produce 28 percent of the world's goods.

In agriculture, for example, in the last 38 years the number of American farms and workers has been reduced by two-thirds while during the same period farm output has increased by three-fourths.

When our farmers finish feeding Americans they export 60 percent of their wheat and rice and 50 percent of their soybeans.

In a recent excellent book by former Secretary of the Treasury entitled, "A Time for Truth," Bill Simon points out that—

"America was born a capitalist nation, was created a capitalist nation by the intent of its founders and the Constitution, and developed a culture and a civilization that was capitalist to the core."

Three books were mainstays of early American culture—the Bible, Blackstone's Commentaries on the Common Law, and The Wealth of Nations by Adam Smith.

One fortified and shored up the morality of the new nation; one provided the foundation for our legal system; and one provided the guidelines and inspiration for our free enterprise system.

For almost two hundred years we curbed the state and gave the American citizen virtual free reign to travel the highroad of ambition as far as his imagination and industry would take him. During most of that time we believed that governments, like men, had to operate within their income.

Then came a generation ago, the preachers of new liberalism, the practitioners of the new welfare state, the new deal and new society politicians who boasted they would tax and tax, spend and spend and elect and elect.

Gradually, while you and I have been busy trying to make a living and responding wearily to ever growing tax burdens, we have seen public debt rise to ubiquitous heights and bureaucracy expand until now one in six employed persons in America is on the public payroll.

A socialistic society has gradually replaced our once robust free enterprise system. And thus we have allowed the competitive profit system that makes men stretch for the unreachable goals to be diluted and its very existence threatened.

In the last 50 years we have balanced our national budget only eight times.

In 1955 the total public debt for all levels of government was $318 billion. Twenty years later it was $754 billion. Included in that figure is the indebtedness of local governments which rose from $33 billion to $149 billion.

Such irresponsible spending has drained the sources of available long-term capital funds so that today all levels consume 80 percent of such capital.

The same warning that Winston Churchill gave his countrymen almost 35 years ago about the spread of socialism in Great Britain is, I believe, poignantly applicable to us. This great conservative said:

"I am sure that this policy of equalizing misery and organizing scarcity instead of allowing diligence, self-interest and ingenuity to produce abundance has only to be prolonged to kill this British island stone dead."

When Abraham Lincoln was a young man of 28 he addressed the young men's Lyceum Club of Springfield on the subject of America's future.

He said, "all the armies of Europe, Asia and Africa with all of the wealth of the world in their treasury (our own excepted) and with a Bonaparte as a commander, could not take a drink from the Ohio or make a track on the Blueridge in a trial of a thousand years.

"If destruction be our lot then we ourselves must be its author and finisher. As freemen we must live through all time or die by suicide."

Personal liberty and economic freedom are inseparable twins. Destroy one and the other will fall.

If we are not to commit economic suicide and thereby totally destroy our personal liberties, then we must make here and now whatever resolves and sacrifices that may be necessary to restore the American free enterprise system to its once healthy and productive state.

Let us in the coming fall contests elect only those to our state and national legislatures who will fight taxes, balance budgets and dismantle the great and useless hordes of officeholders, who like the bureaucrats of the days of King George III, spend their waking hours eating out the substance of our people.

Only by such strong action can the American business community save itself and thus the great nation that gave it birth and substance.

HOW CAPTIVE NATIONS WEEK WAS OBSERVED HERE AND OVERSEAS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. DERWINSKI. Mr. Speaker, the 20th observance of Captive Nations Week was commemorated by rallies, church events, and other activities across our country and abroad. One of the chief sources of vexation to the occupants of the Kremlin is the constant reminder that the annual Captive Nations Week illustrates the long series of Soviet Russian conquests and aggression from 1920 to the present. One of the main techniques employed by the Russians is to induce a loss of memory on the part of its targeted subjects as to the victimization of nations and peoples under the heel of Soviet Russian imperialism in yesteryears. Unfortunate for them, the annual Captive Nations Week will not let them off the string.

In a wholesome bipartisan undertaking, I wish to insert several examples of how Captive Nations Week was observed here and overseas. The following are illustrations of the spirit and intent of Public Law 86-90: First, proclamations by Gov. James R. Thompson of Illinois; Gov. Michael S. Dukakis of Massachusetts; and Gov. Robert F. Bennett of Kansas; second, a letter which appeared in the July 7, Brattleboro, Vt., Reformer; third, a report on the week in the Free China Weekly of July 23; and fourth, a letter by Lee Edwards in the Washington Post of August 6.

STATE OF ILLINOIS EXECUTIVE DEPARTMENT

PROCLAMATION

Americans enjoy the freedoms that peoples in captive nations do not know. The rights we take for granted are fought for every day by those who do not rule themselves.

Each year, the third week in July is set aside for commemoration of captive nations. Here in Illinois, the Captive Nations Observance in Chicago is July 14-15, highlighed by a National and Human Rights Rally.

In the hope that all peoples throughout the world may find their freedom, I, James R. Thompson, Governor of the State of Illinois, proclaim July 16-22, 1978, Captive Nations Week in Illinois.

In witness whereof, I have hereunto set my hand and caused the Great Seal of the State of Illinois to be affixed.

Done at the Capitol in the City of Springfield, this FIFTH day of JULY, in the Year of Our Lord one thousand nine hundred and SEVENTY-EIGHT, and of the State of Illinois the one hundred and SIXTIETH

JAMES R. THOMPSON,
Governor.

THE COMMONWEALTH OF MASSACHUSETTS
A PROCLAMATION, 1978

Whereas: The week of July 16–22, 1978, is observed nationally as "Captive Nations Week" in accordance with Public Law 86–90; and

Whereas: This year marks the 20th anniversary of the Captive Nations Resolution, which was enacted by U.S. Congress on July 17, 1959; and

Whereas: The captive nations of Central—Eastern Europe—Armenia, Byelorussia, Estonia, Georgia, Latvia, Lithuania, Ukraine, and others—constitute the Achilles' heel in the Russian communist empire; and

Whereas: Hundreds of Ukrainian, Lithuanian, Latvian, Armenian, Georgian and other dissidents and human rights activists are held in Communist Russian jails and concentration camps for demanding the implementation of the U.N. Universal Declaration of Human Rights and the Helsinki Accords for their respective peoples; and

Whereas: The 1978 "Captive Nations Week" serves as an appropriate forum to manifest public support for the restoration of national independence of captive nations;

Now, therefore, I Michael S. Dukakis, Governor of the Commonwealth of Massachusetts, do hereby proclaim the week of July 16–22, 1978, as Captive Nations Week, and urge all citizens of the Commonwealth to take cognizance of this event and to participate fittingly in its observance.

Given at the Executive Chamber in Boston, this twenty-first day of June, in the year of our Lord, one thousand nine hundred and seventy-eight, and of the Independence of the United States of America, the two hundred and second.

MICHAEL S. DUKAKIS,
Governor.

EXECUTIVE DEPARTMENT, STATE OF KANSAS

PROCLAMATION

By the Governor, to the people of Kansas, greetings:

Whereas, the imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czecho-Slovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Serbia, Croatia, Slovenia, Tibet, Cossackia, Turkestan, North Vietnam, Cuba, Cambodia, South Vietnam, Laos and others; and

Whereas, the desire for liberty and independence by the overwhelming majority of peoples in these conquered nation constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas, the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas, the Congress of the United States by unanimous vote passed Public Law 86–90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of the captive nations:

Now, therefore, I, Robert F. Bennett, Governor of the State of Kansas, do hereby proclaim the week of July 16–22, 1978, as Captive Nations Week in the State of Kansas, and call upon our citizens to join with others in observing this week by offering prayers and dedicating their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

Done at the Capitol in Topeka under the Great Seal of the State this 18th day of July, A.D., 1978.

ROBERT F. BENNETT,
Governor.

[From the Brattleboro (Vt.) Reformer, July 7, 1978]

OBSERVING CAPTIVE NATIONS WEEK IN THE AREA

(Editor of The Reformer)

Once again in the second part of July we will observe "Captive Nations Week." Captive Nations Week became a part of American history, and there is no hope in sight, that the captive countries will be free again. There is a saying, what the communists have they never give up.

This should be a remainder to the people of the United States. From coast to coast in the United States, refugees from the enslaved countries, their American friends, and also many American leaders bring freedom to the foreground by observing Captive Nations Week. Their pleas will reach the hearts of many freedom loving Americans and tell them about the misery people have to endure under communism. We are here to remind every American and people of the Free World about the enslaved brothers by the communist regime and communist tyranny.

Once again, we are appealing to all Americans, to young and old, men and women, girls and boys, red, yellow, white and black, to high school or college students, to all Americans of different origin, clergy, to everyone who desires to live in freedom with liberty, justice and peace, join me to save the United States from the Red tyranny of communism.

In this Captive Nations Week observance, we are asking you to pray for those who have lost their lives in communist labor camps and prisons. To pray for many families who live behind the Iron Curtain, and who are persecuted by the Communist Regimes. To pray for those who are longing to be free. Pray to keep our country free and that freedom may come soon to all captive nations.

Remember freedom is the greatest gift and blessing for all kind and today we are demanding freedom for the captive nations. Look at the map of the world. In the last 10 years you will notice that the communists have gained countries, territory and people! I think it is a right time for you my friends to examine this before it will be too late!

God Bless America, God be with our brothers behind the Iron Curtain. Help us destroy the communist influence and protect our beloved country that it may never fall prey to communist tyranny. This year the "Captive Nations Week" observance for the States of Vermont and New Hampshire will be held on Sunday, July 16, 1978, at the "Captive Nations Memorial" in Epsom, N.H.

[From the Free China Weekly, Taipei, Taiwan, July 23, 1978]

FREEDOM SEEKERS REVEAL MISERY OF MAINLAND LIFE

"Ordinary people on the mainland have to use the same towel for eight years," said Chow Kang-han, a freedom seeker, when he condemned the totalitarian rule of the Communists at a rally July 19 to mark the 1978 Captive Nations Week.

Chow told the participants, including U.S. Representative John Ashbrook; Bertrand Motte, chairman of the National Center of Independents and Farmers of France; George Creppy, president of the Administrative Chamber and vice president of the Supreme Court of Ivory Coast; and some 200 freedom fighters that 85 per cent of the farmers on the mainland oppose Communist rule.

He said the freedom seekers flee the mainland not only to escape hardship, but also to tell the world the truth about what is going on there.

Tai Yen-shih, another freedom seeker,

noted that the living standards on the mainland have not improved in the last 20 years He pointed out, however, that the number of people killed by the Communists increased from 30 million to 80 million and the escapees totaled over 30 million.

During the rally, the freedom fighters also resolved to send cables to U.S. President Carter, the U.S. Congress and drew up a declaration as follows:

"We have come from all sectors throughout the Chinese mainland but have one thing in common; we all possess tear and blood-stained records of our bitter opposition to tyranny.

"Countless people on the Chinese mainland had fallen before our rise. All they had as they faced the tyrants' guns was their mortal flesh, but they wrote epics with blood and used their bodies to pave the way to freedom. Many such forerunners died young.

"Our choice was to remain in servitude or rise to resist. As we decided to be brave, we grew taller and taller. We started walking over the blood of our comrades. The price could be life itself, but there was not retreat once we began fighting Communist tyranny.

"People who have all along lived in free areas do not know how painful it is to be without freedom and dignity.

"We hope that all the conscientious individuals of the world will see that even slaves with no private possessions behind the Iron Curtain can dream about a beautiful tomorrow. How can those living in freedom and dignity feel so hopeless about the future? What we shall be depends on what we ourselves do. We cannot let a handful of politicians arbitrarily decide our fate.

"Let us all be brave fighters against Communism and tyranny. The future then will be ours."

[From the Washington Post, August 6, 1978]

CAPTIVE NATIONS WEEK

Your columnist, Stephen Rosenfeld, calls Captive Nations Week a "dangerous dream" ["The 'Captive Nations' Fantasy," op-ed, July 14]. But Sen. Jacob Javits (R-N.Y.) asserts that the week is not "old hat," but needed today more than ever.

Furthermore, Nobel laureate and dissident Andrei Sakharov has called the Shcharansky and Ginzburg trials, which came on the eve of Captive Nations Week, "a challenge to all foreign governments and anyone working for human rights. If we don't weaken our efforts, the authorities will have to soften their attacks."

Frankly, I think that Dr. Sakharov, rather than Mr. Rosenfeld, is in a position to know what is best for captive nations and captive peoples.

LEE EDWARDS,
Secretary, American Council for World Freedom.●

"JIM"—JAMES GRANT BOLLING

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. ADDABBO. Mr. Speaker, I would like to extend my deepest sympathies to my dear colleague, DICK BOLLING, on the loss of his wife, Jim. My heart goes out to my friend, for we all share in the grief over the loss of a remarkable woman.

In addition to being a warm friend and a loving wife, Jim Bolling distinguished herself in politics and government.

A team at home and at work, the Bolling's relationship was truly remarkable. They brought the best out of each other—to the benefit of themselves and the Nation.

Jim Bolling was brilliant, capable, and dedicated. At the same time she was warm, vivacious, and a good friend. An asset to the Nation and a loving companion to her husband, Jim Bolling's passing is our great loss.●

OUR FOREIGN AID PROGRAM

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. HARKIN. Mr. Speaker, yesterday the House passed the foreign aid appropriations bill by a vote of 223 to 167. I was one of those who voted "no" on final passage. However, I do not want my "no" vote to be interpreted as a reflection of an implacable attitude of mine against foreign aid. In fact, quite the opposite is true.

I personally feel that I am a strong supporter of the type of aid this country ought to be extending around the world. I believe that as the richest and most powerful nation on earth that we have an obligation—not merely a "political" obligation—but we have a moral obligation to share with those who are less fortunate some of the wealth that God has given us. We are the richest Nation in the world due in no small part to the industriousness of our people and our social, economic and political structure.

Still, no one can deny that all of this rests upon a foundation of natural resources which were not put here through the efforts of human beings. We are blessed with abundant natural resources. We are blessed with the finest soil and the best climate conducive to producing food and fiber. Not every region of the world has been so blessed with this type of a foundation on which to build its economic, social and political structure.

That is why I believe we have a moral obligation to feed the hungry, clothe the naked, and heal the sick regardless of race, color, creed, or wherever in the world these conditions exist. I believe we should extend this type of humanitarian aid to people in need regardless of the governmental system they may be living under. In nearly every case, it is the poor, the hungry, and the sick who have no say in how their governments operate.

Humanitarian aid, not "political" aid, ought to be the hallmark of our foreign aid program. To a certain extent this has happened in the past. One can point to many examples of where our aid has gone for humanitarian purposes. But even a casual observer can see that much, if not most, of our foreign aid today is done for "political" reasons. Of course the chief "political" reason is the old catch word "national security." The emotionalism surrounding this phrase "national security" has led our foreign aid program to be more of a military aid program than a humanitarian aid program. We now supply military training, military arms, and military "credit" sales to nearly every country in the world. Where people are starving, we send them guns; where people are ill housed and ill clothed, we send them tanks; where people are sick, we send them tear gas. I believe this type of foreign aid is wrong and no amount of persuasion regarding "national security" will ever convince me that this type of foreign aid is in anyone's best interests, except for the short-term interests of those who may be in charge of the governments of these poor nations.

There are many good things in this foreign aid bill that the House just passed, but the things that are good and decent and humanitarian are far outshadowed by the amount of money that is being spent to prop up repressive dictatorships and to provide economic and military support for those governments—for those dictators who suppress the legitimate human rights of their people.

There is a section in this bill that prohibits direct U.S. aid to such countries as Uganda, Laos and Vietnam. Now while I do not condone the actions of the governments of these countries, such as Uganda's Idi Amin, the fact is there are people in those countries who desperately need our help. Reports indicate there are epidemics of tuberculosis in Uganda. There is an epidemic of malaria in Laos. In Vietnam, there are people—who are still our friends, I believe—who are suffering from malnutrition because their countryside was devastated during the long years of the Vietnam war, for which our country bears more than just a little responsibility.

I offered an amendment on the floor of the House to open up our direct aid to the peoples of those countries if such aid went for humanitarian measures, such as food, clothing, or medicines to eradicate tuberculosis and malaria. I could not even get 20 people to stand on the floor of the House to get a recorded vote on this amendment. Yet at the same time, we are willing to continue to pour millions of dollars in aid to the government, say of the Philippines, where the Marcos family is tightening its dictatorial grip on the nation and getting richer and richer every day with the help of U.S. aid money and U.S. military support. Idi Amin is a ruthless and I believe demented dictator. The Ugandan people, under his heel, have suffered a great deal. If there is any way that we can provide medicine and health care to help relieve that suffering, we should do it. First, out of charity, and secondly, because Idi Amin will soon be gone. If the Ugandan people are more healthy, more educated, and more well fed, they will more likely bring in a better form of government to replace Amin.

There may also be some misinterpretation on my vote against this bill because so much of this bill is aid to the nation of Israel. I believe that my remarks on the floor during debate establishes that in no way do I wish to cut down on our support for Israel. While I may not entirely agree with Prime Minister Begin and his policies, the fact is that Mr. Begin was elected by his people in a free and open election, and he

will have to stand for reelection in that same open and free system. Israel is a democratic nation, much like our own, and we have a special relationship with that country. While there are valid indications that certain violations of human rights are taking place in occupied territories by Israel, and I in no way can condone these violations of human rights, I believe that diligent efforts are being made to reach a peaceful settlement of these differences. Moreover, these violations of human rights do not in any way approach the severity of the violations that occurred and are occurring in other countries, such as Argentina, Chile, the Philippines, and Indonesia. Therefore, I do not want my vote to be interpreted as a vote against our support for the State of Israel.

It is said that charity covers a multitude of sins. Any objective readers of our Nation's history will see that this country has not always been the beacon of what is humane and good and decent. But we have always struggled to overcome these failings, and to a great extent we have done so. I believe that we have overcome many of our failings because we are a charitable Nation. If we cease to be charitable, we will cease to be a good Nation.

I want to be able to feel good about our foreign aid. I want no other rewards or returns for our humanitarian aid other than the knowledge that it is helping to alleviate hunger, poverty, sickness and illiteracy. This foreign aid bill is not designed to do this. Until our foreign aid becomes less military and more humanitarian, I will have to register my vote against it.●

PERSONAL EXPLANATION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. McDONALD. Mr. Speaker, due to my absence over the past few days, I missed certain votes. I requested to be paired on each vote missed, but did not receive a live pair on each vote. Therefore, I would like to explain how I would have voted if I had been present.

OUR FOREIGN POLICY AND RHODESIA

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. HYDE. Mr. Speaker, the troublesome problems our foreign policy must deal with are nowhere more crucial than in Rhodesia.

Another significant contribution to informed discussion is made by Georgie Anne Geyer, whose experience as a foreign correspondent and her knowledge of the area and personalities is comprehensive.

Her most recent column on the issue of Rhodesia appeared in the August 14 issue of the Chicago Sun-Times, and it deserves the thoughtful consideration of my colleagues:

[From the Chicago Sun-Times, Aug. 14, 1978]

RHODESIAN BISHOP HAS A RIGHT TO BE BITTER

(By Georgie Anne Geyer)

WASHINGTON.—There is a disturbing sense of political deja vu about meeting here with Bishop Abel Muzorewa, the black Methodist churchman-leader of the black and white interim government of Rhodesia. The sense that you've seen them all before, these foreign, would-be, might-be, will-be leaders who come to the capital of the world for blessing.

But Muzorewa, the short, attractive person virtually every analyst and poll shows to be the natural leader of the new Zimbabwe, is understandably bitter. "The administration policy?" he said. "I find it very discouraging, this close-mindedness or unwillingness to be true to America—and I mean the America that believes in freedom and the freedom of other people. I would have thought they would recognize the real effort for democracy in Zimbabwe and support it and nurture it until it matured."

The administration's policy might be understandable in purely Machiavellian terms. That is, the belief that the opposition Patriotic Front, with its guerrillas, could forever sabotage any black majority government like Muzorewa's. But it is more than that. Listen to these quotes from United Nations Ambassador Andrew Young that are not as well known as his famous "political prisoners";

In his second interview with the French Socialist newspaper, Le Matin, Young said that the interim government, which will turn over all the power to a black majority government in December, was responsible for the recent massacres of missionaries. "If this was a planned operation of attacks against missions, it can only have come from the (Ian) Smith camp," he said.

In another largely ignored interview with the London Times on May 22, Young said that "nonviolence is in many ways being practiced by the Patriotic Front. . . . Basically, what they're doing is moving around the villages and conducting political seminars and singing songs—which is exactly what we did."

To Young, this "liberation struggle" is a "fulfillment of the ideal of British education and values." In another speech in the South this spring, he compared the guerillas to the French resistance to the Nazis.

But there is more: Of Robert Mugabe, the fully admitted extremist Marxist who wants a one-party state under his rule, Young said, "The only thing that frustrates me about Robert Mugabe is that he's so damned incorruptible. . . . He is a very gentle man."

Now, all of this is qute staggering. Among the many things that Mugabe has said is, "We have mapped out our strategy on how the whites will be eliminated from our God-given land" (Daily Telegraph, Aug. 8, 1977).

When Sec. of State Cyrus Vance went to Africa this spring, he was stunned by the extremism he found in Mugabe—and by Young's romanticized version of him. In my personal talks with the highest British diplomats, who do not support the interim government either, they have said privately that Mugabe's men were mostly "savages." The idea that they are not behind the brutal terrorism simply does not occur to any knowledgeable person. "Singing songs" is apparently something they do after marching back from axing the missionaries who educated them.

And here we come to the root of the problem. The trouble with American policy in Africa is not only that it fully supports violence over compromise, but that it is built on lies. In a weird sort of way it is a kind of "Marxism" in the sense that it does not matter what the truth is; it matters what service people like Young believe the lies and misconceptions can be put to. We have been wrong before, but never quite in this way.

Bishop Muzorewa has been and is meeting with guerrillas within Rhodesia, and he says most are fighting for majority rule and not for any individual man. He believes many if not most will stop once there are elections in December. We could help that process, but we aren't.

I hear the strangest echoes of history in all of this. In 1965 we refused to back the democratic candidate in the Dominican Republic, Juan Bosch, because we wanted to support the right. Now we will not support the popular candidate in Rhodesia because our diplomats want to support the left.●

JANE BROYHILL

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. ADDABBO. Mr. Speaker, last Sunday, Jane Broyhill, the wife of our former colleague, Joel T. Broyhill, died at her home in Arlington.

I remember Mrs. Broyhill as a warmhearted woman and a gracious hostess. During Joel's 22 years in the House, Mrs. Broyhill campaigned effectively and tirelessly at his side. In addition, she was active in philanthropic and community affairs, serving as a volunteer at the National Orthopaedic Hospital and the Arlington Circle of the Florence Crittenton Home.

I would like to extend my deepest sympathies to Joel and his family for their great loss.●

HEALTH INSURANCE AND RISING COSTS

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. FINDLEY. Mr. Speaker, Americans today are increasingly concerned about the rising costs of health care, and rightly so. It is estimated that the Nation's health care bill this year will amount to $180 billion. That is more than the proposed 1979 defense budget. And costs continue to rise at a rate of 15 percent annually.

Increased costs result in part from improved medical technology. But other factors also increase the expense: The high cost of staying in the hospital, the overtreating and overcharging by some doctors, and perhaps foremost, the poor administration and supervision of many health programs.

The Boston Herald American recently ran an excellent five article series that pointed out a variety of abuses in the health insurance system and asserted the need for reform. I commend the series to my colleagues, and include excerpts in the CONGRESSIONAL RECORD.

EXCERPTS FROM THE HEALTH PROFITEERS

(By Mort Young and John Hall)

A Michigan woman won't let the health insurance company pay for her unexpected hysterectomy and refuses to pay the bill herself. "I wondered where my third ovary came from," she recalls, infuriated. "Why didn't the insurance people object?"

Both ovaries had been removed six years ago.

A patient is billed $350 for maternity delivery room service, which the insurance company blindly processes through even though mom is a man.

An insurance company inexplicably foots the bill for a six-month supply of birth control pills—charged to a seven-year-old boy.

Such abuses, added to runaway fees, blatant conflicts of interest and callous profiteering, turn health care in America into a money-making machine for those controlling the industry.

The flaws are deeply embedded in the system, investigations of local health insurance companies across the United States indicated.

What has gone wrong with the health care system is reflected by the giants of the industry, Blue Cross and Blue Shield.

The Blues insure one out of every two Americans. They administer government health programs, and handled payment of most of the $60 billion in Medicare and Medicaid filed in 1977.

But regulation of the 139 Blues and other health insurance plans is perfunctory. Hazily-written state laws are pocked with loopholes making enforcement often no more than a travesty.

Most abuses go undetected because they're "invisible": they're not outrageous, multi-million dollar scandals that attract attention.

"They're the 10 percent to 15 percent overcharges for everyday procedures," explained Kenneth Tannenbaum, a former Michigan deputy health commissioner and now president of Health Benefits Administrators in Ann Arbor, an insurance advisory firm.

"Only rarely, if a bill is outstandingly excessive, will the insurer investigate," Tannenbaum said. "Most companies don't scrutinize routine items because, individually, each doesn't amount to a lot of money. In the aggregate, though, they amount to a great deal of money."

In some states, premiums run higher each year without clearly-defined causes.

Massachusetts Blue Cross and Blue Shield, a combined plan, is an example. Despite attempts to keep costs down, insurance premiums go up.

What pushes up premiums are extra services—lab tests, X-rays, that doctors increasingly order and then bill to the Blues. Quantity of service tends to financially compensate doctors for the lower insurance company payments.

Further, the Massachusetts Blues permit specialists to charge more for a service than general practitioners are allowed, assuring that the higher fee prevails, thanks to agreements between doctors to "live and let live".

Similarly inflationary, specialists paid a percent of total hospital charges for all services given a patient force up costs. A hospital pathologist can earn $125,000 as his share for what a salaried pathologist is paid $50,000.

Another slippery area about which insurance companies don't keep the public fully informed is possible conflicts of interest.

Some local Blues appear to offer advantageous financial opportunities to those directly and indirectly associated with them.

In New York, Blue Cross and Blue Shield of Central New York have interlocking boards of directors that also interlock with local banks carrying large Blues accounts.

The question raised by the overlapping financial interests of doctors, hospitals and those running local non-profit health insurance plans, is whether they are able to resist improving their private incomes at the expense of the faceless premium-paying public.

In the mixed bag of health care coverage, there are really two basic choices.

One is the traditional fee-for-service practice. Doctors and hospitals bill the patient or insurance company for each service rendered—from asking you to say "ah" to the cost of the plastic water pitcher at your hospital bedside.

The other, which the government subsidizes if they meet certain criteria, are health maintenance organizations, or HMO's. An HMO charges a subscriber a fixed monthly fee in advance to treat him when he gets sick, whether it is the flu, a dislocated hip, or a heart attack.

In both categories there are so many variables that they defy description.

The prime example of what an HMO can be is in Seattle, where Group Health of Puget Sound, in 30 turbulent years, has bucked the local medical society and doubts by the community to become a stable and competitive part of the health care industry.

In fee-for-service insurance, doctors and hospitals have an economic incentive to maximize hospital time in order to collect insurance payments of bills and to use the hospital insurance as a shield against malpractice claims.

But HMOs incentive is the opposite: to keep patients out of the hospital so that overall costs will be less.

Cooperatives such as Puget Sound, San Francisco's Kaiser Foundation, Boston's Harvard and New York's Health Insurance Plan (HIP) are major exhibits in the federal government's case for a national health insurance bill in which HMOs would be a centerpiece.

But in the headlong rush to duplicate the efforts of successful HMOs in other parts of the country, federal and state governments are managing to turn a dream of health care at a low cost into a nightmare of medical commercialism, illicit profiteering and fraud.

California prepaid health plans (PHP's) are under investigation by a special grand jury probing for evidence of criminal fraud and ties to state officials and legislators.

Many of the clinics provided inadequate or non-existent service.

A U.S. Senate subcommittee found that more than half the Medicaid funds plowed into the PHPs in 1974 were written off for administrative costs and profits, although most of the 54 plans were supposedly non-profit.

But Hale Champion, a HEW undersecretary and a leading proponent of HMO's, believes the California experience was a "sport"—a temporary diversion from the real progress prepaid health has made.

Something is going right with health care in Delaware—unlike in other states.

What has emerged in Delaware is a reversal of attitude by the insurance companies from aloof arrogance toward the public to that of open cooperation. The reward is health services at a price that has begun to level off.

Unlike most Blue Cross-Blue Shield boards of directors, which are dominated by health practitioners and high corporate executives, of the 21 seats on the Delaware Blues board only five are filled by men associated with health care: four doctors and a college administrator who also sits on a hospital board.

Another uncommon aspect is the board's high turnover rate.

Nor is absenteeism tolerated by the Delaware Blues.

Only a few years ago, however, the Delaware Blues were in bad shape.

Board meetings were conducted in secret. Subscribers who protested decisions affecting their benefits were ignored. Blue Shield even stopped sending policy-holders copies of bills their doctors submitted to the insurance company.

"The public didn't have the opportunity to do anything because the health insurance setup, nationwide, gives the public very little influence," according to Frances West, secretary of the Blues board and director of Delaware's Division of Consumer Affairs.

"A reason I'm on the board were complaints that the public wasn't represented. You certainly don't need the president of of every company the Blues insure sitting on its board. They often don't have time to delve into what needs looking into. They become almost a rubber stamp," West said

Besides opening directorships to the public, an advisory committee was formed to represent various "consumer publics" in Delaware such as farmers, teachers, local businessmen.

"The committee came up with changes, attitudes and ideas for the board to act on," West explained.

"It was the first step to help the public understand what was going on," she continued.

The Blues were afflicted by inept claims processing as well as a lack of responsiveness to subscriber complaints; "lousy housekeeping," as West put it.

The old Blues management was fired and more responsive administrators hired.

"The handwriting is on the wall," West cautioned.

They are reading it in Delaware. But can that state's experience be repeated elsewhere, not only with the immense Blue Cross and Blue Shield, but with the hundreds of HMO's—health maintenance organizations—being offered as alternate insurance companies across the United States?

The answer seems to be that it can be done, if greater emphasis by health insurance companies is placed on serving the public rather than almost automatically funneling insurance premiums to doctors and hospitals, according to the Federal Trade Commission, the Moss Subcommittee on Oversight and Investigations, and the Department of Health, Education and Welfare, all of which are probing the health care system.

The increased pressure of public opinion for an end to the upward costs finally has brought the health care industry to the threshold of reform. Whether it crosses over remains to be seen.●

CAPTIVE NATIONS WEEK

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. NOWAK. Mr. Speaker, this year marked the 20th annual observance of Captive Nations Week, which serves both as a reminder of the need for vigilance and dedication in maintaining our personal freedoms and also as a catalyst for reaffirming our efforts to achieve human rights and peace on an international basis.

The strong support that still flourishes in our country for the spirit of Captive Nations Week is evidenced by the many and diverse local observances that are held to mark this anniversary. I should like to bring to the attention of the House the following expressions of support for Captive Nations Week—resolutions issued by the Captive Nations Committee of Western New York, Buffalo's Mayor James D. Griffin and Erie County Executive Edward V. Regan:

CAPTIVE NATIONS COMMITTEE OF WESTERN NEW YORK

RESOLUTION

Whereas, the relentless and steadfast resolve of the Russian Communist expansion to further their imperialistic drive for world domination has not diminished; and

Whereas, this plan of action has met in the last year with visible success as demonstrated by the recent African epsodes; and

Whereas, this aggression by proxy which has cleverly used Cuban forces to further Russian imperialistic aims and has brought the world close to a major flare-up; and

Whereas, this brinkmanship has dangerously involved major parts of the world and has caused bloodshed and was averted only by a fast action of the free world; and

Whereas, the Panama Canal issue has widely divided the American public and polls clearly indicate that most Americans do have strong reservations to the surrender of the Canal; and

Whereas, the decision to return the St. Stephen's Holy Crown to the Communist Hungarian regime—despite valiant efforts of the free Hungarians—is a gross breach of confidence and has created a dangerous precedent; and

Whereas, the broadening of the economic detente with the Soviet Russian world has definite seeds of danger and might create a Communist build-up strategic computer oriented arsenal; and

Whereas, the recent trials and convictions of the dissidents have caused rightly a furor and a public outcry, the shocking state of the Ukrainian and other enslaved nations resistance movements have gone almost unreported despite the Russian created "Holocausts"; and

Whereas, the swift and merciless reaction of the Russian regime to attempt to silence the Helsinki monitoring groups is a clear indication of their Achilles heel and have served only to consolidate the resolve of many fearless men and women to continue their fight for national and human rights; and

Whereas, inspired by the devotion to freedom of these brave men and women who, notwithstanding the ruthless suppression and great personal hardship, have shown valor and exceptional spirit, have given us a valuable lesson in courage;

Now, therefore, we, assembled here to commemorate this 20th anniversary of Captive Nations Week, do hereby resolve to work diligently to inform and pressure our public officials to use all available tools of diplomacy in order not only to alleviate individual hardships but create a fertile ground for human and national rights to flourish on a world-wide basis.

CITY OF BUFFALO, EXECUTIVE CHAMBER

Whereas, our nation recently celebrated the bicentennial of our existence and has demonstrated to the world the viability of democracy by showing our willingness and courage to defend these unalienable rights time and again; and

Whereas, the cause of freedom is indivisible, its loss reverberates and perils freedom everywhere, encroaches upon hard won liberties and undermines even the stablest nations; and

Whereas, Communist aggression by proxy so vividly brought forth on the African Continent only recently could have caused a major conflagration with the shedding of innocent blood; and

Whereas, the Russian imperialistic and expansionistic Communism drives by using Cuban forces as their aggressive arm have attempted to blackmail our resolve; and

Whereas, the human rights movement eloquently represented by President Carter, has enunciated the absolute need to address our attentions to the severe repressions of said rights by certain Russian signatories of the Helsinki Accords; and

Whereas, the Captive Nations, the first victims of Communist totalitarian aggression, are waging a valiant struggle to free themselves of the shackles imposed upon them by this repressive force; and

Whereas, we Americans have been on record that we take the stewardship of freedom seriously and take inventory of freedom's cause daily but especially during Captive Nations Week and reiterate this dedication by building bridges to those oppressed; and

Whereas, the submerged and subjugated nations have demonstrated through their long and tenuous fight their total commitment to gain independence for their respective peoples, and have a right to believe that America shall not desert this righteous path; and

Whereas, no peace can be won by subterfuge, no peace can be hoped for by dealing with the aggressors, for as the great Emerson once said, "nothing can bring peace but the triumph of principles!",

Now, therefore, I, JAMES D. GRIFFIN, Mayor of the City of Buffalo, do hereby declare the week of July 16–22, 1978, as "Captive Nations Week" and urge our people to rededicate their lives to the cause of liberty and dignity of man and ask all our people, regardless of faith, to attend their House of Worship and pray for peace with freedom for all mankind.

In witness whereof I have hereunto set my hand and caused the Seal of the City of Buffalo to be affixed this 17th day of July, 1978.

JAMES D. GRIFFIN,
Mayor of Buffalo.

COUNTY OF ERIE

OFFICE OF COUNTY EXECUTIVE

Whereas, our nation recently celebrated its Bicentennial and has demonstrated to the world the viability of democracy. It has shown willingness and courage to defend these unalienable rights and has unselfishly given proof of supreme sacrifices; and

Whereas, the cause of freedom is indivisible, its loss reverberates and perils freedom everywhere, encroaches upon hard won liberties and undermines even the stablest nations; and

Whereas, communist aggression by proxy was so vividly brought forth on the African continent, and which only recently could have caused a major conflagration with the shedding of innocent blood. Russian imperialistic and expansionistic communistic drives, by using Cuban forces as their aggressive arm, have attempted to blackmail our resolve; and

Whereas, by this tactic the aggressors aim to paralyze our foreign policy and thus effectively render vulnerable in the future by designing to sap our national nerve; and

Whereas, the human rights movement eloquently represented by President Carter, has enunciated the need to address our attentions to the severe repressions of said rights by certain signatories of the Helsinki Accords; and

Whereas, the Captive Nations, the first victims of Communist Russian totalitarian aggression, are waging a valiant struggle to free themselves of the shackles imposed upon them by this repressive force; and

Whereas, Americans have been on record as taking inventory of freedom's cause daily, but especially during Captive Nations Week and reiterate this dedication by building bridges to those oppressed; and

Whereas, the submerged and subjugated nations have demonstrated through their long and tenuous fight total commitment to gain independence for their respective peoples, and have a right to believe that America shall not desert this righteous path. No peace can be won by subterfuge, no peace can be hoped for by dealing with the aggressors, for as Emerson once said: "Nothing can bring peace but the triumph of principles!"

Now, therefore, I, Edward V. Regan, Erie County Executive, do hereby proclaim the week of July 16–22, 1978 as Captive Nations Week and urge our people to rededicate their lives to the causes of liberty, and to attend their House of Worship and pray for peace with freedom for all mankind.

In witness whereof, I have caused to be affixed the Seal of the County of Erie this — day of — 1978.

EDWARD V. REGAN,
County Executive.●

BREAKTHROUGH IN MAGNETIC FUSION

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. TEAGUE. Mr. Speaker, last month the Department of Energy research team at the Princeton Plasma Physics Laboratory (PPPL) achieved a major milestone in the magnetic fusion program. In a doughnut-shaped device called the Princeton Large Torus, a temperature of 60 million degrees centigrade was achieved; this is almost three times the previous highest fusion temperature. It is recognized by the Science and Technology Committee that fusion energy promises us virtually unlimited supplies of electrical energy but requires extremly high temperatures so that certain nuclear reactions can occur. This breakthrough carries the magnetic fusion program a long way toward the "ignition" temperature of 100 million degrees which is required for the fusion reaction

to sustain itself. Hydrogen nuclei are heated to these unusual temperatures by neutral beams and this experiment indicates that this way of heating the fusion plasma in doughnut-shaped machines is very promising. In fact, the next step in magnetic fusion will be to use bigger and better neutral beam injectors in the Tokamak Fusion Test Reactor (TFTR) a device now under construction at Princeton, N.J.

Both myself and the ranking minority member, Mr. JOHN WYDLER, wrote to the Department of Energy officials in June of this year voicing our concern about the future of the magnetic fusion program. Our committee is keenly aware of the critical stage of technology development which the program has reached and feels that good management and optimum use of major facilities are key to its ultimate success.

Mr. Speaker, this Nation is eager for victories on the energy front and demonstrating advanced technology to top renewable resources is mandatory if we are to show other nations that we are serious about energy supply. The Princeton team is to be congratulated for its achievement and the Government/industry team at PPPL should be encouraged to aggressively pursue the next step, successful construction and operation of the TFTR. The stakes are too high for this Nation to take a timid approach to magnetic fusion. We must move aggressively on this option and our committee expects the Department of Energy to reap the fruits of this latest advancement.

The Department of Energy press release follows:

PRINCETON FUSION MACHINE ACHIEVES RECORD TEMPERATURE FOR TOKAMAKS

The Department of Energy announced today that the Princeton Large Torus (PLT) fusion device has achieved a new temperature record for a tokamak-type machine. A temperature of 60 million degress Centigrade was reached, well above the 44 million degree minimum required for a sustained release of fusion energy.

Scientists at the Princeton Plasma Physics Laboratory (PPPL) in New Jersey, sponsored by DOE, have for the first time achieved the temperatures required for producing sustained reactions in a tokamak machine. They have also gained an understanding of how the particles react in the plasma at these temperatures.

Temperature is one of three critical elements needed to achieve a self-sustained fusion reaction. The other two elements are confinement time (the number of seconds the hot plasma can be confined within the device) and density (the number of particles in a cubic centimeter of the plasma).

Higher confinement times and density have been reached in other tokamak experiments especially designed for these purposes. However, all three of the criteria needed to create a sustained fusion reaction have never yet been achieved at the same time.

One key to the success of the current Princeton experiment was the use of a technique called neutral beam injection to help heat the plasma. This neutral beam system was developed by DOE's Oak Ridge National Laboratory in Tennessee.

On the basis of the Princeton experiments, scientists now calculate that the minimum size for a power-producing fusion reactor may be no more than two-to-three times the plasma size of the PLT, which has a radius of 18 inches.

A new device, the Tokamak Fusion Test Reactor, already under construction at Princeton and scheduled to operate in 1981, is twice the size of the PLT. Scientists are now confident that it may be possible to achieve a sustained release of fusion energy in the TFTR.

Fusion, the energy source of the sun and stars, is produced by the nuclei of light atoms, such as hydrogen, combining into heavier nuclei with an accompanying release of energy. Conventional atomic energy uses fission, in which heavier atomic nuclei are split to release energy.

The PLT's record temperature is four times hotter than the 15 million degree temperature of the sun's interior. It is twice the previous tokamak temperature record of 25 million degrees, also set by the PLT. Two neutral beam injection systems have been added since the previous record was set.

Temperatures of several hundred million degrees have been reached in mirror-type fusion machines, which are linear. The temperatures in tokamak and mirror devices are not comparable due to the losses of particles at the end of the mirror machines.

Tokamak machines contain the fusion reaction inside a toroidal, or doughnut-shaped, magnetic field. The hydrogen-based fuel converts to a plasma when heated to the high temperatures.

The PLT experiments were led by Dr. Wolfgang Stodiek and Dr. Harold Eubank of Princeton, under the direction of Dr. Harold P. Furth and PPPL Director Melvin G. Gottlieb. The PLT experiment was initially proposed by Dr. S. Yoshikawa of PPPL. The neutral beams were provided by the Oak Ridge Fusion Energy Division group headed by Hal H. Haselton, under the direction of Dr. O. B. Morgan.●

ARSON—A NEGLECTED CRIME

HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. SAWYER. Mr. Speaker, at the present time, arson is not considered a major, or "part 1" crime for purposes of the FBI Statistical Crime Index. Those crimes classified as major crimes are: murder, larceny, burglary, forcible rape, robbery, assault, and auto theft. The total loss of human life and property as a result of arson, often exceeds these other crimes, however.

Property losses from serious crimes, 1974[1]

[In millions of dollars]

Offense	Property loss	Average loss per offense
Robbery	$142	$321
Burglary	1,181	391
Larceny	816	156
Auto theft	841	1,246
Arson:		
Incendiary and suspicious	616	3,294
Incendiary and suspicious plus one-half unknown cause	1,284	2,558

[1] Loss data for crimes other than arson were obtained from the 1974 FBI Uniform Crime Reports.

From the point of view of the economy as a whole, losses from arson are greater than other crimes—for robberies, burglaries, larcenies, and auto thefts may be viewed as involuntary transfers of assets with little net loss to the economy. Arson causes assets to be destroyed.

As indicated in the chart, above, losses under the narrower definition were comparable to the other property crime categories; with the broader definition, arson losses were greater. Furthermore, loss per offense was significantly higher for arson than for the other offenses.

In view of the relative magnitude of arson, it is surprising that it has not received more attention in the past. This situation is likely due to the lack of a single, well known source of national statistics, as is provided for other offenses by the FBI Uniform Crime Reports.

The lack of reliable statistics leads to local apathy. "Part 1" crime statistics, which are thoroughly reported, are publicized in small and large communities, through the local press and television news stations. These statistics are compared with last years figures and with the statistics of other communities to give residents a clear picture of the number and degree of part 1 offenses being committed in their area. Arson, however, receives no such coverage.

Deaths and injuries from serious crimes, 1974[1]

Offense	Deaths	Injuries
Murder	20,600	
Police killed	132	
Aggravated assault		[2] 453,000
Arson:		
Incendiary and suspicious	1,000	[3] 10,000
Firefighters killed	45	NA

[1] It should be noted that deaths and injuries due to arson are included in the total for the categories of murder and aggravated assault, respectively.

[2] Includes unsuccessful attempts.

[3] Estimate.

Classification of arson as a part 1 crime would have several beneficial consequences.

First. Increase awareness of the problem by publication of statistics which will, no doubt, shock citizens.

Second. Identify arson as a major law enforcement problem which will induce increased funding for research and control programs.

Third. Increase the motivation for the development of better training programs for firemen and the hiring of more trained arson inspectors.

Fourth. Incentive to get better arson laws on the books combined with more diligent prosecution and stiffer sentences.

Fifth. Greater attention by the insurance industry to prevent arson fraud.

As a "part 2" crime, and thus dubbed coequal with gambing, drunkeness, and violating a curfew, arson has been neglected. This neglect has led to a severe nationwide problem of immense proportions. No longer can we stand idly by and let arsonists destroy lives and property. Action to reclassify this devastating crime is our first step in the right direction. With this action we can enlighten the public as to the seriousness of arson,

to let them know that it is not an isolated occurrence and that they are paying, through higher insurance rates, for the actions of persons who are not being held accountable.

In recognition of the greatly increasing incidence of arson and of the lack of adequate statistical records on this crime, I am introducing, today, legislation which will instruct the FBI to include arson as a part 1 or serious offense for purposes of the FBI Crime Reports. This bill will not only serve the purpose of increasing the reliable statistics on arson, but it will aso serve as a warning to arsonists that the American public is taking action on this neglected crime and will be on the alert for offenders. I request your attention and support of this timely legislation.●

CHARLOT: A PORTRAIT OF THE ARTIST

HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. HEFTEL. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following: The genius possessed by a great artist almost assuredly is recognized sooner or later. Unfortunately, that recognition often comes too late for the artist to appreciate. Such is not the case for Jean Charlot.

Mr. Charlot, who has lived in Honolulu for nearly 30 years, is now 80 years of age, but he is still engaged in a prodigious amount of work—still adding to an international reputation that will transcend time.

I am pleased to include the following profile of Mr. Charlot from the Honolulu Advertiser for the benefit of my colleagues and the art-loving public as a whole.

CHARLOT: A PORTRAIT OF THE ARTIST

(By Beverly Creamer)

When Jean Charlot was a very small boy and lived behind the Opera House in Paris, he would go to the Louvre every weekend.

He walked by himself, a very small boy with intense eyes, straight down through there, over the bridge, or sometimes not over that bridge, through the heavy gates to the grandest art museum in the world.

Over to the side were the Tuileries, the gardens where young lovers still walk hand in hand under shade trees, where little boys send sailboats out into the eddies cast by flying drops of water in a fountain.

Into the Louvre he went, up marble stairs, down hallways, to stand in front of his favorites, the Italian Primitives.

At this point, the very little boy in Charlot pauses and Charlot, the artist, looks critically at his interviewer whom he has assumed, rightly, knows far less then he about great art.

Those are the paintings done "before Raphael," he says and his magnificently bushy gray eyebrows shoot upwards toward the navy blue visor clamped over his forehead. Who knows, the eyebrows seem to do their own thinking, perhaps she doesn't know Raphael.

Charlot goes back to being a small boy.

One of his favorites of the Italian Primitives was by Paolo Uccello. He spells it. It was full of the action of horsemen with thrusting lances.

His first fresco done in Mexico, "Massacre at the Great Temple," is filled with horsemen bearing thrusting lances. The horsemen are the Spanish invaders. Their lances are raised against the people of the land.

The Italian Primitives, the French cubists popular as the very small boy was growing up, both are strong underlying influences of the Charlot art. Charlot sounds modest when he says it. They are "a good base."

It is three-quarters of a century since Jean Charlot was a little boy staring at his favorite paintings in the Louvre, never realizing they would shape his own style years from then.

Three-quarters of a century, two oceans, a continent and the art work of a lifetime separate him from those long-ago untroubled memories.

He looks aged and fragile these days, with a kind of built-in vulnerability. Even as little as six months ago he moved with agility, jumping up and down out of his chair during an interview, leaping up to pull books down from an endless collection across one entire wall in his livingroom, catching his cat in the garden for a photograph.

He no longer does those things. Over the space of two hours he sits quietly in a chair in one of his favorite places, a breezy lanai next to the canal in Kahala where he has lived for 20 years and where he painted a fresco along one livingroom wall in the midst of the furious work of the carpenters building his house. The wind rustles the leaves of a lauhala tree overhead.

Charlot is occasionally restless and pulls one leg slowly up to let the foot rest on the seat of the chair. He no longer throws it recklessly over the arm of his chair.

And when he finally arises, after two hours of talking that have apparently been part pleasure, part ordeal, he walks slowly with the help of a cane.

"I never knew I wanted to be a painter," he says, placing the tip of the black cane lightly against the taperecorder on the table in front of him.

"And I don't fancy myself an artist in the sense that people think an artist should be. If I used a word I would use artisan. That is a man who handles well the tools of his craft.

"There is a saying of Cezanne I like very much. You know the artist Cezanne? Spell it. Very good. Cezanne said a painter does his art as a snail trails his ooze. o-o-z-e. That's exactly what happens to a real painter. He just paints."

He went on: "I look very little at my old things. Sometimes I'm idle and I look through them, but I'm mostly interested in doing. Once it's out of me it's done."

As for his place in art, Charlot scoffs at worrying about such things. "It's none of my business," he snapped. "It's all decided by professors of art history. (He taught art history for years.)

"I hope that the things that came out of me are important enough so that people will take them into account. But it's not for me to judge."

Those who have known Charlot for many of the 29 years he has lived and worked in Hawaii, say he has never been a person to temper his natural impatience to fit the circumstances of the moment. Perhaps that is the personality—or the right, some say, of genius.

As the interview went on late into the afternoon and Charlot seemed impatient to be done with it, he asked at one point: "What do you want to do, stay for supper?"

While Charlot can be testy, certainly, and has a sense of humor that some of his friends label "very French," and therefore, almost unfathomable to the American funny bone, there is a strong streak of warmth and compassion in the Charlot soul. It surfaces most often in connection with his art.

It was in 1967 while he was at work on a massive mural depicting western culture at the East-West Center's Jefferson Hall, that he noticed a young art student visiting each afternoon to watch him work.

The student, an amateur but gifted potter, seemed never to be without a large, heavy hunk of clay wrapped in plastic.

Though it took him out of his way to visit Charlot, and it was an effort because he had to carry the clay, he rarely missed a day.

When the mural was finished, Charlot peered at the young man and noted that he had been faithfully watching the unfolding of the fresco.

Then, impulsively, Charlot pulled out a section of his original drawing, signed it and gave it to the student.

Then, just as impulsively, he grabbed it back again. "Wait, that is not good enough for you," he said.

He then unfolded an entire section, 11 feet by three feet, signed it and rolled it up. "This is for you," he said, handing it to the dumbfounded student.

Charlot has always been generous with his art. He has given much away, sold others for just a few dollars, partly because he firmly believes art is for the people and should be accessible to them.

Some of his work he trades, like those he has traded Helena Chock for luaus. "Helena's," he repeats when asked about his favorite Hawaiian restaurant, Helena's Hawaiian Food on North King Street.

"It's a marvelous Hawaiian restaurant. Actually we are friends. She has on the walls of her restaurant quite a nice collection of Charlot paintings on Hawaiian subjects.

"She trades for luaus. If I have friends I want to luau with, I let her know. It makes a fair exchange, I think."

Charlot, a student of the Hawaiian language since his first years here, believes that the culture of a place is implied in the cooking.

"She's good for my Hawaiian," he says of Helena and her restaurant which he visits whenever he is in the neighborhood. "She doesn't speak Hawaiian, no, but, she cooks Hawaiian and I eat Hawaiian."

Jean Charlot is one of Hawaii's most prestigious, most renowned, most industrious and productive artists. Even at 80 he is constantly at work.

There are two major new projects on the horizon, one a fresco mural for a new building, the other a massive sculpture larger even than his "Alii Nui" in front of the Ala Moana Americana hotel. And there are new books coming out all the time.

The two new projects are still partly secret. The final contracts have not been signed and Charlot will say no more.

What he does like to talk about is his latest series of lithographs, now on sale at Gima's Gallery in Ala Moana Center.

Entitled "Kei Viti," the series of five features themes of Fiji, an island Charlot visited more than 15 years ago.

"The things I did now are things I saw in Fiji in 1961 so it takes a long time to percolate, you see."

The lithograph series, priced at $600 for the entire set of $175 apiece, depict the same stylized, strongfeatured people that populate Charlot's murals, paintings and prints on Hawaiian themes.

"A curious thing," he says, pulling his glasses off and folding them up in his hand. "There are very few pink people in my work.

"It's mostly American Indians, Melanesians, Polynesians, and that I never realized until I was around the age I am at now.

"I am part Aztec Indian myself, from my great-grandmother and that's what happened to Gaugain. . . . Gaugain was part Peruvian

Indian and I am part Aztec and I can't shake it off either. My favorite models were dark-skinned people."

Charlot has made a life's work painting native peoples, gaining his first recognition in the 1920s in Mexico when he worked with leading painters of the Mexican Mural Movement.

Diego Rivera, Jose Clemente Orozco, even painter David Alfaro Siqueiros were his compatriots. Charlot says they were paid the same wages as house painters.

It was here in 1931 that he met a young American student, Zohmah Day, there for the summer with an art student girlfriend on a scholarship.

The two young women invited a group of young film-makers and painters to dinner one evening and Charlot happened to be among the group.

The women were budgeting so carefully at the time that all they could afford to serve were boiled carrots.

Zohmah remembers that Charlot was the only one who made nasty, sarcastic remarks about dinner and she kept hoping this "awful man" would be quiet.

(But she married the "awful man" eight years later after a sporadic long distance courtship marked by only occasional visits (he was living in New York then and she in California), original hand-drawn Charlot Valentine's every February, letters decorated with sketches, drawings and paintings and one cancellation of their wedding plans.)

Charlot had gone to Mexico at a "tragic, tragic moment" in his life.

His father had died several years before, he had just lost a church mural commission and "there was nothing in France for us."

He and his mother packed up and went to visit the Mexican relatives.

His mother had been born in Paris but her parents were born and married in Mexico and there is still a long line of cousins there.

Charlot attended the Coyoacan Open Air Art School in Mexico City and through this association came to meet and work with the young revolutionary artists.

It was Charlot who produced the first true fresco in the New World in modern times, "Massacre at the Great Temple" in the stairwell of the National Preparatory School in Mexico City.

He was known as "The Little Frenchman" and it was his writings about the Mural Movement that brought the young artists their first international prominence.

Before leaving Mexico Charlot worked as an archeological draftsman with the Carnegie Institute on the first excavations at Chichen Itza in the Yucatan.

The influence of the pre-Columbian frescoes found in the excavations were to have a major impact on the Charlot style.

A copy of one of the decorative friezes is displayed across one wall in his Kahala living room and it is easy to see how Charlot's works echo the same strengths as those ancient stylized figures.

It wasn't until 1949, long after Charlot had moved to the United States and begun to teach, that he first came to Hawaii.

Ben Norris, then head of the University of Hawaii Art Department, invited him to teach a summer class in fresco painting. He's been here ever since and only retired from teaching in 1966.

It was that first summer that he painted his first Hawaii mural at Bachman Hall on the University campus. It was that mural that his children cut their teeth on.

"I would always leave them a little extra piece of lime surface," he said. They'd paint around the edges and at the end of the day their father would cut off their section.

"They were painting frescoes before they were 10 years old," Charlot says.

Titled the "Relation of Man and Nature in Old Hawaii," that first fresco shows, in a corner, one of Captain Cook's ships arriving in the Islands.

"The relationship always interested me . . . to what extent the people who make the conquest of the land are in turn conquered by the land itself," says Charlot.

"In Mexico it is very obvious . . . in Hawaii it also interested me . . . To what extent the missionaries who came to Hawaii were converted by the Hawaiians to Hawaiian culture, to Hawaiian thought.

"If you know old missionary families, there is an infusion of Hawaiian manners, Hawaiian aloha."

Charlot is convinced that it was the missionaries who were conquered and says emphatically that the Hawaiian culture is very much alive.

A case in point, he believes, is the recent concern over an ancient Hawaiian aumakua that went on the auction block at Sotheby's in England.

The Hawaii public pledged $100,000 to the Bishop Museum toward buying the carved wooden figure and bringing it back home to Hawaii, but the figure sold far above that price to a wealthy European bidder.

Charlot is not upset primarily because Hawaii lost the aumakua, though he does feel "these things have an esthetic value in Hawaii they wouldn't have anywhere else," but rather because he considers there is a basic misunderstanding of the figure itself, especially of the terrifying expression on its face.

He is critical of people who feel that "prettiness" is tied to beauty in art.

"It's important to see that there are some ideas in art that are not Playboy, not bunny-like," he says. "Goodness and prettiness do not always go together . . . and the sense of ugliness does not mean evil."

Charlot says that the figure exudes a sense of "terribilita," an Italian word which means a sense of awe rather than fear. It is the sense of terribilita that is so admired in the work of Michelangelo, for instance, says Charlot.

For Charlot, participation in the world of art began early.

His mother was a painter in her own right and had exhibited in Paris. He modelled for her as a child.

It was she who told him the story about his first drawing.

"I was four years old and I did a drawing which of course I didn't pay an attention to," he says.

"It was a dog climbing a steep hill and it seems that the legs of the dog were well-placed to climb a hill."

Charlot received his early training with the Catholic Gilde Notre-Dame in Paris.

The Gilde was a group of young artists, most in their teens, "who wanted to bridge the gap between artisanship and artistry," says Charlot.

They studied a wide range of techniques, from woodblock cutting to enamelwork to glass windows to fresco.

As a fresco artist, Charlot had to master more than just an ability to express ideas artistically. He had to learn to work with materials that had a life of their own.

In the early days, he was his own mason, learning to mix the lime and sand and spread it on the wall surface. The line mixture hardens within about five hours so you can only work on one small section at a time, he says.

"You trace on the wall, like a jigsaw puzzle, an area for that day and the mason comes and covers it with lime and sand.

"You have to wait until it's slightly hardened. . . . It is very important to do it when it's fresh. (Fresco is Italian for fresh.)

"If it's too wet the tracing paper will stick to it and destroy the surface. And if it's too hard the paint won't take.

"Then you trace your line drawing on that. (Charlot traced with the point of a nail and drew the original on butcher paper before transferring it to tracing paper.)

"Then you paint it with color mixed with pure water. I was using Japanese brushes which are very nice for fresco.

"The paint goes in, the wall dries and lime water comes out of the wall and makes a coat of transparent lime over the color. It's a double movement—in for the color, out for the lime."

In his days in Mexico, Charlot purchased his earth colors from a hardware store. Once purchased they had to be ground even more finely and mixed with water.

Frescos will last forever, he says, but they can be damaged. At the University of Georgia where he taught for several years before coming to Hawaii, there has been damage to one.

"I found that where the students could reach, they had made funny heads," says Charlot. The mural has since been repaired.

The only damage to frescos at the University of Hawaii is not physical but "mental," explains Charlot.

"At one time someone wanted to beautify Bachman Hall and put a row of pots and plants in front of my fresco," he said. Charlot suggested that this was not appropriate and the pots were removed.

Over the years Charlot has been artist, writer, teacher, lithographer, book illustrator, cartoonist (his religious cartoons are published in a number of Catholic newspapers) and playwright. And his children have followed his lead.

"I hoped they would not be artists," he says, partly in jest. "I wanted them to be bankers.

"But they tend to do things that I could understand. Not that I approve of their being artists, but they are. I don't approve and I don't disapprove.

"There's no way of disguising the fact that I was doing those things. I wrote books, plays, I painted and so forth. So do they."

His daughter, Ann, is a poet; his eldest son, John, is a theologian; his next son, Martin, is a muralist and his youngest, Peter, is involved in the performing arts.

The only non-artist in the family in his daughter's husband. "She got married to someone in Venezuela," explains Charlot. "He is the only executive in our family. Steel and what not . . ."

Though he never returned to France to live, Charlot retains the citizenship of his homeland along with his American citizenship. But he likes to joke about how American he has become.

"The other day I was with a friend and I wanted to show how American I am," he says.

So he ordered a hamburger and ate it with a lettuce leaf.

Afterwards, Charlot said his friend said; "You're not a good American.

"You didn't put on it the mustard, the mayonnaise, and the A-1, and the pickles and the dill pickles."

Those bushy grey eyebrows shoot up again and Charlot smiles broadly at the little joke he has just made. He is still, as they say, "very French." ●

THE DEFENSE BUDGET: TARGET FOR TAXPAYERS

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. DRINAN. Mr. Speaker, we are all familiar with "proposition 13 fever" and the cuts in Federal spending resulting from it. But we seem to be ignoring the

one area in which Government expenditures can and should be cut significantly with few negative repercussions. That area is military spending, which continues to command the largest single portion of the American tax dollar.

Continuing the furious buildup of nuclear arsenals is a worthless expenditure in the power game between the United States and the U.S.S.R. The United States now possesses enough weaponry to devastate any enemy 100 times. As Norman Cousins points out in an editorial in the August Saturday Review, "beyond a certain point, the use of nuclear force is an exercise in the pulverization of rubble."

Second, Americans' "keep up with the Jones'" attitude is exemplified in the buildup of weaponry to match or outspend the Soviet Union. What we forget is that a great deal of Soviet military expenditure is directed not at the United States but at China. After the point at which U.S. defense expenditures deter the U.S.S.R. from an attack, we are engaged in an exercise which is pointless.

These unnecessary expenditures are not harmless. The huge amounts of money spent on the military feed inflation by increasing aggregate demand without augmenting the supply of goods available for civilian consumers. According to Ruth Leger Sivard's report, "World Military and Social Expenditures: 1978," military spending also has a negative effect on employment and investment.

U.S. public expenditures on the military were $1.179 billion from 1960–1976. In 1975 alone these expenditures were $91 billion, compared to $39 million for international peacekeeping, $88.6 billion for education, $46.6 billion for health, and $4 billion for foreign economic aid. The average American family pays more in taxes to support the arms race than to educate its children, pay for health care, or help developing nations. A simple 5 percent cut in military spending in 1975 would have meant a $4.5 billion saving; this money could then have been used for more fruitful purposes, including tax reductions to stimulate the economy and lighten the burden of the average taxpayer.

If this Congress is to be taken seriously in its expressed dedication to reducing Government expenditures and lowering taxes, we must take another look at defense spending. In this regard, I commend to the attention of my colleagues the following excellent editorial by Norman Cousins in the Saturday Review of August 1978.

[From the Saturday Review, August 1978]

TARGET FOR TAXPAYERS

So far, the revolt of the American taxpayer has been a skirmish on the periphery. State and local taxes, which have served as the basis for the uprisings of the citizenry, are only marginal compared to the bite out of every dollar taken by the federal government.

The largest single portion of that dollar goes for military spending, which has long since passed the point where it has anything to do with genuine national security. The principal argument being offered these days for a mammoth military budget is not so much that it is necessary for defense as that we don't want to be outspent by the Russians. We are playing a macho game; it is almost as though we have to prove our manhood by outdoing the Russians in pumping money into a military machine.

What makes the game so manic and senseless is that no one thinks to ask where the Russian money is going. It is just assumed that it is all being spent on weapons that could be used against the United States. Have the advocates of megadollars for the military in this country ever stopped to explain to the American people that a large part of the Soviet military budget is connected to its disputes with the People's Republic of China?

Exact figures are not available on the number of Russian soldiers now stationed on the long common border with China. The estimates have ranged from one million to three million men. Whatever the precise size, supplying a major armed force over a vast distance requires billions of rubles. Thousands of tanks and other heavy military equipment are involved in this particular operation. How is it that such facts are never mentioned when spokesmen for the military in this country rush forward to tell the American people that we must not under any circumstances allow the Russians to have a bigger military budget than our own?

Now we learn that President Carter wants to revert to the civil defense emphasis of the early Sixties because, he says, the Russians are beefing up their own civil defense. One would think we would have learned by now that thermonuclear explosives make a farce out of civil defense in general and underground shelters in particular. It is possible, of course, that the President has been advised that the best way to head off a taxpayers' revolt on federal spending, with the military budget as a prime target, would be to create an atmosphere of national insecurity and tension. If so, the strategy is bound to backfire. Vietnam is too fresh in the American memory for yet another major manipulative venture by government.

Imitation of the Russians is the biggest single weakness in American society today. At one time we prided ourselves on the fact that we had become a model for the rest of the world. But that was before we got into the habit of allowing the Soviet Union to define our standards and values. Perhaps the most dramatic and damaging specific example is the CIA, created because the Soviet Union was engaged in a wide range of undercover activities, including subversion and murder. We deluded ourselves into thinking we had no choice except to do the same. Yet we did have a choice. We could have trained massive searchlights on Russian undercover activities, exposing them pitilessly and remorselessly before the entire world community. Does anyone think that Russian secret operations could have continued if the cover kept being removed? Publicity converts such operations into national liabilities, as the history of our own CIA has demonstrated.

The various books on the CIA that have appeared recently have documented the negative impact on American institutions of its undercover activities. What remains to be done, however, is to document the cost to the American taxpayer. The CIA budget has never been presented to the American people. They have no way of knowing whether the cost to them is one hundred million dollars or fifty times that amount or more. One searches in vain through the U.S. Constitution for any provision under which such secret spending can be legally undertaken.

The American people are not mandated to wreck their own economic system just because the Russians find it necessary to spend well in excess of one hundred billion dollars on their armed forces. Perhaps the time has come for Americans to pay as much attention to federal taxes as they do to property taxes. When they do, they will discover that the government itself is the largest single cause of inflation—and that the military budget accounts for the biggest single chunk of government spending. The concern over high taxes, therefore, is directly related to the fight against inflation. Inflation erodes the value of the dollar faster than people can increase their earnings. The military budget is the one place where substantial reductions can be made without impairing the function for which the money is being spent.

Any scrutiny of the military budget must give proper weight to the cost of, as well as the necessity for, the steady accumulation of holocaust-making weapons. A good authority on these matters is Robert McNamara, who as Secretary of Defense told Congress 10 years ago that a total of 400 megatons of nuclear force can destroy at least three fourths of any enemy's industrial capacity. He explained that a fourfold increase of our nuclear stockpile would destroy only one percent more of the industrial capacity of that same enemy. Beyond a certain point, the use of nuclear force is an exercise in the pulverization of rubble.

It is estimated that the United States now possesses something on the order of 40,000 megatons of nuclear force, or about 100 times more destructive power than is required to devastate any potential enemy. The human mind is incapable of comprehending either this kind of power or its implications. One way of visualizing the size of the nuclear stockpile is to think of 43 million tons of TNT being manufactured every day for 6,000 years—or the time span of recorded history.

The sum total of all that explosive force now resides in our arsenals and is getting bigger every day.

The incredible and outrageous fact is that our leaders are unwilling to say at what point they are prepared to call a halt to the further accumulation of nuclear weapons. But there is no reason why they should not be compelled by the force of public opinion to accept a limit. If we are concerned not just with taxes but with the survival of this nation and its values, we will put at least as much passion into the fight to end the arms race as we do into the effort to bring local expenditures under control.—N.C.●

POPULATION TRENDS AND DISTRIBUTION—BALANCE(S) OF POWER SERIES BOOK II(F)

HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1978

● Mr. BRECKINRIDGE. Mr. Speaker, one of the bases for national power, and a primary element of a nation's strategic position in the world is its population. Demographic characteristics and trends in population distribution have important consequences for the nation's potential productivity, mobilization, and economic health, not to mention its ability to sustain its modern armed forces without harm to the civil sector.

Today's selection in the "Strategic Balance" series, "The Soviet People: Population Growth and Policy," details recent demographic trends in the Soviet Union and outlines the concerns to which Soviet leaders must give attention, such as a growing regional imbalance, migration to areas already surplus in labor,

and the flow of productive members from agricultural areas. Since Soviet decisions to influence these trends and others will have a bearing on the Soviet Union's future strategic position vis-a-vis the United States, it is important to be familiar with the demographic strengths and weaknesses of the third most populous nation in the world.

This selection is excerpted from a 1973 publication of the Population Reference Bureau, Inc., entitled Population Bulletin.

THE SOVIET PEOPLES: POPULATION GROWTH AND POLICY

Stretching across the top of Asia and Eastern Europe from the Baltic Sea to the Pacific, the Soviet Union comprises the largest land mass of any nation in the world. Its 8 million square miles approximately equal the combined area of North and Central America, although a much smaller proportion lies within the Temperate Zone.

Most of this vast area forms an uninterrupted plain from west to east, broken only by the relatively low Ural Mountains which divide Europe and Asia. In the north it is practically uninhabited—an arc of treeless tundra succeeded to the south by thick coniferous forests virtually impenetrable except via a few north-south river valleys.

South of the evergreen belt on the European side of the Urals lies an area of deciduous forests that contains the heart of what became the Russian Empire. In this area around Moscow, and later in the rich plains or steppes of the Ukraine and European Russia, was formed the society that spread its influence halfway around the world.

But the openness of the terrain, while posing few barriers to expansion, also meant that the growing country was vulnerable to invasion and destruction. Incursions by nomadic tribes from the east kept European Russia from expanding during the late Middle Ages as did the rest of Europe; later, the threats came from the west, as boundaries and territory in East Europe shifted continually throughout centuries of war.

By 1725 the Russian Empire contained only about 20 million people, and although its territory included Siberia, only 2 percent of the population lived east of the Urals. Information about population size and distribution is meager for the 18th and 19th centuries, but it seems to have grown at a modest rate throughout this period. When the first and only complete census of the Russian Empire was conducted in 1897, a total population of 94 million was recorded.

At that time Russia included not only the Slavic areas, radiating from the core around Moscow into Belorussia, Lithuania, and the Ukraine, but also a center of population in the Caucasus Mountains, including Georgia, Armenia, and Azerbaijan, and a number of Turkic peoples living in Turkmenistan, Uzbekistan and Kazakhstan east of the Caspian Sea.

The U.S.S.R. today is still a polyethnic union, dominated by its Slavic population but with many areas inhabited by unassimilated ethnic minorities. Its total population in 1972 was 248 million, making it the third most populous nation in the world.

INTO THE MODERN WORLD

During the first half of the 20th century Russia changed from a backward, underdeveloped stepchild of Europe into a major superpower.

WAR AND ITS EFFECTS

World War II had a devastating effect on Soviet population, but the full extent of the disaster was not revealed until 1959, when the first postwar census revealed a total population of 209 million. Despite high estimated rates of growth during the postwar years, the population had increase only 17 million from 1939 to 1959, not counting the population acquired by territorial changes. The average annual growth rate for that period was only 0.4 percent. Losses caused by the war included an estimated 25 million people killed and about 20 million fewer births than would have taken place had there been no war.

Fatalities on this massive scale left great distortions in the age and sex distribution of the Soviet population, and these anomalies are still visible in the age structure revealed by the 1970 census.

Of the 242 million people counted in 1970, 130 million were women and only 112 million were men. This difference in sex distribution occurs among those over 45 years of age, who were 16 years and older in 1941 when the war began There is a sharp pinch in the 1970 age distribution "pyramid" in 45-to-54 year age groups, more pronounced for men but present also for women. In the 50-to-54 year age group, the cohort that was hit hardest by the war, there are almost 2 million fewer people than in the age group 70 years and older.

Another pinch in the pyramid occurs in the 25-to-29 year cohort—those who were born during the war. The size of the youngest cohort—those 4 years old or younger—also is reduced. In part this reflects an "echo-effect," caused by the relatively small war-born cohort, who were in their most fertile years during the 5 years previous to the 1970 census.

RECOVERY AND GROWTH

Following World War II the Soviet Union experienced a period of rapid population growth that lasted into the 1960s. Since 1958, when the rate of annual growth was 1.8 percent per year, the Russian population has increased at a more modest pace, and by 1969 the growth rate was half that figure. The rates for 1970 and 1971 were slightly higher. In terms of numbers of persons added to the population, the 2.2 million increment during 1970 was only a little more than 60 percent of the number added each year during the late 1950s.

The 1970 age and sex distribution of the Soviet population reflect the changing growth rates since 1950, as well as the catastrophic effects of revolution, famine and war that occurred earlier. The high growth rates that had prevailed between 1955 and 1965 are reflected in the 1970 age pyramid, which shows large numbers in the 5–9 and 10–14 age groups. The reduced population growth rates between 1965 and 1970 are evident in the smaller size of the 0–4 year cohort.

The population in the working, or "able-bodied" group—defined officially as 16 to 59 years for males and 16 to 54 for females—has increased less rapidly since 1950 than those in the younger and older age groups. The most rapid increase has occurred in the older, nonworking age groups, whose numbers nearly doubled from 1950 to 1970. Old people represent a steadily rising proportion of the total Soviet population.

The 25 years since the end of World War II have seen a decrease in the great deficit of males created by the war, the revolution and other catastrophic events. The excess of 22 million females which existed in 1950 was reduced to 19 million by 1970.

The process of rectifying an abnormal sex distribution is slow, however: The sex ratio of 80 males per 100 females in 1950 had increased to 85.5 by 1970, but is still far from the 95–99 males per 100 females that is typical of populations where growth has been normal. Projections of the Soviet population indicate that the ratio will be approximately 90 in the year 1990.

WHO ARE THE SOVIET PEOPLE?

The U.S.S.R. has an extraordinarily varied population, composed of about 100 separate nationalities related mainly to Slavic, Finnic, Turkic, Georgian, Armenian, Ivanian, Mongolian or Siberian ethnic groups. The 1970 census in most instances allowed Soviet citizens to designate the ethnic group to which they belonged. According to census results, the Great Russians, the principal Slavic group, are numerically predominant with 129 million. This and the 2 other major Slavic groups, Ukrainians and Belorussians, account for three-quarters of the Soviet population.

Other principal groups are the Baltic peoples, including Lithuanians, Latvians and Estonians; the peoples of the Transcaucasus, including Georgians, Armenians, Azerbaijanians; and Central Asians, the most numerous of whom are Uzbeks, Kazakhs, Tadzhiks and Turkmenians. Tatars, most of whom live in the Russian Republic, are also an important ethnic group.

In contrast to the low and declining growth rates of the Slavic and Baltic groups, the Turkic peoples of the Central Asian republic increased rapidly during the 1959–1970 period. While the national population increased 16 percent. the numbers of Uzbeks, Kazakhs and Tadzhiks increased by approximately 50 percent, not counting those who may have been assimilated into the Russian population.

The total number of Great Russians—the predominant ethnic group—increased during the intercensal period in all republics except Georgia. The greatest increase, of course, occurred in their home republic; the Russian Soviet Federated Socialist Republic. The next largest increase was in the Ukraine, 2 million, followed by that in Kazakhstan, 1.5 million—in both cases due largely to migration from other republics.

POPULATION SHIFTS: WEST TO EAST, FARM TO CITY

The 1970 census revealed no surprises regarding the distribution of the population among the various regions of the country. In general, interregional shifts have followed long-term trends.

On trend that continued throughout the intercensal period was the movement of population from west to east. In 1959 there were 45.5 million persons living east of the Urals in the Asiatic part of the Soviet Union—slightly more than one-fifth of the total. This population increased 28 percent, nearly twice as fast as the total population during the intercensal period, and in 1970 numbered 58.2 million, about one-fourth of the total population.

The basis for this shift, however, lies primarily in the high rates of growth in Kazakhstan and the 4 Central Asian republics. Only one of the economic regions in the eastern part of the R.S.F.S.R.—the Far Eastern region—increased more rapidly than the national total. The heavily than the national total. The heavily industralized Urals region and Western Siberia increased at less than half the national rate.

Another trend in population redistribution has been from the western and central regions of European Russia to the southern republics and regions.

Losses in population occurred primarily in central European areas where neither agriculture nor new industries have developed.

Migration played a major role in this net redistribution of population. The estimated net inmigration for Kazakhstan constitutes 19 percent of the increase in population reported for the republic between the censuses, and that for the Ukraine is 8 percent. For Latvia and Estonia, inmigration made up an estimated 45 percent of the population increase—an indication of the need for manpower to these areas to bolster their low natural increase rates and meet demands for labor.

The regional imbalances of manpower which exist in the Soviet Union today, and the continuing flow of migrants to labor surplus areas, such as the North Caucasus and southern Ukraine, are of great concern to Soviet officials. Other difficulties are the high turnover among workers migrating to Siberia and the North, and the loss of young farm workers migrating to the cities.

URBAN GROWTH, RURAL GROWTH

The pattern of change in the urban and rural populations of the republics during the intercensal years roughly followed the regional patterns for the total population. The urban populations of the Russian republic, the Ukraine, Latvia and Estonia increased less rapidly than the national trend, while the rural populations of these republics decreased more rapidly than the total rural population. In the eastern and southern republics, rural population increased significantly.

Growth of urban population was high in Kazakhstan, the Central Asian republics and 2 republic of the Transcaucasus, Azerbaijan and Armenia. This growth was the result of both high rates of natural increase and migration. Urban growth was also at a high level in Belorussia, Lithuania and Moldavia, where rates of natural increase were low. The percentage of urban population in the latter republics was relatively low in 1959; during the intercensal period a massive rural-urban migration brought about what might be called an urban revolution.

Moldavia, which was only 22 percent urban in 1959, achieved the highest urban growth rate—76 percent—between the censuses. In Lithuania the urban proportion increased from 39 percent in 1959 to 50 percent in 1970; in Belorussia it went from 31 percent to 43 percent.

In the U.S.S.R. as a whole, there was an increase of 36 million in urban population. Of this, 14.6 million were added due to natural increase, 5 million as a result of converting rural communities into urban places, and more than 16 million resulted from rural-to-urban migration. Nearly 900 cities and city-type settlements were added to the official list of urban places between censuses.

Rates of increase among the various classes of large cities varied considerably in the intercensal period. While total urban population grew 36 percent, cities greater than 250,000 in 1959 grew at slower rates, and the largest cities grow most slowly.

In 1959 only 3 Soviet cities—Moscow, Leningrad and Kiev—had more than 1 million inhabitants. By 1970, there were 10 in that size category. Moscow's 7 million and Leningrad's 4 million population still overshadowed the other cities in 1970, but the relative differences in size were reduced because the smaller cities grew faster. Tashkent grew 49 percent in 11 years to reach 1.4 million population; Kiev's 1.6 million in 1970 was a 47 percent increase over 1959.

Although the total rural population decreased by almost 3 percent in the intercensal period, rural residents increased by more than a third in Central Asian republics, and by nearly a quarter in Kazakhstan. In each of these areas rural growth exceeded the rate of natural increase for the republic, reflecting relatively higher rural fertility and, in all likelihood, some migration from the other republics. The net loss of nearly 7 million persons from the rural population of the Russian Republic, largely from the Central European and Western Siberian regions, more than offset the gain of rural inhabitants in the eastern republics.

Projected growth of Soviet population

[In millions]

Year	Series B*	Series C**
1970	241.6	241.6
1975	253.7	253.0
1980	267.0	264.5
1985	281.5	276.5
1990	295.3	287.6
1985	307.7	297.3
2000	319.5	305.8

* Constant fertility.

** Declining fertility.

Young men are now required to register for the draft when they reach 17 years of age, and if called into service they enter at age 18. According to the projections, the number of males at the entry age of 18 years will fluctuate between 2.4 and 2.5 million for the next few years, then rise to nearly 2.7 million in 1979. Following this the size of the age group will decline until 2000. Males in the prime military ages of 18 to 34 years will increase in number over the next 15 years. By 1988 it is estimated that they will total 39.8 million, a 31 percent gain in their number over 1970. Most of the increase is anticipated in the late 1970s and early 1980s. During the rest of the century the group will decrease 7 percent to about 37 million.

The population in the working ages (15 to 54 for women and 15 to 59 for men) is projected to increase by 43 million (25 percent) between 1970 and 2000, but the largest part of this increase will be during the present decade. From 1971 to 1976 this age group will increase by 12.4 million, and during the next 5-year period (1976 to 1981) it will rise by 10.8 million. The number of males in these ages will increase nearly twice as fast as the comparable numbers of females over the projection period.

The most significant change in the age structure of the population will occur in the older, or pension, ages—55 and older for women and 60 and older for men. From 1971 to 2000, this age group will increase by 25.2 million, or 70 percent. The number of males will more than double, from less than 9 million to more than 20 million. The number of females will increase from 28 million to 41 million, a 68 percent increase.

Despite these increases, however, the proportion of the population in the nonworking age groups is projected to decrease in coming years.

POPULATION AND POLICY: CAUSE AND EFFECT

Population questions have a high political content in Marxist countries. The issues go back to the 19th century, when Marx and Engels scathingly rejected the social theories of Thomas Malthus. Until recently, the usual Marxist position has been that population size is not a problem, even for developing nations; it is the type of economy that is important. Anyone who suggested the need for slowing population growth was labeled a neo-Mathusian and accused of trying to substitute population programs for needed changes in the economic system.

Since 1967, Soviet spokesmen have moderated this position, acknowledging that some developing countries have been adversely affected by too-rapid population growth, and advocating the adoption of effective birth control programs. Regarding population growth within the Soviet Union itself, most of the attention has been focused on the question of raising fertility where it is low. An increasing number of journal articles and monographs have been devoted to the general topic of fertility decline and the need for an official population policy to counteract the trend. In the latter half of the decade a number of nationwide and regional conferences and symposiums were devoted to these topics. The popular press has not ignored the matter, particularly the literary weekly, *Literaturnaya gazeta*, which has carried many articles by well-known scholars and actively solicited the views of readers.

Attention has been focused mainly on the long-term implication of present fertility trends for the numbers of entrants into the work force. The tight labor supply which existed throughout most of the 1960s prompted increased study of demographic trends.

The concern over possible labor shortages is not unanimous: At least the demographer, A. Y. Kvasha of the Central Statistical Administration, has publicly expressed the view that a further rise in the birth rate may not be advantageous. "The optimal type of population reproduction in our nation," he says, ". . . can be considered to be 'slightly expanding' or close to stationary. . . . With this there will be an expanding labor force, including youth, and at the same time the size of demographic investments will not be extraordinarly high."

Kvasha also took note of differences in fertility in the various Soviet publics. He argued that "optimal" reproduction should be brought about by "stimulating fertility in areas where it is low and at the same time furthering the limitation of fertility in areas where it is very high."

Other demographers, however, and Soviet officials in general, are reserved about suggesting anything that might be interpreted as discrimination against ethnic minorities. They point out that fertility among these groups, while much higher than the average, has been declining along with that of the rest of the country. They argue that further urbanization, economic development and contact with increasing numbers of Slavs who migrate to the ethnic republics as development proceeds will stimulate further reductions in fertility without the need for specific policies.

They also point out that clashes between Slavic and non-Slavic groups have declined since the Stalin era, so that the growth of ethnic minorities and the relative decline in the number of Slavs is not looked on as threatening.

Regardless of the lack of an official position, however, a number of policies of the Soviet government have had an effect opposite to what is considered favorable: They have apparently discouraged fertility among the urbanized, Slavic population while having either no effect or a positive effect on the high fertility among the non-Slavic population. Among these policies are those concerning abortion, family allowances, women in the work force and urban housing.●
